K: Mr. Chairman, How are you?

S: I'm just fine how are you?

K: Just fine

S: I just want to take one minute of your time to see what you feel on the Kissinger-Mooré r matter.

K: Fine, but I hate to have it called the Kissinger-Moorer matter. It's not.....

S: Excuse me I just used it for ...to identify it. The newspapers have played it up that way, I suppose. We;ll have to talk to the Committee members about it more formally and I thought I ought to talk to you to see if you had any different situation on your mind. It may come up tomorrow at the Foreign Relations Committee. By the way I think Senator Fulbright, ...well, he doesn't think much of these allegations and all. But as a practical question about approaching this, I don't know whether the armed services committee...

K: Mr. Chairman, let me tell you my own personal view, just between you and me, looking at it from my own point of view I think the lousy thing is ...it was a lousy thing to have done but I don't think it warrants undermining the confidence in the military. That's my attitude, it has been my attitude all along. It shouldn't have been done, it shouldn't have been tolerated but I don't believe it was a 7 Days in May thing. I think it was sort of a cheap move to make a few points. I believe Moorer when he says he didn't focus on it. He had a lot of other things to do and given my relations with Moorer, he didn't need to do it....

S: But the practical thing is what are we going to do with it?

K: I have never seen the report David Young wrote. I don't know what the allegations are.

S: I haven't seen it either. I heard they had a report of it at the Pentagan too.

K: I haven't seen that either.

S: Well, I don't want to get into this plumbers group on this. I don't have any confidence in them.

K: My personal judgment without having read the Young report.... Young was on my staff and he did not inspire me...

S: Didn't what?

K: He did not inspire me with confidence that what he did do would be very serious or balanced. I would never have imagined he would be given a responsible assignment like investigating the military. As I have said publicly, I don't know about his investigations. That doesn't change the fact that he was doing it, or apparently, according to Krogh, was developing some damaging information. I mean, here was a kid who was not doing very well working for me, thrown into the Erlichman atmosphere. He may just have tried to prove how good he was.

S: I don't know if we have to go through all of that. They can make anything appear to be true almost.

K: That's the trouble. There's nobody I would rather have investiage this than you, Mr. Chairman.

S: Well, if we don't take some, if we don't do something. What do you think of this? I would ask you and Admiral Moorer to each, separately write me a letter undertaking to tell how you feel about this matter, say anything you want to. It might just be that it would settle it, or two, wemight be able to settle it by asking the two of you to come before the Committee and subject yourselves to questions.

K: Yes, the only problem, Mr. Chairman, is that my own direct knowledge of this matter is extremely limited. It really is confined to listening to 12-15 minutes of a taped interrogation of Admiral Wellander. I would be glad to say that and what I know.

S: I am thinking of the ...of your saying you have no grievance, what you just said to me.

K: I would be happy to do that, Mr. Chairman.

S: It might just be that our Committee would be convinced that you and Moorer worked together, had no grievance against one another officially or personally and he was getting information anyway, then so far as you and Moorer were concerned it might satisfy the Committee although whether we should insist on the military proceeding with reference to the yeoman, etc. ....

K: That would be up to you. I have never felt any purpose would be served by diggning up the matter now in a period when every other national institution is being questioned.

S: In keeping with what you told me in the beginning, we have got to move in some way.

K: I will be glad to writeyou a letter stating what I know, and stating whatever it was could not be based on personal animosity, that we worked closely together, it strikes me as a bureaucratic gamesmanship, and it would not affect the confidential relations between Moorer and me. We have worked closely together.

S: I think that would be splendid. It might just satisfy the membership. If not, if somebody insisted on the rifht to ask question, you could come over and we could ask the questions. I called you first. I think I'll call Moorer now.

K: You are free to tell him about our conversation, tell him what I propose to say in my letter...

S: We are not cooking up anything here that would be final.

K: I understand.

S: We have to take it step by step.

K: Of course.

S: Is the Foreign Relations open or not tomorrow?

K: Executive session. I thought I would ....the allegations, say I wasn't content with them and take the initiative and say what I know. I don't know if that would be appropriate. In your judgment....

said you

S: Well you know the New York Times can falsify one thing with another. I've seen what Percy asked you, I believe it was Percy.

K: He asked if I knew about burglaries or other illegalities. I answered in that connection.

S: I saw ...he showed me the question and answers. I think I would cover that by my own volition. I think Fulbright would welcome it. About the leter...

K: I will wait until you have talked to Moorer and then if you request it I will do it.

S: Should I call your secretary or call you back?

K: Either way.

S: All right. Bye.

R: The oil-producing countries.

K: Consuming.

R: Oil-consuming -- with, hopefully, one on the producers later. He seems to feel -- on what he bases this, I'm not certain -- that the conference is as good as dead.

K: Absolutely not.

R: Well, because it's so important, I need some guidance.

K: We have -- The meeting is scheduled for the 11th. We are working on a program for it which I think is really shaping into... For your information, Heath is sending his Cabinet Secretary over here to coordinate their position with ours. The only problem now is France -- they're going to be isolated.

R: Would that include the Belgians?

K: The Belgians will certainly come. It's a technical problem because they haven't got a Cabinet. But there is no doubt whatever that the Conference will take place. They're all sending senior delegations. The British are sending Lord Carrington and Lord Hume. Everyone is sending their Foreign Minister. I haven't seen any of the papers of the other countries. We are making a major effort in coming up with some challenging approaches.

R: No danger that the Japanese will buckle?

N: Hello.

K: Mr. President.

N: Henry, how are you. I was wondering if you got that document up yet.

K: I sent it up a couple of hours ago. It may be caught in the system, Mr. President. It's just one paragraph, but all the information in it is requested by the Saudis.

N: What we want to do is to get the damned embargo lifted, and we want to say the things that will not be put out -- you know the point -- to make it appear like a helluva foreign policy achievment of this Administration. If you hadn't worked out the Israeli-Egyptian thing, we wouldn't be here.

K: That's absolutely true. I don't mean

N: When they start that crap, I say except for Henry Kissinger we wouldn't even have a chance to have the embargo lifted.

K: It wasn't that. It was what we did for four years.

N: You're good to say that.

K: No, but it's true.

N: Thank God you had the guts to stand up and do the right thing. If I can announce it in a subtle way -- what do you think I should say?

K: You should read what I gave you, but you certainly can add a paragraph of your own. Incidentally, in foreign policy, it's the credibility.

N: But the main thing I should say is that as a result of the conversations we have had in the last 48 hours, etc., etc., that the embargo will be lifted.

K: That you can say.

N: Secondly, I will say, as a result, I can now announce with full confidence to the American people there will be no rationing.

N: That will be the good news of this speech -- just that -- that's all we need.

K: What you cannot say is about production restriction will also be lifted -- but the public won't understand that, so there's no point.

N: You and I know it took four years to do it. Where are you now?

K: I'm in my office.

N: My God -- it's so late.

K: State Department. I was in the White House in the morning. What I usually do is spend the mornings at the White House and the afternoons at the State Department.

N: We've taken care of all your needs now? Let's see. We've taken care of Gromyko. We've taken care of the Italian - in March. Nobody else you have to worry about at the moment?

K: No, Mr. President.

N: Thank God. I was just thinking -- when I talked to my old friend Bill, I'd have to go into great _____, but with you we all know what the game is -- you do what's necessary. No more.

K: Exactly, Mr. President.

N: These are necessary.

K: These are necessary.

N: Fine. I'll do them. Incidentally, if dinners are necessary, I'll do them, but I prefer for you to have them.

K: I don't think that's necessary.

N: Also -- have Ford do them. Ford could do Hussein for us. Basically, Gromyko doesn't need - he doesn't expect a dinner.

K: I'm going to have dinner with Gromyko at the Soviet Embassy.

N: With Gromyko, I see him. He never expects dinner. For all the others, use Ford -- he loves to do it. He has the place for it.

D: No.

K: Let's not argue now. If the Egyptians produce for you the number of prisoners -- not the names, but the number -- would you then be willing to make some sort of proposal and with the understanding that when the negotiations start you get the list and the Red Cross?

D: Some proposition to you?

K: Which we would then pass on through the Egyptians to the Syrians.

D: Of course, I will pass it to Israel, but I would tell you what I would suggest as a matter that would be acceptable, I think. If we can say, as I am trying for the last two days to sell my Government, and I did not succeed

K: I don't want to argue. I'm just filled with despair as a friend and admirer of Israel.

D: Mr. Secretary, I will tell you what I have in mind, but the important thing is what I was trying to get Israel to do -- that they would authorize me to tell you that we are prepared to

bring Dayan here - that you are authorized to inform the Syrians that Dayan would be coming with ~~exem~~ a complete proposal and talk ~~wth~~ with you. Once you give him the list, they should give you -- because Dayan is coming to receive the list. That is what my suggestion is. Which was not acceptable. I don't think it's games, but

K: What the Egyptians have said to me is that they think they might be able to get the number of prisoners -- a suggestion I made at Geneva.

D: You made it in Jerusalem.

K: In Geneva I discussed it with Eban and Everon (sp?).

D: I did not know that. This I will pass on.

K: I just would like to see the number. At least that gives you stability. Even if it's 10, it means that they cannot give you less than that.

D: Then for this number, what do we have to do -- pass to you the proposal?

K: We haven't been told at this point -- only a question of what you would do for the number. The Egyptians seem to be in despair about this themselves -- they're not trying to squeeze you. They've now said they think they can get the number -- what can we say to the Syrians?

D: Maybe we can say that for the moment we can have Dayan come here with a proposal and then before he presents it he will get a list -- maybe that can be worked out -- because, you see, the Prime Minister and Dayan did not want to come here not because they don't trust the Syrians but because they don't want to take the

K: Just a minute. That I understand. On the other hand, if they give you the number, that doesn't ease the mind of the people, but it gives a fl__.

D: I understand.

K: You at least can stop worrying about people getting murdered.

D: The question is how do we move on our part?

K: I'm just trying to find out what we can do to get the number. The Egyptians have said to me they think they can get the number, but obviously not -- they haven't said what you should do for the number.

D: Why don't I suggest to Israel

K: What they obviously seem to think -- will you give a proposal for the number -- because that's the context of the whole discussion -- how to get the negotiations started.

D: I am trying to think aloud.

K: How about the following -- and really, I have no authority to say this at all. Supposing we say to them Dayan comes over here and gives me the proposal. I will then certify that it is a rational proposal for discussion. If I say that, before I transmit it they have to give the list and permit Red Cross visits. You see what I mean?

D: Of course.

K: I don't pass it on.

D: Of course. Well, I'll pass this on.

K: But I don't know whether they'll accept that.

D: That I am pretty sure they will accept because I'm trying to make myself clear, Mr. Secretary, because I had long talks.

K: I understand your problem. Your problem is not to be in a position where you make a proposal, then they say "great" -- now make another one before you get the list. If they give me the number I give you the number, then you have gotten -- you've at least saved the lives of those whose number you have because they have to deliver them. Supposing Dayan comes over here, gives me the proposal -- not one like the Syrian -- which is a total insult

D: The Prime Minister did not even bring that up with the Cabinet. It would have leaked -- just too disgraceful.

K: You know, your information about my briefings is so accurate that I

D: Well, Symington has said a new romance has developed -- and he called me - Javits - to say if he heard you he has heard me.

K: Strategically, we are now in complete accord.

D: But I wanted so much to get across to you. We are not stubborn on this. But the prisoners will become pawns and hostages.

K: But now we have a little movement. Can you -- when you're not a Marxist, you can be very ingenious. Get your geniuses there -- seriously -- if you can get the number, you have something. I don't know whether I want to be in the position of passing on the merit. That worries me a bit.

D: Yes. May I correct it a bit and say this -- that you get the number, you pass us the number, then Dayan comes here, then he gives you the proposal but doesn't authorize you to transmit. Once he does it, before you pass it on, you get from the Syrians a promise for the Red Cross visits and then you pass them the proposal. What the people in Israel are afraid of is that once we will pass the proposal to you, then the Syrians will use our prisoners as a leverage on us.

K: I will have a proposal?

D: You will have a proposal which will bait them.

K: The only thing that I then require is that you make the _____ so that if I pass it on, I won't be totally discredited. Make it as serious

D: I think we will make a serious proposal, but it won't be anything like the Syrian proposal.

K: _____ limit of your endurance. I'm not even going to discuss the Syrian proposal. Not even a provision for a UNEF in Syria -- you need a UNEF. You couldn't have the Syrians within artillery range of the Galilee.

D: I tell you the truth. At this stage our concrete thinking on the matter -- because my Goverrmment doesn't even trust me.

K: I have a theory.

D: What?

K: My theory is that they don't have a proposal.

D: That could be -- but they will have. It may take about two weeks -- it won't be overnight. Well, we have to get the O.K. from the Government. I want to tell you the mood there is very very bad -- the families -- it's a Jewish state, let's face it.

K: Our families have been through this. This could now be transferred into some kind of movement.

D: I was thinking. You have added this element. I was vetoed on a ~~xxxxx~~ less liberal proposal. That Dayan would come -- that you would have the list in your possession -- and that was not accepted.

K: Maybe with a list at least they will not kill the people.

D: I will see. Mr. Secretary, I have two questions. What do they mean - the part about lifting the embargo?

K: That's the oil producers.

D: OPEC? Are there going to be conditions there?

K: We have already told them we won't accept additional conditions.

D: There there was so carefully the phrasing about 338 and 442. That was the 442 -- it did not exist in the agreement

K: This has been -- he's been wanting to do this for months.

D: Well, so long as it doesn't

K: I've tried to explain the situation to you. If I can keep control of the process because this -- I've always delivered what I said I would. You've got to keep me in charge of the process, and therefore I'm trying to avoid the consciousness of a stalemate penetrating throughout this government, and therefore I have keep this matter very close up to now.

D: The one item I - Misrafi

K: Misrafi and Levy -- they will be released when ~~when~~ your disengagement is....

D: As a matter of

K: I will raise it tomorrow.

D: You will let me know when you hear from them.

K: You can count on that.

W: This is Gerry Warren. Woodward and Bernstein are doing a long, rambling gossip piece for tomorrow saying that you and Haig tried unsuccessfully for six months to persuade the President to disassociate himself publicly from Haldeman, Ehrlichman and Colson in their legal defense. They say they have notes from John Andrews, the former speech-writer.

K: Well, I can't speak for Haig, but I can tell you I never discussed this matter with the President at all.

W: They're quoting comments from John Andrews.

K: John Andrews is a GD horse's ass. The only time I ever talked to John Andrews is when -- he called me once and said that -- before Haldeman and Ehrlichman were fired, or left -- was he wept on my shoulders about the misery of the situation. That is all.

W: He has notes which Woodward says he gave to them of a meeting that you attended on July 27 -- after Haldeman and Ehrlichman left -- in which you recommended that the President say in his August 15 speech that he had cleaned out the old people and gotten rid of them and that "I'm responsible for a climate of excessive warfare in the White House."

K: My problem is -- I consider that highly unlikely, but, you know, I don't have notes of every meeting I attend.

W: I understand. That's the one mention of you. The thrust of the story

K: I just don't remember that Andrews was at any meeting I ever attended, but I don't want to say that because you know these guys wandered in and out. What do you want me to do?

W: I don't know.

K: The only way I could have been involved at all WX -- was that in Camp David?

W: He did not say.

K: It was during that week I was at one or two meetings. I did not have anything basically to do with these discussions.

W: A week at Camp David?

K: I was once up at Camp David for a day in which I was supposed to see the President and, in any event, saw him only for a half hour on foreign policy matters. July 27 I don't remember, frankly. But it is totally incorrect to say that I for six months attempted to do something because I essentially was out of these discussions. I may have been once called in to express a view, but the phrase that I did it for six months is certainly incorrect. But Haig would know this better than I.

W: Haig says this has never been his position.

K: This question was never put to me that way. But let me think about it and call you back.

K: I don't know what State Department people are saying. I don't know who's talking to New York Times. I haven't.

G: Hav e you seen the ....

K: I will tell you now on this and I am happy to be quoted, the New York Times and the Washington Post have been decent and fair to me. I have no feeling whatever that the Washington Post is out to get me, Not only have they, within the limits of journalistic ethics, ...they have done their best not to get me. If you got evidence that would destroy me you would print it because of journalistc ethics. I've been annoyed by Sy Hersch items, but that's not the New York Times, that's Sy Hersh. I think we have a good adversary relationship that is necessary between the press and high officials. The problem is that you get these kids making statements who, to whomsitting in at a meeting is the greatest event in their lives while senior people are handling 30 things a day and never focus on the little things. The thing is those leaks weren't even NSC papers, they were DOD meetings, ...

G: Anyway that word is a strange one if we were accusing you of perjury, if we were going to accuse you we would find a better way than that.

K: What's so maddening about it is that if anyone was the victime it was me. It was certainly not a friendly action.

G: Henry, I think....

K: And the JCS was treated better than anyone else, really.

G: I don't know what your travel plans are but I would like to get together for another chat if we can, I think we are about due. I want to convey to you too that I am nct at all injured by what you say to Katherine.

K: Frankly, I don't remember when I did talk to Kay about an editorial.

G: You did, you told herein effect, and she was marvelous about it, and said would I call you. I did.

K: I forget what it was about.

G: It was in the middle of the war, you said we had been unfair.

K: On the whole thing I think our relationship during the war was one of respect. I gave up on the New York Times, but I read yours. every day.

G: By the way I was very shocked the other day to have Ellsworth Bunker call and say a recent editorial was the best on the subject he had ever read. I love Ellsworth but I don't think we were that close together. Can I talk to you one of these days.

K: Right. Let's have breakfast or lunch in the next two weeks.

L: I talked to Lipsitz. He apparently had checked out various things about his report with her, including this business about "stalling" was the word Berger used. I called her back and she asked me whether I had talked to you and I said no I talked to Lipsitz and he was very upset about it and particularly about a couple of items and I said it seemd to me to be the reverse of the sense of the meeting. The business about delaying by going to Russia when the sense of the meeting was just the reverse of the feeling of some members of the group. I said Kissinger could have given the Israelis more time, but the matter was not in his hands, there was a Resolution in the UN, etc. etc., and I think this is a particularly pernicious one, knowing he is going into negotiations with Syria is it particularly bad if confidence is shaken. Expecially Syria should not be under attack from other Arab countries now and if there is any way we can.....You know, I know it was Lipset's report, as a matter of fact he sent it to me but I never even opened it, I had been at the meeting and Marty is very long winded, he goes on and on and....

K: Why did Marty do it?

L: I think its just the way he works. He doesn't go to any gmeeting without writing it down. What hadn't occurred to me was that he would circulate it outside the group. Anyway she said she had discussed it and it was most unfortunate...I mean if he tells each side, each side can negotiate for peace, the war had not worked out well for them, and if they do something separately for Israel, well it would be a great mistake, it could be pulled out of context and...

K: She's actually a very nice girl.

L: She said she had talked to Henry Kissinger and he wouldn't have talked to me if he didn't have some confidence in me, it's most unfortunate, she said she understood and I think I gave her something serious to think about.

K: Can you explain to me what the Europeans want at this point? I don't understand the Gaulists. They are going to be out of reserves in six months.

V: You don't ask someone in the process of committing suicide.

K: I read every day in the European press how my policies are disadvantageous to them .

V: But you don't read the serious European press. Le Monde is not serious press. You would see they really say the Europeans are absolutely crazy.

K: I just saw a long article in the Financial Times.

V: The British are beyond repair. All that is left is the Germans. The only real question which is still left is whether some kind of arrangement is possible between the U.S., Germany, the Scandanavian countries and Benelux. There is still hope for the Germans, Helmudt Schmidt is after all one of the few level headed people left.

S: That's the number that appears in the studies. Don't want to MIRV more than 60 at SS18 level. But they could do a hell of a lot more 16s ____if they devoted all their thro-weight to those, but that's ....

K: They say they would have only a lot of small warheads left. Also, its their judgment they are now ahead of us in MIRV technology.

S: I'm inclined to doubt that. They don't have the technology. If they MIRV SS16s they can have as many as we have, the 16s...

K: Yeah. But what do I do next? I can't participate anymore.

A: I think we have to establish credibility. I would say that if the 14th comes and goes and the embargo is not lifted, that we then let it be seen that we're going to stand back for a while. I don't think this will disrupt the Egyptian-Israeli disengagement. It seems to me that they both have an interest that's got its own momentum now. The Syrians really have no choice but to stew in their juice a bit.

K: Okay.

A: I think Akins has got all the arguments he needs, Mr. Secretary --

K: But should we do a letter to Boumedienne?

A: Well, my recollection is that the last word was that he was not going to be a problem providing he didn't have to take the lead.

K: Yeah, but here is a case --

A: He won't get out in front I don't think.

K: But there is a cable that claims that he is supporting the Syrians.

A: Ah, that I haven't seen.

K: Yeah.

A: That I haven't seen.

K: That Asad called him, in the presence of a Saudi. Why don't we do a letter to Boumediene saying that we are near a fateful decision and we just want him to know what the consequences are, that he has my commitment; that we've kept every other promise, we'll keep this.

A: No, I see no harm and it might just help. We've certainly touched base with everybody else.

K: Okay.

A: All right, sir. Thank you.

D: 73,000? That's also good news. I think we have demobilized 40,000 so far. We are in the process of doing some more.

K: The Saudis are running a major campaign here on the Syrian business, and you know how that will reach the President sooner or later.

D: I heard of some of this campaign. I have cabled the Prime Minister of our conversation, Mr. Secretary. I did not get any reaction today at all from Israel.

K: My honest opinion -- our intelligence indicates that Sadat is in some trouble with his army. My judgment is that if Sadat falls, you're losing the best chance to get peace that you've ever had. Compared to that, the mistakes after 67 would be minor, and I believe that progress in Syria is a step in that direction.

Ambassador Keating has presented a proposal of two stages -- first, getting the list, and then getting the visits of the Red Cross.

K: I must tell you as a friend -- when the President _____ with this, you will get under massive

D: I hope that when the President is made privy to it that he is at the same time getting the right explanation from you.

K: Do you think I'm eager to get a confrontation?

D: I know -- but there are other people who are. In the State of the Union he was careful to avoid your name when he said he got promises from the Arab leaders. Now he can't kid you about misleading him. In addition, I think the President did have some direct communication with Faisal. Then he owes nothing to him for the embarrassment.

E: Hopefully you can set the stage for Mexico City, hopefully, you

K: Mexico City, I can do after the energy conference

E: Hopefully you can put the energy conference in context, so that they don't expect the goddamn world to come out of it; that is my biggest concern. That you are going to be blamed if it doesn't come out with great glowing success--that is the thing I'm concerned about that I would hope you would do--
I admit there are dangers. My biggest concern is the press is going look for a defeat out

K: The press is going to look for a defeat out of this conference, no matter what we do

E: I know that--but I am saying to the extent you can cool that in advance--
The other answer is the backgrounder on the energy conference--maybe that will do it.

K: I just think that they will get into tapping again--the Radford case --they are going to get into blackmail

E: On energy, you mean

K: Well on the embargo--why the President said what he did.

E: I thought about it last night--I think it is a close call either way and if you think they are going to get into Radford--then I guess --I'm concerne about the conference--that is my biggest concern--maybe a backgrounder would handle it then.
But I think something needs to be done before that--conf.....[end tape]

K: I take it Joe isn't in yet

A: I think he is having snow problems--he called and is on his way

K: Right, where do we stand--have we heard from any of our various clients?

A: You have a reply in this a.m. from Boumediene

K: That I have seen--that was last night--
It seemed fairly conciliatory

A: I got some thoughts sir, how you might go back on this--which I am just dictating and we'll get up to you

K: Because that seemed to me to say anything the Syrians do is okay with us.

A: That's right. I think it would be useful to tell we got a proposal with Assad

K: Haven't we done that already?

A: Not with Boumediene
This would be a good opening to go back to him and pick that up, and we also ought to tell him--because he mentioned we caused problem by setting the date that we didn't set the date--we were told about an urgent meeting and that it was on that basis--

K: The think to tell him is we were given firm assurances that it would be done immediately after the disengagement agreement was signed so that the Fb. 14 date was an outside date which we were given--

A: That is the point we ought to make to him
But I've seen nothing in from any of the others since Jim's long report about his talk with Faisal. Saqqaf is in Damascus, as they told us he would

K: I Think they are going to yeild.

A: Today I am a little more hopeful.

But that would give it to us for sure next month. I'm serious.

K: Do we see any chance of my having a press conference today?

A: The only thing if you do sir, you will get a lot of questions about the luncheon comment the other day

K: I understandyou all had heart attacks

A: [laughs] Not exactly,

K: I think it does good

A: My question is whether --just the use of the word blackmail when we are trying to work on the quiet side with the Saudis and Faisal, gives an emotional and as you said romantic attitude

K: a But they are also pretty rough customers and they have to know we are taking it seriously

A: I think they got that message very clearly--the problem is giving them public challege, which they sometimes act preversely to

K: So far no one has peeped about--

A: No--you haven't had any feedback at all

K: I would like you to do a long message to Fahmi about the Soviet conversation

A: What should I tell him

K: Although there isn't a hell of a lot to say--say Gromyko complained--first of all I want to assure him that no matter what they may say to him, that we took the full responsibility for this diplomacy that we did not blame it on Egypt or on Fahmi personally.
Secondly, that what the Soviet's wanted from us is a veto over all our Middle East actions, prior notification of everything we were going to do xxxx in joint agreement. This we couldn't--just embellish it a bit and that wehad sabotaged the Geneva conference and also they wanted to be present at all meetings. I made the point what started out as a device to make it easier for Arabs and Israelis to talk, now became a US unilateral--a way by which we imposed ourselves. Then he insisted that we and the Soviets give a joint guarantee even if the parties didn't want it. Which I also refused. What I did agree was that we would coordinate our actions the word special role wasin there because they wanted us to use auspicious and co-chairmanship which we didn't want to mention --that there is no agreement and what I propose is that before either the Egyptians or we tell the Soviets anything, we agree what we are telling them, and call that coordination. See what I mean?

A: Yes.

K: But phrase it delicately, in case they show it to the Soviets.

A: Okay.
One question, sir, what you say the Soviets want a joint guarantee--was this in reference to after a settlement

K: Yes.
But they made it clear they wanted that guarantee whatever the parties thought.

A: Okay, I have that

K: And you might as well tell them that what--we have been in touch with Boumediene and give them a summary of that.

A: We will do that--

K: Can I have it this a.m.?

A: Yes, I'll do it right away.

K: I wonder -- and I say this as a friend. The dislike of this Administration is so great among the Establishment people, are they going to back us up?

M: Some ot the Establishment -- there's a growing resentment against the French attitude, and I wouldn't think you'd have a backlash from that area.

K: Let me give you an example. First of all, at the NATO meeting, I wanted to meet with the Foreign Ministers of the Nine. It XX took three weeks of negotiation for a half-hour meeting. Unbelievable. But

the next week at the European Summit four Arab oil Foreign Ministers showed up and were received like royalty. Now the Europeans _____ have a political directors meeting today and they have a political adjunct to this economic deal which they're going to vote on next Thursday at the Foreign Ministers' meeting of the Nine. _____ meeting is almost insulting. They have finally given Scheel the authority to brief me on this -- on Sunday, which is too late. Almost an adversarial relationship.

K: Well, it may be naiive, but it's exactly -- it's what I've been coming to.

M: I think we're at a very critical point because this can develop into a serious -- more serious thing -- if you don't confront it now.

K: That's what I feel. The reason I called you this morning is that _____ because I had come to the conclusion which you expressed in your memo, but I didn't want to get down

M: You can handle that perfectly well. The sentiment in Europe is that they're looking to the United States for reassertion of its leadership, and they do have a recognition of past history. But they got panicky over this last affair -- the energy affair -- and panicky over the French attitude. In everything you get out of Europe, the lowest common denominator is hostility.

K: And with provocation.

M: This is silly. I think you've got to remind them gently of past history. We've bailed them out a couple of times.

K: I'm thinking of saying to Jobert on Sunday night -- if he turns this into a confrontation, we will _____ hostility to France.

K: Hal, where are you

S: I'm just in the office

K: I see. Now I was sent the EC Nine draft communique. Would it overstrain the department to make an analysis of it for me?

S: I didn't know that you got it. We sent them ours yesterday. To Soames . We will go to work right away, I didn't know we had it.

K: Can youse e to it that when something like that comes it, they would give me the courtesy of analysis automatically.

S: I didn't know--Did you read my message last night that we sent to the plane

K: About whom I should see?
And also that we have to put the arm on them. What does putting the arm on them mean?

S: We only discovered late night before last that they commission/was drafting a communique, so yesterday I got--our draft sent to Soames to tell him we don't want a confrontration, we expect them to exercise influence on the community drafting exercise.
Now that obviously has been too late. But I think from the way the British and Germans are talking that we have had here, and we are going to have a very rough time.

K: On what particular issue

S: The big issue comes down to the question of what kind of machinery follows --the whole tendency is to throw this into the OECD and humor us at most with saying something like--it isn't excluded and and there might be another meeting of this group, or something like that. So the question of the follow-on machinery to the conference or followion activity-=

K: What is their picture, why?

S: Their picture is that they are scared of the French. This is why I said in the message last night to you that we don't know whether they would risk a break with the French, but they certainly won't try unless confronted with a break with us.

K: What is the break with us?

UNITED STATES DEPARTMENT OF STATE
REVIEW AUTHORITY: ROBERT H MILLER
DATE/CASE ID: 17 MAY 2004 200102979

K: What is the break with us?

S: The break with us, I think, is to tell them look, if you don't want to--[end tape]

S: [begin tape]I think we have to talk about it more coherently, but I think that is where the issue comes--and you can probably get some generalities in the communique on general philosophy that is in there--but the _____ part, paragraph 15 or 20, I guess, in our draft communique--

K: I've read it, it is a good communique--

S: Is where the reall~~y~~ kicker comes and as far as I can tell you--... Sheel(?) you are really going to have to talk turkey with him and tell him if necessar to convene a caucus of his nine and tell them to change their position. Actually I think the mandate can be stretched not to be incompatible with the idea of some specific work after this conference , with another ministerial conference

K: Do you think I should have a press conference today?

S: Well

K: What do I say, if I state our goals too ambitiously, it will be a defeat If I don't state them ambitiously, then the Europeans will weasel off off it .

S: You stated them at the Harvard/Yale/Princeton thing the other day

K: And why do I have to state it again?

S: You don't have to. I think if ~~o~~you could avoid a press conference on other grounds today, I think there is nothing to be gai ned in any further public statement.

K: That is what I think. Have we sent my comment around.

S: To the Harvard thing

K: Have we told them to give it to the host or have we just done it for the edification of the goddamn ambassadors? Have we told them to give it to the host

S: I will have to look at the telegram--I can't honestly tell you.

K: My recollection is that we told them this is for them to draw on. Why that was done, I don't understand.

S: That is the why the State Department does things.

K: I am now in charge of the State Department, Hal, and for whatever limited time I may be there, but it is going to work the way I want it--

S: Sure, and I spend my entire day chasing down these things and telling people how to do it--it was incredible to get this damn communique sent to Soames yesterday--it took me half a day to get the damn thing out.
I'll have to dig the telegram out and see what we sent them. I can't see any benefit in your saying anything further publicly.

K: That is why I am afraid of. Because if I say very ambitious goals, then it will be a failure.
If I say very unambitious goals, then all the Europeans will shout hurray

S: I think it has to be done privately.

K: Now what is the business of the Brezhnev letter on EEO, did we get one too?

S: We didn't get a letter-we got on the 7th of Jan, an oral note which

K: But it is amazing that those sons-of-bitches will not even discuss that sortof thing in NATO anymore.

S: Evidentally the British, Germans and French got the same sort of thing --but now we have to dig ourselves out of that whole by -- did you see the telegram I drafted?

K: No.

S: There is a telegram that tells Rumsfeld to say that we did some time ago that we did get a routine oral note restating the Soviet position which didn't call for a response and we didn't respond to it, and anyway it is overtaken by your conversation with Gromyko on which we fully briefed them and which they were deliriously happy with. I think we have to do that to protect ourselves. Let me ask you--the Secretary Morton and others are interested in doing so work with the Poles on coal? classification and they want the Polish minister in charge of that over here. I've held the thing up until I had a chance to talk to you and see whether you ever gave the Soviets an oral reply to their oral note on energy --

K: Yeh, I talked to them, they are willing to talk them.

S: If he has donethat, I think we can go ahead with the Poles. I wasn't going to let it out of here, until I was clear that we had done something the Soviets. So we wouldn't offend them by going ahead with the Poles and not with them.

K: Yeh

S: So we will move on that.
Well I guess I better get this social schedule of yours started up, if you have approved it.

K: Yeh, it is all right.

S: We will make those calls and get these people lined up

K: Where do we have breakfast--State Department?

S: I think so.

K: Who sits in?

S: It is up to you. The meeting starts at 10:00

K: No, I'm not talking about that--who sits in?

S: I think it probably out to be Donaldson and

K: You better sit in with the Europeans

S: And myself and Hartman and then some people may have to leave

K: We' are talking about Sunday

S: But the pre-meeting starts at 10:00 on Sunday

K: Oh I see.

S: It is important to get Sheel beforehand?

K: Then let us meet at 8:30

S: I'll try , he is coming in very late

K: No, then let's do it 9:00 (?)

S: We gave P___le told the communique alsoand/them we expected the Germans to see to it that --

K: There is no way to give it to Soames without it's leaking to everybody

S: We didn't give the text to Soames--we told our guy to talk to him from it and give the points of it. And since Greenwald had left already for Washington, I called Rumsfeld and told him to tell Soames we are really serious about this--that it comes from you and we expect him to be helpful.

K: I'm coming over and would like to meet with you, Hartman and McCloskey.

S: Yeh

K: And I think we have to decide what our policy is with the Europeans. If they are going to do to us in this what they are doing in the Atlantic declarations, and I have every reason to believe they are, we better reconsider--

S: The question is how far we want to push it with the French

K: Let's not say it is the French, because the others are getting all the benefits of the French, plus the benefits of cowardice.

S: I understand that, but on the other hand, I think some of them would be willing to move more than they are

K: Why don't they move individually

S: Because they are committed to the community and they are scared to risk that, and I don't understand the French--I don't understand the French and I think if you can get over your quiet infatuation with Jobert, I think you ought to get him in and really read him the riot act. Tell him he has jeopardized the military stuff, we have spent five years, trying to get great sacrifice here within the government to straighten out our relations with the French --we have gone a long way with them and this just pulls the rug out.

K: When do I do it--before the conference?

S: No afterwards. Or some time during--it doesn't make all that difference because it is a pretty basic massage --and tell them there are so many babies you can throw off the sled to feed to domestic politics

K: Why don't I see him for 5 minutes before the conference and put him --

S: I'd have to find out when he is arriving actually--but I think you ought to take him in your back room

K: And tell him I want to tell him formally that we are ready to have a public confrontation with the French and that we are ready to end all oooperation and make every forum a contest between them and us and let's see where that leaves us.

S: Well, let me get to work on some of these things

K: I'll be in and I'd like to meet with you and Hartman and McCloskey

S: Okay.

K: I had a word with Nelson about it the other day. He checked one view he had and--

R: How do you feel about that?

K: David, you know my affection for the family and for you. It is a somewhat precarious position, if I can be ohonest with you. From the national point of view, you would of course be a tremendous asset, but you'd be out on your own.

R: No doubt about that.

K: I wouldn't pay the slightest attention to what promises you are given when the shooting starts, you are going to be there all by yourself.

R: I'm sureof that.

K: Now that has advantages and liabilities, but it is a precarious position. In a funny way--that is not now possible, because you can't work with me ~~ok~~ having been offered this other thing.

R: Of course I

K: It would have been a safer relationship for both of us, because foreign affairs is still lightly insulated

R: Right, but in a way, it is conceivable that--

K: You and I would work closely together anyway.

R: I n some respects--I might be able to do--

K: You could do more and better.

R: But there--

K: Because you have a much power base.

R: That is right.

K: My basic view I think would be that the country is in such bad shape, and you can't really be diminished by stepping into a crisis, if it doesn't work it can't be a reflection on your and so much needs to be done that can only be done by senior cabinet officers that on balance I think you'd be performing a service by doing it.

R: So you feel I should. Do you feel that this constitutes a problem for Nelson

K: No, I don't see why.

R: I think it could prove--

K: I don't see why it could be a liability.

R: The things one has to do at this time are not going to be popular

K: But David, I think the man who has the guts to walk alone and do what is right, is going sweep the country. I think the worse mistake any politican can make right now is to try to do what is popular. Look at Jackson whom I don't even particularly respect, but whatever position he had is due to the fact that he stood for things that turned out to be plausible at least if not right, and I think that what the country wants is a man who is willing to look at the future and willing to take it there --they are going to be so sick and tired of all these machinations after 4 years of Vietnam and what will certainly now be four years of Watergate--that they will want integrity and direction--I don't see what you could do that could hurt.

R: I think I certainly will get attacked

K: Of course you'd be attacked--but I think that will even make you visible and if you go your way it will be humane and right and if necessary difficult. And of course, as far as I'm concerned, I would consider that you and I would be working in close--

R I have to say to you Henry that that is one of the major factors that makes me feel that I should do it.

K: I mean we could have a partnership between Treasury and State]end tape]

]begin tape]

K: ...those Treasury people--we've never had a Secretary of Treasury who had your international understanding--Doug Dillon (?) not since Doug Dillon--he would be in the same class.

R: Right. Henry, this was very helpful. The trip I must say was sensational from my point of view-

K: You saw Sadat

R: Had a marvelous visit with him--there are quite a lot of specific things and therefore in that particular part--if Joe Sisco or someone could come alone--because there may be some things you want to follow up on.

K: Well could we have private talk first--and then have Joe join us about 8:30

R: Good, could you do that, because the other part I just don't want you to have to worry about--there are number of little things that should be fairly important

K: Another thing I want to talk to you about--you know that all say you are the chairman of the establishment, it may not be exactly true, but that you are the chairman of the trilateral commission

R [laughs]

K: I really think we must take a look at our relation with ~~us~~ Europe. We are now seeing on the energy issue exactly as we did on the Atlantic declaration and nobody can say we are not consulting with them that we are not cooperating--we are offering them things for nothing. We want nothing from them except cooperative efforts.

R: I really think this may be one area where I could be helpful.

K: I tell you if this conference next week goes the way ~~Defense~~ the French are trying to steer it, and the other 8 have again caved to the French, then we have to reassess our policy. We cannot go on this way.

R: I am very disturbed by it.

K: Because in the energy field, we want nothing from them, except not to pursue ~~beggar~~ thy neighbor policies. They can do next to nothing for us. If the French bought all the oil that they need at present prices that wouldn't cut into our needs and they would be bankrupt in 15 months so there isn't anything that bothers us, but we would then be in 1947 after 25 years of effort.

R: I just cannot imagine why they are doing it. One reason I wantedto call you was that I saw Walter Levy at the Council and he is apparently working with Bill Donaldson--will be down there--he is not happy that the papers are being prepared and I thought you should know he is concerne about our position.

K: Our position is too soft in his view.

R: You might want to talk with him--he is really good.

K: He is outstanding--

R: He told me he was really rather unhappy with what was coming out--

K: Okay, let me talk to him today--

R: I think if you have a chance--at least fo find out the nature of his concern

K: Well let's have breakfast then on Thursday--we will talk about your personal plans first. How firm do you think that offer was? I've heard that George is staying until May 1

R: That's right. And I don't know whether that is--I assume this was an offer --I haven't seen the President

K: Not many people do

R: Obviously I'm not going to accept unless I talk with the President and he gives me the same coordinating authority that George has. I don't care about the ~~physical~~ assistant position, but I do care about coordinating

K: You can't get the coordinating authority unless you get the assistant positio I think you ought to get them both.

R: Coordinating for it is essential

K: It is ~~easy~~ easier to coordinate as assistant that as Cabinet member

R" Maybe that is so

K: It is impossible as cabinet member, no one will take your authority, believe me.

R: I see. Marshall Br_____ feels it is the other way

K: I know, but he is ~~wrong~~ wrong, he recommended that to me too and he was wrong.

R: I think in whatever way that is essential

K: The reason is I couldn't get to first base with Defense if there were another system. The fact that I am Secretary of State would get me nothing from Defense or CIA.

R: I think that I better--have you discussed with Al Haig since I saw him?

K: No, but I will this weekend

R: If you have a chance--you may be could find out--if there is a change

K: I have no reason to suppose there is a change--

R: If you could--he said he did not discuss with the presidnt the question of coordination and from my point of view that is really a must.

K: I agree completely. R: Thank you, Henry, and I'll see you Thurs. K: Goo

K: Bob, not being able to reach you, I've made a decision. I'm not going to give a press conference, because if I set very high goals, if we don't reach them, it will be a failure. If I say low goals, the Europeans would say hurray, we agree completely and then it will be a success xx in publicity and a failure in substance; what I think we can do is to have Sonnenfeldt give a backgrounder this pm. He's the only one who understands my thinking well enough to do it.

M: Sonnenfeldt? Where is that going to leave Donaldson.

K: He can sit in. I'm not in the business of making people feel good --I'm in the business of getting policy made.

M Hm huh.

K: Donaldson hasn't got the guts to stand before these guys, nor does he understand the political strategy. But you can think about it--I'll be in in 15 minutes

M Do you want me to hold on to my comments on your speech until you get here?

K: Yeh, I want that speech changed too.

M Hm huh

K: Although it is getting there, do you think?

M Conceptually, I think it is right on. I think they things they suggest are important. I don't think you can set for example a 90-day deadline in your opening remakrs for a task force. I think you have to say you proposed--

K: There are a lot of things like that which have to be changed

M: And I think--

K: But also the conceptual approach has to be done a little differently --but the body of it is in pretty good shape.

M: Okay, mine are here when you come over.

K: I will call you later.

M: I had a cala the other day from Shep Stone.

K: A good man. A fine man.

M: He is bubbling over because he has been bustling around the European scene. He says he has a lot of dope. He spent time in Bonn and in London and it is all sort of preparatory to the Feb. 11 business. I am having lunch with him today. He sent me a long letter. He says he has a lot of under-cover chatter he has heard from the second and third rounds of the Foreign Offices as to what the European attitude should be towards this thing. He says they are also in shambles. It is in ruins there -- the United Europe business. I might pick up something.

K: The basic problem we are having is that the French are doing in the energy field what they did in the Atlantic Declaration and everything else. This time no one can say we did not consult. No one can say we were not generous. We want nothing from them but the same as in the Marshall Plan -- cooperation on the structure. We are reaching the point now where we feel if it does not work we will have to take on the French in an all out confrontation. It will hurt the Community. We cannot have the Community organized against us as an anti-American

*1

M: That is what it is becoming. They take the least common denominator which is the French attitude.

K: They tell us we are sorry; we love you but we have to go with the French. We don't care if they love us or not if they have to go with the French what good does that do us. I cannot tell you on the phone but they are pursuing a more active anti-US policy in the Middle East than the Russians.

M: I gather that is right.

K: That is absurd. Before we do anything like this, I would like to talk to you.

M: Right.

K: Let's talk this afternoon.

M: You give me a ring this afternoon.

K: If I don't call you by 4:30, will you call me?

(Missed the first part)

B: He acts as a kind of financial advisor to the oil companies. He said he had talked with you of what was really on his mind. He asked me to get in touch with you. The general theme was a deep speech on the position of the Algerians and other Arabs on a better way of dealing with Faisel and Sadat. They were very resentful of the Europeans and that of the press, that Faisel and Sadat and the Algerians felt a kind of protector of the weakest of the countries, therefore we feel ___as acting on the embargo and the meting on the 14thth. Don't know positively what is going to come out. It looks like no positive action would be taken on the 14th or not until the second meeting on the 24th. He felt if in the meantime there had been no angry response or from the U.S. following ___the 14th changes had been made Syrian disengagement it was likely there would be an announcement coming out of the meeting on the 24th. He wanted to convey to you they were unhappy with the situation. That they felt you said a number of countries felt it disastrous rather than beneficial. That they could see why the Europeans themselves hoped they got something out of it themselves.

K: They'll say that after the Syrian one too.

B: I'm just passing this on without comment.

K: They told us exactly what you said. For two months I told them that the U.S. cannot act under pressure. He said to me this is ___we must be given something anything at all - just one kilometer__Israel would want anyway. We need the ___and we wish the embargo were being lifted. Nobody even mentioned the Syrian problem to us. In the past we felt very strongly. We, frankly, will not be able to announce plans for lifting the embargo. They were convinced, both Sadat and Faisel that the embargo would be lifted___anything ___ of Egyptian disengagement.

B: When I saw Sadat in Jidda he told me exactly that.

K: We were told on January 22 that it would be lifted the next day.

B: I met with Sadat the day before, and I got a totally different answer.

K: Then they said can we wait until the 14th and we said OK. The next thing I know is now they say the Syrian business is the major problem___going to start blackmailing us. I know you're not___it. I just wanted to explain to you why we're going to be difficult to deal with.

K: I appreciate it. He didn't make it that clear. Nothing can happen before the 24th. It won't be final.

B: The main thing was I think, he felt - his opinion to me was that it would create great problems. The Algerian was not in a position of having any particular line that somebody go along__they could deal with the U.S. ___obviously a good deal of resentment.

K: That I can't argue with. They're making this statement announcing they're having a summit on the 14th, the day before the oil conference. It may work out better.

B: The key of the thing in the Algerian point of view is they're _____.

K: That I believe would be serious. I think the Syrians are becoming more rational and our major problem for the next several days ___we'll have it. No doubt you'll prove it was our fault.

B: They no pay me Henry.

procedure proposal and I have refused to transmit it to the Israelis until the embargo is lifted. I have told the Israelis informally. It is not an Israeli proposal. It is my compromise between the Israeli position and the insane Syrian position. It is so complicated that it is essentially crooked but each can claim -- there are about seven steps that have to be taken in a 72 hour period before the negotiations start but each can claim he has backed the other one down.

H: That can give lip service to the conditions for the embargo.

K: Now that the Syrians have accepted it and now that I have refused to do it until the embargo is lifted I think this will give them the vehicle.

H: Great.

K: Did you see the Evans-Novak column today. Is it true -- did the President have an emissary there?

H: Hell, no. I don't know where that came from. It is not right as you know. You know all that I know.

K: I don't exclude that he sent someone there.

H: If he did, he did not tell me. It is inconceivable.

K: It is inconceivable that I would not have picked it up somewhere along the line. Makes no difference. It looks like it will be lifted. Sadat has called a mini-summit of the Arabs for Wednesday prior to the oil meeting on Thursday.

H: Good.

K: Even Yahmani has said it is going to be lifted.

H: That is good.

K: It proves that the only thing these guys understand is toughness. When we were sucking around them, they kicked us in the teeth.

H: I think that is right.

K: You will tell this to our leader.

H: Yes I will be seeing him in a few minutes.

K: Tell him to stay steady. Be concilliatory but not groveling but not to believe the bullshit about the great cooperation they are extending.

H: O.K. You will be here tonight.

K: Yes. I will try to see him for a few minutes.

H: Good, Henry.

K: ____and some horses ass in the White House sent a message that there is to be no response to the President's speech tonight. Now, the Europeans have the President of the European Council of Ministers there who failed and he prepared a response. They say they don't want to pick the guy. The Europeans have already picked a guy and so has the conference.

S: I don't know where that information comes from. But the President does not intend to give a toast.

K: But he's going to say something.

S: Well, he's going to - yes he's going to say something.

K: Well let him wind it up with a toast and somebody's got to response for Christ's sake.

S: Al just came down and said the President does not want to have a toast.

K: Well go back to Al and tell him for Christ's sake they're all going to go back and consider it an insult. If somebody's can't reply for them.

S: You mean whether or not it's a toast.

K: Look, all he's got to do is to toast cooperation or friendship or something.

S: I already sent him a proposed toast to do that toast to the succes of the conference and the end of his remarks. And Al just came back down and said the President decided he doesn't want a toast, he's going to finish his remarks and say let's go have coffee. I didn't know you were interested. I'll go back to him.

K: I wasn't interested until Scheel came to mee all excited.

S: OK, well let me see if I can.....

K: It just isn't worth it - do you think it's worth it?

S: No. Let me see if I can turn it around.

K: If not, let me know. You know it's not the worse thing either. But any other problem?

K; Mr. President.

N: Hi, how are you, Henry.

K: I just want to bring you up to date on how that conference went.

N: Yes. Fine.

K: I gave the talk and Simon gave a very good talk. We just laid out the problem. Then Ohira, everybody gave talks supporting our position. Ohira was excellent. Schmidt spoke for Germany because Scheel had represented the European community. Schmidt was superlative, and if you have a chance to say something to him tonight you might mention that. Home was pretty good. Good you could say. And he was supported, well to make a long story short, everybody was good. Except Jobert, who was a bastard. He made a really vicious speech, in fact people were groaning, misquoting your State of the Union Address, quoting democratic Senators as to how bad our policy is, it was awful.

N: Yes. We'll just ignore that.

K: I think we should ignore it tonight. Where we will be tomorrow now is simply this; if the other eight Europeans stand up to Jobert we can have a good communique, if they don't stand up to him then I should think we should say the hell with it and that we met and we had a nice meeting. I don't think we should fake a great success because the Saudis have now come to us and offered us bilateral deals and we shouldn't bind ourselves so we can't get them to work with us. Incidentally I hardly dare tell you but we have ____ assurance.

N: Al told me, I got that.

K: And also the Egyptians are going to announce that restoration of diplomatic relations with us shortly after that.

N: That's good, well, I just hope the Europeans will stand up to this fellow, but who knows.

K: Well if he dies, everyone thinks that Giscard is staying on as one of his possible successors. He would be much more cooperative.

N: Will the people stay?

K: Yes, except the British.

N: Yes, I was rather sorry I was hoping to have private chat with Home, not about this business but about their politics, but he wouldn't stay over tomorrow.

K: No, he has to get back because he has to campaign, but I've already told him your position.

N: Yes, I told him last night, good luck, good luck, that's about everything I could say, you know. But he knows?

*

K: Oh, yes.

N: Good.

K: But this, I think we'llcome out all right because the briefing that all these guys are giving is sotally in our support.

N: Good.

K: And its not us against Europe, it's France against us and that's not, that's not a disaster for us.

N: No sir.

K: And all of the Europeans, in fact what's happening now.

N: And the Japanese.

K: They are with us.

N: Right.

K: I had a meeting, I had a lunch confined to Ministers...

N: Yes.

K: and the Japanese , in that rather inexplicit way of theirs you know, nevertheless supported our main proposal.

N: Right.

K: So, the real question is..the thing we have to be careful about, if we accept the French compromise and have all the others feel we let them down. Basically the French compromise is the following: They don't want this conference to set up machinery that is semi-permanent because they don't want Washington to get the credit for having done it, I mean that's in the crudest way .

N: Right.

K: what the issue is, but they have now proposed to me that there be a conference held in a month in Paris under OECD which would set up the machinery and they would be willing to have a few machineries of a temporary nature set up between now and then. The difficulty is if they would promise their vote at that conference.

N: Yes.

K: The difficulty Mr. President is that if we get to that conference, they might promise us their vote on the big things and then drag us into guerilla warfare on oil instrumentation, and having in effect in the minds of the Europeans, caved this time, they will never hold firm again. At least this time we've got everybody. If the French get away with it this time, even though the compromise doesn't strike me as unmanageable...

N: I don't think it is unmanageable. but I...it looks like the French, like the tail wags the dog.
K: and the trouble is at that other conference if they really want to sabotage this effort, there are some people who think they could organize some votes against us. That I don't believe, but they wouldn't have to organize votes if they stand up against what we want we sort of have had it.

N: Right.

K: Also Pompidou might die, and, in the interval, and then no promise would mean anything. I m a little reluctant to ask you to authorize a change in our position at least until a little later in the evening.

N: Yes, well I've got to go over to Alic Longworth's birthday for about hour,

K: I know, I should go too.

N: But I'll be back at by six and available anytime.

K: Well there's nothing, the Europeans are caucusing now and we have a plenary at 5:30 so nothing can possibly happen until about seven or eight o'clock.

N: Well, I'll tell you one thing, with great subtelty but with unmistakeable clarity, they all understand that economics and security are linked. What I was telling them last night they damn well beter understand....

K: Have you...you have been told, of course, the tremendous play your remarks received.

N: Did they get quite a play.

K: Oh, yah. It was on every morning show, 5-10 minutes of television and it was the lead article in every paper, so...

N: Good. Well, good luck. if you're still talking to Jobert, love and kisses and all that crap. Thank you.

K: Mr. President.

N: Hi, Henry. How are you.

K: We are practically finished and we will have a good communique. Everybody accepted in effect our draft almost verbatim with France abstaining from three paragraphs.--the most operational paragraphs, but nevertheless, after the orgasm of our press for three days about that Titanic confrontation with Jobert he winds up having no votes and we have all of them. The communique is essentially the one we drafted. We got about, I would say, 90 percent of what we wanted.

N: Let's be sure we get a little credit for it. After all we worked these people hard, had them to dinner told them the facts of life.

K: Have you seen the Reston column today.

N: No. I have been to the hospital all morning. Just got in.

K: He is praising your remarks on Monday night.

N: Really.

K: The whole column is on your remarks.

I direct the doctor, Lukash, that -- he said you had not used that rubber -- and he will be over tonight to rub you down. But you use him everynight that you need him. K: Yes.

N: Well, fine, fine. The mainthing upbeat and things are going to work out; we are working on embargo and all of that.

*

K: ON the Embargo, Mr. President, I am confident that it will be lifted in a week.

N: Sounds that way from the thing I saw last night and this morning that you sent over here.

K: They are having a summit meet of Faisal, Boumedienne and Sadat today and tomorrow.

N: Incidentally, I got your message late last night about the conference and I think that is just the way to handle the French -- isolate them. They don't want to be isolated. The interesting thing is though that all the other countries would be willing, you know, to go along. The Europeans were supposed to have unanimous vote you remember. That is why I made the little crack that I made at the end of the dinner because our friend the Canadian had told me that we have to be unanimous. I said well you aren't going to do anything then. He was not mean about it.

K: Last week, Mr. President, the Community took a decision and today they have split apart on it eight to one. It is a lesson to everybody.

N: There is no confrontation with the Arabs, is there?

K: Absolutely none.

N: Make that point very clear will you in your -- when are you going to brief?

K: About 3:00.

N: Make it very clear that you and I have chatted, etc and that the President particularly pointed out that this was not by way of confrontation with the oil producing nations. On the contrary it is in their interests to have first a market they can count on and at a price that is reasonable -- whatever you want to say. And that we all want to do that. We look forward to working with them in the same cooperative spirit that we worked here and we look forward to working with them in their economic development -- apart from oil. All that old jazz.

K: We meet again at 12:30 and we are down to a very few minor paragraphs.

N: You might tell the conferees you have talked to me and I was very pleased with the results. Tell them this -- you might say that the President said -- I did not include this in my toast - - you can say in these days of summitry there is the tendency often to credit -- for the attention to go and the credit or discredit to go only to the heads of government or heads of state because we meet in various things, but that I have always said that the real credit goes to the ministers and that I consider the foreign ministers, the economic ministers, ministers of finance, etc and their colleagues that they are basically the artisans -- the peacemakers -- the peacebuilders -- without them there could be no success between meetings of heads of government and state and I particularly appreciate the hard work that they have gone to do to produce. Anything like -- something like that might be helpful.

K: Right, Mr. President. I will say this. And I am planning to come down to Key Biscayne on Friday night.

N: Only if you feel it will help you.

K: I would like to do it.

K: What do you mean -- we had a total success.

B: Comes out in the paper that way. I am planning a trip to Japan in April. They are our number one customer in agriculture. I think I am talking about a three week trip -- Europe, Brussels to confer with the EC and probably make a stop in Moscow and three or four other places. My staff feels there is an advantage if the Secretary of Agriculture could go into the Pepple's Republic of China.

K: I don't think you can go to Moscow and Peking on the same trip.

B: O.K. If you think it appropriate to go to Peking, I would probably not go to Moscow.

K: Let me look into it.

B: Our trade people have good liaison with Peking. We think they will be our biggest customer -- more than Russia.

K: We don't want to give it that high a profile, and they don't. Let us handle with them informally.--To see what their reaction is.

B: Alright. I'll wait to hear from you. I'll be in town the first of next week.

K: Let us make the contact.

Z: Good.

K: Nothing new. It is exactly where it stood.

K: Certainly he would be welcome. Be careful because the Russians take what the White House says terribly seriously.

K: Oh, no. And that's terribly debilitating if its the same thing I have had.

H: Its awful. How are you doing?

H: I'm doing OK.

H: Did Brent tell you about that goddamned Philadelphia thing.

K: Yes. But let's not worry about that now.

H: Well, I assure you it was wrong.

K: It doesn't do any good to seem to be split. The difference, Al, is if I say it it looks generous, if you say it it looks as if I am being cut up.

H: The sons of bitches, nobody else heard it that way.

K: Al, I am calling about something else. That mini summit in Algiers is sending the Egyptian and Saudi Foreign Ministers over here.

H: Oh?

K: And we think it is going to be good news but we could ....we can't be sure. I have to stay here and wait for them and then I think I should bring them to Key Biscayne.

H: If its good news. That's fine.

K: If it is not good news, that's why I think I should greet them here with them arriving here. I'll stay here and wait for them and,.... what's the President's schedule.

H: Absolutely, good idea.

K: Let's not say the President is going to see them. We don't know what the news is yet.

H: We'll just stay cool until you assess it.

K: We'll just say we have reported to the President and he is aware they are coming. We will be in close touch. Because I don't know....the sons of bitches, they just sent a message, that Egyptian Foreign Minister, he thnks he's such a good friend, he just sent a message -- I am coming and bringing Saqaaf with me -- that's all. We don't know what he'll say, whether there are three more conditions, that they will do in in June or when.

H: Right.

K: So, its a good thing to have us see them anyway because we can talk to them about the energy conference. It will teach a good lesson to the Europeans about who's got muscle.

H: The conference was...you performed a miracle.

K: We got 99% of what we asked for. Keep the President's schedule free of Saturday afternoon.

H: OK.

I might bring them tomorrow night or on Saturday.

K: I will report immediately what they have to say. We've got no gurantee what they are going to say getting off the airplanes. I can't control that. but nothing will be said at the State Department.

H: Rifht. There is great sensitivity about how this is done.

K: I just think it is too dangerous to let them come without going ...without knowing what they've got. It might be a slap in the face.

H: Right. I think its the right way to do it exactly.

K: OK. I'm going to bring them down after we know what it is. You can decide how to handle the publicity. I would play it low key. We don't want to get into a position so they think they can slap it on again either.

K: Mr. President.

N: I just called to congratulate you. We got the cable on the plane and I showed it to George, he's off to the West Coast, and Ziegler was there and everybody thought it was terrific, it was really great.

K: Well, we got 98% of what we wanted.

N: As a matter of fact we isolated the French, at least we got them to come around some...

K: Totally, In addition to the communique, the fact of the matter is that it taught an important lesson to the European community.

N: The point is the European Community,=instead of having that silly unanimity rule, learned they can't gang up against us and we can use it now, we can use it on trade, security, with everything else.

K: Exactly.

N: Its an historic breaktrhough, people will see it later, Henry, and by God it was a hell of a thing.

K: Your speech on Monday night was terribly important.

N: It was a shot across the bow but nobody could really be mad at me.

K: Well, everyone got the point including Reston and You made the connection between the economic and the military...

N: That right..you can't separate the two.

K: Well, it really turned into a major success. I gave a press conference this afternoon.....

N: Oh, how did it go, Henry?

UNITED STATES DEPARTMENT OF STATE
REVIEW AUTHORITY: ROBERT H MILLER
DATE/CASE ID: 18 MAY 2004 200102979

K: Very, very good. You know they usually needle me and try to show.....

N: And they've been writing what a disaster the conference was going to be, and was, and then all of a sudden they have to write, I mean it must have, how were they, were they sheepish

*1

K: Oh, yah, they said how did you do it, what happened, are there any secret concessions you had to make. I said look how could you, there were 13 people there how could you make with 130 people in the room. And everyone, lot of questions about the isolation of France so I was very generous to the French and said of course they are old friends.

N: We understood, we said we needed them all, we understood that they'd all had reasons for going into business for themselves, but after all they had to realize, but...I think the line that its good short term politics but disastrous long term statesmanship. That's the thing we've got to keep hammering.

K: It taught us an important lesson if we really throw our weight around we can have our way. Another thing. We had a message from the Saudis, saying its 95% certain that they're going to get the embargo, that the embargo will be lifted. They're already in Algiers.

N: As of when, Henry?

K: I would guess by the end of next week.

N: Not this week huh?

K: Well I think the decision will be taken this week but we won't be able to talk about it because it will have to be ratified next week.

N: Yes. but the Saudis are totally positive?

K: But, oh yes, but the press is so much against it now, I means its talking it down so much that whether it happens this week or next week it will be a huge success.

N: Well, the main point is I got Simon at the fore and I really nailed him to the cross, I said now Bill I don't know what's going to happen I think we may get it sometime, I said first, OK there's going to be no rationing, second, I said I want those service stations filled up so we don't have those damn lines. Two or three weeks after it is lifted, he said, I will givethem 100% of their requirement. He's got oil running out of the ears.
K: That's going to, I think the embargo will be lifted within the next 2 weeks at the latest.

N: Then I could have a press conference right afterwards.

*1

K: Exactly, also, if you plan a press conference, Mr. President for

week of the 25th, that would turn out very good because we would be able to announce the resumption of relations with Egypt.

N: Yes, yes. a couple of brief things I mentioned to Al. First I talked to Finch about Japan, he doesn't want to be an ambassador anyplace so he's out, which is fine because he'd be a fine ambassador but we need him here. Second, I think that Hodgeson would be ahell of a good man if he'd take it, he was an excellent Secretary of Labor, and

K: No, no, I think its a good idea.

N: He's a businessman, and also he's totally our man, you know what I mean. Now, the other one is that I would like to do, don't know if he will take it but I want to offer it. I think we ought to offer London to Dave Packard. If Packard would take it you know maybe that would be....

K: Oh, that would be great.

N: Wouldn't that be superb.

K: That would be a great appointment.

N: And then you see as a senior ambassador over there, even more than Walter, he could help Straus-Hupe in NATO he could help with the European Community, he understands so much, and of course if would be great for the British.

K: I'm seeing him tonight at the Business Council should I run it past him.

N: Absolutely, I told Al, I said to be sure, as far as I'm concerned I'd like to have it offered to him. Tell you what you do, if you see him tell him the President has been trying to reach him or something like that and I want him to know I wanted him to do it.

K: Oh, yes I'll put it entirely

N: You could say that I called and that we, I think its such a terribly important post, He wouldn't have to go until first of May. Walter wants to stay through April, I think. And look, its the Court of St. James, Dave has got money running out of his ears, his wife's a big socialite, they've got a magnificent Embassy. He'd be one of the stars in the diadem, wouldn't he.

K: He would be ~~terrific.~~ terrific.

N: Why don't you tell him that, will you. Another thing I mentioned

I really would like to give John Cooper something, I don't know what, but....

K: I agree, I've been looking for something.

N: How about Egypt?

K: No, Mr. President we have to have a professionial in Egypt, because that's too hairy. The guy we've got there is the best man to send.

N: Well maybe we elevate him. You see John and his wife are great people and.

K: He couldn't handle Sadat. I'd rather give him East Germany.

N: East Germany? Are we going to recognize those bastards.

K: He's a great German Lover and , oh yah, everyone else has already

N: When do we do it.

K: Well, whenever the West Germans have completed it. We'll be the last ones to do it.

N: Fine. All right. I would like for you to give him a call as I mentioned it to him at Alice Longworth's party last night and I said John I want you to do something ...consider it...tell him this is an historic first and we want the best we can have and would he take East Germany. That would be a terrific thing, it would be a great signal to all of our list. John Cooper's loyal and will do what he's told.

K: Oh, yah. and its not all that complicated business.

N: Well if you'd give John Cooper a call and say I talked to you about it and say we talked about a post, East Germany will be open and would he be willing we want to hold it open to him.

K: Excellent.

N: I'll have Hodgeson, I want to do that one myself, he's done some wonderful things lately for us on the labor front, voluntarily, he's working for Lockheed you know. If he would take it that would give us a damn good man in Japan. Former Secretary of Labor, former senior Vice President of Lockheed, you know, he's a real pro. how's that sound to you.

K: It sounds excellent, outstanding.

N: Fine. You tell Dave Packard we want him to the Court of St. James, second I think old John Cooper would love it, Lorraine would love it love to be offered it anyway.

K: I'll call them tonight or tomorrow morning.

N: No hurry, you know what I mean, just so you do it, because I told him I was thinking of something. When do you go to the Business Council right now.

K: in about half an hour.

N: I told you to cut down your schedule, why the hell do you go over there?

K: I thought it would do the Administration some good.

N: Everything is helpful, but you know we don't want you falling apart. Now I told the fellow when I got my physical out there today that ...that guy that a masseur. He said he'd only done you once, and I said every time you want it. so tonight he'll be there if you want him. If you don't want him.

K: I've already arranged it Mr. President.

N: Does it help you?

K: I love it.

N: All right, fine, but you have got to be available for it. He comes in around 10 o'clock. Now look, he does Sgt. and chicken cols, why can't they do our Secretary of State.

K: Its terribly thoughtful Mr. President.

N: When do we see you then, Saturday?

K: Friday night.

N: OK All right. Henry, it was a great day wasn't it.

K: It turned out magnificently, its almost the communique we had submitted ourselves, almost word for word, it took about three days

of maneuvering, but we managed it. but your speech was, that really convinced them that we meant business.

N: Is that what they told you.

K: Oh, yes.

N: You see I was very subtle, as we said on the phone, I didn't hit them with a sledge hammer, but I got the point.

K: What was even more important is that a number of them came up to me without any prompting on my part and said they wanted to tell me that they would report to their governments that you were in marvelous shape, you know,

N: Oh, that I looked good.

K: Yes, that you looked good, you acted

N: I did it all without a note as you know, the fact I did it without a note I think impressed them.

K: Your whole demeanor your confident manner, your delivery,

N: Yes, they had to be convinced of that.

K: and the subtelty.

N: Good, take care of yourself, give my best to the Business Council and tell them By God, they have got to....take them onto the high road Henry, tell them we mustn't think of these miserable, parochial things, we got to think the peace of the world is in our hands, you know, and all of history will judge us for how we act in these next two or three years, you know that right/ What are we going to do, screw around with politics or are we going to do the big things? That's what this is all about, you know it and I know it.

K: Exactly.

N: OK, enjoy your rubdown.

Z: When are you going to take that vacation?

K: Well, the Arabs are kicking up again so God knows if I ever get a vacation.

Z: Well, God better see that you do get a vacation. Henry, I just wanted to report to you that we are moving along on this thing. There was a meeting in New York Tuesday with a number of people, and one of the stories that they got was the fact that at one meeting Jackson drew it up and said that he doesn't think that that group represented the Jewish community and if they wanted to take that position he was going to go over their head in that kind of business, so that what they decided to do is to try to work as quietly as possible on the people who are close to him in a way that does not make it look as good _____ _____ _____ trying to at least open his mind before he has a meeting with you which he still insists has got to be initiated by your calling him. But I don't think there's any sense in calling him until we get him in a proper frame of mind.

K: I'll call him fairly soon.

Z: Now, we've been doing some work with some other people. I was at a lunch yesterday with Fritz Mondale and I think we got Mondale pretty well turned around.

K: Oh good, that's important.

Z: Well, as a matter of fact, by the time I got through the conversation with him afterwards, He said, you know, I think Jackson is just using this for

UNITED STATES DEPARTMENT OF STATE

Presidential campaign purposes. You know, he turned around completely on it.

K: Terrific.

Z: Now the only trouble is that we don't want Jackson to think that this is going to be a part of the Presidential campaign against him, and so I would just as soon have Mondale not say anything to Jackson for the time being. I've been in touch with Sol Lenowitz and Sol is working on the thing and tomorrow we're supposed to get that speech from Fullman.

K: O. K.

Z: And we're going to try to get that thing circulated. So I wanted you to know that we're moving along on it. Sol is going to be in touch with (Cy ?) Simon and we're going to see if we can't create a climate that will make your talk with Jackson more productive.

K: Paul, you're a good friend.

Z: Well, I feel very strongly that not only is it a matter of _____, we've got to have some help, but also this is something that's got to be worked out, and anything that I can do you can depend upon me doing it. We really did as much work as I think we could do within this time limit. I talked to Cy yesterday and got him pushing and we'll just keep on pushing.

K: Good. Wonderful. And let's stay in touch.

Z: Alright. I thought that the Energy Conference really came out better than we had a right to expect.

K: Well, it came out very well, and the newspapers giving the impression that it wasn't succeeding actually helped that.

Z: Yeah. The report that I got was that Kissinger had worked his magic again. Keep on working your magic, but most important of all, please, take care of yourself, Henry.

K: No, I mean -- but then it isn't an official conversation.

D: Right.

K: Don't get presumptuous, we don't always meet as friends. (laughter)

D: (laughter) I can't even claim friendship anymore.

K: No, I didn't mean it. Now, what really worries me -- and this has nothing to do with any policy -- is this total absorption in domestic policy which your system imposes on you. Really in terms of the survival, I am sure that the Prime Minister doesn't wish it that way.

D: Now it's more than ever. It is really a very peculiar period which will end I hope when we have a new government.

K: But what you need more than anything now is some wise leadership, which you in fact have -- not in your Foreign Ministry I don't believe.

D: No, I don't believe. But, Mr. Secretary, I can't agree with you more. You can't imagine how it disturbs my work. My every day work. And the Prime Minister suffers probably more than all of us.

K: But you know you're in mortal danger. You really are in mortal danger if you look at long-term trends.

D: Yeah.

K: And your people cannot focus on it except in terms of day to day tactics.

D: That is correct. But, as I say, I highly believe that this is a temporary situation because, as you know, it's from our point of view -- not mine ..

K: No, no, from your point of view. From our point of view, it's irritating.

D: Yeah.

K: But our survival won't get affected. It may hurt you here.

D: Yeah.

K: But it's from your point of view that I'm worried.

D: I agree with you. And I had a long discussion on this with the Prime Minister. She said may want to come over and help me form the governmen and you'll see what I have to face. She's facing an impossible leaders' block that is undermining the negotiation. Not for the conversions business this is nonsense. Because they insist on having a National Unity Cabinet. They want to be [equal ?] in the Cabinet. The Prime Minister realizes that if this happens, then we immobilize totally any ability of our political action for the next four years, which is suicide. On the other hand, they wouldn't enter into the Cabinet without it. So right now we are facing a choice of either having a 61 majority on _____ coalition or to go to new elections. That is the situation.

K: But why don't you go to new elections?

D: Because the Prime Minister wants -- because she believes that the party can fair much better.

K: Because I think you probably got all the negative votes -- you've got a lot of negative votes last time just as a protest to the war.

D: Right, right.

K: They've had their chance now.

D: That is their opinion. That's the voters opinion. But Dayan and Eban are reluctant to go to new elections. But we might have no choice. I mean, we might have no choice and we will do this. But this explains, Mr. Secretary, the [sensitivity ?]. I want to tell you normally we are not as bad as what appears now. Because this is really -- And on the other hand, their daily [coup] going to town, every day they are calling the government into parliament for a vote of non-confidence which means the government has to express .... They are spreading rumors that we are capitulating to the Americans and the Syrians on the prison-- You know, so this is the atmosphere in the country. They are talking about the issues which are laden with emotion. So it's very easy to rally people around in effect that you want the prisoners back. But I think the answer the Prime Minister gave in Parliament, and even Eban had a good answer yesterday in Parliament, explaining to them that nobody disputes that we want the prisoners back. The question is how wisely to do it.

K: Exactly. Well, I think actually on the prisoner issue -- Eagleburger gave you a briefing didn't he?

D: Yeah, yeah.

K: I was at a meeting. We are going to hear from the Syrians but we don't know what it is yet. All I know is that Boumediene told us that we would hear from the Syrians.

D: On the timed visit?

K: Well, about the prisoners in detail. But I think -- I gave you my judgment that the proposal you made will be accepted.

D: Yeah.

K: And we have not yet had the absolutely final word.

D: Yeah.

K: Now, but my strong opinion is that these two maniacal Arabs who are coming here want to take me out to the Middle East with them.

D: Right.

K: Because Boumediene has also written me that my appearance in the Middle East would have a soothing effect on the population-- on the situation.

D: Mr. Secretary, I can't resist it -- that anyone would believe that your visit has a soothing effect on anyone. (laughter)

K: I treat Arabs differently from the way I treat Jews. I sooth Arabs.

D: (laughter) No, I told Eagleburger my first -- naturally I pass it onto the Prime Minister. She has the cable by now and she is reading it. And I hope you have a reaction (today). But I told Larry what my first reaction is, and I am usually right on this, as long as we can separate the issues of the prisoners from your visit, I think we are preparing a very good ground for your visit.

K: Well, look, what I would like to do -- As long as you work out -- I can hold out on the prisoners by saying that there's no sense my coming until I get the prisoners.

D: Right.

K: And I have that Latin American Foreign Ministers meeting, which in fact makes it impossible for me to come.

D: Right.

K: But just for term planning, it is hard in the face of the embargo -- if they offer to lift the embargo, -- I mean, not to come then the week after this.

D: Yeah. You mean, after the Mexican thing?

K: Right. So just in terms of your own planning.

D: Yeah. No, that I understand. And I have said this to Larry, that -- Well, I was hoping they would not from your point of view, they wouldn't tie your visit to the embargo but of course whatever they will do that is between you and them. But we for us, just in case -- and also for you if I may, Mr. Secretary, no matter what explanations will be offered, if you go to the Middle East before they issue of the prisoner is resolved, everyone will interpret it that you are coming to put pressure on Israel in order to give up on the matter of the prisoners.

K: Unless I can demonstrate that you didn't give up on the matter of the prisoners.

D: That's right. That it is so.

K: Well, look, if your plan gets accepted --

D: Right. That means that we --

K: Look, there's no chance of my coming unless your plan is accepted.

D: Right, right.

K: In which case it is the opposite. In which case I got you your prisoners.

D: Right, right.

K: So I won't come without at least your plan being accepted.

D: Right. No, I understand this.

K: But that isn't the problem. The problem is this is in the context of your plan being accepted.

D: Yeah.

K: And then I would like you to get ready on the substance. I will not -- I have given you my word that I will not try to modify your plan. I've never broken my word.

D: Right. I have asked our people [redacted] secretly to get on substance already a week ago when you told me that --

K: That's not the problem [redacted] you face with me.

D: Yeah. No, I understand. No, but as I said to you, Mr. Secretary, after you talked to me that evening about the Syrians consent, which is about 99%, I've asked the Prime Minister that we begin to think on substance among ourselves first, you know. So that we be ready. And I think something is being done on it.

K: That's what I would strongly urge.

D: Yeah, I will emphasize it again.

K: That's your major problem. And don't spend time fighting me on the prisoner issue because I believe we will settle that in the sense that you gave.

D: Yeah.

K: And if we don't, that is not the issue between -- there is no issue between Israel and the United States.

D: I don't fight you at all.

K: No, no; don't get your Cabinet into the mood --

D: I ....

K: No, you won't. But tell your Cabinet not to get itself into the mood that if I come out there, it will concern the prisoners.

D: No, of course not.

K: If I come out there, it will concern Syrian-Israeli disengagement.

D: That is precisely so. And that would even please the Prime Minister more. Because, as you know, She didn't want to tie the two scenarios. because She thought that it is not good to do it. So, if, as I said, if our plan is accepted -- let's put it this way, you have in your hand the list of prisoners they promised for the visit which will start being executed before there is any dealings with the Syrians, either by us or by you, that could automatically. And then we can publicize it so the papers would not attack or would not connect your visit with the prisoners because that will be a solved issue as far as the scenario is concerned.

K: I can give you this assurance, if there are negotiations on the Israeli-Syrian disengagement, I can't work out the tactics now because I don't know what their proposition is --

D: Yeah.

K: It will be clearly demonstrated that your essential conditions for prisoners were fulfilled.

D: Yeah, yeah.

K: Now, if I go out, we have to modify the scenario in terms of the fact that I'm out there rather than here. I mean, I can't insist -- you know, we have to work out how to stage the fact that the negotiations will not start until [visit] starts.

D: Yeah.

K: But let's not spend time on that [redacted], Mr. Ambassador, because I assure you that is not the issue.

D: Yeah.

K: What you have to get ready for is the substance.

D: Yeah.

K: And I don't want to go out there until you've done more work on substance.

D: Yeah. Yeah, I understand what you're saying.

K: Okay. So I'll keep you informed.

D: Fine, I appreciate it.

K: Thank you.

D: And I would appreciate it, Mr. Secretary, if any new developments come --

K: I will keep you informed, Mr. Ambassador. Our relations are bad only when we have a margin for survival.

D: (laughter)

K: Under pressure we usually manage to get together.

D: That's right. The too quiet days which annoyed me to no end.

K: Ungratefully. (laughter)

D: And you don't even want to say that you will come to a private dinner that I'm holding.

K: I don't -- No, no; invite somebody -- keep it in honor of somebody else ....

D: Not anyone -- it's some friends of yours and mine together. And some Senators that I think would be good that, you know, -- I'm for instance trying to get Jackson and this atmosphere I think would be much --

K: If it isn't in my honor -- the only point is, I have not -- I have rejected a hundred invitations.

D: Of course, of course. It would not be in your honor at all. It would be a private dinner at the house. And there would be most of the people that you meet when you go some.... anyone of your other friends. And it is nothing to do with B- Barbara Walters, for instance, is anxious to see you. And that is as good occasion as any.

K: Okay. Do you mind though if I have one social engagement next week that I don't clear with you?

D: (laughter) If you insist, I don't know what good it does to you if I hear it from other people.

K: Okay.

D: (laughter) That is fine, Mr. Secretary.

K: I will talk a lot this week. And as soon as I've talked to the Arabs, I'll call you.

D: Okay.

K: Bye.

D: Bye, bye.

K: I agree. Let's not do that now...

D: And she wanted to assure you that she and the Minister of Defense and others are working on substance and there should be no worry for you even when you decide to come. She wanted to remind you again that the issue of the prisoners should be settled.

K: I told you I don't want to hear that again.

D: I'm just reporting Mr. Secretary. She was in a very good mood and she asked me to thank you for participating and that she appreciates your confidence. She wanted to assure you personally that she and her ministers will be mum for the next 36 or even 72 hours.

K: At least as long as the Arabs are here.

D: It might cause you some pleasure, but it will give her alot of pleasure and then maybe you can keep them there for a few weeks so that they would be silenced for a few weeks.

My view is unless there is a clearcut unambiguous cutoff the President must not see them.

K: What have your brats done now.

D: What?

K: Those brats in Jerusalem.

D: Nothing, its 11 o'clock at night they couldn't even if they want.

K: What did you call Eagleburger about.

D: Oh, no.

K: I figure when you call Eagleburger its bad news.

D: I called Eagleburger simply to get release to go to my dinner in New York. Didn't know whether I could leave town.

K: No, you can leave town. I still haven't seen the happy darlings as a group because they are so shaken up by what I told them yesterday they need new instructions.

D: Uh, huh. I heard on radio, CBS said you are receiving them in line. one by one, and only tomorrow will you receive them together.

K: That's right.

D: I got a lot of calls from the press asking me if Israel was made aware of the content of what the contents is and I said no.

K: You should say you are aware of the content.

D: No, no, of what is going on, you know. Content of the contact, I said no, I would speak to the _____ but we haven't had contact between us until you decide that you want.

K: No, no you can say that I have ...wish you would tell them that you have had full discussion with me.

D: I didn't want, you know.

K: No, no, no. That I don't mind you saying.

D: But I would say of an informative nature, not ....

K: That's right.

*

D: Maybe you'll have your state Department guy say, you know.

K: All right.

D: Its better. I can say that we met this morning for full discussion of an infomative nature.

K: You can say that. Otherwise though it leaves the wrong impression.

D: Okay, I will take care of ...I'll have my press....

K: Now, one thing that I find rather interesting is that the Saudi, I'm not drawing any profound conclusion from it, the Saudi is more moderate about Israel than I've ever heard him.

D: The Saudi?

K: Yes, nono, seriously. When he was alone. He said don't the Israelis recognize that they could be the leading country in the Middle East if they only had peace with us. He said of course the King is made uncomfortable about Palestine, but you know that , he put it all on the King. You know, he's in his 70's.
D: That's a very understatement for a Saudi to say he's uncomfortable about Palestine.

K: But I find it sufficiently startling to mention it to you.

D: No, no, I'm saying, I agree with you.

K: And I would not base Israeli policy on that but I think it is rather interesting information. He was very calm and also to say Israel could be the leading country in the Middle East I would have said 6 weeks ago that basically they are just behind Syria in trying to get it destroyed.

D: He said Israel could be the leading country in the Middle East?

K: If it only made peace. He said they always ran things in Egypt and elsewhere and we've never objected.

D: You mean the Jews?

K: The Jewd.

D: That's after Faisal told you the connection between Jadaism, anti-semitism and communism.

K: Exactly. I draw no conclusion from it, I'm just saying the mood is actually calmer than I've heard it.

D: Maybe its _____to have 102 points for the _____.

K: And they're are not, on the whole the Saudis are not all that complicated.

D: That's ture. The Syrians are more.

K: Oh, yes, Look the Syrians was in too and I just repeated again your position to him. He said they're very interested in disengagement and I said that's fine, you know what you have to do. I made your proposal again and he said he would transmit it.

D: So, I will not cable now anything on the conversation until you speak to them tomorrow. I've already sent what we said this morning.

K: Right. That I have more or less made as a proposal in response to their request. Also, I will go to Damscus first. You can tell her that. To me it makes no difference. I'll go whereever she says first.

D: No, no, I think its good for us.
K: Okay. And then I'll either come to Israel with the list and it starts or I'll come without the list and say it can't start. See what I mean.

D: Fine, fine. Yes. I see. That is why I thought it better for you to go through ....I think she would like this idea better. I will be in touch with you tomorrow Mr. Secretary.

K: I fear that is one of your more accurate statements.

D: As long as its not only one.

K: I've accused you of many things, I've never accused you of lying to me. Almost anything else....

D: By the way I was to see Scowcroft, as you know, you talked to him while I was there.

K: I wanted him to show it to you last week, sometime or yesterday, just so that you see what we are up against.

D: But I was happy at least to see that was what one of their other guys....

K: No, no, no. but throughout

D: Of these concerns

K: No, no. I grew out of the other man saying it at a meeting that this s hould happen.

D: I see

K: And this is the implementing memorandum.

D: I see at his request, that I didn't know.

K: One that's been requested.

D: Because I know that the one who wrote this is sufficiently out by himself to invent something like that.

K: No, in respone to a request, at a meeting a few weeks ago.

H: When?

K: Tuesday morning.

H: Fine.

K: They have come with a specific program which links the two together on the embargo. And , formally also that I be sent to the Middle East. And he could come out of the meeting and announce that he is sending me and then if it is lifted, he could tie it back to that conversation.

H: Yes, I agree.

K: I urge that he must be totally disciplined and aloof in that meeting. At this point, what has shaken them to the core is we are not asking them for anything. Do you think he can be gotten to do this and not promise anything?

H: Sure, I think so. In my last discussion with him -- if this is any criteria -- he is totally on board.

K: I saw these guys separately last night and separately this morning. And I'll see them together tomorrow.

H: That's good. Damn good. I know we could do this Tuesday morning.

If I may read you a short question: Did you ever attempt to see the investigative report on that matter? Sec. Kissinger: No, I was told (you struck out I was told I would not be shown them.) Sen. Cannon: By whom? Sec. Kissinger: By Mr. Ehrlichmann. Let me put it this way (now you struck that out). We have got to trace this thing and one of the main things is why they did not do something about it. We are going to have to try to get these reports and I think that that could well be left in there.

K: I just did not want to trigger Ehrlichmann into another onslaught quite honestly.

K: Mr. Chairman. How are you?

F: I'm fine. I just got back last night.

K: I called but you were not back yet. It was an interesting play, incidentally. It states alot of profound philosophical propositions in a bizarre way which is the only way you can be serious in the theatre these days I guess.

F: I think the visit was great success. I will get you the editorial, they did an excellent editorial.

K: In the Gazette?

F: Yes. The following Sunday.

K: I thought the questions were very friendly.

F: They were. I thought the press behaved extremely well.

K: And the coverage here, what little there was, was strictly substantive I called you last night to bring you up to date on where we stand with these two foreign ministers, and this has to be strictly for your information...

F: Sure.

K: They have had three propositions: (1) They are going...they will lift the embargo at the next meeting of the oil producers, but they don't want any discussion of it before. Having said this, of course, The Egyptian foreign Minister runs around town making enigmatic statements but that's their problem. Secondly, they want progress in , nevertheless on the Syrian side and thirdly, they want me to come ~~w~~ out quickly as a way of getting the talks started between Syria and Israel. Its a little bit absurd to have two foreign Ministers come collect a Jewish Secretary of State, but I can help them a little bit perhaps. They were going to stay here and cart me back to the Middle East with them, but I convinced Saqaaf I couldn't cancel the Mexico City meeting and couldn't go until next week but I probably will have to go out there next week. But there is a possibility we can settle it and not just get the talks started, of course we would have to work out the prisoner issue.

F: You see, when you become indispensable ...an indispensable man, it becomes difficult to discharge your duties. That's the problem. Say one comment made by one of the more sophisticated members ....Len Williams ...he said "My god, it was a work of art. It was subtle as the Mona Lisa." But none of them wrote in such a fasion.

K: I have not seen any such comment.

F: It really went off well, it couldn't have been better.

K: Well I did it out of a very deep conviction.

F: I appreciate that and it was done so well, the timing, everything went off well.

K: The Press conference, too, due to the cooperation of your people down there, it was at a very high level.

F: I was really pleased with them. I thought there would be a few snide comments.

K: How does it look now with the Governor.

F: We think that many other things have deterred him, he keeps postponing and the longer he does that the less likely he is...he may decide not to run.

K: That would be good for the country.

F: That would be a very good thing. That's why I'm staying down there so much. I expect I will go back until he makes up his mind.

K: You did understand you you were invited to come along to Mexico. Our understanding was you really didn't have the time.

F: Right. I don't think it would be wise under the circumstances. Yes, I appreciate that but I don't think I should. So you really feel they will lift it, when about?

K: Probably about May 2 or 3 it looks like.

F: I think that's very good news because phsychologically it would be a trememdous lift on the situation. There's a great deal of hoarding and speculation that takes place, it would relieve the situation, they would quit hoarding and quit the speculation and that would be a tremendous thing. If we can keep from making mistakes. They must have reason to believe you can move the Syrians.

*

K: I think I can move the Syrians on the prisoner issue.

F: I still think the brig problem is Israel. We have to be very careful not to do anything they ....someplace there has to be some give.

K: I would like to get as much done without a flap so when we approach the broader issue.

F: The Jerusalem thing. I don't know what to day about it, I mean I don't want to cause you any trouble. The thing ought not to be ascepted as non-negotiable. It isn't strategic enough, its purely emotional, religious thing. I think I recall the original agreement in 48 the status was to be under the jurisdiction of the UN. I don't see how they can ignore that sort of charter of independence, or almost the equivalent, its their own constituation really. They...

K: They can't give up the claim to Jerusalem, its out of the question, for the Arabs I mean.

F: That's right. Well, anything I can do just let me know.

K: I'll be in touch before I leave.

F: When are you leaving.

N: Hi, Henry.

K: Mr. President, I just wanted to bring you up to date on where the matter stands with these foreign ministers.

N: Right.

K: I followed the strategy which you and I discussed the other day which amazed them because they had come here to haggle to see what we would pay for the embargo. Now I have the strong impression that they are going to lift it anyway and therefore I think you should see them.

N: Well, I told Haig if that is what you wanted to do we will do it.

K: But I think you should be very aloof and not offer anything to them. We've offered them everything there is to offer now and I don't think they need any additional reassurances and they are not really looking for that now.

N: What are they looking for then?

K: Well, I think they want to deliver to you the message they've got which is a little bit ambiguous but which I think, in practice -- I've told them that we can't accept any conditions. They were going to link it to Syrian disengagement. I said that under those conditions you can't meet them so they are now going to take that linkage out and they are just going to state it as a series of three unlinked propositions; that they have agreed to the principle of lifting the embargo, that they want progress on Syrian disengagement, they want me to come to the Middle East but they don't make those three things conditional on each other. Absolutely.

N: As far as the thing is concerned we will meet with them and talk to them a little.

K: I thought if you wanted to you could step out with them and say you are sending me back out to the Middle East.

N: Or we could say it while we are in the room. We will feel something out on that.

K: That is what they want and that is what they want to have announced anyway. It doesn't make any difference who does it. It just one way of emerging with something and then if they do lift the embargo it would be linked back to this meeting. They say any discussiong of lifting will

them. They are going to try to have a meeting of the oil ministers within two weeks.

N: That is two weeks later than they are supposed to already.

K: That's right.

N: I wonder then if they say no discussion of the embargo if it is really worth having them and the fact that you are going to the Middle East is not going to -- you know -- we have been around that track before, Henry and it hasn't helped on the embargo. You see, my only interest is the embargo. That's the only thing the country is interested in. They don't give a damn what happens to Syria. That is our problem. I think we should see them but I don't know that we want to build up the fact that you are going out there if it cannot be in anyway linked to the embargo -- you see the problem we've got there.

K: Well, it can't be linked to the embargo, Mr. President, and I think the more we build up the embargo the less we are going to get it. The most effective thing I have found with them is when I told them Saturday night that we don't want to discuss it anymore.

N: Well, that may be effective in terms of their thinking. They want to have their cake and eating it too.

K: No, no. It was effective in getting it lifted.

N: I hope so. I think we will get out the announcement.

K: It doesn't have to be done then, Mr. President. I just thought--

N: It ought to be done right there. They will leak it out anyway right away.

K: If it happens within two weeks as they say it will then even though you can't announce it tomorrow it will be linked back to that meeting.

N: At least it will show some action. O.K., Henry, that is what we will do -- meet them about 11:00.

K: Right. Eleven o'clock and if I may I could come in half an hour before.

N: Sure, sure. Let Steve know when you want to come and I will keep it open. Good. Hope you are not wearing yourself out again.

(2) Because of the tough situation the Syrians have they want us to make some move to help them get enough movement so the Syrian President can vote for it. K: Did the European decision thing come up.

V: Yes, sir. The question was not asked at the White House but came up here. I followed the line you gave me on the lack of consultation. No plans to veto. It raises some question in our mind the nature of consultation. We do reserve our rights and we are studying to see what this offering implies.

K: O.K.

V: I think it will probably be taken as a fairly sharp response.

K: It will?

V: I think so. The other thing which came up grew out of your briefing and I checked it back. That was the nature of the prospect of the oil embargon and the forthcoming oil ministers meeting.

K: Just don't say a GD thing.

V: I found in checking ...

K: I don't give a damn on what I said on background.

V: I struck that but I want to forewarn you that AP wrote a story on which overplays on the basis of the background. I have gotten hold of Schweid and said you did not say the things that he had written in that sotry and he is doing a correctiong.

K: Good. Thank you.

3/5/74 9:06 a.m.

S: .....question of what we do about it is really the difference between being relaxed and letting it fall of its own weight or actively working against it. I never doubt it after what Home said that the British weren't going to stop it and then they were too weak to stop it anyway, I don't know what Sheel said to you in Bonn but I think to keep the French happy and to just show a movement, it was pretty inevitable that they should do it and getting together some people right now to do a paper for you, but I don't really--

K: I am determined not to accept it; it is not a question of whether the decision in itself can harm us, it is when the Secretary of State is in Brussels to brief NATO to be summoned to the EC and then to be informed of a decision that they have already taken and that it is already in the newspapers

S: Yeh, of course, I couldn't tell what Scheel might have said to you in Bonn on the thing

K: He lied--you know, he obviously said we would do a few minor things but we will never go to the Foreign Minister's meeting

S: There is some talk this was a surprising development, but I can't believe it--that these things happen out of no where.

K: And to take the decision with Britain absent and Italy having no government is inexcusable

S: I think obviously that puts you in a very awkward position and it is a stupid thing to do in this fashion and undoubtedly it was done as a means of repairing a relationship with the French. I don't think everybody has a hell of a lot of confidence that it amounts to a great deal and it does come down in the end to how much capital you want to spend to work against something like this.

K: I don't want to work against it, I want to use it as an excuse to show that this procedure will never be accepted again.

S: I think that on the most immediately related issue--the energy conference, the Europeans still seem to be under some general impression that they did us a favor in the way they conducted themselves in the conference, and I think that is where our tactics are going to have to be adjusted to more passive position

K: I want us to be on a more passive course on the energy one; I do not want you to go over to that EC drafting next week, just tell them we are reassessing it, but above all, Wilson is seeing Annenberg at 5:00 today, should Annenberg mention this or should we let it go.

S: I really don't think Annenberg should mention it; I would like to discuss with you what we do with the British government, because I do think we have to pick up contact with him pretty quickly, actually it is a good thing to have Callahan in the foreign office--he is less volatile than ---

K: There is one thing they cannot do is to support the Common Market within the first three months of being in office against us.

S: I think --

K: They can do a lot, but that they cannot do.

S: I don't know what they were going to be able to do at all, other than try to settle the miners' strike, I don't see how they can go on for more than three months at most

K: I would like you to draft a letter to the Heads of the nine which is focused primarily on procedure

S: Okay, well we are going to meet at 12:00

K: I know, I want that letter drafted

S: Presidential letter

K: Mr. President.

N: Hi Henry. Anything on the foreign policy front you want me to try to get out on board today. I don't think I'll be asked anything.

K: On the oil embargo, the way it stand now, just to let you know -- I wouldn't go beyond what we discussed yesterday. The Libyans don't want to hold it in Tripoli so Sadat has ~~decided to~~ invited them all to come to Cairo. Which at least givesus a fixed location. We have had a cable from the Saudis saying that the King after the meeting I had with him has now definitely decided to lift it, but even that I wouldn't bet my bottom dollar on given their volatility. But this time tit comes from the Foreign Minister which is higher than we have ever had it. We made a statement yesterday that we hadn't been consulted on that European thing.

N: Right,

K: And I think you should just stick with that because that is true. Should I say
N: ~~I think~~/that we take a dim view of it or not.

K: I think what you said yesterday...

N: Well, we might say that they are ~~obviously~~ obviously looking to their interests and we will of course look to ours.

K: Something like that. That would be fine. But otherwise, -- I am just leafing through my cables to see whether there is anything else that is likely to come up. On the European thing, they are obviously looking to their own interests; we have offered cooperative arrangements and it is up to them which way they want to go. If they look to their interests exclusively, then we'll look to ours. I would leave open the possibility of the cooperative.

N: Ok.

K: There is nothing else you don't know.

N: The meeting is tentatively schedule for the tenth, is that right?

K: It is tentatively scheduled now for the 11th but again I would not tie yourself to it because so many things can happen. I would just say

REVIEW AUTHORITY: ROBERT L FUNSETH
DATE/CASE ID: 18 MAY 2004 200102979

that there is a meeting; it is their decision to make but we of course have indicated our view. Something like that.

N: As for as the Syrian thing is concerned we will simply say that it is a difficult problem that will be discussed further when the Syrians and Israelis come to Washington.

K: Yes, but you could say, Mr. President, that the United States will exert all its influence to bring about a just disengagement scheme between Syria and Israel. It would be well received in Syria.

N: Right.

K: And the Syrians have been actually in their public statements very restrained.

N: Alright. Fine Henry that is good. If you think of anything give me a call.

H: It went very well. Hal and I both were there and I went overthe thing in great detail with him and I stressed the seriousness of it.

K: But they mislead us.

H: Before it seemed to us that they were patting us on the head and saying nothing much has been happening on the Foreign Ministers meeting and then the next day there we are, it's all in the press and announced as an integral part of the program and I told him about your being called out there to hear this from him and the annoyance and the bad way that it easily got portrayed and then I quoted from the La Monde article and that said you parachuted in there to torpedo it and I went over the whole...

K: Of course it is a little bit absurd that the nine foreign Ministers were in Brussels and I have to brief the NATO Ambassadors and they won't ask me to meet with them. That in itself is a symptom of what is wrong with our relationship.

H: Yes. Well we went over the whole thing and our reasons, both substantively and procedurally for making it a very regrettable and indeed serious development and that he should well understand and he should stress to the people back there how seriously we take this and that this is really the guts of what we have been talking about since we started on this Declaration and that to get the word that this is the problem. How do we deal with each other on a confident basis and enable ourselves to exchange enough information so that when decisions are made they are at least made in the full knowledge of what the other fellow thinks. That has not been possible up to now, and it is ridculous to continue to talk about words if the facts of the situation come no where near those words and he took it all in very carefully.

K: And you made clear to him you are not coming there for..

H: Yes, I told him that we had sent a message to the Chancellor and to look at the Declaration again and that we were not going to go there until we had reviewed our situation and how we are going to get at this problem, but we are going to the NATO consultations

K: Good.

H: So I think that went very well and I think he'll be helpful back there because he said to us some things also about French behavior and that Europe really did have to make a choice and that this couldn't go on.

K: I think we are going to force the French to head in.

H: Well, I think so too and I think the most important xx thing we should do now is to keep this on the concrete issuesx level, that is that we have now put our finger on the real substantive problems between us and it is not a personalized thing, it isn't pique with Jobert, this is the gut issue of our relationship with Europe.

K: And they are going to be put into one impossible position after another if they drift along.

H: Right.

K: Incidentally, I don't think we should have the energy coordinating group in Brussels. I don't care where the hell it is.

H: Well, let's keep the next meeting there. One of the things we are...

K: No, No. But I don't want after that, to meet in Brussels.

H: Oh, well Bill is coming back I guess tonight and we'll discuss tactics

K: Well, is any serious person going to be with him? You are going to be over there so you can sit there with him. I want either you or Hal to sit in with him.

H: OK, well we'll see how that fits now. We'll probably go through London on our way to Brussels and the Brussels thing now will be on the 14th. That's the same day Bill should be there.

K: Good, well he just doesn't have the old fighting spirit.

H: Well, we'll see what we can work out. That probably will fit then for us to be there part of the time.

N: Hi, Henry.

K: Mr. President, I just wanted to bring you briefly up to date where we stand, on that oil embargo, because there have been so many stories around; most newspapers say this means the end of it. This is not true. We have now heard not only from the Egyptians, but also from the Algerians. I have had a message from Boumedienne which says he will definitely support lifting the embargo. And with that in the fold, I think it is going to work.

N: Yeh, I understand. Well the newspaper stories, they don't know what the hell is going on.

K: They don't know what is going on, but on television and so forth, they keep saying this is an indefinite postponement. For once now I believe it is going to work.

N: Yeh. What is the date set for--

K: Wednesday--in Tripoli, Mr. President

N: What does that mean indefinite. Why would they interpret it to mean indefinite

K Well they figure there will be another delay or no agreement.
they
N: That is the way/were going to have it too. But anyway what we can say about it are the results, but

K: At any rate, I thought you might like to--

N: Having heard from both the Egyptians and Algerians -- but at least the Egyptians said they were going to have the meeting for that purpose didn't they?

K: That's right, but for this purpose, Mr. President the Algerians are worth more to us than the Egyptians--because the Algerian oil minister is the head of that group, and secondly, the Algerians are known to be close th the Syrians and thirdly, they are radicals.

N: Of course. And they have indicated they are going to move to support it, are they?

K: No. There has been a report that Tito has died, but it is unconfirmed.

N: Hm huh. That will start a little action, won't it?

K: That might well start a civil war there

N: Think so?

K: Could happen, yes.

N: Yeh. The only thing is they have to hav e arms. Well I guess---

K: Well, they've got arms between themselves.

N: They just divid them all up huh?

K: Yeh.

N: Army, Navy, Air Force. Well anyway

K: Be mostly Slovaks against the Serbs

N: Right. Right Well we will keep our fingers crossed --the embargo--I think maybe it is going to come off this time.

K This is the closest we have come to anyway--

I am in Washington on one of my regular trips advising ~~very~~various parts of the Government on narcotics law enforcement and I wanted to simply check in with you to register a couple of impressions I have -- for what they are worth. Which you are probably already aware of. One is the extremely complex government attitude toward the growing Turkish problem and t; make sure that you felt comfortable that you had all the information you needed in deal ing with what I think is going to be a significant foriegn policy question over the short-term. How we respond to Turkish interest in going back to narcotics cultivation and what this implies by relation there and elsewhere and since I knew that the State Department had recently been stripped of (for good reason) most of their narcotics specialists because they weren't doing a damn thing -- I thought I would let you know of my interest and if I can be of any help in identifying people in the government who could assist you or if I can be of assistance myself...

K: Emilio,

R: Hi, Henry, good morning.

K: How are you?

R: I was thinking things over because I am so concerned as to the success of the Washington meeting and I more or less came to an idea. The major ~~and~~ of the international and local press has been favorable to the Tlateloco meeting and I want to congratulate you on the instructions you gave to Kubisch at the meeting in Quito. All the people there in Quito mentioned the Tlateloco dialogue and the President of Venezuela who just acame into power came in saying, or mentioned the Foreign Ministers' meeting in Mexico. So now we have something positive in our hands and we should do something to continue it. I have an idea but I wanted your reaction before I go through with it. On the one part, this is the spirit of Tlateloco and the other part, I think we have to come out with something concrete because if not we are going to be criticised, especially now at you because it is at your home and your backyard -- and then I learn that Senator Mansfield said in the Senate and was reporting of the meeting in Mexico that a new projection and a new idea should be given of Cuba. That is how it came out in Mexican papers this morning. S o Henry, thinking of you as my friend on the one hand and on the other, trying to see what positive steps to make forward -- I don't want your people to beat you to the punch back home. So I was thinking, but I want your reaction on this -- give it a thought and then call me back -- if Mexico proposed at the meeting in Washington that Cuba should be invited at the next meeting of Foreign Ministers, not to the OAS, and at least for you as President, which you will be at the Conference -- not to have an objection, just to be silent. Then I would go this weekend or next weekend to speak to Fidel Castro and tell him that one of the things that has hurt you more is that everytime we speak about you going into the OAS thatyou start screaming and saying horrible things about the United States. This comes out also because at one press conference that I had lately, I said that Mexico ~~was~~ would always support the admittance of Cuba to the OAS but that Mexico would not go hat in hand to ask Cuba because Castro always comes back with nasty answers. Well, this divides public opinion -- some applauded it, some didn't. I know that in Argentina, people were very happy at me saying these things which was a little distorted but there was some who were very happy. We are the first that have always had relations with Cuba -- we still maintain the relations wi th Cuba and so forth, but we will not go hat in hand because everytime we speak about this thing Cuba , Castro or somebody comes out and says we were

R: (cont.) instruments of the United States and etc. etcetera. And that hurts my national pride. So I said we would not do this. Well, taking all these things into consideration and decide whatever you are thinking -- now that the famous economic block has been more or less retired to Argentina, etcetera, etcetera -- which is a very positive thing and which would also be worked through Washington -- what is your reaction if I put this there -- the majority of the countries will be for this proposal becuase I know they are happy with this thought and the only opposition would be Brazil, Uruguay, Paraguay, Bolivia and Chile. Well, if the idea goes through - - a tremendous success for your meeting in Washington to have a new attitude towards Cuba.

K: But I have a massive problem with my President and Emilio, I actually have to run off now. Can I call you tomorrow?

R: Yes, give the idea thought. I want you not to reject when I propose it if we get together and I propose it. Just to abstain.

K: Yes, but that may be impossible in Washington.

R: Well, Mansfield is already speaking about new ideas.

A: I think there may be some price tie-in and that may be the problem. They may have to make a deal -- the Algerians wanted the price kept up and maybe there was a deal they would lift the embargo if the Saudis agreed not to back the prices.

K: Does OPEC include Iran?

A: Yes. Venezuela, Nigeria and Indonesia.

D: Mr. Secretary.

K: Yes, Mr. Ambassador.

D: How are you?

K: Did I take you away from Marvin Kalb.

D: No, no., I am having lunch with the Foreign Min. We have already arrived at dessert so there is no...

K: At your home?

D: No, at the Hotel here at the Hilton. Two meals a day at my house a day is too hard for Vivian. Mr. Sec. if I may I thought just briefly to suggest to you what I think will be the topic that would be raised. On the Jordanian situation he is familiar with the meeting of the Prime Minister.

K: Is he there now.

D: No, he is not with me. I am in a telephone booth. Although I don't think he knows all the details that were suggested but in general the question of the corridor he knows about and the question of the Palestinian exile government he knows about. I think it will be helpful if you will also tell us a little bit about the visit of the King and what next.

K: Yes. But how much can I tell him.

D: Well, unless the King has said things that he hasn't said to the Prime Minister you can tell him everything but if the King said something, as you indicated to me, something special.

K: The King hasn't said anything but the Egyptians have had an emissary here and I thought you should know about that.

D: On the Jordanian business.

K: A little bit on the Jordanian business.

D: I suggest the following then...

K: Which indicates that they may want to play with Hussein.

D: Let us do the following. Eban wants it too. At some point we will just remain the three of us. Because I am not only concerned about Eban but I am concerned about the staff you know -- maybe you tell him in general terms what the Egyptian wanted without any operative thing.

K: He will leak it.

D: Then don't say it at all then.

K: I will tell it to you.

D: Fine. Nevertheless he would want a few minutes alone.

K: We will see that the three of us (are alone). About Syria, are you going to bring somebody over next week.

D: This is what I wanted to tell you. It is my--between you and me personally, Mr. Sec.--it has been my recommendation to have Dayan all the time. I got Eban to agree with this. Golda will go along with it. The big objection we have is from Dayan and the objection of Dayan is based on two elements: a) he says he doesn't believe anything can come out of it because only you can convince Assad to accept anything reasonable and therefore a second or third rate officer that will be sent here will not be able to do anything.

K: Look, will you tell that prima donna, that is perfectly true. I am trying to gain time. I don't give a good God damn. I am not even going to give that officer the real plan but I have got to gain time and I've got to be able to prove that I can produce Dayan.

D: Mr. Sec., this is exactly what I said, even if nothing will emerge out of this conversation it is important to indicate to the Egyptians that we are doing for the Syrians what we have done for ...

K: Exactly. I want Dayan over here then I am going off to Moscow. Then I want the Syrian. Dayan can be out of the country by then. Dayan has absolutely nothing to do with the Syrian. Then I am going to give the Syrian triple talk.

D: I understand. I suggest that you mention to Eban this. Eban is with us on this. He agrees that Dayan should come and Golda I think will go along with it. The Government will decide on it Sunday. So Eban is impressed with the feeling that you want Dayan, he would be able to cable Golda that he found that it is a matter for you that would either make or break the future negotiations.

K: Secondly, Mr. Amb., I want you really to study some of these ideas carefully that you and I discussed. I know that they are terribly painful for you.

D: You mean on the Syrian situation. What do you think I have been doing. That is the second reason why Dayan doesn't want to come.

K: I know. That's the first reason -- not the second.

D: No, no, the second one because any govt now that will suggest anything beyond Oct. line would be dead duck tomorrow. But discuss it also with Eban. He is familiar with this idea.

K: I know ;but we are back at the old business. You have to consider it in terms of the other alternatives. We know now that the French and the Russians have made formal demarches in Syria not to settle with me.

D: Yes, that I also mentioned to you when I saw you because we knew the French were active in Damascus on this. But I think you are right in assuming that the Syrians had rather do business with you than with their other friend.

K: Yes, but they are under great pressure. Therefore, I have to have some action going.

D: We will discuss it. It is not a simple situation -- I don't want to go into now but we are also ...

K: Mr. Amb., I have learned one thing. The Israelis will do everything with bad grace but it will eventually be the right thing and it is better to do the right thing with bad grace than the wrong thing with good grace.

D: That is correct, but Mr. Sec., we also learned that things that you think are impossible can always be...

K: That is the wrong lesson you learned. That was the lesson you learned from the Egyptians. I said this to somebody. I said it this morning that the Israeli govt reminds me of a fellow who wins at roulette ten times in a row and now they think that is the normal event and they make their budget on that assumption.

D: Only if you are the croupier.

K: No, no. Really. Don't expect this. I give you my word. My assessment is that the minimum you have to settle for is what I gave you. I am really serious.

D: I know, and believe me I have passed this on. I just want you to know..

K: I have no indication that that will be accepted but if it will be rejected at least we can split the Arabs on it.

D: If you can be 100 percent sure it will be rejected it will be easier for me to sell it.

K: O.K. We will talk about it tomorrow.

D: The other subject he would want very much to talk to you about is the Russians. There is great concern in Israel over the role of the Russians and between you and me there has been some criticism that maybe you don't take to severely the Russian statements in Damascus, the Russian behavior vis-a-vis the whole Middle East development and he would want to hear from you how you evaluate the Russian role in the Middle East.

K: Very dangerous. What does he want me to do , be tougher publicly.

D: I don't know. He thinks that the Russians should be put in their place in a more vigorous manner but let him explain his position.

K: That's childish but look I've got to go to the Foreign Relations Cmte. What questions have you planted?

D: No, no. This time I let you off easily. But you said to the Jews that unless I call you seven times a week I don't earn my salary.

K: No., I said unless you call me seven timesa day.

D: No, weekly they said, and they have started a campaign to raise money to supplement my salary now.

K: I told the Jewish leaders that you have a quota -- that you were a stakhanovite.

K: Mr. President

N: Henry, it is quite important, tell me in just a moment because I have some people waiting for me and I have to leave, but what should I say, as I will be asked about this embargo because of the Ford statement, your statement and then of course the leak out of Sadat about 2 months etcetera, etcetera, etcetera. What is your suggestion?

K: My suggestion is that the reports we have is that we have had no official report..

N: I know, I know, that is a duck you can take -- it is one I can't take. I can say simply that I am not going to comment on this because we have had no reports -- which of course isn't true, alright second point.

K: No, it isn't untrue, because we haven't had an official report, but you could say our impression is that they have decided to lift the embargo.

N: I should say that, that they have decided and then when they lift it for two months... suppose Henry, the more likely question will be, of course, is suppose, Mr. President, the report is true that they lift the embargo but only for two months with a condition -- what is your reaction. What do you say to that.

K: We have made a strong complaint to the Egyptians about this.

N: Privately, what do I say publicly, that's what I am asking.

K: I would say lifting it for two months really doesn't solve the basis problem very substantially. Or I would say this, ~~that~~ we move at the pace which is best suited to bring about a settlement regardless of the embargo and if they think they can affect us by it, that is not the right way of doing it. And I would handle it that way.

N: Ok.

K: But frankly....

N: We are not going to look at a gift horse in the mouth, we're going to take the two months at least and it will be awful hard for them to impose it again.

UNITED STATES DEPARTMENT OF STATE
REVIEW AUTHORITY: ROBERT L FUNSETH
DATE/CASE ID: 04 MAY 2004 200102979

K: If they have to reimpose it they'll never reimpose it. If it lapses after two months then it is a different problem and I haven't seen what it is they have actually decided. But if you show too much receptivity they'll vote it they might not do the two months thing.

N: ...show too much receptivity at all. That's what I am talking about. I am simply saying -- I am thinking of sort of kicking them about it -- about the two months.

K: I think the best way to say it is that we are moving at the pace that we think is most appropriate and that putting ~~xxxxxxxxxxxxxxxx~~ a deadline on the embargo won't affect our actions. Won;t speed up our actions. And that will give some argument to those who want to lift it unconditionally.

N: Are there any that do, Henry.

K: Yes.

N: Still.

K: Definitely. We had definite word.

N: ~~xxxxxxxxxxxxxx~~ Has the decision been made that it is two months lifting, isn't that what we are talking about.

K: Yes, but we don't know whether that two months, Mr. President, means they'll review the situation after two months, which would be meaningless because they'll never agree on reimposing it; or whether they mean, it means that after two months, they have to take a new decision to lift it again. If it is just a review after two months, Mr. President, it would be a facesaving nothing.

N: That's right, I get your point. Fine. I got the word, don't bother with Buchanan's call when it comes, ok?

K: Right.

N: Fine, I am all set, anything else?

K: No, there is nothing else.

N: You got the letter off to Brandt.

K: Yes, he must have it by now.

N: Nothing..

K: Nothing in the paper -- that won't leak on their side.

N: Well, I'll cover that in answer to a question I think I am not going to make a big thing by announcing it.

K: No, I wouldn't do it.

N: I'll get a question on it so I'll low-key it.

K: Right, I would low-key it and keep it in that general framework.

N: Yes, not get into a position of announcing it in a big way -- well, we have cancelled our trip to Europe -- we have never had a trip to Europe.

K: Exactly, I wouldn't put it on the basis of cancel, I would just say...

N: We;ll just say that we will take it when the situation is ready

K: And when the Declarations are ready.

N: They are not ready yet. The one on NATO is going along satisfactorily the one on the other is unsatisfactory because they have , the nine have taken a position at times that seems to be opposed to that of the United States. We , of course, do not ..it is a consultative process, you know what I mean.

K: Exactly, exactly the line and until we have that worked out there is nothing to sign.

N: And I am going to say too that this is all part of the same situation. The Europeans cannot expect cooperation on the security front where the American role is indispensible to their survival and confrontation ~~xx~~ and at times even hostility on the economic front.

K: And political front. That I think would be excellent. And I think they are beginning to cave. We had word today that Brandt has given orders that there has to be full consultation with us no matter what the Nine do.

K: Jack, how are you.

J: OK. I wondered how you made out this morning with our two friends.

K: Well, first of all I told them I thought it was a good idea to have you participate and they said they would talk to you next week.

J: Right.

K: And, in fact, they said you had already called them too.

J: That's right. I told you that.

K: Yes. I'd forgotten that.

J: I told you I told them I want to see them.

K: I hadn't focused on that. Secondly, they talked about some pretty excessive numbers it seems to me. They want a hundrednthousand. Ribicoff would, I think, settle for less. And some end of harrassment which we can handle if isn't taking two weeks, three four. I mean the demands. So , I didn't really argue because I don't think this is now the time. I have to see what I can get and then they haue to see whether theyre willing to take that.

J: Right. Well, the more I thought about the forumulation , the better I like it.

K: What formulation?

J: I mean, the idea of some kind of shorr tether in return for commitments which are acceptable.

K: Yes.

J: So, I'll see them next week.

K: Godd.

J: You're going to be around for a little bit.

K: I'll be around up until a week from tomorrow.

J: Good. By the way, how about that meeting yesterday. Did it go to your satisfaction?

K: I thought it was very good. I was very pleased with it.

J: Good.

K: How about you.

J: I felt very good about it and they were obviously satisfied.

K: I think it's really a committee that can be very helpful.

J: Yes. I really think it is too. Of course, what happens to Fulbright is going to be a major qestion.

K: Yes.

J: Henry, one other thing I meant to ask about and omitted,that was your view on where Italy stands. The reason I ask is I'm very good friends with - you are you met her here with

K: Yes.

J: And she is very very deeply concerned and might even contemplate for office there if she knew more about what was going on.

K: Where Italy stands in what way?

J: She just wondered what we in the United States thought about it's present posture. My own opinion which I've given her was that for the moment this government would be let alone as more or less as a caretaker government. I didn't see any radical effort to unseat it or throw it out or create some new situation in Italy momentarily, probably not more than a matter of months.

K: You know in the issues that concern us in Atlantic relations they're sort of wishy washy, they want to get along with everybody, they don't have a very clearly defined policy.

J: They're probably very weak, that's their reason.

K: That's right. I'm not saying it critically.

J: So it really does count for too much at the moment.

K: No.

J: Do we see - do we think this government is likely to carry on for awhile?

K: It's probably the only one they can form under the present circumstances. This government is essentially the same as the preceding one.

*

J: Right. If somebody thinks they can get something out of making a move they are very likely to just let it be.

K: That's my impression.

J: That was exactly mine. Henry, you did leave it with Wayne Hayes that he would come back to you with what he was going to do on these parliamentarians.

K: I left it with him that he would make an effort to do it and I had the impression he'd come back to me.

J: I see, ok, well' I'll talk to him next week.

K: I think it would be a good idea.

J: Yes. Are you possibly be in town for perhaps a small brunch on Sunday.

K: This week?

J: Yes.

K: No.

J: Next week?

K: Next week, if I come into town I d be in town only Friday and Saturday.

J: Only Friday and Saturday. Alright, well let me know and we'll see how you feel and what we might do.

K: I'd love to do it.

J: Alright.

K: Give my love to Marian and get some rest this weekend. For the first I've seen you look a little tired.

J: I will. I really will. I'll play a little tennis and I'll rest.

K: Good.

J: Fine, Henry, talk to you next week.

K: Thank you.

K: How are you Emilio?

R: Fine and you?

K: OK.

R: I received your very nice letter in which you told me you wrote a letter to the President saying that the organization was alright here.

K: It was superb it wasn't just alright.

R: Thank you. What have you thought of what I told you the other day.

K: For reasons, I find I cann't discuss it on the telephone it would really have a very bad reaction here with our President.

R: OK.

K: That doesn't mean I'd object to the principles, if it happens later on. As long as it isn't announced here.

R: OK, Henry. I have to go to see this person anyhow for bilateral thing that we have. What I'm going to tell him coming out of my own....

Conversation cut off.

R: We were cut off Henry.

K: Yes.

R: Look, I was telling you anyhow, not this weekend, but next weekend, I'm going over there to speak to this man. We have some bilateral thing that I want to arrange. I'm also going to tell him that I don't think or his foreign minister or anyone when we have this meeting, brings anything in their favor when they start speaking their mouth off. That this of course would be a way in the future in Washington, that they would concur to our meeting. I repeat I'm speaking just for myself and for my country.

K: You can certainly give your own impressions of my own views.

In the other hand, in some near future can be utilized in another country for their admittance this we would discuss with you me. I think there's much good policy and diplomacy just then speaking their heads without any results. This I am going to tell.

K: Right, and you can also tell them that anything you want to say -he wants to say to you, I'd be interested to hear.

R: Fine, that I will do Henry. Passing on another thing, of a bilateral nature I read in the paper here that an assistant to Jack Kubisch spoke about the possibility of money for the _____must be paid.

K: Impossible.

R: Yes, I know. I want to explain. I had my Ambassador call him directly and he said that what happened is the executive branch, you, logically presents this as a bill apart and they put it with two other bills that are for domestic purposes. That was what he said and that the Foreign Senate Committee that he thought it more logical how the executives have presented it, which is right. The only thing that we have in mind, I don't want even to think of.

K: I will personally testify for it.

R: OK, thank you. Last thing Henry, my President, just give it a thought, _____with a long time with our delegation, was thinking of sending a group of major investors in here so they can go and see all parts of the country, how they can ___in the shares and explain that contrary to general commands or attacks, we do want foreign investment, but according to certain standards, that is to have it in a sporting mind. If you can arrange a group of that kind, would help us very much in many ways, Henry.

K: OK, I'll do my best. I'll see you - I'll be in Acapulco without fail on the 30th.

R: OK. Now the 30th.

K: Definite.

R: How long are you going to stay?

A: I'm Jewish, I must say this castrated government of ours has more direction and more authority then any other in the West.

K: That's right. You know the President today canceled his trip to Europe.

A: Oh, did he. Why was that.

K: Because of the European behavior.

A: Which European behavior?

K: Their approach to the Arabs.

A: Oh, yes.

K: No, they thought that he was so eager to come they could do anything.

A: Is this a new approach to the Arabs or just an old one.

K: No, the one we've been screaming at them about for the last ten days.

A; What did they do, Henry? I'm was in Arizona,

K: They have offered across the board economic, finanacial, technical, bilateral common market Arab deal culminating in a foreign ministers conference between all Arabs and all Europeans.

A: I'll call him and say that you said for me to talk about it. I've written about gardens from my first return from vacation.

K: How was your vacation?

A: Well, it was awful, Henry. Because the doctor thought Stu ought to get away from this God-dmaned claustraphobia, we went out to Arizona. The blood separation was badly done and we were too far away and the dryness gave him nose bleeds anyway. We just had a gastly time.

K: How is he now, that he's back.

A: Well, he's so-so. I hope he'll be well enough. You may well see him on Tuesday night.

We never had any arguments. It was very hard.

K: Nancy will be down this weekend.

A: She will.

K: You doing anything for dinner tomorrow night?

A: No. Not a damn thing. Oh yes I am, I'm going to Billy Grahm's wedding dinner.

S: Yes., Mr. Secretary. Concerns.

K: I have two contradictory concerns. One is I don't want this discussion to be sent in 10,000 copies all over the world.

S: No, what I had planned to do was to do a very brief resume of what at least some of the NATO -- at least our NATO capitals might know what happend.

K: What would you say?

S: I would simply say that he asked specifically these two questions and that you had indicated that there might be three options to consider; we had no further intention of making proposals. If they had something to say that was useful let them say it.

K: Right.

S: Just put it that way.

K: That gets me to my second point. I don't want our Embassies to encourage the Europeans into putting pressure on us to finish, especially the EEC declaration.

S: Oh, no. I think we would simply add in this thing -- that this is the way it was put -- if the matter was raised it could be simply put in exactly this form but that we weren't asking, or pressing or in any way suggesting that they make any proposals. It is entirely up to them.

K: O.K.

S: I think we ought to take the position that...

K: Do you agree with this incidentally. What is your personal view?

S: My personal view is that if they -- yes -- if they come up with a worthwhile proposal then we ought to be more than willing to at least meet them half-way on the thing, so they don't get any feeling that we are totally now deaf and completely deaf to any suggestions they may have to make.

UNITED STATES DEPARTMENT OF STATE

K: Yes.

S: I think if we are completely deaf to it then this frankly plays back into the French hands who would say well they weren't really interested anyway

K: Yes.

S: That we ought not to perhaps specifically or positively encourage but we certainly not at this stage of this game discourage.

K: Yes, but what I want to avoid is that come in next week some meaningless EEC Nine paragraph and say now sign please.

S: I think that would be made clear in that you had said today very clearly and this would be the point that I would like our missions to have and that is it has got to be something that is not just meaningless words but a specific proposal.

K: And that we consider the EC Nine Declaration as it now stands to unbalanced for us to accept.

S: Yes.

K: That has to be made clear.

S: Yes. I will make that even clearer than what I have just written.

K: O.K. Fine.

S: One other thing while I have you. You've seen Don Rumsfeld's message. But it seems to me that is an absolutely non-starter. This idea that we go into a NATO Declaration of 14.

K: Well, if we go on that course of strengthening the NATO Declaration -- well he will get our cable .

S: He will get our cable.

K: Which will say the third option is that if we go on the NATO alone it must be strengthened.

S: Yes but it is quite clear that it has to be the fifteen.

K: That is clear.

S: He suggested we do it on the 14.

K: No, no. I guess he gets to the 14 in case the French don't cooperate.

S: What he is saying is that if we abandon the EC ~~new~~ nine declaration let us try to go ahead with the 15. The French might not be willing because if add this thing on consultation they won't like it. If that's the case then and Lunt has even suggested this perhaps we ought to do it on the basis of 14.

K: Let's not worry about that.

S: I think that is just a non-starter.

K: Well, that is not likely to happen.

S: I don't think it is either.

K: But you should say if we go the route of the NATO Declaration alone that then we would like additional paragraph on consultation.

S: Yes, that is in of course what you said to Von Staden so that should be in there.

K: Right.

S: I will send something up to you shortly on it.

"Information from most reliable source has reached us to the effect that the Secretary of State, in his briefing of the European Foreign Ministers, expressed the feeling that the utmost that could be achieved by the United States alone in the Middle East has been carried out and that henceforth we must bring the Soviet Union to participate in all future sets. This is what Dr. Kissinger intends to coordinate with the Soviets." Fahmy said this information had been passed to the Egyptians by a European state. He did not identify that state. K: How about Wednesday for lunch?

D: That is alright, 1:00?

K: 1:00.

D: Ok. As for children, they are welcome in Moscow.

K: I haven't decided to do it. You see the trouble is, it is their vacation.

D: That is alright because Brezhnev asked me to tell you that your children are welcome in Moscow. So all the attention will be taken and we will take care to show them what is worthwhile to see. So it is no trouble at all.

K: They will probably come back as Communists.

D: Well, we will try to do our best.

K: Are we going to meet in Zavidovo or in Moscow.

D: As of now it stands in Zavidovo.

K: Good.

D: This is,, he thinks it is better to be quiet there, as you know.

K: No, I like it.

D: Unless there is last minute change, which I don't think. It will be Zavidovo.

K: Do you think it is time enough to meet on Wednesday. It is the first time I have really a good stretch of time available, lunch on Wednesday.

K: Well, we'll try for a half hour tomorrow and we have lunch anyway on Wednesday.

D: Lunch day after tomorrow.

K: So we will try,...how are you, you seem to have a cold.

D: No, quite alright. Simply, I just arrived today so it is rather busy after ..it was a long way to go.

K: Are you coming back with me on my plane?

D: Yes, if you don't mine.

D: (Laughter) No, no. Thank you very much, I will come with you. Brezhnev set aside all this week for thinking..he is preparing to meet with you.

D: Right, he decided to go to Zavidovo to look in a quiet way for himself

K: Well, I look forward to it.

D: So, please let me know about tomorrow and we fix on 1:00 Wednesday.

K: Teriffic. No we will definitely find a brief period tomorrow.

D: And on Wednesday we will have a quiet discussion, Ok? How do you feel Henry?

K: I feel fine. If the Middle East situation goes on much longer, I'll kill somebody, but that...

K: Scoop, how are you?

J: Well, I am a little disturbed.

K: What happened.

J: Let me tell you. I have not called these people yet, but Marilyn Berger has the figure of 100,000 that we discussed.

K: Not from me.

J: Well, I am just telling you and Gwertzman from the Times has it.

K: No one on my staff even has it. Ribicoff had it.

J: I checked with him .

K: Dinitz had it and Max Fisher had it.

J: Max fisher had it, why would he have it?

K: He called me with it.

J: He called you with it? Where did he get it?

K : I don't know.

J: Dinitz got it?

K: Dinitz had it too.

J: Well, I don't know..

K: Look, it is totally against my interests to have that figure out. It reduces your flexibility totally.

J: Well, it just blows the whole thing.

K: Well, let's not say it blows the whole thing

J: Well, for all practical purposes.

K: Scoop, my assessment was that you gave me this figure to toughen me up and that it was not your absolutely last word. You don't have to comment on it. I had no possible interest to get that figure out. I didn't want to nail you to a figure.

J: No, I understand. But, I haven't called back to Marilyn Berger - I am going to do it now. But I am just going to no comment

K: Look, from our side, I will say that alot of figures have been discussed and we just are not going to comment on anything. And you can absolutely count on it -- on our not confirming it.

J: Right, right.

K: And I will have George Vest say tomorrow, explicitly at the press briefing that we discussed alot of things and any figure -- there was no final figure.

J: Right. Well, there are two main concerns which I have said publicly and that relates to numbers and harrassment.

K: That's right.

J: Those are the two key things.

K : Scoop, I thought I understood you very well the other day. And I have two objectives -- one to come up with something that you can support and secondly to let you take the leadership in it when it comes out.

J: Well, ..

K: I don't want to set up a scorecard on who got what.

J: The important thing is to accomplish something. I want to be cooperative.

K: Scoop, I have no complaint about our relationship on this and it is totally against my interest to put that figure out because it locks you in and as you know I consider it unrealistic. I have no reason at all to put it out.

J: Right. I wonder how in the world those two guys, Fisher and Dinitz -- well, anyway, I wanted to check with you before I called....

K: Well, if you take the position that no firm figures were discussed, I will support it.

J: Right, I am just going to tell them that I have no comment.

S: It would.

K: I think we have the Germans so scared now and we want them on our side.

S: I think you're right. That would mean you would have to stop in the Benelux.

K: I have to stop somewhere for refueling.

S: I don't see anything wrong with it.

K: Can you find out what this does to the schedule?

S: Yes. We would have to let the Russians know so they can get their escort there.

K: And how much it would delay it?

S: Sure. I'll find out.

K: OK, and if necessary we leave an hour earlier. Second problem is, since I'll be in New York this weekend, do you think I have to come back or do you think they can pick me up there. Give me your frank opinion, I don't mind coming back.

S: No, I think honestly it would be slightly better coming back, because there would be a lot of press.

K: OK.

S: I think it can be done the other way, but it will highlight your being in New York and that sort of thing. There will be a lot of press interest in this.

K: OK, well then I'll come back. I think I can use military transportation, now that the thing is lifted.

S: Oh, I think you have to. Yes, I definitely would. As I understand, that's all it takes - they were going to lift that as soon as the embargo was lifted anyway. I would use military. I definitely would.

S: No, that's right.

K: I guess Copenhagen is a little easier.

S: It's a little easier. It's the shortest way.

K: How much time can it add to it?

S: I think the only thing it adds is a slight loop from Bonn back up to the Baltic Sea, that's all. I doubt if it's a half hour.

K: Will you try to get the President for April 17.

S: I've already approached him on that.

K: What do they say?

DATE/CASE ID: 05 MAY 2004 200102979

K: Mr. President.

N: Hello, Henry.

K: We finally got the official text. What happened is basically it is lifted unconditionally by the majority. With the previsal that they would discuss it again on June 1. Which doesn't mean it goes back on June 1, it just means they will discuss it again on June 1.

N: Right.

K: The Algerians may say they agree to lift it only until June 1, so they make it conditional.

N: We don't care, we don't get any from them anyway.

K: That's right. I got a message from Sadat and he said he will help me get the thing concluded by the end of April, which is also my plan. The Syrian disengagement, so then there won't be any problem, anyway.

N: Well, of course, there must follow not only the disengagement, as you know, but....

K: Mr. President, with all respect, we don't have to linger to any permanent settlement at this point. The major thing we need now is the disengagement. If we talk too much about permanent settlement, when I was there the last time I talked to Sadat, he isn't ready to discuss that. That will get us back into Geneva. We should be very careful in making promises on that.

N: This is one thing we're going to do though, Henry. That's understand that. There is going to be a permanent settlement.
K
K: Of course, Mr. President. If we get into a forum where all of these issues get discussed together, we'll get killed.

N: I agree, but we don't want to leave any illusions here with our friends here that this is it, you know, and the Israelis think that they can just dig in and this is it.

K: No, no...

N: Because then this same thing will come up to haunt us next Fall.

K: No, the strategy That I see now, but which we shouldn't announce publicly, is that after the Syrian disengagement we should get a settlement between

Egypt and Israel and then we've broken the back of it. Then we can work on....

N: I agree. Palestine and Jerusalem last.

K: It's one step at a time. That's our advantage over the Russians. The Russians are trying.....

N: What about the note to Brezhnev, did we decide?

K: That's coming - that should be waiting for you.

N: It's still a good idea.

K: It's an excellent idea, Mr. President. I made just general review by you of the issues for the summit.

N: Good. And you have incidentally made it clear to everybody in the Department that there is to be no comment on this thing.

K: Absolutely.

N: And Simon should just really be ...

K: Haig and I called Simon.

N: Don't say a word, I'll say something tomorrow night. I must say it categorically but I won't go too far. I can't do it in a half-assed way. You see what I mean.

K: We both called Simon, Mr. President.

N: We'll the advantage out of this and if later on it would be a disadvantage we'll take it. It's fine. It's good news. Good news to get it done this far.

K: On the other one, I - there's no question that after the Syrian disengagement we have to go to a permanent settlement.

N: Yes. Looking at the trip thing now, that's the other thing I want to raise with you.

K: My recommendation would be for you - the Egyptians are recommending that around May 20 would be best for them. We can announce it early in April. We can have a few others ahead of the Egyptians. I would recommend that you start in Egypt.

N: Put Egypt first.

K: Yes. Because you'd get a tremendous reception. He could smooth the way for you and go to Morocco last. That way you'll have two tremendous receptions. You could go to Morocco first.

N: Morocco will be good. It should be Egypt first, they're the hard one.

K: If you go to Egypt first, you'll get a tremendous reception. You'll get a good one in Sudan and Saudi Arabia. You'll get a great one in Amman. What you get in Damascus, only the devil knows.

N: That's right.

K: Then Israel you'll get a good reception.

N: Maybe.

K: No, you'll get an excellent reception.

N: The point that I make is that - I might be asked about that - I doubt it, but if I am, I'll say we have a number of invitations we have under consideration.

K: And now that the embargo lifted, we can explore them more fully.

N: We're looking at them, right. On the European thing, you want to stay about where we are.

K: Mr. President, it is going so well, the French Ambassador today made a public statement praising you, but you should stay tough. We've put the steam in the kettle and we're going to get everything. I think you should say you've made your comments. The Atlantic relationship is of course, the corner stone and now it is up to the Europeans. We have for a year expressed our views and when the Europeans have reacted, we will meet them more than halfway. If they ask you about a trip to Europe I think you should say let's wait how the discussions go. They will be on their knees begging you to come before too much time is over and when you come now you'll come as the strong man.

N: What I was going to ask though was on the trip to Europe, we put in terms that having laid down what we did, can we say the matters are now under discussion.

K: On the trip to Europe...

N: No, no, not the trip. The matters of issue.

K: The issues are now being under discussion.

N: The matters are now under discussions, we hope to work them out.

K: It's up to the Europeans and we will certainly be conciliatory in working them out, or something like that. I would not let them off and say they have already met our demands.

N: They haven't, no.

K: But this is turning into a smash. The French Ambassador today held a public press conference in which he said they're are no serious differences with the United States. France respects respects the U.S. as a great ally. Things we've been begging them to do for a year.

N: OK, Henry, thank you.

K: Right, Mr. President.

G: Were you unhappy about the remarks made the other day by the President. Would you rather he hadn't said what he did?

K: Yes.

G: I felt that it was unnecessary. I mean, it serves no purpose.

K: It's sort of unfortunate, because what I said wasn't planned. And it gave the Europeans an opportunity to totally confuse the issue.

G: Yeah, it was very unfortunate.

K: I mean I spoke to a group of wives in an informal way and those morons in the State Department had the press in there without telling me.

G: Well what actually, I mean, I never could get it out what you in fact said to them. What did he mean by.....

K: I said nothing of any consequence, but by the time they got through distorting it, it was hopeless. I wasn't even talking about Europe. I was talking about a nuclear war, and I said, let's not kid ourselves, no government is going to survive the catastrophe of a nuclear war. No European government that ended World War I ever recovered its legitimacy. That's absolutely true.

G: Yeah, fantastic. Well that's interesting. I read the thing and I couldn't imagine what you had said.

K: What I had talked about was the impact of a huge catastrophe caused by governments on its population. It had nothing to do with the current crisis. It wasn't set in that context.

G: Of course. Well, again, when it comes out of context it's a meaningless phrase. I mean, it just doesn't mean anything. And nobody has understood it.

K: And in that context it's one hundred percent right.

G: Yeah, well, Henry, what exactly, what do you see. I mean, is it just ~~[illegible]~~ leave things alone there?

K: We're not going to make another move.

G: Well, this is what I feel very strongly. Has Bruce been going around importuning people?

K: No.

G: That never took off.

K: No, we canceled that.

G: I see. Is it because there was just no point.

K: There was no point. We knew what the facts were. I mean, everyone knows what it is.

G: Yeah, and is the severance in the British government at all helpful or even more problematical?

K: Well, in the short term it's helpful. In the long term it will be more problematical.

G: Yeah. And the Germans are just continuing to say, we don't know what the argument is about.

K: That's right. They're waffling all over the place.

G: Yeah. And why essentially? Just too worried about the French, or just a feeling let's not rock this boat as well as so many others?

K: I think that and the emotional need of the French. The French are beyond my understanding. DeGaulle I understood.

G: Yeah. Well the other day at the West European Studies this man Bahr who used to be the head of the French Delegation to the Common Market was there. He began to talk about the difference in generations and about the fact that the new generation doesn't understand things. So, when it came to questions, I mean the whole thing was an unbelievable performance. For example, among other things, he lashed out at the Dutch in response to a question. I think the question either from Kimmelberger or Leonchev. In a fashion, you cannot imagine the _____ "[speaks in French.]" On and on this way. But then I asked him, I mean, he went on and on talking about difference in generations. I said you sound positively _____. I said after all, this is all that he's talking about. But what would you have to do if you were an American to prove that the object is not simply to dominate you.

G: He said you would have to behave differently than you are now behaving.

K: Like what?

G: This is the next question. This is all in French. I said, "[French]", and again talking about the oil thing in terms of no planning. You know, I reminded him of all the things... Some day, Henry, I must show you however this Bill Bundy letter, and I'm sure you've heard from Nancy the end of that thing, where he said the crisis is over, as I told you, and France is now -- you know, that's how the whole thing ended.

K: Yes, that's what he told me too.

G: Unbelievable.

K: He wanted to get me to say that he shouldn't print it. And I said, no, I thought this was just putting a bandaid over a cancer.

G: Now what is his game here, Henry? Is he anxious not to have anything in there that would upset the Europeans? Is he anxious not to have anything in there...

K: He is anxious not to have anything in there that supports the Administration.

G: That's right. That is what I... I mean this is what Dan Bell and Irving Kristol and others said. But someday I must show you a letter from him that is theoretically a letter of criticism. I mean, this is not the last one. In the end he simply said, it's all over, as I told you, I mean, there is no problem anymore.

K: Yeah. What are you going to do with his article.

G: Well, this is the thing, Henry. There's nothing to do. I made a change in the beginning and sent it to the Times. The Times felt that their Laquer(?) piece is rather like it, which in a sense it is. But what I now feel, and this is one of the many things I want to talk to you about, I really feel that what I have in this article is the basis for a very important longer article. Where do you public it in this country. What is a serious journal? Again, you don't have the time to read this foreign policy, but it's just unbelievable crud.

K: You know I would have to say we are practically being...you know, we had a good foreign policy going and they are now killing it.

G: Yeah. But what can be done?

K: They are moving to the right of us on detente.

G: Absolutely. This is the thing.

K: I mean the very people who were accusing us of being warmongers, insensitive, immoral, and 5 thousand other things, now think we are not tough enough on the Russians.

G: Absolutely, but this is what it's all about.

K: The people who thought we were too tough on the North Vietnamese say we are too soft on the Russians.

G: That's right. But, Henry, how do you get anywhere in this country - how do you get any of these things said?

K: I think we are heading into a third republic state. We are going to become ungovernable. The press is going to be our parliament.

G: What can be done?

K: I don't know.

G: But this is it.

K: You know, they're not going to rest until they've torn me down.

G: Well, again, and you know some people imagine that I write this way because of a personal relation with you. It has nothing to do with you.

K: I know a clash with Europe won't do it because the Europeans are going to collapse on us before it's done. They haven't got the nerve to continue it.

G: Again, who is going to collapse first there?

K: The Germans, the Dutch. You know, we're going to kill the Davignon committee and nobody's going to make a decision anymore without checking with us.

G: Yeah, but the bigger thing, Henry, is that there is one kind of theme that is coming through from the left all the way over to the right. I mean not all the way over to the right, whatever the right is, but it is one kind of opinion and you cannot get another thing said. And again one thinks of trying to start something new, but what do you do - you can't start a new newspaper, you can't start a new journal. It would take years to build it up. But there is simply no outlet for a certain kind of opinion. What you just said about whether it's Third Republic or not, that's another matter.

K: Well, and they're moving with amazing uniformity. You know, last year the Democrats were hitting us for a $60 billion Defense budget. This year $95 billion isn't enough. Last year if you explained high manpower costs they'd sneer at you. This year I had Cy Vance and MacBundy in the other day and ~~they said~~ and I said, look, our budget is higher in detente. Oh, but that doesn't mean anything. Manpower is such a big slice of it and inflation.

G: Yeah.

K: Which is true, but they wouldn't have said that last year.

G: Yeah. You know it really was, Henry, and not for just one policy or something else...

K: But then you know, the suicidal...[end of tape]. ....but they systematically go after me.

G: But their illusion is this is why you have to look at least at this Brzyzinski thing. Because after all what Brzyzinski is telling you is, in a sense what it really is, it is a kind of...

[redacted] B6

G: Yes, but you see the only thing that I think can save this. May I just give you this to reflect on - you've probably reflected. I keep going around with these people and saying one thing. If you think there are going to be Democrats in the White House in '77, you are really mistaken. You aren't gonna make it. Not one of you are gonna be there. And, incidentally, I said it to someone yesterday, here in Washington, and, you know, I could almost see the man blanch. They have just taken it for granted that they're gonna be heirs to all this - it's simply a matter of waiting the thing out. It is by no means certain, Henry.

K: No, no, I think that Gerry Ford could probably beat anyone except Jackson.

G: I think he could beat Jackson. Incidentally, I don't think Jackson can get it without ~~suffering~~ such a struggle, including the killing-off of Chappaquidic, which isn't gonna be all that easy, because Chappaquidic is gonna stay in long enough for him to ruin the chances of a fair number of other people. What I am really worried about is that there is the illusion. I mean what you have in Brzyzinski is the illusion that in '77 he'll come back because he is the head of a trilateral commission that believes in a thing called Western Europe and also believes in a thing called Japan and these bad relations will be restored.

K: Well, first, our relations with Japan aren't bad. Secondly, if last year proved anything it's precisely the attempt to restore bad -- whatever I tried to do other than what the trilateral commission says it is trying to do. That's exactly the mistake we made. But when you listen to the establishment we always go wrong. That's right, if we hadn't lifted a finger with Europe nothing would have happened.

G: Yeah.

K: How is he going to establish good relations with Europe, precisely how? What ~~xxxxxxxxxxxxxx~~ concrete steps would he take? I don't think he's gonna get into office, but supposing he did. How would he do it?

G: I have no idea. He has no idea. But it is a new kind of nostalgia, a nostalgia for something which again never existed.

K: Look, Kennedy tried, it, Johnson tried it, Nixon tried it. Isn't it probable that there's something organic he re?

G: Yeah, yeah, but also, Henry, what has got to be seen is these people still think that it is if they had any sympathy for us, which they lack, it is in respect to a recalcitrant France. It is France that is impossible. And the failure to see that it is a much deeper thing - that it is Europe in the terms - I continue to feel that what I wrote in that article is essentially right. You cannot understand it unless you understand a place called England, a place called Germany.

K: That's right.

G: You cannot understand this phenomenon.

K: Well, I think we'll let them stew in their own juice now. I'm sorry frankly that it reached these public proportions. I think if last week hadn't happened and we had just slowly disengaged from Europe and let them stew in their own juice it would have brought them back better than this public brawling. I wouldn't have had the President say what he said.

G: I didn't feel you did. I just knew you hadn't.

K: And you know I wouldn't have said publicly what I said. Although what I said wasn't so bad, if you read it.

G: Well, but this is it, you see, I only read it out of context.

K: What I said, two things that were taken deadly out of context. I said the big problem in this world is to create a cooperative world structure. There is a paradox that we know how to regulate relations with our enemies but we have not managed yet to create a cooperative structure with our friends - which happens to be true. That was one quote they played with. The other one was the legitimacy one which I put in a totally different section and which dealt with a different subject.

G: Yeah, well, Henry, again I don't want to quote my own article, but I think the thing really is to let the thing simply be. I think there should be no more talk about any visit.

K: No, no, that's out.

G: I think there's no need for it. And I think just play the whole thing down and see what happens. But what I still worry about is what is going on in this country, which again, nobody is writing about.

K: No I think the better strategy would have been just to let it die without an uproar.

G:] Yeah, but now that the uproar has happened, Henry, do you still not think that one should just forget it?

K:] I think one should just forget it, but you know now the trouble is the Europeans are gonna make an overture and that's gonna keep it up and up and up. They're gonna try to rescue these declarations now.

G:] Really?

K: Yeah.

G: Because they still think that that's what the issue is about.

K: That's right.

G: Who is there there, Henry, that you really do feel understands? Does Giscard not understand what's going on?

K: That I can't tell.

G: I mean they speak with one voice, with the master's voice.

K: Well, I don't know who's doing the speaking. You see, what makes us think they're nuts is whenever I see Jobert alone he tells me he disagrees with Pompidou.

G: Yeah. But it certainly doesn't sound that way.

K: No, but it isn't true that we have ever had any controversy. That's French pu blicity.

G: Yeah, very interesting. Well I am going over for about - I'm leaving a week Friday - for various things in connection with a book of essays that I've edited that is coming out in Italy, and things, and I really frankly to answer your question about what I want to do with the article, I would like to make it into something better, but I frankly don't know - you know, better in the sense of not fleshing it out and dealing much more with the real difficulties of some of these x mysteries(?) But once you did, I have no idea in this country at this moment where to put it. I have no idea who to offer it to.

K: Yeah, I agree. Harper and so forth wouldn't do it?

G: Who reads Harper?

K: Yeah.

G: Who reads The Atlantic?

K: Well, that's true.

G: I mean, The Atlantic wouldn't do it. Harper's might, but who reads it? So this is really, I think this is the most serious matter that exists, that there is this kind of nostalgia for moments when we were able to get on with our allies and when we were fairly tough with the Russians. Again, what you say about detente is absolutely true.

K: But look, they're not going to maintain their toughness. Do you think that Hinster(?) would be tough with the Russians for two years once he got into office?

G: But, Henry, he's never going to get in. I feel this so intensely and so certainly ... that would mess things up.

K: Yeah, well that I'm sure of too. Besides he couldn't stay in even if he got it.

G: It's never gonna happen. But it is the creation of a myth that is going to survive until the 1976 election.

K: I know.

G: And I think this myth - we're aware of that this myth has to be taken apart. And when his doctors say, look, I mean again the Europeans are constantly talking about detente. Who in God's name pushed detente with real ardor if not the Europeans. And the British seemed the _____ ones among them.

K: Okay, Steve - I know, I know, when Heath came into it all over here and the minute ~~the~~ detente ended the Europeans would be in Moscow. Okay, I've got to run.

G: Henry, bless you, and you don't think you'll be here at all next weekend.

K: I'm not sure yet.

G: Well, I'll just try to get to you from time to time, but this is not the man to do it through. Can I call Eagleburger?

K: Call Eagleburger.

G: And just say that you told me to.

K: Yes.

G: Okay, thanks. Goodbye, Henry.

K: Goodbye.

Z: How are you? I hope you have a lovely day in the beginning of the week.

K: How was Brasilia?

Z: Marvelous. It couldn't have been better.

K: Good.

Z: The weather was very nice. And Mrs. Nixon actually took the show. It was a very, very good idea. I think everybody was _____ her, not only the Brazilian people but also different Delegates. They were very happy to see her.

K: Good.

Z: She did a beautiful job.

K: Always does.

Z: She does really indeed. Now since I have been allowed to call you for a _____ again, I got a printed message from him through my sister.

K: Yes.

Z: He is wondering whether the time which they've been insisting that he woul d have you as his guest -- His Majesty -- in that first island --

K: That unfortunately will not work out.

K; I have been telling a group of newsmen the other day that I genuinely felt that it was in the national interest that you return here. So I just want you to know that I really think that it is important.

F: Well, I appreciate that very much and I think these things are very subtle but I think they mean something to thoughtful people. So I think that is a very, very good way to do it.

K: Now I don't know, Mr. Chairman, how you want to be kept informed. I haven't bothered you because of your preoccupations. But, are you coming to Washington at any point -- or how should we do it?

F: Well, I -- we are so preoccupied now with trying to get people together -- organization and find ways and means to raise enough money to open the headequarters and employ some of the people that need to be employed in this kind of a campaign right away but I do want to come back -- I need to come back for various personal and public reasons. I instructed the staff before left to negotiate with your staff about the possibility of few days hearings on that matter we talked about the last time.

K: Yes. You still want that?

F: Well, I think it would be useful to you and I ought to come back -- it would give me a reason to come back for various things -- you know.

F: That's all right. I just thought when ever was convenient for you and you remember what it was about.

K: Oh, very well.

F: And it's only a day or two -- certainly one day with you, I guess and then a day or two with somebody else.

K: Well, we will do our best. It might be better to do it after my return.

F: That's right. Oh, I think so. I wasn't thinking of it before. After you return -- you know this is on this general problem -- program of detente and I thought it would serve both your purposes and I think it would be wise to call attention to it from my point of view, too.

K; Well, we will do it. You can count on it.

F: That would probably be the middle of April.

K: Right.

F: Well, how are things going? What is your estimate of what is going to happen on the oil problem.

K: I think it is going to be lifted within the next two weeks -- maybe today maybe next week at the meeting of the Foreing Ministers.

F: Yeah. This is just for my information -- I won't quote you at all -- does that mean there is a possibility of a settling down,of oil reaching a more economic level?

K: My guess is that it would lead to a decline in prices.

F: It ought too.

K: If they lift the embargo and if they increase production.

F: Yeah.

K: Both of which is likely to happen that's almost certain to depress the prices.

F: Uh-huh.

K: The other day they had an auction in Kuwait even at present levels and they couldn't get more than nine dollars a barrel.

F: Uh-huh. That's coming back to some reasonable level.

K: So we think it is likely to come down to about seven.

F: That sounds good to me.

K: Now on the Syrian thing, Mr. Chairman, we are moving rather slowly deliberately because we wanted it to be -- there has got to be a lot of work done in the Syrian domestic structure and a hell of a lot of work on the Israelis.

F: Uh-huh. Well, so long as it is moving and in the right direction that's what . . .

K: No, it is definitely moving.

F: Are you feeling all right?

K: I feel fine.

F: Is Congress doing all right? Is the Commitee acting all right?

K: We had a very good session with the Committee last week. Unfortunately we missed you but it was Sparkman -- he conducted it unobtrusively and it worked very weel. I think it is one of the best things -- the relationship between the Committee and the Executive and you have had a tremendous role in shaping that.

F: Well, I think it would be very helpful to have those -- I would hope they are good meetings. I know they always are when you are there and I will look forward to ϕ it. I ought to get back for a little refresher anyway.

K: Good and look, when you come back why don't we have some visible appearances together if you think that would do any good.

F: All right. That would be fine.

K: If you thought -- you know I leave it entirely up to you.

F: Okay. Have you ever heard anything more about the matter we talked about from the community . . .

K: I've used my influence and I have even talked to Javits about it. And he told me he had talked to a few people.

F: Uh-huh.

K: But I don't think they are all out to get you but I may be wrong.

F: We keep hearing diverse views, you know, some of it not stemming from New York but from Memphis but anyway that is a matter that you won't be getting involved in. I just thought if you heard it by the way.

S: Fine. Thank you for being available. We had an interesting little coffee session for the last hour with Eban. I thought it would be useful for you to know the sort of going attitude which was expressed to him unanimously by Symington, Humphrey , Sparkman and myself, all of us vest the feeling that Jackson was being intransigent. The word was used several times.

K: Terrific.

S: And it was worrying us and in one way or another, each in his own way, they developed the thought that - well Humphrey said, we've got to get something, more from the Russians then we're getting. Everybody hoped that you would gain two things. A progression above the 30 to 36 thousand which was Eban's argument rather than a lowering and some assurances of an end of harrassment in special cases involved. It should be conditioned on a reformulation of the Jackson amendment, in such form as you could work with it. And the word reformulation was used a lot. The point is that all four of these, the people, three of them Democrat said that they were' becoming increasingly uneasy for fear that the failure of the trade agreement would be hung on them, the Senators. Of course they met on the people who pushed the Jackson agreement. I told them of the possibility of defection from the signatories. I said there are not many but I overheard some talking about that. Eban interposed no objection except that he's bargaining for those two points.

K: Yes.

S: There was an agreement that they hoped very much you could get it but there was also an understanding that it should be conditioned on - you could accept it be conditioned on a reformulation. Some of them thought, the Democrats, that they ought to have private talks with Scoop and ask him not to make it impossible for them to work something out.

V: Yep.

K: What do you mean yep, what are you doing about it?

V: I've got that and ASP has the tape -- has some of the quotes from your tape as well. Which means that really the tapes are not private and they are not being respected. And it raises the question whether you wwant to go on with tapes because they are not being controlled by the owners.

K: Yes. We can't go on with tapes.

V: I have already gone to the record of the New York Times and it means that Bernie Gwertzman's tapes are picked up by other New York Times writers and they begin to quote from them. We had that with David Binder and I raised that with him. So I think the real answer is, sir, if we have tapes they are not going to be properly controlled. They are not controlling them well.

K: Well, we won't permit it anymore.

V: I think that is the answer. If you want control -- when we go back in your office they can hear what you are saying in the plane but tapes are used and misused and there is no question about it. I have a whole documentary practically episode on that.

K: Now again, I, of course, don't know what I said in that briefing.

V: Well, I have both records in tape, sir, throughout each time I sat in with you.

S: Helmut and I worked out an agreement in principle.

K: Don't give me that Helmut business, you've sold us out again.

S: Well, I was just doing it on your account. You told me to.

K: (laughter).

S: But I think it's something we can sell. Casey agrees on it and he will follow up and try to....

K: What are the major...

S: There is one sticking point that Helmut said he would have to check with Brent on but from the way he described that, I don't think he'll have any trouble. The tricks of the matter was the loan and the amount of money per year that the concessionary aspects of the loan would generate. Basically what we've got is about $150 million per year. Which is quite a lot.

K: Yes.

S: The problem was jockeying around these numbers and getting them fixed so that he can describe them in a way that fits his political circumstances and we can describe them in another way which fits ours and we both understand that and arranging these terms so that they will yield us the money that we need. I put in this call while he was still here so he could speak to you but he had to go, but he sends you his regards and says he appreciates the chance to talk with you today.

K: That sounds terrific, it really sounds very good.

S: He continues to be anxious to have a meeting of our little group in Bonn.

K: I'm for it. I strongly urge him to do it.

S: I gave him what dates I can although it would stretch me a lot to do it.

K: Now George, as long as I've got you on the phone. You mentioned the other day you might stay until July 1. I don't know what these characters are thinking of a replacement for you. Do you know?

S: I think they expect the name Bill Simon, but I don't know.

K: I personally believe that given all the domestic uproar we're going to have, it would be better if you could stay until July 1.

S: Well, I'm not particularly anxious to, there is the only rationale for it really is the fact that there is this Russian meeting and there is the C-20.

K: Exactly.

S: Meeting to finish off. If Helmut said - he inferred to me that you and he had talked about that. He has pressured me some to stay. Why don't you take it up with the President or Haig or somebody.

K: OK. I just didn't want to do it without having talked to you.

S: I think we're in business with this offset thing, and I think Schmidt will again be able to present himself as a person who knows how to work things out.

K: Terrific.

K: Are you going to get me an answer tomorrow morning on this.

S: Yes indeed. I've just finished it.

K: What's your view?

S: It's interesting there are several permutations and combinations that you can go with this thing. Some of them would be quite defensible and not bad from our stand point. I think the main thing for us is to hold ours to our present level of deployment because obviously the higher we want to go the higher they'll want to go.

K: No, but I told them something like 5 to 3.

S: There are all kinds of funny combinations which don't make the throw away thing look too bad you wouldn't put it in those terms. For example, we would have 50% and they would have 20% of there - 50% of our light(?) missiles and they would have 20 of their medium. That would also make it possible...

K: But can we express it in numbers? Rather than in percentages.

S: We're going to give you several...

K: I don't want it in percentages.

S: I want to give you several ways of expressing it, there will be verification problems if we're not careful. We have to do it by fields or we have to do it by what we already know has been converted to be compatible with SS-19's and SS-18's. We've got to keep that in mind and....

K: That is not at all...all we need is a number for now. Then we can get into the verification problem.

S: I'm sure I'll be giving you more than you want, but I want you to have the whole problem when you talk.

K: I don't want to talk, he wants a paper I can give him because Brezhnev has the whole gang of them in Zavidovo.

S: Then I'll give you two things. I'll give you a paper also.

K: He didn't think it would be good for him to send the paper back I gave him.

S: OK, that was another question I meant to ask you. But you gave it to him anyway. I'll give you a piece of paper that has fixed numbers in it, but I'll also give you an analytical memo that tells you how we got there.

K: Right. Well what are the numbers. Can you share them with me.

S: 240 is one of them.

K: Look 240 and ... 240 19's?

S: That's right.

K: They'll never accept that.

S: Another set of numbers is 64 18's which is what they've already got converted and 120 or maybe 180 19's. That takes you way out of wack on throw weight.

K; How far does it throw you out of wack on throw weight.

S: Well, 2.1 to 1.5 or something like that.

K: They say that the throw weight penalizes them for their backward technology.

S: Yes. To try and do it on the basis of war heads gets to be extremely difficult.

K: Because each of their war heads is bigger.

S: Megatonage in any case is way out of wack because of the size of their missiles. I guess the conclusions is you really have to do it in tubes.

K: What do you mean?

S: You have to do it on launchers rather than war heads. We'll give you what the war head figures so that you know. But I don't think you can express it in terms of war heads.

K: We would have more warheads if it's 1500 to 240...

S: In that time frame we would have more merve(?) war heads on any variation you can think of.

K: They'll never accept any of this. OK.

S: Al least we have an opening.

K: Right, thank you.

S: First on the subject of MFN, I'm more or less aware of what you've been doing and it sounds very constructive to me. I have the feeling that it is a pretty urgent issue.

K; I've talked to.....

S: Subject you could bring up on this Russian trip.

K: I've already raised it.

S: You have.

K: With Dobrynin.

S: OK, very good. Second, do you have any thoughts on how to handle this Cuban question. As I gather the President is taking a hard line on it. What do we do, start putting people in jail. The Canadians have just gone ahead. They're furious of course. Or shall we just wait a little bit.

K: I wouldn't take any action yet. He's got to yield on the Argentine case.

S: He's got both these cases and they're both tough.

K: He approved the Argentine case and he disapproved the Canadian case. That doesn't make any sense. So I've sent the Argentine case back into him.

S: OK, we'll wait in hopes that maybe he'll change his mind on that. Third, and this is sort of on a personal level. John Dunlap has a friend who is the head of the Central Planning Office in Saudi Arabia.

K: Oh yes, Nazir.

K: No. I just want you to know I know him.

S: Alright. You know him well. He has written to Dunlap asking John questions about how to organize manpower things and on an earlier occasion he wrote asking if John would come over and give him some help.

K: Yes.

S: I took that up in the earlier case with Brent Scowcroft and got back the message to say no, not until the embargo is lifted. John then got a call from somebody in the State Department, in effect saying, who the hell you think you are. That offended him.

K: Wait a minute now, why would somebody in the State Department call him at all.

S: I don't know. I'm just saying, in light of that, he brought this letter to me and he said, I'm wiling to do what the government wants but I'm not willing to get myself all screwed up. But if there is something I can usefully do here, this is a contact, this is a person that trusts me.

K: I think he could be useful.

S: Yes, so do I. I just wanted to let you know this.

K: I think the world of John Dunlap.

S: All around in the State Department.

K: I'll get them to shut up, it's an unbelievable place. I tell you, your one guy - Hennessey does better work than all my Latin Americanists put together. He came to a meeting yesterday and he was terrific again.

S: Good.

K: He's got some good ideas for you on that trip.

S: Well, we're trying. I told him after you and I talked that we should try to think about this trip as an extension of your efforts in Mexico City.

K: He's done it beautifully from what he's told me.

S: Good. Well, I just put that into the back of your mind on Dunlap.

K: Look, we are trying to start a big bilateral discussion with the Saudis. As soon as I get an answer on that from them, he should be one of the people going.

S: Why don't you put him down on the list of people that meets on that subject and then he can come on some things. I would also suggest to you that you put Eberle down on that.

K: Alright.

S: There are a lot of things involving our trade relationships around the world for which this has implications.

K: Right. I can tell you there's nothing I don't think that Dunlap is qualified for.

S: Dunlap is extraordinarily talented. He's also totally reliable.

K: And unselfish.

S: And unselfish. He's a very very good man.

K: Frankly, in my mind he would be a good possibility to replace you. I don't know how much he knows about financial things.

S: He knows plenty. He learns, he understands things. Anyway, I think it would be good to involve him in this effort. Next item, and I'm sort of on two sides of this issue. Yesterday Schmidt, after we got through with our negotiations, made a comment about the energy conference along the lines that he hoped we wouldn't let it drop because he felt some momentum was gotten up and he said if you have problems like the Foreign Ministers taking that initiative. He said I was distressed by that and he said if I had known ahead of time that they were going to do that I could have headed it off, and would have. At the same time he says he hopes that we don't drop the initiative because then it will set him back and others because it will just be described as a gimick of some kind that we used for either domestic purposes or some other purpose, but it wasn't really something to be taken seriously.

K: We won't drop it.

S: I think as I know you agree, he's worth paying attention to.

K: He's our key man.

S: I think that we need to think that over and in that connection it seems to me we need to have some way of making it public, that we are having these discussions with the Saudis and the Iranians, or we will. So that they don't seem to be an act of bad faith, assuming we're carrying on in the energy conference. That is to set it properly. That's not easy to do, I know, but it seems.....

K: When they are scheduled we can do it, but so far we don't really have a formal agreement yet.

S: Right. I think it is important to give attention to how that information is put forward so it doesn't seem contradictory to other things.

K: Exactly.

S: Finally on my list, there is a subject that's been under discussion for some time on international investment flows in the CECD. Casey has been handling it in the State Department. The subject has been, and I guess mainly because the State Department seems to be our representative in the OECD. Right now the subject is in danger of sort of falling between the stools. It's something we have felt, was of course, to discuss and with Casey gone, his thrust disappears and anyway I think there is probably more expertise on this subject in a fellow like Denham (phonetic) than you find over there. I would like to suggest to you that you consider having some different form of representation in the CECD and perhaps let Denham handle it or somebody else handle it.

K: In principle I'm in favor of that, but these things, they always bleed so much over here. Let me raise that here.

S: You've got to do something about it because there is a meeting scheduled that may get postponed or we may have to ask for a postponement because we're not really ready with a strong person to put forward there.

K: Right. I'll try to get to it tomorrow.

S: OK, now finally I have a suggestion for you for your Under Secretary of State for Economic Affairs.

K: Who?

S: The name is Alan Greenspan (phonetic).

K: Oh yes. I know him.

S: You know him?

K: Yes.

S: I think he's a very talented fellow. I don't know whether he could be gotten to do it, but he's smart as he can be. He fits your description of wanting somebody who is analytically able and is experienced and savvy. He's more of an analyst then he is an operator but he has enough of the operational, not to be sort of brittle. He is a very good analyst and knowledgeable fellow.

*

K: OK. Let me look at it.

S: OK.

S: Well, I don't know whether we'll send anybody, but the number two man is a very very good man. A very bright fellow by the name of Horan. But let me think this over because we've just gotten word today and I'll have some kind of recommendation on this thing tomorrow.

K: But can we take it easy now on overloading that system.

S: Yes, we certainly will. In fact there hasn't been a discussion with the Saudis ever since that first batch, which is about ten days ago, because Akens has held o ff waiting for Saqqaf's return. Therefore we're in a position to fully control it.

You know, Henry, I think you've got to talk very straight to them. They may be unhappy but from their point of view this is a situation which is not very bad and I think you've got to say to them, look, we're not going out of our way not to cooperate with you in the Middle East. But the reality is that you're unacceptable to one side and we're going to try and find ways in which we and you will keep together. We're not going out of our way to exclude you here and we will touch base with you, not concretely what I've suggested to you or litle nuggets. One, I think you could commit yourself to a Geneva ceremonial exercise to put the stamp of approval on both the Egyptian-Israeli disengagement as well as the Syrian one.

K: Once they're done.

S: Yes, once they're done. Secondly, at that Geneva conference you could also commit yourself that you are willing to talk generally at that conference in terms of where you go from here. In other words, kind of a non-commital sort of general discussion at that particular reconvening of the Geneva conference. Third, you could make a commitment that you will consult informally with them at least once more substantively before any Syrian-Israeli disengagement agreement is achieved. And fourth, that if there is an opportunity where you feel that their direct intervention, particularly with the Syrians, would be helpful. That you would bear this in mind. These are all mouses that I've come up with. Henry, I don't think you need to give very much to the Russians on this, regardless of how delicate it is. I think they might be irritated, but from their point of view they could live with this situation.

McC: I thought we should. I agreed to it and I agreed to recommend it to you.

K: Yeah, but you know, there is the basic sentence in the Department, "when in trouble make it a Secretary's statement whether it makes sense or not." You know, I know it would be good on the record, but do we really want a debate on Vietnam right now?

McC: Well, I pointed out there is a risk that you will now focus a lot more attention on Indochina than there has been. It's kind of been a benign subject, at least until Graham Martin's unfortunate telegram.

A couple of them I think you ought to address yourself it, if you would. One in particular is that people say that if they - if we look at your style, it seems that it's easiest for you to deal with authoritarian heads of states then it is to deal with democratic leaders.

K: Yes, I've heard that.

S: How does that grip you? How should we deal with that.

K: Let me, not for quotation, let me tell you my view on this. It is the big - first of all, of course our initial negotiations had to be with the authoritarian government because this is where the danger of war was.

S: Right.

K: Secondly, it is always somewhat more complex to deal with allies then with enemies because the style of negotiation has to be different.

S: That's right, more complex.

K: It has nothing to do with democracies and authoritarian governments. Thirdly, in this phase there is a problem of the western democracys which has been noted. In which, not because they are democracies but because they are now all facing really the legacy of world war II in the sense they are just getting back to conducting their own foreign policy. The governments are in a complicated position and for that reason there have been some difficults over the past year in dealing with them but not because they're democracies, but because of a problem that all western countries have. But nevertheless, when this is worked out I think we'll come out stronger for it. I actually believe that the events of the last two weeks with respect to Europe are going to leave us all in a much stronger position, because for once we're talking about essentials.

S: What do you mean by secular prbblems - we'll have difficulty dealing with them because it's a secular problem of all western countries. That's a little...

UNITED STATES DEPARTMENT OF STATE
REVIEW AUTHORITY: ROBERT L FUNSETH

K: The problem of the western countries right now is, that the nature of authority in all of them is in the process of redefinition. The nature of their national purposes is in redefinition is because all of them are going through domestic crises, including we. That on top of that to relate to other countries becomes a much more complex task. Now wether I'm better suited for one then the other I think others should comment it. K: It's hard to imagine.

S: I think it's alright. Listen, one thing I did on my own, I'd just like to run by you. On the question of survivability of the President. no matter what happens and the U.S. is going to be mistaked to think the U.S. can't respond and everybody should look to the long term interests.

K: You better not put that into my mouth.

S: No, no.

K: Why don't you say that might be in character.

M: Hello, Mr. Secretary. John Mulliken. Hi.

K: How are you.

M: Fine. I've got these quotes here - can I run through them with you?

K: Sure.

M: OK. Starting out here. On the Watergate, I would like to be remembered for what I did here, not for being part of a conspiracy.

K: Well now, this depends entirely on the context in which this is put in.

M: You want the whole paragraph?

K: Yes.

M: Kissinger , his sensitive criticism but also his determine not to let it get in the way of his goals. He's determined not to be hurt by, in any way, by Watergate. Then comes the quote.

K: OK. In that context it's alright.

M: Now we go on in the same paragraph. He told Time diplomatic editor, Gerald Schecter, last week. That's the end of the sentence. In other words, you told him that. New sentence. As for detante, he insists that quote, it is not a love affair, but rather a process by which the interests of both Moscow and Washington, can be exposed and in some way reconsiled, enquote.

K: Good.

M: OK?

K: OK.

M: I don't think you said, I think I said that and they picked it up. As for the criticism of his personal diplomacy, he simply points out to the achievements and asks whether any other approach would have gained more, quote, Our records still looks good, he says, quote, my relations with China are solid, Vietnam has held up better than I thought in the face of Congressional restriction. In Europe we will come out of the latest blowup much stronger, because we will bring issues that have been tangled back into some political focus, enqoute.

K: If we would just leave out the phrase, our records still look good. That looks sort of self serving.

M: Yes.

K: Why don't you just say, he apparently believes or he believes the record still looks good.

M: OK.

K: You see what I mean?

M: I see it. Now, we're talking earlier - this is another sentence - another paragraph rather. About various types of negotiations. I'll read the whole paragraph if you like, maybe that makes more sense to you. It's short.

K: Go ahead.

M: Once specifically, in so far as some Asians are concerned, is Kissinger's close identification with the present PT(?) regime. The Secretary considers the Chinese the best negotiations he has seen. Quote, they said what they mean and they stick to it, while the Russians are tough and the French difficult but with style enquote. And then it goes on to talk about ...

K: Can you take out the while?

M: The while.

K: Just say the Russians are tough.

M: Yes, sure.

K: You see then it's no contrast.

M: They had brutal in there, I had to take that out. Yes sure, OK. That's fine. Now what we need are two quotes that we don't have. One is a quote about Sadat. We have a very full quote about Sadat being nice about you and great stateman, strategist, etc. The main thing I have on Sadat, I don't know why we only have that, is that he's a man who can give orders and is in charge. This is in a discussion with the difficults in Damascus and in Jerusalem. Is there something you'd like to say.

K: No you can say Sadat is a man of vision. Who said of course, and stuck to it against enormous difficulty.

M: That's good. OK, that's fine. In the Middle East, Jerry, who is moving

about at the moment, remembers only one word that you - we would like to say something about the Middle East situation. In line with Europe and Moscow and the record generally, and he only remembers you saying is murderous. I don't think we can use that, although I'm sure it's very accurate.

K: Complex?

M: Complex. Anything a little fuller? In the Middle East you're still complex. Is that alright?

K: Yes.

M: Good.

K: Complex and potentially explosive.

M: Yes, OK. That's fine. I think if you'll clear all that. There's one thing I'm sure it wouldn't bother you. One of your quotes, it's not a serious quote, if you want to here it, I'll be glad to - it's a joke quote on the plane.

K: What is it?

M: It has to do with you saying, I haven't got it right in front of me, basically, never have I known more secrets, never had more influence and no one has tried to seduce me with beautiful women - it kills me.

K: It's alright.

M: It's the ____of the plane idea. If you don't like it we can remove it. I hope you don't. When you talked to Sadat do you address him as Mr. President?

K: Yes. He addresses me as Henry.

M: As Henry. OK.

K: I'm sure he would let me addresseby his first name, but I always have a hesitation with Presidents.

M: Yes. You told me that one of your students who is current Prime Minister of Turkey is that name Taku (phonetic)?

K: No, Ecevit.

M: E-c-e-v-i-t.

K: Incidentally, I gave you the wrong name for the Foreign Minister of Norway.

Who is a student of mine, not the Prime Minister.

M: No, you gave me the Foreign Minister.

K: Ok, good.

M: But I don't know where they got the name Taku. If it's Ecevit and he's Prime?

K: Prine Minister.

M: Well, I'll have to straigten that out. We have it, now we're talking background we have it that Mr. Hodgeson is possibily not your personal choice for the Ambassadorship of Tokyo.

K: I approved him.

M: A big uproar took place in Tokyo which our people found about because it was Lockheed and all that thing.

K: Oh really, I didn't know.

M: They thought they were going to force them to buy Lockheeds.

K: Oh, God, that's ridiculous.

M: That is ridiculous. I think we can get around that. It's not a bad cover. Can I ask you some other points if you have five seconds more.

K: Sure.

M: We're just saying that your children live in Belmont, Mass.

K: Yes. If you want I can give you something since it won't appear until Monday that you may or may not want to use. It's entirely up to you. I'm not eager to get abused, but I don't want you to feel you were scooped or anything.

M: Yes.

K: I'm taking my children to Moscow with me.

M: I'd like to use that.

K: It's their vacation and I haven't seen them in four months and I wouldn't have a chance to see them for another four months if I didn't taken them.

M: Oh yes, we'd like to use that, it's very nice. Thank you. You have taken them to the Kennedy center in the Presidential box.

K: Yes.

M: I have seen you at the Redskins games. He never worked for you, did he, Brezinski (phonetic)?

K: No.

M: He left with the Johnson administration.

K: That's right.

M: I'm down to the last question. I don't think you have to answer it, but I have to ask it. Alright? You have mentioned your weight before. Do you have any particular weight you would like to suggestion or just let me knock that out. Do you have any perimeters? That you prefer?

K: I prefer it around 175, but I'm far from that today.

M: I see. Alright. OK. I couldn't say 175 to 200 and not get disbarred from the State Department.

K: It isn't 200.

M: It isn't 200.

K: It's closer to 185.

M: OK. I can't think of anything else that I can't bother Dick Campbell with. You usually eat your dinner if you're eating in the State Department, in your office don't you.

K: That's right.

M: And your breakfast and lunch you go to the dining room.

K: My breakfast I usually eat at the White House.

M: At the White House, of course.

K: And lunch usually in the dining room.

M: Right. Alright. I think that's all. You're not going up to New York tonight.

K: No I'm not.

M: You mentioned something about having a number up there tomorrow and all that.

K: No.

M: Well that's all I can see and thank you very much, very kind.

K: You're very courteous to check all this.

M: Not at all.

K: I'm going to be very alouf. I'm not going to be very communicative.

K: Yes.

S: Which is not a question of methodology in the first place, but a question of general orientation.

K: Which is what?

S: That the consultation methods that they were employing reflected their view of what the European decision making process should be and what results it should yield.

K: And that it's a basically hostile direction.

S: That's right. A pattern was developing in that direction. We know that this is largely French, we can't quite acoount for it. Although we know it isn't entirely French. I wouldn't mind even saying that to the French. I think it's true, they had support from the British.

K: Yes.

S: At least from the British. And from various of the Eurocrats. It's very clear how defensive they are when you talk to them now. Anyway, I think with the French above all of us is the time to hold the line.

K: No, we are appointing somebody within the next week.

R: Oh you are because I had a suggestion that might make sense namely Dewey Dane.

K: Who is it.

R: Dewey Dane was Governor -- was one of the Governors of the Federal Reserve Board and was not reappointed I think largely because he had been appointed originally by President Kennedy but he had been in the Federal Reserve for 35 years and I think he is one of the most experienced people in this field.

K: We pretty much have somebody already.

R: OK. Then you won't need him. The other thing is the Dartmouth Conference is meeting in the Soviet at the end of April. I wonder whether it might be good for the steering committee of three or four people to have a brief word with you after you come back from the Soviet and before we go because it is -- the way things are going it might be helpful.

K: I favor that.

R: Would you. Could we set that up.

K: Could you set it up with Eagleburger or Campbell. I just don't have my calender here.

R: I don't mean with you. I mean with them. If you approve of the idea.

Sec. Gen. Waldheim/Kissinger
3/22/74 - 10:03 am

W: Hello.

K: Mr. Secretary-General, how are you?

W: Well, I'm fine. I was quite tired when I returned from Africa, but I'm fine again. I'm sure you are very busy with your trip to Moscow and I've only to wish you the best success...

K: Aren't you nice.

W: I hope everything goes well. I congratulate you on your press conference. I saw part of it and I read carefully what you said. I think that this trip to Moscow will be very helpful because I do have the feeling that our friends there are getting a little worried and I think your trip couldn't be better timed.

K: Well I think, too, it is at a good time.

W: Mr. Secretary, I have a few points which I wanted to mention to you. First of all, things are going quite well here; we have things under control. The Security Council this year is easier to handle than last year because of the new composition of the non-permanent members. They are more... they are not as... actually, I'll put it this way, in asking for a meeting for _____ we had informal consultation a few days ago, as you know, on the request of Malek and the Russians, and the three main items which were mentioned, the ceiling of 7,000 troops per unit, Malek is worried that I could go beyond 7,000. I calmed him down. I told him that this is not my intention, that 7,000 will be enough. Of course, if we had a new situation in Syria, for instance, it could be that we need more, but as far as I see it, if there will be no new situation we could even handle a possible Syrian bumperstorm (?) with the troops over there. In other words, we could dispense without any problems, two or three battalions which are now in the reserve in the tidal area to Syria in case the U.S. would succeed and that there is a similar solution that we had on the Egyptian front.

K: O.K.

W: So he was very satisfied with this. Then there was the question of the mandate for units in Egypt. He created the impression that each unit that they didn't ask for the mandate to police the_____. I told him that in my report to the Council last October, it is said that one

UNITED STATES DEPARTMENT OF STATE
REVIEW AUTHORITY: ROBERT L. FUNSETH
DATE/CASE ID: 10 DEC 2002 200102979

of the purposes of units is to avoid the outbreak of new fighting, and in my opinion this covers the mandate so he accepted this, too. The third point was the discrimination. You know the Russians continuously complain as do some of the non-aligned countries that the Israelis do not permit contingents from countries which have no diplomatic relations with them. I mentioned the matter to Abba Eban with whom I had breakfast a few days ago and I hope that sooner or later the Israelis will give up their opposition against this contingent. For the time being I continue to avoid sending those contingents to the Israeli security zone, but I don't know how long I can maintain this practice.

K: Yes. Well, of course, I think the Israelis have some merit on their side here.

W: Well, physologically it is understandable. On the other hand, the mandate for the force is very clear and it says that they should move freely, wherever they want to move and it is a little complicated for us. I always try to do it in a pragmatic way, and it worked until now, but I thought I should mention it to you in case you have the possibility to the Israelis so that sooner or later we can get the agreements. But all countries can move freely in the buffer zone.

K: Right.

W: Now, there's one problem which seems to me extremely important, and also in connection with your trip to Moscow. I discussed this with Bill _____ when he was here, the possibility, and in fact, I don't know whether you, yourself, have discussed it with your people in the State Department, to try to get a commentation of the mandates per unit for one year, not for another half-year. The reason is very clear. I think _____ and of course _____, but suppose the others who are trying to be helpful will be in the fall. But my feeling is that it could be that just at the moment when we have to again prolong the mandates per unit in October, that the situation will be _____ and it could be that we could then have probably _____ So I wonder whether we couldn't try to get ....

K: Well, for your information, I've had an informal talk with Sadat and I think he would agree to it.

W: Oh, good. I feel it is important that the Russians also agree, that they don't ....

K: Let me talk to Gromyko about it when I'm in Russia.

W: That's what I thought would be helpful because it's good to know that the Egyptians are in favor. That will certainly help very much. But I think _____ of very importance in this regard. It would also be helpful to me and to my people here because for plenty of reasons.

K: Exactly.

W: To facilitate our planning.

K: Exactly. Well, I will do my best.

W: Thank you very much. Now, the last thing is the special session, Mr. Secretary. I just wanted to tell you that now of course there is very hectic activity here amongst the delegations. The current trend is to make sure that we do not have confrontation here, but cooperation. I stress this in all my statements and I have the feeling that the great majority is all in favor of having a good cooperation amongst all delegations, but we heard rumors. Unfortunately they are _____ and the Ambassador is not back yet from _____ that the _____ are still thinking of some sort of confrontation. Now this would be the worst, of course, that could happen. I still hope that the whole session will go in a constructive way....

K: When is your opening session?

W: On the 9th of April.

K: Is that when the opening speeches are, or is that....

W: Well, the 9th will be only the procedural opening. The President _____. The idea is to have three committees and three sub-committees. The President (precedent) will probably be the same as last year. Ambassador _____ from Ecuador _____. You know him?

K: Yeah.

W: And so I don't expect too much trouble in this regard so that the real _____ starts on the 10th, and then the idea is to have three weeks special session.

K: I haven't decided yet whether I will come up, or how to do it.

W: I would, of course, be very happy if you could make it and could come personally to make a statement and to _____ the people here. It will be on a high level. The _____ ideas that it should be on a ministerial level. We have an idea that a great number of foreign ministers will come, a few prime ministers, and even a few heads of state. When I was in Africa they told me that a number of heads of state intend to come. But no formal invitation. The only formal information I have is that the President of Zambia is coming personally. Otherwise it will be the foreign ministers, finance ministers and....

K: But _____ is coming, isn't he?

W: But this is what we expect but we haven't got the formal information. The Ambassador is still in _____. He's expected to be back in the next few days.

K: Right. I will try to come. I'm going to be on vacation so I may not be there for the opening day.

W: Well this is not absolutely necessary. I am glad to hear that you have decided to take a few days' rest. You really deserve it. I remember you wanted to earlier, but it didn't work.

K: That's right.

W: So please don't worry about this. The important thing is that you are coming. If you come a little later I think it doesn't matter, but it would of course be highly appreciated if you could come personally. The debate will last, at any rate, a couple of weeks.

K: Well I will try to come during the second week of the debate.

W: That would be perfect. That is excellent.

K: Good. Mr. Secretary-General I will see you then, if not before.

W: Well, at any rate, if you are in New York I hope we can get together and discuss a few other things.

K: Absolutely. I wouldn't come to New York without seeing you.

W: You're very kind. Again, my very best wishes for your trip to Moscow.

Z: Hi Henry.

K: Ron, yes?

Z: On this ABC thing.

K: I have no interest in it. You know, its entirely up to you.

Z: I mentioned it to the President and he said fine to have film taken he said but he didn't feel that -- he thought that the matters you would talk about were too sensitive to really have them include on sound.

K: I agree completely.

Z: And he said I don't want to act when it comes to you know Moscow and foreign policy,

K: I couldn't agree more.

Z: So I think I'll call Obwess(?) and say if you want a little film fine or if you want to delay this until Henry gets back and they're talking about it in those terms fine but the President said I don't mind doing this but you know I just don't like to act when it comes to foreign policy and I said I think Henry would feel that same way.

K: I didn't realize they want it soon.

Z: Right. OK fine. We're tracking then and we may do some pictures if not we'll do them later.

K: It's entirely up to you.

Z: OK Henry. Thank you.

K: Mr. Ambassador

D: Yes, Mr. Secretary.

K: Have you dried your tears?

D: Have I dried my tears? No. When I am with the General I am laugheing. I keep my tears for other places.

K: Ok, now listen. Two things, one -- we have had an urgent message from Sadat saying he has information that Israel is planning a major strike on Sunday against the Syrians.

D: A major strike on Sunday against the Syrians?

K: And that he wants us to know that this would have serious repercussions on everything we have done up to now.

D: I hear it for the first time. Naturally, we will check on it right away.

K: well, Would you please add my urgent request not to do it, especially when I am on the way to Moscow.

D: I can tell you Mr. Secretary, 99% I am sure it is nonsense. But I am going to check on it because I have been in constant communication with Israel today and I don't think anything of this sort is planned.

K: Well, they are also busy making press statements that they can't plan military operations.

D: That they can't plan.

K: I am going to tell Sadat that El Lazar is now becoming a press star.

D: No actually, I saw the full statement. It wasn't as, I mean the tone was much more minor -- but on this question that you told me I will check immeidately. I am sure there is nothing. Would you like me to phone you later with regard.

K: Yes, I have one other matter which is just follow-up on what we discussed. But I will discuss that with you later, I don't want to take away time from important people.

K: How are you?

M: I was talking to Winston Lord when you came on the phone. I told him that these fellows are sort of scattered to the four winds when they had gotten a sort of informal word from ~~X~~ Ken Jamison that there was very little likelihood of meeting this week, but I can ~~ek~~ get Ken Jamison who is down in the Bahamas now, but he is one the way back.

K: No, no. Don't get anybody back it was just stupid of my associates. I told them I couldn't do it Tuesday, but I would do it before the end of the week.

M: Well, I think your Assistants were trying to protect you. a good bit.

K: Yes, but Jack, you know that is one of the problems in these jobs that you get protected.

M: I know, what I want to be sure, Henry, is that when they come down they ~~w~~ are well-equipped to tell you in a short period of time just what their thinking is. That means that I can get them together before they did come down -- it is going to be pretty hard to do that before 10:00 tomorrow morning.

K: No, no, there is no sense doing it but it is sort of a pity because I am going to the Soviet Union now, I don't need it there and then I'll be back for a day and then I am going on vacation, then I'll be...

M: You ought to go on vacation and if it is anything of any substance we can take it up with Rush or something else.

K: No you can't.

M: I know it is not going to be like dealing with you but I don't want to do anything half-baked tomorrow.

K: No, no, let's forget about tomorrow. That just can't be under these circumstances.

M: Ok. Then we'll be back at you. There are alot of things I would like to ~~k~~ have them tell you about their reading of that whole area.

M: Don't have it on your mind.

K: It isn't a question of being on my mind, it is a question that sinee we are thinking of doing some of these bilateral things that I told you.

M: Yes, yes there is alot of that going on now.

K: But I want to understan d first of all what it is that others are doing bilaterally. And it doesn't do me anygood if you tell it to Rush .

M: Let me go to work on that this coming week and put something together. And then I'll be in touch with...

K: What I want to understand from them is first, what bilateral things are being done by others. Secondly, what bilateral things we should do.

M: What bilaterals we should be doing.

K: That's right, becuase we are quite willing to do it.

M: Ok, what else?

K: Those are the major things.

M: Those are the main things and I think they hav e some ideas as to what you can do to help and I think third and fourth, they would like to report to you their reading of what is going on in connection with the cha cha they hear in the area in regards to the settlement.
That might be helpful to you.

K: I would appreciate that. But can they keep their mouths shut?

M: What's that?

K: They can keep quiet , can't they?

M: They can what?

K: They can be discreet.

M Oh, definitely. You don't need to worry. I can guarantee that.

K: They are not like Jewish intellectuals.

M: They are not like Congressmen's wives. I can guarantee that.

K: No, the Congressmen's wives were fine. It was the press

M: It was the press. I had some fascinating talks, by the way, In Paris over the weekend.

K:: Oh you did.

M: I saw tsome members of the Chamber and I saw some people that came over from London and I got alot of reading. You know those little remarks you made had a profound effect and I think they did good.

K: I think the net impact turned out to be good, although I didn't plan them.

M: Yes, it came out pretty well. The attitude in Paris was very interesting, but I will tell you about that when I see you.

K: Well, I look forward then -- you tell your associates that if I am not at my best it is because it is the end of along trip. But let's aim for a week from today.

First part of conversation was missed.

K: An Israeli command spokesman said that Egyptians had moved more guns into the restricted zone despite inspection by UN observers and had stationed artilery in regi ons forbidden by the terms of the January pact. Why?

D: I am sorry. I don't have any answer for you Mr. Secretary . I know that I got a statement that in case the thing was publicized we would say the following.

K: That was perfect.

D: Yes, and you know it was a little change from what we agreed yesterday.

K: No, no that I don't know what you agreed. What were you going to say.

D: When I saw you last night, you suggested that we would say that we are studying the situation to the extent that there wer e violations.

K: That was fine. I liked that.

D: Israel did not accept exactly this formulation. And said that if the thing would be published by Newsweek or someone else, they would say, in answer to a question, no missiles were involved in the matter because there is a great concern in Israel about missiles. We have information that the Egyptians are holding somewhat lighter artillery than was agreed. The Chief of Staff talked with [redacted] Silvaso; the matter is under investigation and we are confident it will be rectified. Which is better than what you read me.

K: Although, why did you have to say that much.

D: The only element that we could use was the artillery because of the concern in Israel is themissiles and [redacted] nobodyis concerned in Israel about fa few more pieces of artillery. What they are concerned is the missils. Because of the implications of it. So that is why, the story would have been published .

K: But please keep the debate down with Egypt. Egypt cannot act for you on Syria if you keep attacking Egypt.

K: Is there any Chief of Staff who doesn't run for Cabinet in Israel.

D: He did not run for Cabinet. He is basically a very decent fellow.

K: No, acutally, he is one of my favorites.

D: I am going to cable and ask them to go down and speak to him.

K: Good, I have one or two other things whic I will call you about later. One is tha t Sadt, we got a report -- he made no comment on that information you gave him.

S: Hello Henry.

K: Jim, I just wanted to call you before I left and really only have one item of business but in general the situation is the way we left it and if anything comes up I will see to it that you get informed through Scowcroft.

S: Right. Incidentally, Henry, I heard that the MBFR meeting was not a thing of joy and enlightenment.

K: No.

S: I wanted to

K: It was a sorta disaster.

S: I wanted to remind you that the discrepancy between US and Soviet Union forces is just based on 15% cut on both sides.

K: Oh, no that I did not object to. What I objected to was you know if you take out the Soviet tank army with equipment for 29,000 Americans without equipment it is a little hard to sell.

S: Well, I think you are going to have to sweeten it up with tragment(?)

K: Exactly. As long as that is understood. And what we may have to do is

S: See we have those 7,000 weapons in Europe some of which we don't know what the hell we would do with.

K: Another problem, Jim, we ought to consider is that when you begin analyzing these equipment ceilings you don't really know whom they work for because if you take out their men they probably have to take some of their equipment with them and if you put a ceiling on theirs and a ceiling on ours you breed another disparity.

S: I think the best. It sounds right, I'd have to look at it more closely.

K: I don't expect to get into that in any detail in Moscow. The only thing that may come up in Moscow, but this is simply a guess, I have no knowledge of this, is they may resurrect again the idea of five to eight percent cut which would work out to about 12 for us and 29 for them.

S: That's all right.

K: And in a way since we are not held to taking forces out.

S: Listen I think we can get that kind of stuff out of our headquarters and what not.

K: Exactly. It might even be a better way of doing it.

S: Yea. We have positioned ourselves in negotiations far better than the Russians have in that regard, we've got more fat.

K: Jim, one final thing.

S: Maybe that's a disadvantage being so combat heavy.

K: I have the impression of some foot dragging by the Navy on that mine clearance and Ebare(sp?) has now raised a number of questions.

S: Well Ebare(?)

K: Which I think the Navy put him up to.

S: I don't think the Navy put them up to that. Ebare(?) we misses a bet there, and I don't know whose fault it is. At the time that State made that announcement we should have informed him previously.

K: Oh sure.

S: And a lot of that stuff I think is just a resentment of the bureaucratic situation. Now he is raising two questions. One question is, how can we send our sons to die on foreign soil. And the other question is, who the hell is going to fund this. Now on the funding side I think we will have to find a way of getting it out of the AID budget.

K: Oh, Jim, the President is calling me on the other line.
I will call you right back.

D. Yes. Well that is all what we want Mr. Secretary. We don't want any confrontation.

K: Well let me know by 6 pm what I should tell the President, if any thing. But you can tell the Prime Minister that we are flying weather permiting on Tuesday.

K: Hello
H: Henry.

K: Hubert, how are you?
H: Fine, my friend.

K: I am going off to Moscow tonight. But I wanted to talk with you about one matter which I know you disagree with some of the thinking here. Which has to do with some use of some developments loans for Viet Nam.

H: Yea.

K: The problem is that the oil bill alone for Viet Nam has risen by a $125 million as a result of the rise in prices and that almost all their difficulties are caused by world inflationary treasures.

H: I had a talk yesterday with Gen. Van Dong and the Ambassador that was in here.

K: Right.

H: And I do understand that problem, Henry, but here is what I was worried about, Henry. In fact, I am not adversed trying to help as much as possible in these matters, but the problem that I see and I had Gail Magee in here; We got worried if you start to transfer it just stirs up such ungodly troubles over here as all of my colleagues, I don't know whether we would be able to get another bill out that is all.

K: Yes.

H: As I told Mr. Parker, you can do it this year, you got the authority to do it, the law is clear, you can do it.

K: Right

H: But right away just between us you will have Frank Church, Ted Kennedy, and Cranston and Abourezk and all these fellows jumping up and raising hell, and the Chairman of the Committee and Mansfield and all of them.

K: Yes.

UNITED STATES DEPARTMENT OF STATE
REVIEW AUTHORITY: ROBERT L. FUNSETH

H: And I just got to worry about whether the short term gain was worth the long term risk.

K: Well, that is a point I understand very well. I have two problems I don't expect you to give us the go ahead but some of our people here are worried if we do do it as a last resort that your willingness to manage the AID Bill would be affective and that of course would be very bad blow to us.

H: Henry, I am not a petulant young man about stuff like that. I want to work with you. I mean I am a soldier in the ranks in things I believe in and I know we have some obligations there. I am not going to jump.

K: After all the agony we went through, all of us and you perhaps more than anyone, to let it all slide down now because of what is not a huge sumethat's what bothers us.

H: Now you have got a $54 million request in here for economic to try to get that sub up to the organization.

K: Right.

H: Now, uh,

K: Of course, if we got that we would not have to do the loan.

H: I think that its my judgment that we can get most of that over here. That's if we really work at it, because it isn't a large enough sum of money and it was authorized. You know we did authorize it, and we authorized it with a pretty good majority, better majority than we did with appropriations.

K: Well, why don't I do this Hubert. Let's hold off a few more weeks to see how that supplemental goes.

H: Right.

K: And then if we get absolutely against it then we may have to do the loan.

H: I understand that.

K: And you and I am not asking for your public support at that time but for your sympathy that we have to do it despite of your preference.

H: Well, now let me assure you of this. If you have to do it, which I know that, that is something that you will have to weigh very carefully because the only reason I told Parker that I looked with opposition on it was because I was worried about fiscal 75 because I thought we had things colled down on SEA, but they are still at it. It's got us like we're on heroin. You know. It is unbelievable around here that we get hooked on this.

K: Then they are going to crank it up again.

H: Yes, they are trying to crank it up again. If you got to do it, just have your man, just tell us when you got to do it and I'll, I'm not going to raise any hell about it. I am not going to join the pack.

K: That is really all we can ask for.

H: But I would like us to pursue the course of the supplemental if we can and see if we can do it the regular way.

K: Well, why don't we hold off for 2 or 3 weeks.

H: Yes.

K: And see what the situation is then.

H: I had a heart to heart talk with the Deputy Prime Minister here and told him exactly what was being said around here in terms of Congress of you know what it is, but I have to be very honest with you, I think you are wasting ammunition. You have to be frugal and you have got not to over react. And you have to show some progress in your country in economic development, even though it is minor you have got to be able to show it, of course they don't get any good press here, it is impossible.

K: It is awful. Because they are really working hard and they are caught by the world economic situation. Look India is taking a beating. Every country is caught by these high raw material prices.

H: Of course, and this is the worse problem we have right now. All right Henry.

K: Good Hubert, when I get back from the Soviet Union I would like to sit down with you on SALT at some point because I know you have always been interested in this problem.

H: I have been. You know what, just before you go, let me say this, I talked the other day here with some of our people on this Jackson amendment business. I wish we would get that damn thing off the MFN and MFN ought to be done really on the basis of a rather normal thing and if we got any argument with him it ought to be on credits. You know a banker has a right to say before you get my money, we would like to talk with you about certain things. But on MFN it seems to me that that is a normalized relationship that this world in this year of 1974 requires. And I think that means more to the Soviets in many ways than even the money. Because there are other places to get money. I see they ..

H: got a billion dollar plant from Germany coming up.

K: Yea. Of course, the credits they already got, so if they were cut off that too would be taken unfriendly--as an unfriendly jesture.

H: Well, we are not going to let that happen but

K: But I think we could come to an understanding with the Congress about the rate of lending.

H: Yes:

K: And that it won't go beyond a certain point unless there are certain things that the Soviet Union does.

H: Yes, I think people understand that. They really I mean a banker will say to you like to they say to PANAM and PENN Central and a few others unless you do certain things in management we are not going to continue the money.

K: Well let's see what they are going to come up with on the immigration issue when I am there.

H: Well, good luck to you, my dear friend.

K: Thank you Hubert, and I look forward to seeing you. How is your health?

H: Oh listen, I am feeling just great and I am so grateful I can't tell you. I really do. And I want to help you in any way I can.

K: Well, you know your admirers are all praying for you.

H: I know that. Well you do so much, I really worry about you just between us. The Lord blessed you with all kinds of strength and vitality.

K: Well, I was very fortunate that way.

H: Good luck on this journey friend.

K: Well, what we discussed the other day say anything between 5 and 10 % US/USSR we would be willing to discuss.

D: Just as initial step, but with understanding.

K: But with a link to a second step which would include national forces.

D: OK, so long as those lines we discussed. He may... annoying negotiations maybe as I mentioned to you just a number of troops which you put there along figures I mentioned toyou privately, but those are the same we understand and agreed. Half year and other half from there.

K: I have signed off on that thing on that paper and that should be coming over to you on Monday.

S: Yea. But the stuff for the negotiations. They are making an announcement that we are starting negotiations.

K: That's fine.

S: And with that I think I can generate support.

K: Look, I have

S: ....We are in trouble on that. The Mehone Committee is taking a very tough attitude on it and they have been willing to go with a $200 million increase and that's all and that leaves us short of what we need let alone short of what we asked for.

K: What did we ask for?

S: I am going to try to get Mehone off that and get Stennis to weigh in. But it is very helpful to me if I can say well look fellows we are trying to adjust our problem in SEA where we have got excess resources we are going to reduce them as we plan to do in Thailand, but on the other hand on the Vietnamese side , because we have taken our forces out we need additional money to support the Vietnamese.

K: Absolutely, you can do that. And I will strongly back. And if you want me to call Mehong I'll do it.

S: No, I don't think that is necessary. I may call you in at a later date. Now the other thing is that John Stennis and some others have taken a very tough attitude on Diego Garcia.

K: Stennis I talked to him the other day and he told me he was going to come around.

S: OK. That one is going to be very tricky to put through.

K: The thing they are all having trouble with is why it has to be in the supplemental.

S: The answer to that is quite clear. Because we want to get an additional 6 month head start prior to the time they reopen the Canal.

K: Yea. Well

S: OK, Henry.

K: Well, OK, Jim and I'll be in close touch.

S: Have a good trip and I think that there is some possibilities if you think about it of holding up the option on MBFR or SALT and that you want to have some movement on one or the other. I'm not sure how they feel about MBFR, but some ways that may be a more promising area and shows a sense of diplomatic momentous.

K: Well, I'm not dying to get you know to ram SALT through. Let's see what happens.

S: Yea:

K: Do you think Zumwalt wants me to raise home porting in Odessa? I think that is a more reliable place to homeport than is Athens. OK Jim.

K: Mac, how are you.

B: You're on your way aren't you?

K: I'm on my way this evening, but since all my letters are written by others I wanted you to hear from me personally how much I appreciated your letters.

B: Well, you are nice to take the time with all you've got on

K: No, I thought it was extremely thoughtful. What you said about George Ball also crossed my mind.

B: I found myself snickering to McCloy about it so I thought I would share it with you.

K: But I agree with your basic point. I think now that a shot has been fired across the bow we can all...

B: I think it worked better than I was afraid it would, you know I think you have other people to do work for you now.

K: That's right. I think now no European government it going to vote on something that effects our interest without getting it to us one way or another.

B: That's right.

K: I have had incidentally, I've had the, our own records checked on what we were told when. We were told some of these things, but in such a peculiarly inconclusive way.

B: They may have been. It is absolutely characteristic of the Germans. They are doing it now with the French. You can see they are not being as firm in conveying what they would like of the French as they are conveying to us what they would like to convey to the French.

K: Yes. But, I think we can cool the confrontation.

B: I think you already have.

K: Exactly.

B: I think it is four or five days better off than when I was scribbling that.

K: But I appreciated it very much. What I would like to consider working out at some point in the near future is how I can get you gentlemen down here and

get you read into some things so that it is more a consultation.

B: I think that the way to do that is, is not to put so much of your own time in it. If you wanted to delegate somebody that you had confidence in, then people, could come in and out as they were able to get to Washington and...

K: Let me work that out when I get back from the Soviet Union, because on the two big issues which are going to be SALT II and the MidEast we'll need every scrap of public support we can get and every bit of advice we can get.

B: I think both are going to be edgy and I think on the Middle East in particular there is a need not to be longly given the climate of opinion here.

K: And that's going to be, you know that is going to get nastier and nastier.

B: I saw Eban in the airplane coming back the same day we were down there, because he had been seeing you. And he said something cryptic about what a difficult day it had been and I could see that you had begun the educational process.

K: Well, I am trying to avoid a head on confrontation for as long as possible.

B: Well, you are absolutely right. First place you would break up the government and then it would be your fault.

K: Exactly. Exactly. But on Syria for example, they have just got to give up a slice of the Golan Heights. It won't be

B: Told _____ Berlin about that who understands them better than almost anybody I know and he thinks they will, when they really.

K: I think they will too. It they can figure out how to stick us with the blame for it.

B: And if they can decide if Counatry(phonetic)? doesn't really matter, I don't know if that is the one that doesn't really matter or not. But all they have to do is find a piece of property that they, that their generals can most easily part with and you have a bargain going.

K: That is what I think. That is what I hope any way, but even if we don't get a bargain going, I will then be able to split the Egyptians away from the Syrians.

B: You can get the Egyptians away from the Syrians, but I'm sure how far you can get them from the Saudis, which is why I worry about Jerusalem.

K: On Jerusalem something has to happen. Jerusalem, on Jerusalem the Saudis will not give up.

B: Exactly right.

K: I hope the next move after Syria can be a major settlement with Egypt.

B: Well if Sadat will go. It depends a little bit how far he can go and still say he is keeping the solid front that he always talks about.

K: As long

B: He probably knows better than we do.

K: As long as we don't call it peace I think it can go quite a distance.

B: Yea. Well that gets theological with the Israelis.

K: That's right. But I think the Israelis are so..if the Israelis had any sense they would offer the 67 porters to Egypt. And get them out of the war, because for that they could get anything.

B: I'm sure that is right. That is what you said to us the other day and on reflection I am convinced of it. It's the government that is not capable of thinking for itself though it is much the same proposition that applies there that you applied to the Soviets in the context of SALT.

K: Yea.

B: You have to give them the menu because it is just an act against nature for them to design it.

K: But if they are not willing to give up all the territory, then maybe they should settle for not getting all the peas.

B: Well. They will do much better the other way around and their own does know that but, but.

K: They would do a lot better the other way around because whether they get those 10 or 15 miles.. makes no difference in history.

B: None.

K: He is the only one of them who really has some strategic grasp. But he may not last through that report of the investigating committee.

B: Well, that is the trouble. How long will you be gone?

K: I'll be back Thursday night.

B: _____says you look forward to boar hunting.

K: Inhuman. And I tell you the last time I participated in that sport, where I refuseded to shoot, but when you sit up in that stand, it makes you doubt that prudence pays because they put out the food and about 80 boars arrive simultaneously and there was one extraordinarily cautious and looked behind every tree arrived late, searched the ground before he put his foot down and it of course got it. And one of my big problems is to get a better relationship between political and economic objectives. And we haven't ever really been organized well in the State Dept. to do this. And with Shultz leaving it becomes even more important. I was wondering if whether by any wild chance one might be able to induce you to take this?

H: Well, I think it would be an exceedingly wild chance Henry. I am in the midst here of a very considerable operation. I have been Chairman for about 2 1/2 years. I have got about four plus some to go.

K: Four years to go.?

H: For some years to go for retirement. I turned 60 years old Henry. I am getting to be an ancient of days. And so, I am pretty well ruted in here I think for the duration.

D: Hello

K: Communications from your Government which Eagleburger has handed to me. Let me make a number of points: First of all, I am sending it back to you, I refuse to accept it, and you can tell them that.

D: This is not the communications that I was suppose to hand to you.

K: At any rate. Just tell them I have refused to accept the first part of it in any form in which it has been communicated. Secondly, if you think if it is in your interest to bring this matter to a head while I am in Moscow, you go right ahead and do it.

D: But we don't think it is in our interest to bring it to a head.

K: Thirdly, if Dayan doesn't come, I'll withdraw from the negotiation and state publicly what has happened and you do what you want. And then we will put somebody else in charge here. We have now communicated to other Governments that Dayan is coming. Your behavior is outrageous and frivblous and you know dam well we have told Sadat they should be removed by the time we fly our next plane. You know very well that he has told us the tanks would be removed and has not refused to withdraw the artillery. I have communicated with Fahmy yesterday so it is entirely up to you, if you want to play domesticate politics you go ahead and do it, but I think and you just communicate this to the Prime Minister, I don't care to debate it. I cannot accept this communication in any of its points. We are talking about 72 lousy artillery pieces which we have told you we would get removed and if you can't understand why we wanted to get to Sadat personally for the first time we flew a mission and why it was so desireable to do if after the embargo had been lifted then and why we wanted to have the military photographer interpreter there who could explain it to him.

D: We understand this.

K: So then the first part of your thing is just totally unacceptable but if you don't like our reconnaissance you do your own reconnaissance, we would be delighted to stop it.

D: Can I say something Mr. Secretary.

UNITED STATES DEPARTMENT OF STATE
REVIEW AUTHORITY: ROBERT L FUNSETH

K: YOu can say something but I don't want to debate it.

D: I would not say it for the sake of debate of an argument. . I think your reply to me now is based on the wrong assumption. It is assumed that we don't come or that we are looking for a reason not to come. The fact of the matter is so the Prime Minister and the Minister of Defense are very anxious to carry these negotiations and for DAyan to come. The point is that we are asking your help in moving

K: You have my help. I sent a cable last night in which I made essentially the points you asked me to except I didn't make them conditional and I still don't believe I 've told you for months not to ~~length~~ Syria and Egypt together.

D: We are not lengthing Syria and Egypt together, but you will have to understand Mr. Secretary the situation in Isareal there is now questioning these violations and a question of creditability of the government.

K: If by the time you get ready to settle it, there is still violations then you have a point. If at a time when you have been assured by the U. S. Government one, that the tanks would be withdrawn; two, that we are in active discussion with the Egyptians about the artillery being withdrawn; three, when you have the backing of the Government to get it withdrawn, but when we are pleading with you not to make an issue of it with the Egyptians, who are under attack from the Soviets alreay.

D: Yes, but this is not the question we are making an issue with the Egyptians. We are really appealing to you to help us.

K: That we are doing. I have already done it last night and if after the next flight they are still there then we have a real problem. I have in any case told them to remove it as quickly as possible.

D: Isn't it possible Mr. Secretary they can remove it by Tuesday when the .... expects

K: Maybe it is. I am not saying it isn't. The method we used was the right one. The method you using is wasting a lot prestige for nothing.
D: We are not using any method, but we are under attack and we are only communicating with you. We have not communicated with public ly on any of these methods. We are trying to bring the situation, to rectify the situation so that everything can proceed, this is our only interest. We have no interest in...

K: I told you, you could say that we have told you that by the next time. Well you can't use the reconnaissance publicly.

D: I called the Prime Minister after our conversation last night.

K: Well at any rate, I sent message to the Egyptians last night. No we have made all the points you wanted us to make.

D: Can I say to the Prime Minister that you have asked the Egyptians to remove the artillery and that you last night sent message to the Egyptians asking them to remove the artillery and rectify the violations as quickly as possible?

K: Yes, but that is the second time we have done it.

D: It is the second time you have done it and the...

K: And they have never refused to do.

D: And they have not refused to do it. And...

K: I have no question that they will do it. Why should they want to cheap with 72 artillery pieces?

D: I don't understand it either. That is why Dayan says that he thinks that a strong plea by you would be responded by them. He doesn't think it is a major method for them to move these..

K: We have made a strong plea. Now I will not tell this to the President until 6 p.m. tonight, when I talk to him. Now if you want to get me a reaction from Israel, you can do it up until then.

D: I will communicate to the Prime Minister and Dayan.

K: But I must say two things, one, it cannot be in your interest to have a public confrontation with Sadat.

D: Mr. Secretary.. this is the one point.

K: Secondly, you cannot want to emphasize violations while I am in Moscow for god's sakes.

D: That is why we want to solve the thing before you go. I mean if we have this assurance that you have done all what you could.

K: You have the assurance, you can tell them that we have personally intervened with the Egyptians. However, it isn't helpful to have all of this in your gd knitze(?) Well then it will be on every Moscow radio station

to the Middle East.

D: But that is not up to us, Mr. Secretary. When the opposition tables a motion for the agenda as they did, We can't stop it. I can assure you we are intereted in a debate or in foreign affairs security because that is the last thing in the world we are interested, and this is not a threat., Dayan ask me to tell you; tell the Secretary we are not threating him, we are not using c___ leverage. But it would be physically impossible for me if I have to debate and give evidence and the thing is not rectified. They say the Minister of Defense of the country does not leave when the agreement is violated and believe me Mr. Secretary

K: But look I am holding this thing together against all probability here. If he doesn't come, I'm going on vacation. If the Middle East explodes in a nuclear war, I've canceled too many visits. If haveasked the Syrians to come here on April 11. If this whole scenario which has been designed in order to give you the maximum amount of time falls apart and you make the Egyptians who are trying to help us ... for this, then I can't do any more.

D: But is it so difficult for them to do this before Tuesday? Then everything is set in motion again. I mean really if surely.

K: I don't know whether it is that difficult for them because I can't go to Sadat every other day. I now have to go to Fahmy. Fahmy is much tougher on these things than Sadat.

D: I understand. But if you have asked for Sadat to do this then he owes you an answer.

K: What I asked Sadat was, thinking that we were dealing with rational people, that by the next time our planes would fly, 6 or 7 days, I expected that they would not find these things there. I didn't ask him to reply to it, because I wanted to do it in a face saving way so that the next time we could report they weren't there. I have attempted precisely to avoid having him to back down. This is exactly my strategy.

D: I understand.

K: Now when we are flying next I don't know but it will certainly be next week.

D: I understand this but this is, we are also .. rectify this out of the..

K: And therefore, I know we are flying next week sometime because I have just approved it. I don't know the exact date on which we are flying. But it will take two days to get the pictures after that.

D: Maybe if you fly on Tuesday and then we can get the pictures by Thursday and then he can leave on Thursday and be here on Friday. I am simply trying to find a way out of a situation that is really impossible. Not that we are looking for it, Mr. Secretary after all, we really have meticulously done everything in the agreement.

K: Yes, but I am confident that if the Egyptians violate the agreement they won't do it with 72 artillery pieces and you know it too.

D: That is correct and that is ..

K: And therefore, we are not talking about anything but a technical violation which I am sure will be rectified if you do it in our way and if you put Israel on war footing over there then keep the defense minister there and fake a great crisis.

D: No we are..

K: When you have Syria to worry about then you can go right ahead and do it.

D: Mr. Secretary, but you surely believe me that it is not to our interest either to make a crisis out of this or to put The Secretary of the country in a war or delay coming of the Secretary of Defense nor of which is to our interest and not only you and I understand it but Golda and Dayan understand it. What we want is a way that all these things would not happen. If the thing is out in the public It has all been kept secret, that is a differenct situation. But since the thing is all in the public, we are trying to find a way in which the Minister can come as scheduled which the Egyptians will rectify the situation and in which we can rectify the Syrian situation. I mean this is precisely what to do. The Prime Minister says we gave credit here, continue to give credit and with Sadat. We really want to do this and I said to Larry Dayan told me on the telephone he hadn't even thought about our second line defense after we would lose Sinai because we don't want to make it a permanent line. And as a result of it wait for nobility there. I mean, I passed it on to Larry as a kick of information. And this just shows to what phase we are meeting. Now we have a very serious public situation to face and this is not of our making. And this other question Mr. Secretary you tell me you can't be concerned with gd domestic politics, it is not domestic.

K: Oh, come on if you can't explain that you have been asked by the U.S. Government to that all we are talking about are 72 artillery pieces and that you want to wait ~~xxdx~~ until another inspection after which you will of course pay the different thing. Really if the public (Israeli) is so stupid not to understand that then ~~wex~~ I think we are in bad trouble. For all I know they may be gone by next Tuesday. We didn't ask him. We avoided what you are forcing us into.

D: Well we are not really forcing you into any Mr. Secretary.

K: Well, look, it is up to you. The fact is , his not coming will become known just as I will being leaving Moscow, which is going to be tough enough as it is.

D: No, No, I don't think we should face a situation .. It is best for us ... We are trying..

K: I regret that I have already put in ., I have sent a long cable to Fahmy yesterday after our discussion explaining to him that 6 batteries is 36 pieces not 72 and I said it would be unfortunate in deed if this matter were to cast a cloud over the excellent record so far metitously observed at the disengagement agreement. Then at the end I said you should tell Fahmy that the Israelis have just contacted me with an urgently that the artillery fleet in excess of 36 piece be withdrawn in order.. prevent this discussion from becoming a major political issue in Israeli with all the unfortunate repercussions and complications that cause for what we are seeking to accomplish together in preparing the atmosphere and way for the ongoing peace effort with Syria. So I have made the...

D: That is correct Mr. Secretary. The only thing that maybe I can suggest is that if this things can be achieved before the session of the UN that would remove the whole issue from the public line and would facilitate the whole operation. I mean this is only one point that ... can make ~~AKXW~~ because I think that will allow us to

K: I will make that point today. It is a grave mistake. It is a grave mistake you are forcing us into and you

D: Why, Mr. Secretary?

K: It is a mistake because I am certain the next time we fly the gd things won't be there. I know Sadat; he isn't going to risk his relations with us for 72 artillery pieces. You are now forcing us to force them to back down in writing.

D: They don't to put it down in writing.

K: I cannot ask our Ambassador to see Sadat three times a week. Therefore, it has to go through channels, therefore, there will be a written recored of it.

D: Suppose you make reconnaisance Tuesday then send it

K: I don't know when our reconnaisance is flying. I am going to find that out.

D: I am just trying to find a way ... There is no need to make a crisis. It is no good to any of us. Iam trying to convey and be as honest as I can

K: Look I know you were honest about. Look, I won't tell the President until about six o'clock, if there is anything you want to modify fine, or otherwise I will have to send a piece of paper to him in a synopsis form.

D: (inaudible) Well I be talking again with my Minister.

K: I would not recommend however that we be in a position when he is worried about what the Israelis do while I am out of town. I do not think that is any bodby's interest.

D: No, definitely not. (Inaudible) And Dayan said to me to tell the Secretary what we are doing is a today we have another causlty Except for his diplomatic effort we would have never reacted the way we did.
K: That I believe. Look we have this immediate problem in which your proposition is unacceptable. Now is we can. First part. If we had wanted to gx cover up for it we could have done it easily and the second part is unacceptable.

D: Was not in a document questioning relationship between . It was a description of the situation . Which authorizes us to to ask you to help us rectify it.

K: That we. I have read you what I said.

D: I understand.

K: I will now send another one.

K: That isn't the letter I wanted. I wanted a friendly letter you know telling him that we would , we are under great preassure from the Soviets, but that no matter what noises he hears from Moscow, [illegible] to believe only what I tell him. You see what I mean.

S: Yes. All right. We will get that to you.

K: And that we are staying on the course we had indicated.

S: Around the course.

K: You understand.

S: Yes, I understand what you are saying.

K: Hello.

P: Good morning, Mr. Secretary.

K: How are you?

P: This is very heroic of you when you are just about to leave, and I will make it very fast.

K; I am leaving later in the day.

P: Yes, I know, but I really do appreciate it because it is terrible helpful to the story and it is very gracious of you. The cover we are doing is a very long profile which means both professional and sorta personal look at Barbara. The first thing I would be interested in knowing, is how you evaluate her as a journalist--how tough an interviewer is she?

K: I think she is very persistent interviewer, and quite tough. She has a great ability to get to the heart of the question and not to quit.

P: Has she ever asked you on television a question that you really did not wish to answer?

K: Yes.

P: Which one?

K: I don't won't to tell you. No but several times.

P: She several times what?

K: She several times asked me questions that I really didn't want to answer.
P: But you did.

K: Well I, Yes, because she wouldn't let me get away any evasion.

P: Is she, taking the last interview for example when you about a year ago, I am told privately that you had said privately to people at CBS. Barbara told me this and said it was all right to pursue it with you, that her questions were tougher than Marvin Kalb's. Is this anything I can use newsworthy?

K: No. I don't want to make individuals...

P: No I can appreciate that. One of the problems of the story is trying to ...

*

her

K: Well/questions, incidentally on what basis are we talking here?

P: On the record.

K: Well then will you read back to me whatever quotes you are going to use?

P: Yes, I will. Would you like for me to start right now?

K: No, let's get through and you can then tell me what quotes you are going to use. Her questions were more personal.

P: Than what?

K: Than some of the other interviews that I have had.

P: Do you as the interviewee consider that a good or bad thing?

K: I am very fond of Barbara, so I, its, I don't say, you know it makes it a different interview.

P: In what sense?

K: Because it's more personal.

P: It is my thesis in writing the piece is that this is one of the reasons she gets particularly in her long interviews with people some of the news that she does get because it is a human interview as well as a news interview. Would you share that?

K: I think that, yea, that makes sense.

P: How do you see Barbara as a woman?

K: She is a very good hearted, warm person and she has been very good friend.

P: Are there any particular examples when she has gone out of her way to be ... kind or do something for you.

K: She has always been a good friend.

K: I think I have said as much as I am going to say.

Peer/Kissinger
3/23/74 9:20 AM

P: Let me just ask you two last questions. I don't know you if in you busy life in the White House and State have had time to read the longer pieces that have been written about Barbara.

K: No.

P: A lot of them have been very one dimensional sorta Sammy gleb Walters what makes her run. What do you think the people at large who don't know her don't understand about this woman? or don't appreciate.

K: Well, I think she is an exceptionally warm-hearted person and a with a great capacity for friendship and not at all a pushey aggressive girl.

P: You say this even after an interview?

K: Even after an interview.

P: Uh, let's see.

K: OK, I've got to run.

P: One last question. You have been renowned in Washington for your success and power obviously, and the fact that in Washington as we all know, power makes, tends to make a man very attractive and sorta sexy. Do you think it does in a woman? Is success or success in power do they enhance a woman's attractions.

K: Not to me. I don't think so.
I mean, certainly not power. I don't think that has anything to do with it. Certainly not in my relation with here. That is her power.

P: Mr. Secretary, thank you very much. Do you want me to read back what I have taken down?
K:
K: Well, would you call me and just read me the quotes you want to use after you have taken it down?

P: OK. I don't think there is, certainly the calibre I can well appreciate that it is ...

K: Look, why don't you call me back and just check the quotes.

P: OK,

K: Good. Thank you.

P: Thank you so much. Have a good trip

K: ___their negativism continues.

V: I think so, sir. I think they are built in negative, that's my sense of it from their talks - from talking to them before and after. I think the biggest part of it they derive from your own briefing to them from Moscow to London. At least that's the way they interpret it.

K: That's amazing. Was that so negative?

V: They draw that conclusion from it.

K: But you were there, weren't you?

V: I did not draw it that worthy of that total/degree (negative) of negativism. If you try to push it further I think it will have a rebound rather than, you know go and make it any further.

K: I wasn't aware I was so negative.

V: There were terms like unacceptable, failure and so on. They were used in a limited context. The problem for them is they take that context and make it a broader one than it was in fact, indeed the fact.

K: OK, thank you.

V: Right, sir.

K: Hello.

S: Hi, Henry.

K: Jim, how are you?

S: Oh, pretty good. How are you?

K: Well....

S: A little I assume.

K: Yes, but the major problem isn't that. The major problem is that we have nothing left to offer the Soviets and therefore detente is just in bad shape

S: You mean on the MFM and equivalent?

K: Yes. I mean SALT isn't all that surprising to me and the press is building it into a crisis.

S: Who is building it into a crisis.

K: Well the press is building into a crisis.

S: Oh, the press is. They were after me.

K: Into a failure. You know, given our proposal we haven't got - you know when you listen to the Soviet version, our proposal looks pretty silly.

S: Why is that?

K: Their version is that what we're saying is we're starting off with 6,000 warheads which we're banking volarisis (sp), on poseidon. They're giving us per boat, then we're banking all the air delivered RV's and then we want to restrict their ICBM's on a ratio that's unfavorable to them in the overall.

S: I think that conceptually that has some merit, on the other hand as you stressed, you just can't do with SCBM's what you can with IC's.

K: But then I said, you know, you'll be able to destroy our ICBM's and he said, yes and leave you with 9,000 warheads to hit every village in the Soviet Union. It's not an absurd arugment.

S: No, it's not, except our preference isn't necessarily to hit every village.

K: I agree. All I'm saying is, when you hear their version - I think we would like an agreement. Their proposal now is 1100 to 1,00 MERV missiles. No sublimits but they will tell us what the sublimits are. I will ask - you're not free for breakfast are you.

S: Henry, I'm going to take a little rest if you don't mind. I'm going off to Bermuda for two days.

K: OK, I just want a little work donw while I'm gone, I'll have some of my people do it. Maybe they could get together with yours so that it doesn't leak out.

S: Sure. Just have them call Paul.

K: Whether any sublimits are conceivable that we could live with. Always keeping in mind what the situation will be without an agreement.

S: Right. OK. How's everything else?

K: Otherwise, things are going along OK.

S: Did somebody shape your senior State Department official conferences on the aircraft? I'd like to know what you say.

K: What I said was...

S: I'm just asking if there is a transcript.

K: But I can tell you what I said. I said some progress was made but not enough to constitute a breakthrough and we now have to analyse it.

S: Well, I guess I was quite consistant with that when they asked me about it yesterday.

K: That's all I did say.

S: OK. Good. Now on the question of Suez. There's a very delicate situation, as you know Herbert was opposed to that. I went up to see him, I guess after you left, and he has now backed off and he indicates that he is willing to support the operation as long as we give him a way of crawling back off the limb, which we think we've given him. He says it is improper, illegal for the DCD to fund this directly. So the position that I've taken is that the administration will seek from the operation in other ways. You can either look around in the aid budget or if you don't have it in the aid budget send a supplemental to the Hill or indicate that you're going to have a supplemental to the Hill. If the supplement doesn't fly then of course we will have done the work already.

K: My nightmare is that with the Egyptians going so far out on a limb for us, if we now get the same problem with the Egyptians that we did with the Soviets.

S: No, I agree with that. I agree with your nightmare and I think the way to do that is to proceed - the only way that we're going to be able to launch the C-141s, which we would like to be prepared to do essentially today, issue the execute order, is that is Herbert, Stennis and Mahon are satisfied that the administration is not intending to use DOD funding for this, after we've launched and executed, then you can go back to the drawing board, if you can't raise the money some other way. At this point with them raising those questions and Herbert being very stoney about it, Stennis I think probably could be talked around, not Herbert.

K: Do you think the Navy has put Herbert up to this?

S: No, I do not. I think the Navy wants to do this and I think they regard this as useful to the Navy's image in the world, sort of an all purpose service and so on. I took Zimwalt (phonetic) up to the Hill with me and he was quite useful in bringing Herbert around on the concept that we are not sending American boys to die on foreign soil, which was the line that Herbert initially started off with. As long as the indication to the Hill is the administration will seek to do this outside of the DOD budget if we ultimately fail in that regard after we have executed the operation then that's a new ball game. But I don't think we can start the ball game if we say now that the DOD is going to eat it, in fact, I know damn well we can't.

K: OK, good.

S: S: Is there some other things on the back of my mind that is a problem area? No, I can't of it at the moment. I shall be in Bermuda, you can get me at the Naval Station there, if by any chance you need me. Bill Clemmens will be available.

K: Good. I'll be on vacation myself.

S: Oh, good. Where are you going.

K: Acapulco.

S: How long?

K: About a week.

S: You taking off on Sunday?

K: Saturday.

S: OK, good.

K: I'll see you then when I get back.

S: Is there any other area we haven't - oh, Henry, get your people to take a look at the Soviet-Iranian border. The Soviets have conducted some maneuvers up

there, that are kind of odd and unusual and they're putting some pressure up there on the Iranians.

K: OK.

S: I believe that the watch committee is kind of, said, let's not stir anyone up about that, but I think that you ought to be informed on that because it looks like either a little muscling in the political area and it's obviously related to their threats that the Iranians should stop supporting the _____. That could be a problem.

K: OK, let me take a look at that.

S: OK.

K: Good.

S: Hello, Mr. Secretary.

K: How are you?

S: I'm fine and I know you're tired and busy.

K: That's all right.

S: Thank you for returning my call. The economic - the import control legislation and also the Eximbank legislation is in a subcommittee that I'm the - the subcommitte is banking this committee and I'm the Chairman of it. Both the Export control administration act and the Exim legislation expires at the end of this fiscal year, June 30. We held some hearings and we're planning a resumption of the hearings next week. What we want to focus on at this time are the foreign policy implications for both export controls and export credits. That of course raises the Jackson amendment but it's an example of a larger question, GAC opinion that a number of proposals one way or another, or bartering food principally for other commodities. The general purpose is to get into the foreign policy implications of export policies and we're starting with some administration witnesses, Casey is going to come up but I would hope at some point we might come in on you to testify in this phase of the hearings.

K: My trouble is I'll be on vacation next. How long are these hearings going to run?

S: They'll run through the month and maybe into May.

K: I don't think I'll be able to do it before May if that's still time.

S: No, that might be better. I'm in no position to say, but we'll be continuing certainly in early May.

K: I'll be on vacation and then there's that special assembly in N. Y. which brings so many foreign ministers here. Then we have an CAS meeting in Atlanta. If you would let me wait until May I would appreciate it.

S: By all means, it will suit your convenience. I do think you and you almost alone could speak authoritatively on this aspect. At some point hope very much.

K: As long as I have you on the phone, I wouldn't havebothered with it, the newspaper today all have stories about a failure of the SALT negoations in Moscow and that's totally wrong.

S: Oh, really.

K: They picked out a phrase I used two weeks ago saying it was time for a conceptual breakthrough, so they asked me was there a breakthrough, I said no, there wasn't a breakthrough there was progress, but they only heard no breakthrough. Today the Soviets papers all printed what I believe to be correct that there is a chance of coming to an agreement this year.

S: I haven't seen today's stories.

K: I just say this so that in your own considerations of credits you don't do it in the context of a failing detente.

S: I don't want to do anything at this point. I have no position myself and I would hope - what I really want to do is ventilate the issue and get started on it because we're under time restraints now and I don't know where you stand with the Jackson but from a little what I've heard there's no a great deal of progress on that in connection with the Trade Bill, in Congress whether there will even be a Trade Bill. In the meantime the Exim Bank is getting up closer and closer to it's ceiling and we're approaching the June 30 date. I would hope without polarizing the issue but handling it in a responsible way we can begin to ventilate this thing and Jackson amendment is just a part. Begin to move towards some kind of a compromise. I'm complete sympathetic with the motion for using export controls and credits ffor political purposes.

K: Oh, no. So do I. That doesn't bother me.

S: That doesn't bother me one bit.

K: There's no disagreement by me, with us on that.

S: They're arguing the other side. They say withhold the credits for political purpose. Others, some of them in the Jewish communicate. Marshall Shullman coming out and say give them to Kissinger for political purposes. That's the - that in a very large sense is the question, I think we ought to start ventilating it. Seriously and with no dispostion on my part. I suspect on the part of the others, the banking committee, to reach any premature decisions. We do have one immediate problem, I don't know to what extent this enters in your problems, but that GAC opinion, notwithstanding the Attorney General, does raise the validity of exim credits and guarantees into the Soviet Union and Eastern Europe. I don't know what the attitude of the export is and the banks are. I thought they would have serious doubts about exposing themselves, until that question gets resolved. Either it gets resolved by the Congress or in the courts. Nothing I can do about that one at the moment.

K: Let me aim for testifying in early May.

*

S: OK.

K: Good, nice to talk to you.

S: We'll be back in touch with your office with more specifics and if possible a date.

K: Good.

K: What I would like to do at this speech is to say, look, there is a problem of development but for God's sake don't let's discuss it in terms of a confrontation between the developed and developing nations, but in terms of the complete issues that confront us. In which on major points there is a communitive interest and where there isn't a communitive interest you certainly can't extort it from us.

K: Hello.

S: Henry.

K: Jerry.

S: Hi. Did you see the Star tonight?

K: Yes.

S: There's a wonderful cartoon.

K: I tell you this reporting from this trip is the weirdest I've ever seen. There must have been something wrong with my briefing. Have you seen that Moscow has now denied these stories and both have said there is a possibility of achieving an agreement.

S: Then you used us right.

K: I didn't use you. I tried to tell you guys the truth, which is no break through, but progress. Nobody seemed to hear the latter part. Really, let me tell you for your own guidance. You will not look bad if you do not howl with the pack. I'm not telling you there will be an agreement by June, right now, I'd say the chances are 50/50. They made a proposal which if it is suitably clarified, could be the basis of an agreement. If we don't get the required clarifications then it cannot an agreement in June. But it is a definite movement. For the first time we're talking about the same thing. I don't give a damn whether one week says it's bad, in fact it's slightly helpful with the Soviets. The truth is literally what I said but you guys were so focused on the break through that when I said no break through, you didn't h ear there was progress.

S: I guess so. Everybody's - the other thing is that you've, you went on such an upswing that everybody I think over reacted because of that. You know what I mean. The fact at least everytime you go someplace....

K: Jerry, take out the communique from every previous pre-summit meeting. Compare it and make up you own mind. I wanted to tell you about that thing George Vest mentioned to me. It is total nonsense. Gromyko did not get in touch with me on the whole trip through the Middle East.

S: He was obviously expecting to meet you.

UNITED STATES DEPARTMENT OF STATE
REVIEW AUTHORITY: ROBERT L FUNSETH
DATE/CASE ID: 10 MAY 2004 200102979

K: Jerry. That anybody can say now. There was no communication to me from the Soviets at all during that trip. There was a communication by me to them before I went on the trip saying I would be available for consultations by their Ambassadors, in every place I visited, that was before I knew he would be in Damascus. I never received a reply to that.

S: Why should they say that he brought Sukhodrev along with him because he was expecting to see you.

K: Jerry. Don't you think the way to have done that would be send me a message saying he was prepared to meet me. I'm telling you we received no message of any kind from him, from the Embassy, we received no Soviet message of any kind about his travel.

S: Did you see any Soviet Ambassadors?

K: No, because they never replied to my message.

S: In Moscow they were saying Gromyko got a lot of heat from Brezhnev because he's done so well in the Middle East.

K: That is conceivable. But this may be his way of covering himself.

S: In other words, what's confusing to me why did he bring Sukhodrev with him. The timing of your visits were so close. They're saying you never consulted with them. You never explained why you didn't see him.

K: That is true since I didn't know he wanted to see me. Today we announced my trip to the Middle East. We sent a letter to Gromyko. A personal letter from me explaining how the trip had come about and saying I hoped he would instruct his Ambassadors in each capitol to be available for consultation because would get in touch with them if he agreed. Then a never heard from him again.

S: The next thing was you heard he was coming to the Middle East.

K: The next thing I heard he was coming.

S: I picked up some stuff around town here about possible compromises on MFN, like no natural gas - postponing the natural gas deal but they would, the Russians, would make some progress on the hardship list and maybe increase the numbers.

K: I don't want to go into that.

S: Well, I have to go into it. I just wondered if...

K: I wouldn't speculate on any hard and fast deal toomuch because it's a more fluent situation than that.

S: But if I raised those things as possibilities would that be an embarrassment?

K: The gas deals, I haven't heard that discussed at all. The thing you have to keep in mind, Jerry, there's a sort of lemming suicidal impulse right now. People throw away what we've got as if it's nothing. Three years of peace with the Russians isn't nothing. That's my big worry. Our domestic uproar is so confusing people that they don't look at it.

S: I must say that the crescendo is getting louder. The other thing, for example, I heard today that the date for the meeting would probably be the end of May or early June because otherwise it wouldn't be feasible from the go.

K: The date will be as we announce it, as we told you.

S: Which is what, end of June?

K: Not before that.

S: Last ten days of June.

K: In that general area.

S: In other words, the end of June.

K: In that general area.

S: They told me that you'd probably go down to the Black Sea.

K: Who told you that.

S: The Russians.

K: That's one of the possibilities, on that there hasn't been a decision.

S: I'm sure you know this but if you don't I think it's interesting. The reason that was given to me that it would be easier for Brezhnev to go down there and see the President one on one. And as he did in Moscow again, then he has to worry about the other two guys because it's a more formal situation. Where if he meets with the President at ___it's easier for him to be number one down there.

K: And if he's lucky, I may not be there.

S: Now, I'm not going to sleep tonight. You shouldn't make jokes like that.

K: No, he may keep me in Moscow.

S: I meant ___Kosygin, not you.

K: I know what you meant. OK. On this Gromyko visit, believe me there's nothing to do. All he had to do was suggest it and we would have worked something out.

S: I need some kind of quote for the story can I say no break through but progress.

K: You can say it, no break through, but definite progress.

S: OK. Can we say - I thought the fairest estimate that you gave that says, no break through - you said it was inclusive.

K: Yes. I tried to be fair. That is true. It is inconclusive means that there is a chance, but no guarantee.

S: Why don't we say that, there's a chance but no guarantee. That's nice.

K: You can use that.

S: That puts the ball in the other court, nicely, I think. Are you going tomorrow.

K: Almost certainly.

S: How is Dayan?

K: It was alright.

S: I heard he was - he didn't come with much.

K: You know you guys are conducting my negotiations now.

S: We spend so much time with you...

K: I am quite confident we will work that thing - that we will come up with a reasonable position. Always compared it with the trend. I am perfectly relaxed. It was a good meeting.

S: OK. good. Have fun down there. We'll see you when you get back. You really deserve a rest. I think you did a hell of a job on this thing. Obviously you don't need me to say this, but I wouldn't be too upset by the reaction. I don't think it's - it looks awful but you can already see the Russians are upset. The thing that fascinates me is that they were really unsure of themselves this time. This time they're in a different kind of league then they've been in before. Normally they just go in and bully people and now they really have to think about what they want and where they're going to go and I think it's driving them to distraction.

K: It isn't that they didn't try to bully me.

S: No, I'm sure of that. I think obviously they want to buy some time but I think...

K: Look, basically given all the problems we are having, it was a damn good meeting it really way. None of us who was there compared it unfavorably with last year's in Zavidovo.

S: Right. Good.

K: OK.

S: Thank you.

K: Hello?

D: Dr. Kissinger.

K: Mr. Ambassador. Look I'm writing a letter to the Prime Minister of some of my thoughts which I thought I'll have Sisco give to you on Tuesday, so that it gets there about the time Dayan does. What do you think?

D: Dayan told me about this and I think it cannot hurt. In fact, I think it's a good idea.

K: I'm not pressing her. She doesn't have to do anything for a few weeks.

D: Right. No, I understand. I think its - and I relied that you put it in such a manner that in which it explains the motivation, though it does not....

K: Why don't I tell Sisco to go over it with you and you edit it.

D: That would be highly irregular, Mr. Secretary. Especially to do it with Sisco. But I'm willing - maybe Eagleburger shows it to me and then I will tell Eagleburger if I think something should be changed. But that should remain only between us.

K: I thought I'd tell it to Marilyn Berger.

D: Marilyn Berger grabbed me in the corridor before we left and she asked me if it's true that the Secretary's getting married today. I said that was one of the bilateral issues that wasn't discussed.

K: She is an absolute pain in the neck.

D: Are you, Mr. Secretary?

K: Listen, if you don't know, it can't be true.

D: I'm not sure anymore. I think my information is slipping.

K: You know that these things wouldn't ever happen without you.

D: I wanted to tell you but whatever you decide to do, Mr. Secretary, my blessing goes with you. I really mean it.

K: Thank you. I hope you don't mind my teasing you. It is really a sign of great affection.

D: I really appreciate it, it's mutual, I can assure you, Mr. Secretary.

K: I know that. You've been a friend beyond the call of duty.

D: I like you as a human being and I think you're doing a great job for the free world. That is my main thesis about you.

K: The crowd is gaining on me, you know it.

D: You say what I did with the Soviet press for you, Mr. Secretary.

K: I know. I didn't know you had a gang there. Actually I found that very interesting.

D: I think they realized that they undermining their own cause by this. They don't want to weaken the President, they don't certainly want to weaken your position.

K: No, my position they'd love to weaken.

D: I don't think so, Mr. Secretary. I had a very interesting luncheon with the editors of the U.S. News and World Report the other day - while you were in Moscow. We were discussing this question of detente and I was trying to convince them that ____because of their interest in perpetrating the President's position. I really believe it. I think the biggest catastrophe that can happen to them is if there's a change here, because when there is going to be a change, it will also be a radical change toward Soviet detente. They know it, so therefore - I mean I don't say that they.....

K: I'm not sure that's true.

D: I think it is. I think they are very much interested in keeping the....

K: Why should Ford change his policy?

D: Because they don't know. It's a new element, it will take ____another two years to study him and all his friends and all his motivations. They don't know what power base he will have around him.

K: It's an element of uncertai nty.

D: They know that in any event Congress will be stronger ~~on the fort~~ because he comes from there and he is dependent on them. They know that Congress is not particularly sympathetic to them, so all these considerations, I think, indicate to them. Besides they have great respect for your ability and ...

K: Since they now know that ability is not working for them ...

D: Well, I think they still think that they can best advance detente under you then under anyone else. I don't mean it critically, I mean I think that you are trying to get the best things for America out of detente. That is obvious, but I think that they would see new mobility to advance than anybody else. I know, and they realize that they instructions you came with on SALT were not sufficient. They know, I presume they even surmized that if it were up to you individually you would gone further.

K: No, not much. A little.

D: More than I would say on material things.

K: I think we're not pursuing an insane course which will lead...

D: to confrontation in the front.

K: No, that eventually too, but at first it will lead to Soviet military superiority because we're not going to increase our budget enough to - but that's a different problem, we can discuss it some other time. OK.

D: Dayan flew to New York and I'm joining him this evening and he will be coming bac for meet the press. I think their meeting was good, the meeting today. It put him into a better frame of mind. And he is now afraid that by Monday it will not all be toppled down while the Secretary is going to be in Acapulco. I said, I think that the Secretary will see to it before he leaves that he closes all the avenues so that nobody will run away with the show.

K: No question.

D: And he explained to me what you told him that we have to give the credit to Schlesinger that you don't want to...

K: That's why I maneuver in such a way.

D: Yes, I understand. When you come back and we will have one of those personal talks, I will tell you some of the things that are happening town. I don't want you ever to misunderstand me, Mr. Secretary. I'm not saying it to you in order to play into the Departmental game. I don't play those games. Not with you anyhow, but I think you ought to know what is going around town and his talks with Congressman and his talks with professors. I'm not saying he s talking against you, but he's building it on constituency. He's building a constituency which is based on the ___line then the one you take. He does not speak against you except on specific issues. He's speaking about the need for stronger American and for a less compromising America. He has attraction to these circles because he is intellectual, he's the only one in that Administration that...

K: Particularly since it works against the Administration.

D: Well, yes, but that is a secondard... Yes, that is why it is attractive to some element, sure.

K: OK, I'll see you when I get back.

D: Fine, have a nice vacation, Mr. Secretary.

K: Thank you.
D: Bye.

K: Frank, how are you?

M: Well, other than recovering from the flu, but otherwise I'm fine. Are you going to Syria or Acapulco?

K: I'm going to Acapulco.

M: I thought this morning, Holly said she thought you were going to Syrian and then somebody came over and said that Francie Bremer says that you're going to Acapulco

K: That is right.

M: Then I figured she knowsbest. I had a couple of things I wanted to raise with you. One before you went down to the Latin American meeting, but I don't know whether you've done anything with it or not, concerning a fellow Chon Chol. Ever heard of him?

K: NO.

M: Well, he was the Chilean Agricultural Minister. You know, an agricultural economist, but apparently a very high class intellectual academic fellow and in jail. It struck me from what I heard about it and the kind of people who were calling about it, that it would be an awfully effective thing if somehow we could put some pressure just in respect to him, because it would look awful good and he's a kind of a Galbraith (?).

K: Do I have his name here.

M: Chon Chol. C-h either a-n or o-n. C-h-o-l.

K: OK, we're making a representation about somebody else, so I'll include it.

M: The first name is Jacque. As near as I can figure out, he's pure academic and very respected here. You know, in a non-political sort of agricultural agronomist fellow. I'm sure he probably isn't thatpure if he served , but I'm also sure it would look awful good if something could be done. How long are you going to be gone down there.

K: About a week.

M: Well, when you get back, let's talk because I may be going on my visit. To the Caribbean.

K: Oh. OK, good. Will you call me when I'm back?

M: Yes, I'll call you when you get back.

K: And I hope you feel better soon.

M: Well, I'll be alright. Also maybe we can get together then on a date for our seminar sometime.

K: May would be possible. April is impossible.

M: Well, why don't you get your people to think about a date in May.

K: OK.

M: Talk to - oh who is it we've been talking to? Miss...

K: Andrews?

M: No.

K: Rothe?

M: Yes.

K: OK.

M: Or Eagleburger.

K: Eagleburger would be the best, but I think they can't pick a date until I'm back because - not until I've talk to Syria and it's fallen into place there.

M: Yes. The way you're going it will fall into place. Just a quick nudge. I tell you there's nothing like it. I even like the setback.

K: The setback isn't actually so bad compared to what the papers said.

M: That's right. I can see that coming along too.

K: It is coming along. Actually the papers got carried away. I told them there wasn't a breakthrough, but I did say there was progress.

M: They want a miracle a day.

K: But they're now so used to homeruns that they won't settle for doubles.

M: That's right. Exactly.

K: Frankly given the situation with the Chiefs, I couldn't get a homerun, but I couldn't have - but I would have tried to avoid hitting one if I could have had one.

M: I must say I think those guys - they want only the superlative. I thought if even you read between the failure lines you see success. I'm sure the stories aren't very well written anyway.

K: No, they over wrote them.

M: I'll tell you who's not fooled by the failures is F. Edward Herbert, if I read the paper correctly.

K: Who?

M: Did you see that story - Herbert who is the House Armed Service...

K: Oh yes, did he pop off?

M: Oh, yes. He's setting up a separate subcommittee.

K: Oh, on disarmament.

M: To study these terrible disarmament agreements that you're about reach.

K: No, he isn't fooled. We have no interest in high profile right now.

M: Well, he doesn't see you as failing, I'll tell you that. I think it's all just fine. But I'll call you when you get back.

K: Good, wonderful.

M: And we'll talk to Eagleburger on a May date.

K: Good. I want to talk to you at any rate about where the liberal Democrats are goingin foreign policy. I think they're killing themselves.

M: Well, I want to talk to you about that, because where they're going is in a very strong __position.

K: Well, that's alright. That they have a right to do.

M: But you've got to undercut that somehow.

K: But what they're also doing is in a hard line position.

M: The way to head that off is on the human rights area. You can't let this become a confrontation between , you know, with them on the human rights question. I thought you had won that day and I hope I can tel l you this, that was the ___day. Terrible. You can't get into that position again.

K: I'll tell you the truth. I wasn't prepared for the questions.

M: That was obvious.

K: Whic is another stupidity.

M: You should have waited. Waited till you saw the statement and so forth.

K: I agree with you.

M: Let's talk about that question because I think that can be blunted and then you can let the liberal democrats go where they want. If they want to be hardmind Richard Nixon 1950 anti-Communist, that's fine. Because they're not going any where with it.

K: OK. Hope to see you soon Frank.

H: Yes, Henry.

K: Al, I'm meeting with Dayan today and you know on that Syrian things what needs to be done. But one of their problems is that we've been dragging our feet on the arms supply. He's the only man who understands in Israel what needs to be done. So I think it's important he come back from here with some understanding of his position. One of his problems is the Soviet have put about 800 tanks into Syria since the war. We've only replaced 225 out of the 600 they lost. He feels he must have tanks which the army says they don't have, except by taking them from unit. I think that we just have to do that. And the same with ACPs.

H: How many of those do they need?

K: 500.

H: OK.

K: I'm going to have Brent work with Schlesinger but I would like to you, if you would, if we have anyproblem, I would like Dayan when he sees Schlesinger on Monday afternoon to be told he's getting this. So that he can go back to Israel as the man who produced it. That will then help us in the subsequent talks.

H: OK. Do you want me to wait until Brent tells me the way in or to move anyway. I can do it either way.

K: What do you think?

H: Maybe it's better not to undercut Brent, let him just start and if he finds there's a problem.

K: OK, I'll have Brent work it this weekend and get in touch with you if there's any problem. And you might just say the President is interested in Dayan having something to take home with him.

H: Exactly. I understand the picture, Henry, we'll just put the arm on him. It has to be done. We can fool with it.

K: Have you seen that the Soviets have now put out a statement denying these press reports.

H: No, I didn't.

K: The Soviets have put out a statement saying it is totally wrong to say it was a failure and that an agreement by June is quite possible.

S: That's the plan.

K: Right. We are going over, with him the various disengagement schemes. He's really been the man who on the Egyptian disengagement and on the Syrian one has been the one who has carried the intellectual ball. I would be very useful if he could come back with some positive news on some of his concern. I don't have the list here in front of me so I don't want to go over individual items with you. If Brent could work with somebody, whom should he work with over the weekend.

S: He could work with John Whickem on that.

K: OK, I'll have him work with Whicken and I talked to the President about it yesterday, again not on items but as a general idea and he is sympathetic. too. So can Brent work with Whickem and if you could in your conduct when you see him, do it from that point of view it would be very helpful.

R: Hello, Henry.

K: Hi, Ken, how are you?

R: I'm fine thanks.

K: I'm sorry we couldn't get together this morning and now I'm off for a vacation.

R: I know you are, you certainly deserve one, Henry and you should have. I think you have received most of the things I had in mind.

K: You had to go home. There wasn't any mixup about getting together today.

R: No. I just finished up everything and so I can home.

K: Did they tell you - you know, there's no reason for you to have stayed.

R: I wanted to, I had some things I wanted to do.

K: You wanted to go home.

R: No, I had some things I wanted to do in the office.

K: They did tell you I was going to see you right after Dayan.

R: No, they didn't. No one told me that.

K: Alright, never mind.

R: I thought you'd probably be with Dayan toomuch.

K: NO.

R: When do you leave, Henry - at 1:00?

K: Yes - there's no sense for you to come in, it isn't that important. Did you make clear to Kosciusko-Morizet that we infact did have evidence along the line that these articles said?

R: Yes we did. As a matter of fact, Henry, I played golf with him and with Mel Laird and with Jim Hutson just after you had seen him and he was telling me about h is talk with you. I said we did have evidence, Jacques, some of your Ambassadors had been urging the Arabic countries, I won't tell you which ones, not to lift the boycott. He said well that can't be. I said, well it is, that's the evidence we had.

I said obviously it's indirect evidence, but we have the evidence. Then he came officially to giv e me the demarche. When I called him back in as you requested, I told him this over again that we did have indirect evidence to that effect. He denied it, he said that would be stupid of us. He said obviously that would mean a continued curtailment of production and that in turn would mean we would not - the price would stay high and it would hurt our economy very seriously. I said I don't know about that but certainly your Ambassadors are reputed to urge the continuance of the boycott and I assume they don't do anything that Jobert doesn't tell them to.

K: Basically it wasn't so much that they urged them the continuation of the boycott b ut they told them after the boycott was lifted they would see we'd go back to our pro-Israeli policy.

R: That was the point. I told them that was the reason that they urge the continuation of the boycott because the boycott was the only thing that kept us from going....

K: Some people say that - I've heard one story that said that Morizet said that I p ut out that story and that you didn't contradict him. Is there anything to that?

R: No, I told him that the thing was unauthorized. In essence I told him what you told me to. He told me that he - I knew nothing of his talk with you on Friday. He told me at the golf game the next day on Saturday afternoon, that he was sure that you had been the one who gave Marilyn Berger her information. I said what makes you think that? He said, well I just assumed that. When I called him in...

K: I never even saw the Marilyn Berger article.

R: That was the one that came out - she made it low key. That came out before the Evans and Novak article. Evans and Novak came out in the morning, that I saw Morizet - that was the day after you had seen Morizet. He said he thought Evans and Novak had received the information from you. I said I'm sure that was not the case. He then - I then told him on that second meeting, because I didn't know where that article in the AEP(?) had come from, that I had been in touch with you and I was authorized to see that anything in connection with the State Department, except an official saying anything attributed to the State Department, except what our official spokesman said , was unauthorized. He just accepted that, or at least he said nothing about it.

K: There's not much we can do about it, but basically I think we ought to freeze our relations with these guys for the time being.

R: I think frankly, Henry, they have somewhat been encouraged, the fact they have been treated so well as they got worse and worse. They think they can carry on what India did with you. The more we did for India, the worse they got. I think they feel the same way.

K: Yes.

R: Henry, coming to another subject, we have, I think, got to put it up to Bill Donaldson. Either to devote his time to security assistance or to energy. The security assistance thing is - thank God we're putting George Vest in now to take Sy Weiss' place. Sy is not moving in. I talked to both of them, I talk three talks now to Donaldson.

K: Well, what does Donaldson say?

R: He said he's getting on top of it. I'd tell him about the personnel problem - he's getting on top of it. I asked him to come back and report to me, and I'm just not getting the reports back. I've just decided he's so completely wrapped up in energy that's he's not going to be able to get on top of security assistance.

K: Basically, he ought to be able to do them both.

R: He's certainly wrapped completely around energy now. With George Vest in, PM is supposed to be, in essence, the staff for the Under Secretary for Security Assistance. We'll see how that goes, but I'm very sceptical that Bill can handle both jobs. At least he's not doing it now and he's been in there for 6 months.

K: He ought to be told he must.

R: I've told him three times now. I'll tell him again next week. I think I'll call him again and tell him he may have to make a choice. See what his reaction is. I don't think he quite has the capacity to spread himself over those two bigs jobs. I think he's so deeply in on security - on energy. He's traveling too, quite a bit on it. The security assistance thing, we just have to take up ourselves that Joe is helping out on the Middle East. Did Joe see you, by the way, about Jordan.

K: Not yet.

R: On the 12 million five for Jordan, I just sent it back into Joe. On the 12 million five, Henry, both AID and Holton think, they in essence told the committees, that the Vietnam was the mass supplemental we were coming in on. They think it will have a very bad reaction in the Congress on the whole thing if we go back in for an extra supplemental of 12 and a half for Jordan. That the thing to do is to include the Jordanian 12 and a half next year. That Jordan's cash position is very strong now and they don't need the cash and that we might jeopardize even Vietnam if we got back in additional supplemental request on Jordan. They've had a very bad reaction in the Congress on Vietnam but I hope we'll get that through. I'm inclined to think we ought to let Jordan go into the '75 budget at 12 and a half million. Is that alright?

K: Yes.

R: Good. Now I left with Larry a new group of names for the Under Secretary for

Economic Affairs. If you want me to I can get busy on some of these.

K: Let me check those names and I'll leave my recommendations with you.

R: Good. I've got one last thing. I talked to Jim Schlesinger again. Jim insists he talked to you three times or four, about Bill Porter continuing as the negotiator for the Icelandic negotiation. I told him it's just imposible, I think.

K: I tought at that time it was only one more session.

R: I was think about this. They don't want Joe to do it, that's the point. I mentioned Bob McCloskey. He said maybe that would be a good out. What we could do is get Joe and Bob both in on the thing. I'm afraid Joe is going to take a beating from them if anything goes wrong because they haven't wanted him, you see.

K: Why don't you explain that to Joe.

R: And sort of dilute it between Joe and McCloskey. I thought also to suggest to make Jim happy, I might for this one session to bring Bill Porter down from Canada and let him sit in on this last one negotiating session. To wash himself out. What would you think of that?

K: OK, good. I think that's a good idea.

R: That will satisfy Jim to a certain degree and then push it on over.

K: Good.

R: [redacted] B1

[redacted] B1

K: OK, well then let McCloskey handle it after the next meeting.

R: Good, well thanks a lot Henry.

K: Thank you.

R: Hope you have a good vacation, you certainly deserve it.

K: I am going to the Senate Foreign Relations Committee. Do you think it is for real?

D: I have her on the line now, Mr. Secretary. It seems to me it is for real.

K: Well tell her -- the one thing that has to be understood in Israel. It is my judgment as your friend -- not as a Secretary of State, now -- that if this thing blows up and leads to another war the outcome is going to be an imposed settlement with a 67 frontier.

D: I understand. I will tell it to her Mr. Secretary.

K: And tell her -- first of all give her my affectionate regards. Tell her that it is my belief that she is really essential.

D: I will do this. Can I call you when you come back from the Senate.

K: Yes.

K: You are marvelous.

J: It couldn't be nicer and we are thrilled. You were at the Escondons?

K: Yes.

J: Did you see them at all.

K: Yes, we saw them several times.

J: How very nice. Are they all right?

K: They are fine and very nice.
It was
J:/Beautiful?

K: Yes. Couldn't have been nicer.

J: I am delighted for you. It makes everything else pale into very small print.

K: I wouldn't say that.

J: It does. Henry, I have lots of questions but I'll only ask you the most urgent one. One you are appearing at 4:00. I gather you would like your appearance confined to Moscow?

K: Not absolutely. Maybe in the first round.

J: O.K. That will be fine. How much time can you give them.

K: Two hours if necessary.

J: I think you should tell what you have just told me to Sparkman.

J: Fulbright will be gone; have you talked to Bill?

K: No.

J: I think it would be nice if you gave him a ring.

K: I will do that.

J: He is probably on his way back to the office now.

K: He is in town.

J: Yes, but he is going in a couple of hours.

K: I will call him immediately.

J: He was just here. He didn't even show up to vote this morning because he is anxious to get out.

K: I will call him this minute.

J: The other things I wanted to ask you is this. I was going to go to Europe on next Wed. night but I found that I couldn't see anybody there. I wanted to see Wilson and his team and Brandt and everybody is going to be away. The only thing going on in Europe is the Bilderberg which by the way both Nelson and David are going to.

K: Yes.

J: You know that.

K: Yes I do.

J: So I cancelled out of that and had an invitation from Jack Kubisch to participate in the Latin American --

K: That would be nice if you would do it.

J: When you say that immediately throws me. I really have no interest in doing anything that isn't ... very purposefully.

K: It would be very, very useful.

J: Are you going to take a hand in it yourself.

K: I will be there every minute of it.

3.
Javits;

J: If somebody would instruct me. Jack wants to come up. I assume he will brief me on what you are trying to do.

K: Exactly.

J: The other thing I wanted to ask you is this. We want to fix a little attention because it was so prescient on this report on the Committee of Nine. You remember that.

K: Of course, I endorsed it.

J: Suppose, if I can get Wayne Hays to do it, I know you talked to him. If he and I joined in a letter to the State Department saying, will you give us your comment on this document and we will then cause it to be published as a Committee print.

K: I will give it a personal endorsement.

J: I think it would mean, really in analysis, probably another way of declaring our present stand on Europe.

K: I would be delighted to do that.

J: You see what I mean.

K: Absolutely.

J: The other thing that can be done is this. Max Vanderstall is going to put out a white paper on it. I thought we could print it as a Congressional document or if the State Dept. considered it more appropriate it could do what it wished with it.

K: Let me think about that. Let me see if we have some mechanism of doing it.

J: The last thing is there have been considerably stirrings here about the Jackson Amendment and at your earliest convenience I should get some idea from you as to your present stance. Joe Sisco is coming up for breakfast and he will brief me to whatever extent he wishes to. But in the final analysis because this thing is really engendering a lot of interest among Jewish organizations, I should have a better idea as to where it stands at this time. Are you proposing to have any near term meeting again with Jackson.

K: No, I would not have such a meeting without talking to you first.

*

J: Alright, and then do I gather that you told them that when you did have a meeting you wanted me present.

K: I haven't formally done that yet, what do you think?

J: I think you should.

K: Ok, I shall.

J: But, I don't think that's as nearly as important for the reasons I'll be able to give you.

K: Jack, are you going to be in town next week?

J: I'll be in town whenever you want, I mean I'll make it my business to be.

K: Well, how about having breakfast Tuesday or Wednesday next week and then we can review that whole situation.

J: Good, my office will work it out.

K: Good, wonderful. And let's have it at State.

J: At State.

K: We'll eat better here.

J: I'm for that.

K: Good.

J: I'll see you later and I am delighted and love to Nancy.

K: Thank you, hope to see you both soon.

J: Oh listen, you'll see me Saturday night, I'm coming to..

K: Oh, marvelous, teriffic.

H: Mr. Secretary?

K: Yes.

H: How are you?

K: OK.

H: Good.

K: Bill, on this Soviet proposal have you ever done any work - analytical work, so that the BS finally stops, of what we could make of it if we wanted to.

H: I've got it started here and it's almost finished, but it's not quite in shape.

K: It seems to me we could proceed, I mean, they said no sublimits, but they said information. Now supposing we don't debate what is information, what is sublimits, I suspect that one of their problems is that they don't want to follow the same mix as we do.

H: That's right.

K: You see what I mean.

H: They've got a mix of their own.

K: They undoubtedly have a mix of their own. Can we suggest something to them that is rational from their point of view and yet within some program that we have sensed they might do anyway. You see what I mean?

H: Yes.

K: And within the limit of what we might do anyway.

H: You remember a did a little memo before the Moscow....

K: No, you're prediction of the program turned out to be quite correct.

H: I've got that refined and including a more detailed look at the SLBMs part.

K: And what's your estimate of that?

UNITED STATES DEPARTMENT OF STATE
REVIEW AUTHORITY: ROBERT L FUNSETH
DATE/CASE ID: 14 MAY 2004 200102979

H: Well, I think, on the basis of what we know, it's going to be about 150, but it's going to be very late in that...

K: Which is consistent with what they told us.

H: Yes. But there's a little room - our problem is the one that you raised, that is, they may only intend to do 150. We're up against this problem of verification.

K: On the other hand if there is no agreement, there is some number we're willing to live with without an agreement.

H: Yes, but without an agreement the numbers are going to go well beyond that.

K: For us?

H: For them. I mean they'll just keep building. That's the essential point. That's the one I'm trying to get at now.

K: But what you should do in your analysis is - there must be some ratio we're willing to live with in the absence of an agreement. Right?

H: Right.

K: Because that's how it's going to work out defacto. Instead of comparing the ideal against the real, let's compare the real under two circumstances.

H: With an agreement and without.

K: Exactly.

H: Right.

K: When can I have that to study? Can I have some of this tomorrow?

H: Yes. Can you wait until tomorrow afternoon?

K: Yes.

H: There's one other thing that I think we have to do, which I think is going to be neglected. That is this whole question of exchanges of notification of information.

K: Like what?

H: I think there's a lot in that, because even though we say we have to count every SLBM, the fact is you can't bring in a submarine, redo it's fire control system. Put in new missiles and turn it out like sausages.

K: Well, that's what I think.

H: This is quite an elaborate process and unless it's done under total cover, we're going to see it and we're going to be able to count it.

K: Exactly.

H: But nobody's working - I just discovered today no one is....

K: Yes, but is anybody working on these SALT proposals now?

H: Yes, we just had a meeting.

K: Who is we?

H: Well, the State Department people had a meeting.

K: Yes, but how about the French. What are they doing?

H: They're working under the Lodal thing now. Lodal's people told them quite a bit. Now there's several papers going.

K: Why did Lodal's people...

more

H: I have know idea what motivated all of this, but a greal deal came out then I thought we were going to talk about. Anyway the numbers are available to almost everyone and some notion of what went on is available. This is probably OK and people are going to have to work with real figures.

K: Yes, but when are we going to get their analysis?

H: Probably by the beginning of the week - beginning of the next week.

K: OK, can you find out for me?

H: That's what was agreed upon today, but we can speed it up.

K: Speed it up.

H: All of this is going to be coming together at once, but the Defense's position is already fairly...

K: Which is what?

H: Which is that none of it can be verified, so it's all phoney.

*

K: And therefore what?

H: And therefore, you know the - but this is at a fairly low level. I think we're going to find that this proposal can be worked. The question is whether the levels will be anything near what we can ___.

K: But that's what I would like you to look at.

H: Yes. We'll have....

K: What can we imagine that's not insane from the Soviet point of view?

H: Well, I think of a breakdown....

K: There's no sense telling the Soviet they can have 700 SLBM's when they haven't even begun to test it.

H: Right. And when they probably won't do nearly that many.

K: That's what I mean. We don't even see the submarines that can carry them.

H: No, I think we've got a fairly good handle on what their probable program is now.

K: OK, you better do a paper for me.

H: OK, I'll get it up to you tomorrow afternoon.

K: OK, good.

N: Hello.

K: Mr. President.

N: How are our Algerian friends?

K: I thought that was a spectacular day yesterday, Mr. President.

N: They are a little bit, shall we say provencial but...

K: But they are very influential in the Arab world.

N: Very influential and they are just like the Chinese. Puritanical as hell. You notice they smoke but they didn't drink.

K: Yes. Boumediene said to me on the way out, he said just tell your President that whatever his contemporaries are doing to him, history within one mandate (meaning one term of office) will record him as one of the greatest peace makers in history.

N: That's nice of him.

K: You made a tremendous impact on him.

N: We had a good talk. I thought that in the evening what he wanted to do was make a little speech. That is why I let him do it. That let everybody hear it and then keep it a little light. I think sometimes these guys are so humorless,

K: On the other hand, the human touch for them is enormously important. I had mentioned to them in the afternoon your plans of going to the Middle East.

N: They hit me with it.

K: I told them you had no specific plan to go to Algeria but then I am glad they did hit you with it. I think myself now the way this present schedule is, we may have to lean on the Israelis a little bit. If we can get the disengagement done in the first few days of May then -- I think very much you ought to go in the last week of May or first week in June.

UNITED STATES DEPARTMENT OF STATE
REVIEW AUTHORITY: ROBERT L FUNSETH
DATE/CASE ID: 19 MAY 2004 200102979

N: Depending of course upon this House thing. We have to see what is happening there. If They've left us off the hook by that time or got us on, we've got to do one or the other.

K: Do you think they can do it that fast.

N: I don't know. I haven't the slightest idea. They probably want to drag it on. I don't know. Doesn't make any difference.

K: I think in any event, when the disengagement with Syria is done -- which I hope to be able to know in two at most three weeks then the trip by you to the Middle East would be an enormous event. And one that is...

N: Before Russia.

K: I think it must be before Russia; and it would be politically of the first magnitude in the Middle East. I have been talking to the Egyptian Foreign Minister and he says they need it. They just don't want it, they need it as a symbol of their new orientation. Conceivably we could do it after Russia but if you do it before Russia, the Russians would be extremely miffed.

N: I know, but they would get over it.

K: My own guess, Mr. President, is...

N: They travel in the Middle East. Why can't we?

K: Exactly. My guess is that around May 25th would be a good time.

N: Let me think of it in terms of planning. Henry, with regard to Gromyko, we see him at 11:00. I have just gone around the track with Podgornyy and there is not much. How long do we have to take with this fellow again?

K: I guess an hour and a half or hour and fifteen minutes. I've got the Egyptian For. Min. here in my office. I am in the back office. I will come over about 10:30 if you agree.

N: I am pretty tight this morning. Come over about 20 minutes till, will you?

K: O.K. The major problem is he will want to go over all the bilaterals. That's easy. The major thing he will hit you with is Soviet participation in the Middle East.

N: Right. I know that. Podgornyy hit me with it too and I said you would consult etc.

K: You can't go much beyond that.

N: I know that . I told him there were some places we . . . have influence and some places you have.

K: The Egyptians are violently opposed to it. The Syrians are opposed to it. And the Israelis are opposed to it. It is the one thing they have all agreed on.

N: What do you say to him then.

K: I think we should say after the Syrian disengagement we are prepared to go back to Geneva and to agree that everything is done through Geneva.

N: You noticed how Boumediene picked up immediately on my line that look you're not going to have a permanent settlement with a lot of governments sitting around in Geneva. I said you have got to have some private talks between things. He said that is the practical way it is done. I said of course we have this public forum. He got the point, didn't he.

K: Mr. President, I know these Arabs.

N: You have spent more time with them than anybody else.

K: This was a spectacular success yesterday. I told you what the For. Min. said to me after the morning. In the afternoon, and after the evening, first Boumediene said to me on the way out, then Boutiflika took me aside.

N: Who is Boutiflika.

K: The For. Min. He said we've got to get the President to Algeria. He said get disengagement done fast so that we can do it.

N: Good.

K: It is not only to have a junket, Mr. President. It will be a political event in the Middle East of the first magnitude.

N: Of course it is. And We've done it. I'll see you then about 20 mins. to 11:00. Make it a quarter till. You and I know this subject so well I will do a dance around the son of a gun.

K: We don't have to talk about it.

N: I would like to have him nbt drag the thing on because I am going to Florida about 2:00 and I need some time with Haig.

JK: You want/name specifically what...

K: I think what we should say is: Since this meeting takes place so short a time after Mexico, we do not believe that any major results can occur. What we can do is reconfirm the spirit. Set up working groups for the preparation for the next meeting and perhaps if you want that scientific and technical thing or whatever and secondly, once you have established that you should say it would be unfortunate if the meeting in Washington with the American press in the present state of our situation would focus on the divisive aspect because that would destroy that new spirit. And we have to say that clearly. Can we do that?

JK: Sure. I guess I was not clear in my own mind what you wanted.

K: Can we get that done today please.

JK: Oh, yes.

K: Good. Thank you.

K: Jim, how are you.

S: Pretty good. How are you.

K: Thank you very much for your note.

S: Well, I tell you, Henry. I knew about that wedding well in advance because my yeoman service told me about it.

K: Who is your yeoman service.

S: I have a yeoman in your office. Don't you know about that.

K: Oh, sure.

S: But I did not want to give it away. Those fellows do yeoman work. Congratulations and all that kind of thing. Did you have a good recess.

K: Yes. I had a good rest.

S: Now there are two are three problems which are minor but could become larger. One of them is in Egypt. I don't know whether your people have brought you up to date on that. But this fellow Murphy who came in with the low bid obviously does not have the resources to carry out the excavation operation and he is going to be trying to put the bite on the Navy. I had while you were away great trouble holding John McClellan on the line just for the US Navy's present participation in the thing. And as you know we have previously had problems with Hebert and Mahon. That has got to be very carefully watched and those fellows have got to be kept in line. Eilts over there in Cairo has been making commitments according to the cables that I saw a couple or three days ago with regard to what could be done to help out Murphy. We are going to get ourselves very tangled up. You had better caution Eilts on what he says to the Egyptians about Murphy.

K: All right. But you know we are getting ourselves into one hell of a fix here. The Egyptians are being squeezed by the Russians.

UNITED STATES DEPARTMENT OF STATE
REVIEW AUTHORITY: ROBERT L FUNSETH
DATE/CASE ID: 14 MAY 2004 200102979

S: The substantative problems are mighty clear to me but some how or other we are going to have to have a way of helping them which is direct and is supported by the Congress.

K: I agree.

S: Because the chaps up there on the Armed Services Committee and Appropriations Committee that deal with our budget just regard it as inconsistent with the law for the Department of Defense to be doing little favors for the Egyptians out of the monies appropriated for US defense.

K: Yes.

S: McClellan was very hard to bring around on this one. I spent about an hour with him. And as you know Hebert was a bear.

K: Yep.

S: That is one area we are having trouble and Eilts should not make commitments.

K: I have to check into that. I am not familiar that he is making commitments.

S: I saw a telegram the other day. Now that is a very delicate operation and it should be handled through coordination between State and ourselves.

K: I agree.

S: The second problem is Diego Garcia. I believe that Gov. Holton needs a little bit more instruction but he has not been much of help on that. State papers refer to that as a Pentagon proposal and it may or may not be a Pentagon proposal.

K: No, no. We support it completely.

S: Can you get with some of the senior people up there otherwise it is all...

K: What is it you want us to do?

UNCLASSIFIED

S: Let me get back through Larry Eagleburger with a set of proposals. Basically if you can turn around Mansfield.

K: That I don't think I can do because I ran into him at a dinner last night where he hit me on it. I supported it but I don't think I can turn him around but I can maybe neutralize him a bit.

S: That's the main thing, if you can get these fellows just to be a little quiet. I don't think the opposition up there is as deep seated and across the board as one might think. It is just that there are some noisy people who are opposed to it. The Armed Services Committee deferred it to the 75 budget without prejudice but the House has put the money in and I think Tower and Jackson will help us out when it goes to conference.

K: Good. If you can make a specific proposal I am fully behind it. I am not aware of the fact -- I must say that whenever Holton talks to me -- when I went up to the For. Relations Committee he urged me to get strongly behind it.

S: Well, good, good.

K: Whatever mistakes have occurred were inadvertent. There might be things on which we disagree and in which they do to Diego Garcia what your guys are doing to me on SALT.

S: Now stop that. What are my guys doing to you on SALT.

K: All this stuff that they put out that I am for a softer position and Defense is just as happy that it isn't working so and so forth.

S: Are you referring to an article by Marder last weekend. I thought that came out of State.

K: Absolutely not. It couldn't come from State.

S: The tone, as I read that article, was that the reason that the thing fell apart was that the President listened to the Pentagon rather than to you.

K: But that isn't true either.

S: I know it's not true.

UNCLASSIFIED

K: Because the proposal is exactly what I recommended.

S: Look there are fellows up there on the Hill that are continually attempting to invegle me into saying something unfavorable about SALT I. In trying to get us into a dustup. As a matter of fact at the National Press Club yesterday they -- somebody pulled the same thing and I continue, needless to say, as I have for three years now, two years now, said that SALT I was a good deal.

K: Forget now what your guys are saying about SALT but it wouldn't be inconceivable that some of our guys are sniping at Diego Garcia, but I don't have the impression that Holton is one of them.

S: No, I don't think - I think Holton is a good man. But he's a little unfamiliar with the tactic and you might get him to sit down with Dave Abshire and give him a few pointers and also to get a plan on some of these things.

K: OK. And also if your legislative people will will tell me what I can do I am fully in support of Diego Garcia. I would like to talk to you, Jim, about SALT. Whether there is anything we can do with the Soviet proposal. Dobrynin came in now and said, you know, indicated there might be some flexibility about numbers, either by letting us go up a bit, if we need higher numbers, or I think, they might even accept a bigger ratio on MIRV missiles. What we have to do is compare it with what they can do without an agreement and what we're willing to do if there is no agreement.

S: Right.

K: I continue to believe the worse outcome would be if we stick with our program and they go all out.

S: Yes. That would be a very bad outcome.

K: At the figure of 1100, that's roughly our program for MIRV missiles.

S: Yes.

K: I think 1142 is our program by 1980 if I understand it. So then the question is, since we're not giving anything up, of our current program, do we intend to have a larger program. If we don't intend to have a prospect of getting a larger program, is the limit that is set for them somewhat lower than they would do anyway or what are we giving up. You see that's what I would like

UNCLASSIFIED

to analyze. I don't know the answer.

S: Right. Well, let's get a little analysis.

K: And maybe you and I could get together next week.

S: Well, you know I'm leaving on Tuesday to go over to Germany.

K: For how long?

S: I'll be there the balance of the week. I want to see if we can strengthen the NATO position in the North__ region.

K: I strongly favored it.

S: As you know, every time we look at that it looks as if the Americans and Germans can hold in the South, speaking conventionally. The North__ region is kind of full of holes. The British particularly are very ___. The Germans are improving markedly on this and I wanted to throw our influence in behind the North__ region because there's not much point in holding in the South if you're going to collapse in the North. And also I'd review the troops and tell them what a great job they're doing and all those things.

K: I think it's important. Well then we may have to meet shortly after you get back because I'll be leaving for the Middle East shortly after that. I have to run to a Gromyko meeting.

S: I promised our friend Dayan 200 tanks and 500 APCs. But we're now holding them up pending clarification of what the hell is going on there politically.

K: And also hold up a bit on the Syrian business.

K: What do you want me to do to counteract the bad reporting coming out of the press of your meeting and his going to Moscow. I need an explanation.

K: Have you done that letter to Callaghan.

S: I've been over it. You didn't ask me to do it but I've been over it about an hour ago and it is in your office. I think somebody else did it -- EUR or someone. It is a summary on Fahmy, your talks etc. And you have also the Asad letter there.

K: Gromyko, the shit, excuse me, as soon as I said to him that I would meet him in Geneva that of course he lapped up. Now he wants to meet me in Damascus if I go to Damascus.

S: (Laughter) It is becoming positively shameful on his part the way he is doing this.

K: It is one of the dumbest performances I've ever seen.

S: He really said this to you very directly.

K: Yes, so I said I would have to think about it . Now I will tell this -- what is that Syrians name.

S: Shahibi. You had better get the real pronunciation from the interpreter. He is outside standing by.

K: I will just tell him, Look it is that same baloney again. I have no interest in it. I can't refuse it if Asad wants it.

S: I think Geneva is reasonable and I think he ought to be satisifed with that. How did that go.

K: It was entirely social except for the end. And I told him I would meet him in Geneva on the way, second I will be willing to have Geneva reopened after the Syrian disengagement is done. And third I will be willing to make a statement that we will pursue coordinated policies as a result of the Geneva meeting.

S: That's fair and he lapped all of that up I am sure. He has something to take back with him.

K: It is a pathetic performance.

S: It certainly is -- very pathetic.

K: You know, I forgot to take Fahmy down. Do you think his feelings were hurt.

S: I'm sure not. I was there, I could every well have done it. He is fine. He seemed to be in very fine fettle this morning. I think you are treating him very well. You will be having dinner with him on Monday night and I think he is very pleased.

K: O.K. Has he gone back?

S: Yes. He has gone to NY. He left by train this afternoon at 4:00 I think.

K: So he isn't there yet.

S: No, he would get there 7:30 or 8:00.

K: So, you are coming tomorrow nigt.

D: Hello, Henry.

K: How are you? Look, Brent Scowcroft talked to you earlier this week and in the meantime I've been so scheduled with visiting Foreign Ministersthat I've never had a chance to follow it up. I just wanted you to know that I am extremely interested in this.

D: That's very generous of you. What I told him was this....

K: Would you like to talk to me about this at some point?

D: Well, what I said to him was this. I -- it represents somewhat of you would recognize a little bend in the course of my normal range of activities, interests and so forth. I would like to think over the weekend, I said to ~~me~~ him about it, and then I would be back to him and if it seemed fruitful, I would like to talk to you.

K: Right. The way you should think about it is that I need somebody to whom I can essentially turn over the economic affairs.

D: Well, it's damn interesting. There's no question about it.

K: Subjec t to only my overall foreign policy direction. And with George Shultz leaving there's really no one here that can provide this combination of wisdom and knowledge.

D: As I said, it's an extraordinarily interesting range of ideas. It's a little bit -- of course the areas where I have operated ~~Exx~~ I've known all the institutions and the characters and the personalities for 30 years and moving into an area where I know less than that, is one of the things I will personally need to think about.

K: On the other hand you have been watching. Any businessman or outsider I'd bring in wouldn't even know where to begin.

D: Well, that's true. Well, let me do this, let me think about it and I'll be back to him and then if it seems useful as I.....

S: Yes, because on that let me tell you what has arisen. I think that would be fine. Can we set that up for next week.

K: Yes, set it up for Tuesday.

S: Because one ~~other~~ of the complications that has come up is that I think Marwan -- who has been in New York, I didn't know that -- has been talking to this fellow and I think he feels as if he hasn't had very much attention. But also, he feels he has a catagoric commitment on airplanes and all kinds of things and you know we are not very clear just what kind of commitments he thinks he has. I think the fact that you would be willing to see him and talk to him about...

K: He has a commitment from us on the radar -- I don't mean a commitment. We got Sadat's view.

S: That was our view on the radar, but this man is talking about airplanes and all sorts of things I gather.

K: Fahmy wants us to give them the C-130s they have already paid for.

S: This is apparently what he -- he feels that he has a commitment of somekind on the C-130. I am told this by Don Easum.

K: What do you think of that.

S: I myself would rather start on the radar and move slowly on this and I think it is important for you to sound him out and see how this fellow sounds.

K: I think I will give him the radar and say we will have to see what happens on the airplanes but it is definitely in the ballpark.

S: I will have Don Easum get a hold him and say you would like to see him on Tuesday.

K: Do you think that Don Easum could avoid telling him that I am the obstacle to the airplanes. This is what he has done.

S: No, I'm sure he has not. But I am sure we can get across.

K: Mr. President. I missed you last night.

P: I only called to wish you a Happy Easter.

K: Thank you. I am in New York today to speak to the UN. It is not going to shake the world.

P: We seem to have a little problem on the Lebanon border but that was inevitable.

K: Both sides are guilty there. I had a good talk with the Chinese last night. You know the highest ranking official ever was here. They fully reaffirmed our policy and he went on and on about your visit. And he strongly reaffirmed the course that was outlined.

P: Did they give you any indication of the problems?

K: I have the feeling Chou is on the way out. They didn't mention him once during the evening. And everytime I brought him up they changed the conversation to Mao. Now as I think back, I had over three hours with Mao and Chou didn't say a word.

P: Mao (?)____ has killed off his people like Stalin.

K: That's right. That's the second man he's killed off. To be number 2 man is suicide. That conversation with me was his way of putting his own stamp on the thing so that they could get rid of Chou without hurting the relationship with the US.

P: Why do you think they want to get rid of him?

K: Domestic politics. I think it's a tragedy. I think it's a clash between Chou and Madame Mao. This guy yesterday talked as if he were in charge. He didn't say he was in charge but talked with great assurance.

P: We didn't meet him?

K: No, he was purged in the Cultural Revolution and just rehabilitated after you were there.

N: How did your speech go over.

K: I think it went over very well.

N: Good, good.

K: I said some pretty tough things about forming cartels of producers and they did not go up the wall. On the whole, the reaction, actually, was better than even the NY Times reported because it just breaks their heart to say anything positive. I quoted some things that you said in 69 when you appeared before the UN about the need to dedicate ourselves to deeds and not just to retoric.

N: I guess we are going to have the For. Ministers dinner tomorrow night

K: That's right, Mr. President.

N: 8:00., Blk. Tie.

K: No. They were told not to bring blk. tie so they aren't ready for it.

N: We still make it 8:00.

K: 8:00 will be fine.

N: And women are coming.

K: Yes.

N: That's good. That will be good because Mrs. Nixon just having taken this trip, she ought to be there.

K: I think it would be essential for her to be there.

N: I just plan to speak briefly.

K: If you want me to, I will send over a few suggestions, but you usually do these things so well.

N: Yes. We will just make it a warm, sympathetic kind of a thing.

K: That's right. The major point with them is to give them the sense that they've moved to the center of our attention, historic relationships.

N: Right. I had told Al to have the people prepare me a thousand words. Maybe I will just read it, or I don't know. Do you think I should do that or do you want me to just wing it.

K: Why don't we draft something and let you see it and then you can decide.

You could certainly read it.

N: If we read it, we could make copies and pass it around so they wouldn't have to translate it.

K: I think there would be a lot of advantages.

N: Would they have a response?

K: I suggested that one of them respond. And they will let me know tomorrow morning.

N: It won't be Sevilla Sacasa will it.

K: Oh, no. God no. It will be a Foreign Minister -- maybe the Brazilian, maybe the Argentinian.

N: There response should also be in the same way. They should read it. What I am thinking of is so it won't be a long dreary time in translating and everything. Maybe we could just have a thousand words written that I could read and I would ad lib a couple of things at the end and that's that. And then hand it out to them. I don't know. That's a possibility. You see if talk and translate and they talk and translate we are looking at about an hour and a half at least. While they like speeches, we don't like them that well.

K: Yes.

N: Basically, what you want more is just a friendly gesture don't you.

K: What is most important is the warm gesture. Another thing we could do. I don't know how the room will be set up -- whether it will be round tables or a long table. Because if it were round tables one could have

an interpreter at each table.

N: It sort of has a bad feeling when you hear that mumbling all the time.

K: Yes. That is true.

N: I don't like that but we could still use round tables. I think the round tables make it more...

K: It is a more intimate evening.

N: Also we avoid then the protocol.

K: Exactly.

N: I will determine on the reading tomorrow.

K: We will have something for you tomorrow morning.

N: That's good. I had a little call from Mansfield reporting on his dinner with the Chinese. He says the Chinese are very supportive and friendly about the President and about you etc.

K: Oh, they are all out.

N: And they asked about his coming there and he said well, tell me. They said go see Wong Chen. I said, fine Mike, go see Wong Chen, we are all for it.

K: Absolutely.

N: I think it is an indication that they want to warm things up a bit.

K: No question.

N: Another thing that is probably true too is that every time we sort of start to make a move towards our Soviet friends, they sort of move a little towards us.

K: Exactly. That's what these idiots can't understand. That our China policy--what our critics don't understand our China policy absolutely depends on our Russian policy. The reverse would also be true. If we moved away from the Russians, then the Chinese then would be free.

N: Well, we are coming along and just remember if we have been able to take the heat of this last year and accomplish what we have we sure as the dickens are going to be able to take it a little while longer.

K: Mr. President, I believe that the public opinion is on the verge of turning if we can just --if there were just one unambiguous event like a House vote in your favor or something like this.

N: It is hard to get those people to ever come to a point because of politics, but we will see. We have some things that maybe will be interesting next week. The main this is that is very interesting both in terms of our foreign policy and even in my travels in Ohio and Michigan there is an undercurrent of support there that is just ready to break loose. What do you think?

K: That is my absolute conviction -- that is my firm conviction.

N: In foreign policy it never has left us.

K: In foreign policy the liberals are sort of trying to create the impression now that there is something wrong with our foreign policy. Our foreign policy is in great shape. What can they point to.

N: That is one of the reasons that the trip was hard for them to swallow.

K: Exactly. And why the summit is hard for them to swallow. If they were sure it would be a failure, they would want you to go. It's because they know damn well it will be a success. That it's a guaranteed success that they don't want you to go. And they can piss on SALT, we will have enough other agreements. The average person doesn't know what SALT stands for.

N: And on SALT WE WILL/HAVE SOMETHING.

K: We will certainly have something in the field of arsm.

N: And that's all you need.

K: Something on the ABM...

N: Everything has to be step-by-step.

K: Exactly.
N: Fine Henry. See you tomorrow.

K: Right, Mr. President.

S: You know, we get mouse-trapped in this thing if the Russians claim they have this on authority.

K: No, just say this is our information, is it correct, and what should [redacted] we tell the Russians. Say Gromyko raised it, I said I couldn't believe it, he then said he would check their source, they [redacted] checked their source and they didn't tell us who it was but they say they have reason to believe he's responsible.

S: And I think we have to tell the Germans in any demarche that this completely changes the situation - if correct - this would completely change the basis on which we've been operating in our defense of the German decision.

K: Why?

S: Well, because we've [redacted] taken the position that the Germans did this and we agreed since it was not illegal. If the Germans [redacted] now say that they've always been willing to withdraw if we veto it, first of all this is the agreed position between the four Western powers.

K: Just about finished it. Yes.

F: Henry, I wanted to talk to you now before tomorrow about the Security Council.

K: Yes.

F: I am giving you my thoughts only and it is up to you to decide what you want to do. I think it is much better that Scali works hard too that at the very end to not veto or be forced to do so, you know. Because if this is going to take place then it should be a very bad thing to have a bad effect on the Syrian business, you know. This is what I am saying now.

K: Yeh, but if we vote for an anti-Israeli resolution it will also have a terrible effect.

F: Yeh, but you see, I thought that saying -- that he should work very hard and if he can'tdo it you have to send somebody to help him you know so that at the very end you have a tough resolution that you can support -- especially the Russians would be very happy at this moment you know to prove that they are supporting the Lebanonese and you are not supporting them -- and if you can succeed to have a resolution for which you and the Russians support. . .

K: But how can we do that?

F: Either paragraph or so water down to make it a little bit more balanced.

K: Yes.

F: It is not difficult.

K: And will the Lebanonese accept it?

F: Oh yes, the Foreign Minister is there and he is ready to do it. I spoke to him and I spoke to Ora -- their representative you know. At any rate my advice is that the best thing is that you will vote for a resolution which is going to be passed. It has to be balanced you know and then for that you will be able to vote for it.

K: But if we vote for a bad one, it won't help my trip either -- the major problem -- I'm not kidding you. I have not yet got Israeli approval for what we are discussing.

F: I agree, but you see the point -- you see the Russians now are making so much propaganda even in Lebanon itself even inside in these papers you know.

K: Yeh.

F: I don't want you to vote in a way which either embarrasses the Israelis or the Lebanonese or the Syrians or you. This is the main point.

K: Okay, I'll look into it the first thing in the morning.

F: Yeh, the best solution is if you can reach an agreement on a resolution which you can support [redacted] B1
[redacted] B1

K: Yeh. Yeh.

F: If it is not possible, then have the _____ abstain. To veto any resolution now it will be a calamity.

As you know, there are a number of American subsidiaries in Argentina and the Argentines has passed a law according to which if they don't sell to Cuba they're going to be nationalized.

N: I see.

K: And you had already approved in February that under those conditions we can make a special exception and we can't really take the position that American companies in Argentina cannot obey Argentine law. If you had approved that and I held up the implementation of it because the Brazilian government at that time was changing and they had some doubts about it, now the Brazilian Government has come to us and have indicated that they favor our going ahead and if we could go ahead within the next day on this then Argentina would not introduce a resolution in Atlanta which would have the effect of lifting the sanctions altogether throughout the Western Hemisphere.

K: Can we do that -- I don't know when to do it. I'd like to do it at a time that our bloody Foreign Ministers are out of town. 4:30 in the afternoon -- that's probably too late to make the evening news.

S: Yes, it really has to be about ...

The Secretary referred to the Gwertzman article in the NY Times. He had obviously been given many details (included in the article) of the different positions taken by the Middle East countries. Fahmy was unhappy about the article.

S: I will check with NEA and let you know.

K: I've got to get this stopped, Joe. We cannot have it.-- What encourages Kissinger to proceed.--The moderate Egyptian position compared to the tough Syrian position. If we want to overthrow Sadat, this is a good way of doing it.

S: I would agree and all I can say to you is that I have not talked to him and I will see what I can do to find out who has.

K: I may have to remove Atherton if I can't get any attention in these Bureaus, I've got to be brutal.

S: Let me look into it and give you an aswer.
Do you have 30 more seconds; I was about to call you. We have a good balanced resolution. The British have worked one out in New York. We have also worked one out over night. Will you give me the authority to just go ahead and work this out and I can assure you that it is very balanced.

K: But mention it to the Israelis.

S: Sure. Of course we will. Because I think we might be able to come out all right at the end of the line.

G: Hi, Henry, how are you?

K: Okay.

G: They may already be resolved, but I have a fairly strong feeling that it will be helpful to go for the bundle on the aid to --

K: Oh, come on. Look, tell the Israelis to lay off. They know -- they're again going through one of their suicidal periods.

G: Well, that may be, but these have happened only occasionally that I've gotten a very strong sense of their being in that kind of a state.

K: There's no chance of our giving them the whole thing now before Syrian disengagement. I mean, we also have the Arabs to consider. What should we give them $1.5 billion for? I have worked something out with Dinitz which we're going to do this week, and then we'll do the rest afterwards. We've got our Arab position, too, to worry about.

G: Um-humm. You say, why do it? I think it's --

K: I'm telling you, if you want to do something, you tell the Israelis to be helpful on Syria because I'm going to withdraw from the negotiations if they're not going to do it. And then let them see how they can stand the whole world in international forums.

G: Well, can they -- I understand that, Henry, and I've only partially cause to make this presentation --

K: Yeah, but look at our position. Here we are with a war going on on the Golan Heights with no progress whatever on disengagement, you want the President to announce he's giving a $1.5 billion credit to Israel? Do you think the President will approve this? He hasn't even approved $500 million yet.

G: Well, I think he should.

K: Why?

G: Because I think it would be a message of consistency in strength.

K: Well, he will do it --

UNITED STATES DEPARTMENT OF STATE
REVIEW AUTHORITY: ROBERT L FUNSETH
DATE/CASE ID: 17 MAY 2004 200102979

G: . . . some people that are not persuaded by anything because of their own fanaticism and there are others who will get the message that there is some consistency no matter what's going on on the homefront. And I think that the Israelis do have some intuition of a tragic destiny that may be multiplied by their congenital hysteria and I think at this time that kind of resolution of this particular problem would have a great meaning.

K: Well, he will get what I worked out with Dinitz.

G: And that is agreeable . . .

K: This is agreeable with Dinitz.

G: All right. But I wanted you to know the feeling I had based upon some of the discussions against a backdrop of 5 years of intimate requests. This one just seemed very real. And I think that they do need that help and that it would be important . . .

K: But we need a little help too.

G: . . . know that. But I think that they --

K: They need help on MFN and we need help on the negotiations.

G: All right. But I don't think you want to have echoes of 1969 and early 70 when there was a great feeling of distrust there about what was happening here. I think that would be very extremely dangerous.

K: No.

G: [Because they have] disarray at this point over in Israel.

K: Well, look, they have gotten everything from us all along and that isn't going to change. It's simply a question of timing. But even that isn't a major problem because he will get the major part.

G: Um-humm.

K: What you should tell him is that it is important that we make some progress on the Syrian disengagement or there's going to be --

G: . . . I think they'd be much stronger in their ability to do that if they had a very clear cut and very symbolic vote of support and there's nothing that would be more concrete than this particular decision at this time. . . .

K: Well, they're getting something very significant this week.

G: Okay, Henry.

K: Good.

G: Thank you.

K: Yes.

S: And what is his comment.

K: He thinks we could get a balanced resolution if we worked on it. And he thinks we should work very hard on it and he'd use his influence.

S: Yes, that's what we asked him to do.

K: Because he is just afraid of a veto.

S: Well, lets see where we are in terms of -- how far they got -- I don't have a report from Scali this evening because today was a day of discussions and let's look at it the first thing. and you expressed to them where it was -- I found the whole conversation very reassuring.

K: I do too, but you know, Joe, these guys are about ten notches below Chou and I had the impression that he's had it.

S: Yes, I'm afraid so. I heard what you said and you're able judge this. I have no judgment, not having experienced it before. But if that's the case, then it's lost group. For example, if now they continue to refer in everyone of those points, you remember what Mao said to you.

K: No, that's alright. That's guaranteed continuity. That's why they did that.

S: Right. So that was alright. It's just a failure to mention , is that what you're really....

K: Yes. Quoting Mao was bad.

S: On this matter, what do you want to do. Do you want to call Fahmy?

K: Yes.

S: Now, I have one other very quick thing to take up with you. Yamani has called and wants to talk to you. Let me tell you what the problem is. On Monday five oil executives are going to testify before the Jackson committee. It relates to the very private deal which the Saudi Arabians made with us in assuring that our defense people got their oil for our fleet. Yamani is worried that the Jackson committee will make this public. DOD we are told, talked to the Jackson people some weeks ago and at that time they received an assurance from the Jackson committee, Feldman and the other people that are involved, that they would not make this public. Now the recommendation that I have is this. Yamani wants to talk to you (a) would you authorize me to call him on your behalf to say to him that the Secretary is aware of his concerns and that we will do everything in our power to keep this matter from being aired in the committee publicly, although obviously we can't guarantee it.

K: Absolutely.

S: And then secondly, will you authorize, I don't know who would be the best person either me or someone else, to call the council staff, Mr. Feldman, and to remind him that they've given this committment and this is very important from the point of view of our national interest.

K: Absolutely.

S: OK, I'll proceed on that basis.

*

K: Now, OK, you're getting that schedule done for me.

S: Yes and we owe you an Assad letter as well and a couple of ~~xxxxxx~~ hundred things. You really have gotten a little work out of me today.

K: Joe, that's why you stayed.

S: You ought to get me a raise you know. I only make $40,000, I'm broke.

K: Is it in my power, incidentally?

S: No, there's no ~~xx~~ way. As you said two months ago, there isn't a thing you can do for me and I'm here just for the love of it.

K: Yes.

K: Joe, I have Peter Ramsbotham here with me and he tells me things are going well at the Security Council. That we are canvassing a double hundred nations. Is he living in the same world I am.

S: I don't know what he is talking about. Let me take a reading in New York, but we are right where we know we have been in terms of that draft.

K: No, that was this morning. As I understood it the Europeans came up with something that is totally unacceptable.

S: Well, that is what I showed you this morning, but I think our British friends have had, and I want to check this with Scali, some further discussions with the Europeans and I think what he means is that we gather the Europeans are coming along very nicely. Hold on a second, here is the draft that is coming right now. I understand it, I haven't looked at it, that the Europeans apparently have accepted something which the British have put forward which looks pretty good. I haven't looked at it but I'll give you a reading. It is practically our text, Mr. Secretary, so it is going pretty well. Here I have just read it, I'll be glad to bring it in to you. Would you like to look at it.

K: Sure.

S: We'll bring it right in.

K: I'll tell you, the problem is, if there is no Syrian disengagement, then the war will start again, then the French and the Soviets will be able to tell the Arabs they told them so all along. The U.S. will be totally discredited, because if we can't -- the issue is whether Israel with withdraw say, 5 to 8 kilometers into the Golan Heights. If we can't get that, then of course how can we claim we can get anything. You see what I mean?

B: Yes.

K: Whether they're willing to give up the town of ___. Now, of course, if Israel had any sense, the Syrians have made a proposal which isn't really all that outrageous and if they gave the Syrians -- if I were Prime Minister in ~~x~~ Israel I would give the Syrians 2/3 of what they've asked for and that would run the Russians out of there, but that's beyond Israel's capacity, even to imagine. So I'm not arguing on that. But if they could ~~gx~~ grudgingly give 5 to ~~x~~ 8 kilometers, then at least we can prevent an outbreak. If I fail, the only one who's faced them up to now, is I. I mean, it's a personal thing. If I fail, I'm out of the negotiation, if I'm out of the negotation, they'll be thrown into international forums. Do you believe that this country in the ~~fact~~ face of another ~~xxxx~~ energy crisis will mount an airlift? I doubt it. So, it's a very serious matter. Portugal wouldn't give us the Azores again.

B: I'll have a talk with Dinitz.

K: Jack, how are you?

JK: Just landed in Atlanta. I'm at the airport.

K: Oh, God. It wasn't that urgent. I just wanted to find out how your press conference went.

JK: The press conference, I think, went very well. I talked for about 10 minutes at the outset on the record reviewing the background as to how the meetings originated and the background of Mexico and in Washington and then went through the communique, the highlightes and expressed the view that you were highly gratified by the results and the constructive attitude and indicated what the results have been of the meetings and then went on -- and then read the announcement -- a 2 sentence announcement towards the end.

K: That was probably a mistake.

JK: Probably a mistake?

K: Yes, We should have saved that for another day.

JK: Possibly. Over-shadowed the other.

K: Don't you think?

JK: It's possible. But the problem was that it was already leaking all over the place.

K: Was it.

JK: In any case, it gave us the initiative because news was going to leak it over night, it was better for us to get our two sentences out at least.

K: Yes.

JK: But then there was 30 or 40 minutes of questions and I felt very interested and they went very well. I thought everyone seemed quite pleased that in effect, I think we've handled as well, as far as the press is concerned. They were expecting less and so we're somewhat pleased by things going better than they had intended to be. Rabasa was on the plane coming down. He said he thought it was a most successful conference.

Far more than anyone had anticipated.

K: Actually it turned out to be pretty good.

JK: I've got my fingers crossed. If we just don't get some kind of backlash on these damn automobiles____and Argentina and so on. It just depends on how the press plays it.

K: Yes.

JK: And I just don't know how they will. For example, David Binder of the N. Y. Times said, well now if you are going to ~~issence~~ license these companies, don't you really expect that the policy will now collapse. I said absolutely not, there's no reason to assume it will collapse. The fact is, we're treating these as an exception. He said how can you refuse anybody. I said, here you have -- he said you seemm to have made these concessions to the Argentine government under duress____, I said that's not true at all. There's been no question on U. S. Government from the Argentine ~~Government~~ Government, we've been really caught between the desire to have good relations with are Argentina.

K: Well, the basic point is how can we insist American Companies don't have to obey foreign laws.

JK: Yes. It's just an absurd posture and unsustainable position for us to be in. Really I think that these last two days have gone better since we had any reason to ~~xxxx~~ anticipate. We'll just have to see how the damn press plays it tomorrow. But thus far__lead into the meetings and the press yesterday.....

K: No, I think the conference itself will -- we're coming out superbly.

JK: I agree.

K: I'm just wondering now whether that Argentine thing~~x~~ is going to kill it.

JK: I don't think so. I think people who try and see wheels within wheels may think that you use this as a trump card to play to insure cooperation from the Argentines and the Mexicans and others who are prepared to press for a lot more on Cuba. I don't know, we'll just have to see how they play it. Dudley Thompson was on the ~~plane~~ plane coming down and several others Venezuelan. They were all really, I won't say ___, but they were really ~~quite~~ quite pleased. Very happy with the outcome.

K: Because they like to jocular way the meetings were conducted.

*

JK: Well that's what Dudley Thompson said. He said really the secret to the success, he felt, was your own personal -- your personality and the fact that when everything starts to get a little tense and a little formalistic, you would make some kind of remark that would relax the tension. I feel very good -- I feel like someone who's gone through about 2/3 of a difficult passage and I'm just keeping my fingers crossed and watching things.

K: If it was leaking anyway, we had no choice, unless the only other things we could have done was told ___we couldn't make a decision until Friday.

JK: Yes. It was just....

K: I don't know whether that would have worked.

JK: I have a feeling that there are really two stories that came out of tonight, or that came out of the meeting today. The wind up of the meeting and this license thing. They may play these two stories. I certainly did not relate them in any way. I said the matter never came up during the course of the conference.

K: Did you take questions on the conference first.

JK: Yes, Oh, yes.

K: And then you went into the license thing.

JK: That's right.

K: OK, well, we did what we could. OK. Many thanks, Jack. I yell and scream at your group but so far you've always come through.

K: Have you seen the draft yet?

HAK: Yes. It isn't all that bad.

K: I don't think so either. I must say we did a little rewritting after they left about 2:30 this morning.

HAK: I don't see -- on the subject of trade, "the Foreign Ministers attach special importance" to the status quo.

K: That needs to be clarified. That commitment is at a standstill. We'll clarify that as soon as they get here.

HAK: You can't say that. Because that has all the wrong connotations. Then we should have a paragraph or two which gives a little lift to the G.D. thing.

K: Christ, you know we had it and we argued about it. They want to keep the rhetoric out. They want to make it just a statement of the facts of what was discussed and what the agreement was consensus of. We have some sentences in the beginning and the end but very little.

HAK: But that makes it a catalog of things they are asking of us.

K: What I'll try and do if you agree is try and weed some phrasing in and around, or if you want, we could, we had a paragraph in on about between one and two and....

HAK: Also, I don't know whether that economic coercion paragraph is doing us much good.

K: As a matter of fact, let me tell you we rewrote the second sentence of it after the Ecuadoriansleft because they are the ones that had it in there and they had a sentence in there that they -- the foreign ministers -- the Latin American foreign ministers expressed their concern to you about the consideration being given in the U.S. Congress to. They were going to restrict imports, etc. They also expressed concern over proposals that would tend to restrict acc ess. The whole theme of that, even the title of that article is a problem for us.

HAK: That is right and that is what should be pointed out in it.

K: Yes.

HAK: That's exactly right. XXXXX

UNITED STATES DEPARTMENT OF STATE
REVIEW AUTHORITY: ROBERT L. FUNSETH
DATE/CASE ID: 3 MAR 2003 200102979

K: If we could make it a more balanced thing. The way we've got it now is that all forms of economic coercion from relations among the countries of the Americas. You know, we're subject to economic coercion in a sense at times too. It might be a charter of rights and duties, etc., by the time you get some balance both ways. That is what we were seeking to turn it to that. We don't favor economic coercion measures against us either. On the Panama thing, let me tell you that there was a disagreement privately between me and the Panamanian representatives on one point. The other two paragraphs stated the second paragraph is excellent. The first paragraph he wants to put in he said his Minister is insisting that they put in the first paragraph that the Latin American Foreign Ministers expressed their solidarity with Panama in exasperation as they had done in Bogota. I said, look, we went through that in Mexico. We wouldn't accept it there. The United States can't sign -- the Secretary of State can't sign that and I said we just can't do it, and to issue such a statement here in Washington, I said do you want a treaty or don't you.

AHK: They can do it separately if they want to.

K: On the other hand I do remember your comment at one point yesterday when we were talking about the 30 some Senators.

HAK: But not as part of a communique I signed.

K: Yes. The thing is, would you, if I can work this, would you be willing to have something in there that shows that they are pressuring you hard and they have solidarity with Panama.

HAK: Yes.

K: It is balanced so that it doesn't look like you are giving away the whole ballgame. You know if they are just thrilled with the way things are going on the negotiation with Panama then we must be giving everything away so there ought to be a little criticism of us or a little pressure on us in it, do you think so?

HAK: Yes, that doesn't bother me that they say I took note of their concern for progress.

K: OK.

HAK: That doesn't bother me so much but nowlook, I have the problem that the President wants to see the Egyptian Foreign Minister at 11:30 this morning and I have no way of not being there.

K: How about this. Why don't we have our meeting and then at 11:15 or something you call a recess for the drafting committee to do a redraft of the communique and then.....

HAK: And begin again when, at 2:30

K: Whenever you wish. We've got a buffet lunch available for all the delegates. They can just come and go, serve themselves. You can come or not as you please.

HAK: And then we meet again at 2:30.

K: That would be for the wrap-up. What we could do at 10. Have the discussion of the panorama of U.S. - Latin relations and that's when the Cuba thing is going to come up. Then consider the communique as it stands now, try and get a decision on these couple of items, whether it is going to be working groups or not, then you do a review of the international situation if time permits and call upon the drafting committee to go back and do a redraft and resubmit it to the ministers at 2:30. How about that.

S: Well, I don't really know other than the whole bureaucratic thing that you've got so damned many people involved in.

K: Well, but, that's what I want to end.

S: Alright. I don't...

K: Now, it was important to me to get this determination made before the Congress came back and all hell broke loose. And that was worth more to me than whether every G.D. SFO7 could sign off on something on which the decision was never going to be made at any level other than the President.

S: It got there, I think, yesterday, if I recall or.....

K: Well it got there last night and I had asked for it Monday morning and all we needed was a two page memorandum on which I told them what I wanted.

S: Well Brent called me late last night and he tells me there is a problem with this which.....

K: That's the second issue.

S: And the problem is in the Defense Department, I am told, that they feel that first of all, the instructions that I understood were given, they weren't given to me directly, was that you wanted for 1 billion dollars and then you leave the rest untouched. The problem is that apparently the bills have gone around that amount and therefore there is need to make a determination in terms of the overall amount so if you make the rest of the amount foreign military sales, that will mean that the Israelis I am told have to begin to pay on that because its a matter of credit. Now is that what you and Dinitz worked out. I'm not very clear what you and Dinitz worked out in this regard Mr. Secretary.

K: What we worked out was what I ordered which was 1 billion now and 1.2 later. Now this I did in part so that I could sell it to the Arabs.

K: We would call it credit and then shift it back.

S: Well see this was what didn't come through and I don't think the memo quite says this and thats just the point and thats what Brent and I talked about late, late last night.

K: But we are now in the situation Joe, due to the G.D. bureaucracy of the State Department. These memos always get written in some three hour period. Its a very brief memo. Had that memo been done Tuesday when I requested it we would have flushed out this problem on Tuesday. I want this done before the Congress comes back and all hell [illegible] breaks loose in Congress. So that we are reacting to the Congress.

S: Well, this I understand and I think as I say, part of it is some confusion in the instruction and part of it is what I would agreeable and it is not defensable is.....

K: Yes, but if there is confusion in the instruction all they have to do ask me what I mean.

S: I understand Mr. Secretary. I'm not justifying, I'm trying to explain.

K: Joe, you are the number 3 guy in the Department now. Why must it take five days to get a simple G.D. memo which is not controversial since orders had been issued what we wanted.

S: Not controversial here Mr. Secretary but you've got other agencies that are involved in this.

K: And why can it not be done in one day, that's what I want to know.

S: There is no excuse.

K: If I had done it in the W.H. I guarantee it would have been done in 2 hours.

S: I have no excuse.

K: OK. Well you know it wasn't. I would like to get the people who did this called on the carpet and told to straighten out.

S: In any event I've already called George Newman this morning after brent talked to this has got to be revised somewhat to reflect what you've just said here.

K: But by that time it will happen just before I go to the Middle East. It will look like blackmail. It will happen just when the Congress is coming back and screaming its head off. In other words, the Department has again brought about the exactly the opposite of what I wantd.

S: Why don't we get this altered in the next hour which can be done in the next hour Mr. Secretary and then go from here.

K: If I then can get to the President who is raving around here on his own reasons.

S: I will try to give you a better answer as to why it got delayed. I don't honestly know.

K: Good. Thank you.

K: Alright.

A: Again, I wish you every possible happiness. As I said to you in the note, I earnestly pray that you'll have as much happiness in your life as I have with my wife.

A: Henry, last week Robert O. Anderson was here for a few days -- he was up to see me -- and indicated that if the Morton situation were not set solid, he indeed would very much like to be considered once again.

K: Let me raise that to the President.

A: As you know he is a tremendous situation. I know I don't have to underscore for you what a superb representative he would be.

K: Absoutely.

A: I'm afraid were I to leave on the 30th, there would be no way of handling the official July 4th.

K: Absolutely.

A: My people feel here it is obligatory that we continue the July 4th celebration.

A: Alright. July 15th. And I'll give Bob Anderson a call at the Ritz in Paris and tell him that I have relayed the subject matter with you and at the earliest opportunity you would approach the President but that we -- of course, we have to understand that it could be too late.

K: Hello, Mr. Secretary General.

W: Good evening, Mr. Secretary. I apologize for ringing you up so late.

K: Not at all. It's always a pleasure to hear from you.

W: You are very kind. You know that your statement here got an excellent reaction.

K: I've been very pleased.

W: Highly appreciated. This time I'm not bothering you with the Middle East but I ring you up because of a rather difficult situation here regarding the special session. The problem is that we have three aspects. One is the declaration of principles. For your information, I think this will work, that we can adopt these declarations on a consensus basis. They are difficulties but I think they can be overcome. Then there is the problem of action. The latest information is that the developing countries, those in the non-aligned group and the group of 77 are determined to push ahead with the document which the 77 had worked out sometime ago already. We hope that it will be possible to have it adopted by consensus, but and this is the dangerous thing, but failing that/to press for a vote. Now if they press for a vote they would get the necessary number of votes.

K: But it wouldn't be implemented.

W: But it cannot be implemented. It would be another paper without any real value. And it serves the problem. The third aspect which is the main reason why I thought I should ring you up. I have been contacted last Saturday or Friday by the Ambassador of -- by the Foreign Ministerof Guyana, who flew with you, as I remember you discussed it when you had lunch here, he had told me that he was flying with you to Washington and the Foreign Ministerd of Sudan. They both came as well as the Finance Minister of Iran, asking me to help them in setting up, as a sort of ___of this assemble, a special fund for the most affected developing countries. And they complained a little about the fact that the U.S. delegation, after your statement, was not really active. He had avoided discussion of the problem with the other delegations. In other words, they were very reserved and kept back with their own opinion. Some of the delegates said well, we had expected it after this very constructive....

K: Well, let me take a look at.....I will bok into that and see what the problem is. Basically, I'm sympathetic.

W: Yes. Mr. Secretary, my complete request is this. We want a sort of complete ____of this session, which will be over in one week, set up a special

fund which should get money from the Iranians. They have already told me that they have 150 million ready, the check could be given to us immediately. Venezuela and perhaps Algeria and Libya, whereas Saudi Arabia and Kuwait say, well we have already pledged to the Islamic fund and to the Arab fund so why should we pay to another new fund. But these religious funds, he said, want to pull them in this committee. They don't cover countries like Guyana, India, Sri Lanka, etc, therefore it would be logical to have a fund which could be, of course, administered by the World Bank. I talked to McNamara, he would be very happy to help us with his machinery and his.....

K: Can I call you about this tomorrow after I have seen what we can do? Basically, I'm sympathetic.

W: That is very kind. I have a meeting tomorrow with donor countries and this petroleum producing countries so I hope that it will be possible that perhaps the USA could help us in this regard and make a contribution to such a fund because that would be very encouraging to the others.

K: I'll try to call you in the morning.

N: Well, that's what he said.

K: No, ~~there's~~ that's absolutely what the Europeans want from us, is that we now tell them all is well and there is no problem and that just isn't true. There is a massive problem and if we don't deal with it now we'll have to deal with it under much worse circumstances three or four years from now.

N: That's right. No question in my mind and the question is how to get that kind of cooperation in dealing with it. What one of them very cleverly said, this is an editor of a newspaper, very attractive, very bright, articulate guy.

K: What's his name?

N: I can't think right now. He's a good looking guy and he said, well he understood bombing Haiphong just before you went to the Soviet because he said that worked very well. He said he wasn't sure that bombing before discussions with European allies necessarily was the best way to get cooperation. But the only problem with this is that these Germans are very clever but they are petrified of being isolated.

K: But, Nelson, that's the only thing we've got going for us.

N: Well, I understand.

K: We tried for a year dealing with them in another way, then they just keep delaying decision and they give the French everything -- they give the French half of what they want and they give us 10 percent of what we want and it creates confusion and objective gain for the French policy.

N: Exactly. Well, let me say this, I'm going to be in Washington on Wednesday for a Water Commission meeting and I wonder whether at any time Wednesday there might be a chance of getting 15 minutes with you.

K: Absolutely.

K: Let me see whether I can arrange lunch.

N: Anytime.

K: And, if not, afterwards. Is that possible, for a drink?

N: Sure. Either way.

K: Good.

N: I think I've got some interesting little insights and so forth, plus some channels. I'd just like to give them to you and I don't like to do it over the phone.

to talk to you, this is not the crucial thing. The point is, I'm very much concerned about a major reaction this ____ and then I get word from the UN that the British are against it, the Austrians are against, the Australians are against it so the US should be the one to push it in.

K: We are certainly not pushing it, that cannot be true.

D: But the fact is,....

K: If any of them are going to abstain with us, we are going to abstain with them. What we cannot -- I am not under the impression that we're pushing this.

D: No, you are not pushing it, but the fact of the matter is and Joe Sisco will confirm it to you, if you need any confirmation, that the British and Austrians and Australians think that this is one sided and they've said to you and as well as to us.

K: They haven't said it to us.

D: Yes, they did.

K: Well, I'll have to look into that.

D: They did and we know this. I don't give a damn about the UN resolution, I mean, you know my opinion of this, but I am only concerned with the reaction and it's not necessary. I mean, the Lebanese have done a vicious act of murder or the terrorists. I don't need to go into the details. The fact that they will go out of the resolution of the UN with clean bill of health, this is really an unheard of situation. I mean, for what's it worth. The whole thing is worth nothing if you didn't have any resolution. If you can bring it to the point where there will be no resolution week after that.

K: No, that we've already tried. OK. Look will you call me when you leave the Kennedy Center.

D; I'll call you maybe as soon as I get home, about 9:00.

K: Don't do it because I may not be here.

D: So, I'll call you before I go and if are you/there, I'll come.

K: That is right.

D: I did have a very nice evening last night with Gov. Rockefeller.

K: You did?

D: Yes. Very pleasant evening. I was in NY and I came especially to see him.

K: Good. Well, he's a great supporter.

D: Yes and he's a very nice man. He talked so highly about you and I found it so difficult to contridict.

K: I'm having lunch with him tomorrow. If I here of any -- if he comes with what happens to the 500 million in grant.

D: No, not a word about it. We talked about you, about Nancy, about the critical choices he's working on. We talked about what you're trying to do in the Middle. He expressed great affection for Mrs. Meir. He wanted me to take a personal letter from him to Golda and we have a very lovely talk. K: I give you a great scoop and you blow it.

K: Were you going to offer technical assistance..

S: I don't think you need any. At any rate, I think it's really great news and I'm really delighted.

K: That message I got about what you want to do, I think you got that (Reston) article totally wrong. First of all, it's totally untrue that Bruce has requested to return and I have a long cable from him in which he denies it, is outraged by the story and claims that he's very happy.

S: If you believe that he'll tell you another one.

K: No, I believe it. I talked to him about before he left. Secondly, the fact of the matter is, our China policy is absolutely on course now. Whatever of problems of Chou maybe, the policy is totally on course.

S: What does that mean?

K: What it means is, that it is exactly on the course that it was outlined last November, that exchange programs will be starting again very soon and that all the signals are positive and that the conversation with (Teng) was an extremely positive conversation -- really designed for reassurance. This is on the background

S: What about -- what do you mean starting soon?

K: Well, starting within the next month or so.

S: I see. I gather you also been seeing other Chinese too?

UNITED STATES DEPARTMENT OF STATE

K: I saw the Ambassador yesterday.

S: How did that go?

K: Very well. I mean, it's all part of the same pattern.

S: Well, OK, but I mean the general thrust is, you know....

K: Whatever Chou's problems may be, they have to do with domestic not foreign policy. And even that I'm not in a clear position to say.

S: In other words, my reading -- around town here the thrust was, well Henry's kind of put the ___on Chou's neck. Now it seems to me...

K: Totally wrong.

S: That wrong. Well, my reading of that was, for goodness sakes that's not right. He's taken the pressure off Chou and said, you know, after all Mao's the one who made the ~~policy~~ policy.

K: Exactly.

S: And that's the way you should read it.

K: It should be read as a reaffirmation of the existing policy regardless of who is technically -- whose name is associated with it and it is a reaffirmation with Mao's backing. And that is the ~~xxx~~ correct way. You're interpretation is absolutely the correct one. It was one of the most positive conversations we've had with the Chinese. I mean, you can't use this but just for your information.

S: The one with (Teng).

K: Yes. The other was really just a continuation of the first.

S: Is there any specific that I can point that? Quite frankly, there's a lot of disenchantment. It's very difficult to have a dialog with these people. If they're isolated, they've isolated themselves here in Washington. The academic community feels that this kind of ___the people involved and...

K: Yes, but Jerry, this is sort of the existing melee in the country in which one can't bear the thought, you know, in which the thought that this thing may be working you know, this is being said about the Soviets, it's said about everything.

S: But also, you know I mean, a policy gets support from people who are involved aside from you. This is ~~the~~ a sort of consensus that came out of the Asian Scholars Meeting up in Cambrigde a couple of weeks ago.

K: But the Asians got -- it has to do with their general attitude towards the Administration too.

S: Yes, but I think it's more than that.

K: The Chinese never looked at the policy with us on sentimental ~~xxxx~~ grounds, they looked at it on practical grounds. They never did it for understanding ~~xx~~ in the abstract. In terms of that, it's working quite well. There was ~~akkax~~ hiatus of a few months in which nothing was happening, one way or the other. I mean, it wasn't going backward but it was sort of an hiatus, but it's now picking up again.

S: I don't see how. In other words, you say it's picking up but what can you point to specifically.

K: Well, I think ~~xxxxxxxxxxx~~ you will see...

S: I mean, Teng's visit certainly is a specific thing.

K: And you will see that the exchange programs will be picking up again.

S: In what areas can you just give me...

K: Well, in all areas. I'd say ~~xxxxxxxxxxx~~ were foreseen, but I cannot talk about things that haven't been announced yet.

S: Come on, that's why I called you.

K: I can give you my judgment if you wait a week or two, you'll see it announced.

TELECON:
Ambassador Dobrynin/Sec. Kissinger
April 24, 1974
11:55 am

D: Hello, good morning Henry.

K: Good morning to you.

D: In connection with the submarines and SALT things. I would like to check with you -- I sent already what you sent but, there are some things that I would like to attempt to add because there are some explanations in my opinion that are needed. First, this is my own statistics. Am I correct in understanding that what is really now you are proposing -- not the only MIRV limitations as it was before because up to now we were discussing without modifying the terms of the Protocol Interim Agreement but was saying of a MIRV limitation, now it looks though that you propose in both ways for 80 or 83 double change or rather double bonus, if I may use this phrase. It means that not only _____ will be agreed upon between us on the MIRV but at the same time to change or modify the terms of an interim agreement. Is it so?

K: By thirty missiles.

D: Yes but it doesn't matter. I was speaking not for now, but in matters of principle because you change the principle really, if I understand correctly.

K: It arises out of the technical problem, Anatoly. The number of missiles on a boat.

D: I know, for me it is more of a political now; because up to now it was clear-cut situation.

K: No, no. A slight modification of the extension of the Interim Agreement. Until 77 we would leave the agreement as it is.

D: Yes, but it is according to the existing agreement.

K: From 74 to 77 the Interim Agreement would stay as it is.

D: Until 77,

K: That's right.

D: But it needs to be changed.

UNITED STATES DEPARTMENT OF STATE
REVIEW AUTHORITY: ROBERT H. MILLER
DATE/CASE ID: 14 NOV 2002 200102979

K: No no, but we are not asking that it be changed retroactively. For the extension period we want an increase of 30 missiles.

D: Yes, so really your proposal now is...

K: No, I would like you to tell me that Soviet survival depends on 30 American missiles, it would make me feel very good.

D: No, no no, Henry. But first I would like to know from a political point of view.--what is changing now.

K: What is changing is that we would like 30 more missiles for the extension. No more submarines, but 30 more missiles.

D: So this is a new element yes?

K: It is a new element which arose when..

D: No, I understand. Up to now it was very clear-cut in Brezhnev's mind..but now it is changed in the Protocol itself - ok.

K: In the Protocol from 77 on -- from 77 onward.

D: Yes, I understand, but it was up to now, the whole discussion was.. without changing the Protocol. And second, you mentioned about the number of _____is 44, you mean 41?

K: No 44, but we would get rid of the Trident. We would just carry out the Agreement.

D: There is some agreement about 41.

K: Well, that's a dide agreement that lapses in 77 anyway.

D: I know, but you mean that this agreement should not be carried on after 77.

K: No, after 77 we fulfill literally what is in the written agreement which is 44 and 710 and we can reach the 710 by trading in old missiles.

D: But there was an understanding.

*

K: That understanding would lapse after 77.

D: It will lapse?

K: After 77.

D: It will continue?

K: Lapse.

D: Not 44 but 41.

K: It will be 44.

D: 44.

K: Yes.

D: So this is the second change, not 41 but 44.

K: Right, but that is how we get the three Tridents.

D: I am aware of that. I understand. How you come to the number of Tridents by 40 or 43, I tried to calculate by the number of missiles and I couldn't come to the 740 -- where do you get that? What composition of the 740?

K: What figure did you arrive at?

D: It depends what kind of a submarine you are going to have. How many Tridents and how many..because it is a different kind of combination. If you take by 83, then 10 Tridents, then you will have 31 and then 736, but you are saying 740.

K: Then we would have 4 missiles -- 3 standing on the deck of some submarine. You figured it out correctly.

D: It should be 736.

K: Well, if you drive us to that point, we will yield. We will give you 4 missile

D: I want to know the real combination. -- because this question they will ask you. Are you thinking by 83 it will be 41 or 44?

K: [illegible]

K: That's a very good question, Anatoyl. It could be either. This is something we would have to discuss.

D: 41 or 44.

*

K: We would like 44 but of the ones that carry MIRVs, you know, on the calculation you made there might then be 3 submarines that don't have MIRVs of the old type.

D: I understand, but..I am concerned about this figure of 740 -- how you arrived at this.

K: The figure 740 is roughly -- is arrived at the way you calculated it one way. Another way you can arrive at the figure 740 is to calculate, is to take 656 plus 96.

D: What figure?

K: 656 plus 96.

D: 652?

K: 656 we are entitled to now under the present agreement. 656 is what we have now, you add 4 Polariss, no 4 Tridents to it. That gets you 662, and that gets you to..

D: If you have four Tridents with 44 -- then 736.

K: That's right.

D: It gives you 756.

K: Four Tridents to 656, no.

D: No, if you have four Tridents and take the figure of 44 the it gives 736.

K: That's right.

D: But still it is not 740.

K: No, I agree with you. I put in 740 to have a little maneuvering room since I know that your leader always likes to have something conceded to him.

D: I am sure they will ask me tomorrow.

K: Or, you tell your military intelligence that maybe we have a submarine now that has 25 missiles.

K: If you came to this figure of 740, it is 40 plus four or it stems from your idea...

K: Look, it gives us a number of combinations. It can be 40 plus four; it can be 31 plus 10. We can compose it in different ways.

D: I see, but still...

K: All of which amount to about 733.

D: 736 it will be in this case. To sum up --

K: I think they should send an Ambassador who doesn't analyse things and just transmits them.

D: Well, Henry, to sum up, one it is definitely a change, second, about the, [redacted]...

K: Look, it is a minimal change.

D: No, nno, it changes the basic political approach. It changes now even the Protocol.

K: I thought I had made it clear that we wanted.

D: What?

K: I had made clear to Brezhnev that we wanted three Trident submarines added to the Agreement otherwise I wouldn't have had to raise it because under the Agreement we can..

D: By 80?

K: By 80. To reach 77 in 80. We don't want them now.

D: Yes, but is it correct to say that it will be by 80; by 80 it will be really in a sense what you mentioned -- but withing 41 or 44?

K: Within 44.

D: So you change here too.

K: Yes.

*

D: Even by 80.

K: Correct.

D: By 80 it will be 42 plus 3. Ok, I will send it. I don't see any chance it will be accepted but for your talks with Gromyko it will be interesting.

K: You would do me a great favor if you would reject it. It would protect my political future here much better if you reject it. If you analyze it we would trade in the 54 Tridents; we would trade in old missiles for theTridents.

D: Yes, I know.

K: So the total number of missiles is only increasing in effect by 26.

D: Yes,

K: And I cannot quite believe that Soviet security hangs by such a narrow thread.

D: No, but what you discuss with Brezhnev...so if you are proposing to change the numbers from 41 to 44.

K: But, look, if you accept the numbers I gave to Brezhnev on MIRVs -- 370 for 550, or something like that.

D: Yes,

K: If you accept the throw-weight relationship, then we can modify the ; then we are in a different proposition. Then we can extend the numbers of the Interim Agreement.

D: Henry, the only difference -- but a big one is between what we discussed in Moscow and now. It says if you change -- you make it now instead of 100 , 250 -- right?

K: Right.

D: And at the same time you add 3 more submarines from the basic agreement -- that is the second change, right?

K: The second change from your proposal. We never accepted your proposal.

D: On what?

*

K: I mean we are not ugh our counter-proposal makes those changes in your proposal. On the other hand we are accepting a much better ratio on MIRVs than the one we proposed to you.

D: Yes.

K: We proposed to you something like two to one and now we are excepting five to four.

D: I understand. I don't argue about this one. What is the essence of your proposal?

K: The essence of our proposal is that we are moving toward your MIRV proposal and in return for that xxx we are modifying the Interim Agreement.

D: Yes. This is the point. But even modified by 80. Yes.

K: Yes.

D: But is this 74 or 736.

K: Oh.

D: I am not bargaining, but it..
No, no
K: If you want to put down 736 right.

D: Because in this case I could use ...

K: Yes, yes 736 you are right.

D: In this case I could

K: No, no, Anatolly you figured it out correctly, unfortunately.

D: OK so I will put this down with this understanding that K...
It will be 3 submarines.

K: Exactly and look I can tell you privately that if you accept the 82 or 83 we would work out a deployment schedule for Trident but it is less than 10.

D: For the deployment of what?

K: Of the Trident boats. Under the figures we gave you, we could have 10 Tridents by 83.

*

D: Ten it looks slowly, but

K: But we could have it if we wanted to, but we would be willing to make an understanding with you or on the deployment schedule considerably lower than 10.

D: Than 10.

K: Yes

D: .. deployment.

K: Yes, that is the significance of the last paragraph of what I gave you. Something around five.

D: By 83

K: Yes. You know it might be fixed, but I just wanted to give you a feeling plus or minus one. Now you understand you are dealing with my personal views here.

D: Yes. OK, Sir I understand that what you said was in estimation. Right?

K: Good.

D: OK Henry.

D: Thank you very much.

M: I had no idea when I last spoke to you that you were sort of-way down the aisle. I asked if you were going to Acapulco or Syria and you thought I had gone out of my mind. Very well done. I congratulate you. She always struck me as a marvelous woman. I am a great admirer.

K: We have got to get together soon.

M: I have two matters to tell you. One is the trip that I told you about is now on.

K: Wait a minute now -- what trip was that?

M: To the Caribbean.

K: I must have blanked out ~~on~~ on that.

M: I told you that I might be doing a television interview with....

K: Yes, yes, I know exactly -- of course. Good. Then I want to see you.

M: Yes. Well it's a .....

K: When?

M: Well, it's six weeks away.

K: Well, let's do it when I get back from the Middle East.

M: When you get back -- early in May?

K: Yes.

M: I'm going to England on the 17th of May so maybe sometime in between there, or even after the 1st of June. It will be late in June.

K: I must see you before you do that.

M: I think there might be something useful in that. I'm delighted to hear about the Chilean. You're leaving at the end of this week and coming back....

K: I'm leaving on Sunday.

M: Do you think before you leave you could get us a tentative date. I'm told...

K: Let me look it over.

M: ...that our seminar file is in your action file. We've been talking to Eagleburger and to Gompert. If you could just give them a tentative date before you go that would be good.

K: Good.

M: Now you mentioned one other things once which I think would be very useful in light of a lot of things that have happened, which is, you suggested that Holly and I should put on a very discrete evening with critics of a kind that you're not likely to meet.

K: I would like that.

M: ...in your normal travels. Nothing public or anything like it. Responsible concerned people who are not members of the foreign relations committee, or even members of the Senate but who have some influence. Are you still interested in that?

K: Yes, I am, very much.

M: Maybe we could try to work that out -- May I think is probably too quick, but maybe after the 1st of June.

K: Why don't you and I talk as soon as I get back.

M: Alright. But we'll have to do that, we'll talk sometime between the 5th and the17th of May.

K: Right. I don't think I'll be back until the 10th.

M: Alright, whenever it is.

K: We'll talk in that period and then we'll set that evening.

M: And then if you could tell Larry or somebody, if you can pick a date after the 10th, anytime in the rest of May for this seminar thing. That will be fine. And then we'll talk about the other thing when we talk, because it looks very serious and I think it's not without significance.

K: It is of significance because it fits in with other things.

M: Exactly. The time cable strikes me as an interesting one and of course I will say not a word to anyone.

K: And the NY Times with it's great acumen has missed the whole point of what we did with Cuba at the OAS.

M: Really? I haven't seen the Times.

K: Well, they have an editorial complaining.

M: Complaining that you didn't do anything.

K: That the Latin's know what we're doing.

M: Of course they do. I got that from the AP. If you know how to read and if you know how Latin's talk, it was quite obvious. I wasn't surprised when this other thing came along. I think we can make all kinds of ground.

K: Exactly. What you're doing may fit really very nicely into it.

M: I hope that you will not mention it to anybody.

K: Look, it's against my interest.

M: Where it could get back to them. Above all, we certainly don't want them to think....

K: No, no. What you can do is to give your impressions. I don't want you to be a messenger.

M: But in any event, you don't know that I'm going or at least you're not treating it very seriously because otherwise they get the impression that I seem to be but that I'm indeed some kind of ....

K: No, I'm not going to talk to anybody about it.

M: Good.

K: There's no need for me to talk to anybody.

M: But file the information away that that happened a day or two ago, it should effect your thinking about other things, perhaps.

K: Exactly. No, I don't consider it an accident.

M: I don't either. Just put it into your file and I think it's significant, if you want to know, that this was the only one accepted.

K: What channels did they use? I mean, they didn't use the Soviets, that's all I....

M: No, they used their own UN mission.

K: OK, well that's fine.

M: And simultaneously did not accept major networks, all of which had been asking for the same thing.

K: That's intelligence.

M: In other words, they want exposure, but.....

K: But from somebody with political sophistacation.

M: Exactly.

K: Very intelligent.

M: And whom they have reason to believe, you know, if not friendly, at least open.

K: Exactly.

M: So, it all sort of fits together and I'm.....

K: Look, as soon as you hear that I'm back, will you call me.

M: Yes, I will.

K: Good, Frank.

M: I will and if you could give them a date, we'd set something up for late May on the other thing.

K: Right.

M: Alright, Thank you, Henry and congratulations.

F: Fine, how are you? Congratulations to you.

K: Thank you.

F: Hey buddy, I'm glad to see you got ten days of rest.

K: Well, I'll need it when I go to the Middle East next week.

F: I'm brining in the Wider group including some of the Soviets Jewish people tomorrow. And I just thought I'd check with you. What you might want to accomplish or what you had in mind so we could just check signals.

K: On the Soviet Jewish people do you think I should see them with that other group or do you think....

F: I'dd tell you what you do. You're going to be meeting I understand with Jackson on Froday. I would do this Henry if I could suggest this. Bring the subject up at how its intertwinded with the whole Middle East situation.

K: The reason I wanted them in was really not so much the Jackson thing. I first wanted to explain to them what I'm going to be doing in the Middle East.

F: I know that.

K: Now, can I trust the group you're bringing in?

F: Yes, you've been able to trust them so far.

K: Including the Soviet Jewish one.

F: I'm only bringing in one in and that is Stanley Llowll. I'm going to talk with him before he comes in and lay down the ground rules on it.

K: Look, you've never let me down. Your group has never let me down.

F: I've had to be pretty..... But that one of the reasons -- you know I have some control over these fellows. If they don't think they can get an appointment any time they want to. I have to exercise some degree of discipline with them. Now, what we'll do tomorrow. I'll go over that with them beforehand and then about a few minutes before you come in the meeting you call me and I'll give you the low-down on the whole thing.

K: Good. wonderful.

F: I think you can be very frank with them. You're going to have to see what problems you face and that and then I think you'll probably want to relate how that relates to the whole Russian situation.

K: That's what I thought I would do,

F: I think this is important. Now as long as Sanley Lowell is going to be there. He is coming in that group. You see I've been trying to break down this business. These people in the Soviet group are very, very radical and that's the reason I've just kind of have never wanted them in except that its just their leader. Knowing the politics of things. But now that this fellow is here I'll have a visit with him beforehand and then what we'll do is if you'll just call me in a few minutes before the meeting I'll give you the low-down on the whole thing.

K: Good, and you will guarantee their usual discretion.

F: So far over the years have I ever let you down.

F: We can't afford to let you down.

K: Well, you're a great friend.

F: Tell, me, how are things going. Pretty rough.

K: It's a difficult period but I think we can manage.

F: Good. Well fine, I know that you have and I've been trying to do my best to keep things in control. By the way, when Jack was here we had a good visit.

K: He told me.

F: Let me say this to you Henry. I xxxx have my contacts in the overseas where I'm able to talk to anyone of the party members directly. You know I have that ddvantage because of my relationship over there.

and I can tell you this. No matter what takes place -- my own appraisal of it as of this moment is that you're going to be dealing with the same people that you've dealt with for the next few months.

K: That's my guess too.

F: And I think that no matter who it is -- I've talked with the members of La Cod even, no matter who it is going to be the policy on the disengagemen dituation. There isn't going to be much disagreement with. Now in terms of negotiation -- the frame of mind on that. That's something else but the fundamental policy is the same. Anytime you want to know the sort of the background on what the different parties think you can feel free to call me because I'm in touch with them because of my relationship with the Jewish agency over there.

K: Right. Well, we'll stay in close touch.

F: I'll see you tomorrow.

(Missed first part)

C: As you know, the tax bill seemingly is hung up for different reasons. The Energy Bill is in ahead of that and there's some feeling that it's a controverisal...

K: Which bill - the Trade Bill.

C: The trade bill. That may not be moving anywhere and we may have no particular chance to do anything. A halfway measure is possible in terms of the export-import legislation which has to get through by June 30, so that will be coming to _____to extend the export-import matter. Jackson added credits to his amendment so that we can quite appropriate put in whatever modification of the Jackson amendment we might like to or seek to do that on that bill.

K: That would then take....

C: Not cover most favored nations.

K: No, but it would take care of the credits.

C: It would take care of the credit and would show the Senate position.

K: That would be helpful.

C: That would be one step. Now there's one other alternative. The Finance Committee is going to report 3 tax bills out in the next week or so. If we wanted we could try to amend one of them with our version of the Jackson thing and just do it rather ____if we have the capacity, which I think we have and ____the matter right then by adding on the Jackson languages modified which would cover most favor nations and cover the export-import credit matter. That would go to the proper committtee in the House so that we wouldn't have jurisdicional problems over there. The question is whether it's worth trying to move that swiftly or whether we should test the waters on export-import legislation.

K: My instinct is the latter but I'm not expert on legislative.

C: If we showed the Senate will on that, we, of course, will have not have vehicle to grant the most favored nation status to Soviet Union and the question is how long....

K: My impresion is, that if we could get a quick show of preserving the credits that this would help us a hell of a lot.

UNITED STATES DEPARTMENT OF STATE
REVIEW AUTHORITY: ROBERT L FUNSETH
DATE/CASE ID: 17 MAY 2004 200102979

C: That may be the rightest and most orderly way to go then.

K: But I would be prepared to consider the other alternative. I'm having breakfast with Jackson, Ribicoff and Javits on Friday and maybe we should talk after that.

C: Fine. In connection with that business, the general feeling among people I've talked to here is that Jackson and Ribicoff are in ____and even if we confront them with it, the likelihood of beating them --they're going to fight like hell and try to beat us. Whereas Javits might be detached from them and I've had a preliminaary meeting with Bill Hildebrand who's Scott's key man up there. Scott is generally sympathetic to our view point and what I'm trying to put together next week, is early in the week, a meeting with Scott Mansfield and myself and Javits to bring him into our plans and see if...

K: I think Javits can be detached. Ribicoff talks to me as if he could be detached but that may be tactical.

C: I think it's conceivable if he -- I'm sure he's aware of the re-thinking going on in the Jewish community...

K: Jackson I agree is in _____.

C: I presume the meeting you'll have wouldn't come to any conclusions. Wouldn't leave us free to move these people, or try to move them.

K: I'm certain -- I do not expect we reach any conclusion. But I thought if I could have a sense of ____I could make a better judgment after that.

C: That would be very useful. I will not be able to have this meeting until next week so if I could talk to you before you take off again, after you've talked to those 3.

K: Absolutely. I'll talk to you Friday morning, right afterwards.

C: Let me ask you two more questions. One on Sparkman, do you happen to know his feelings. If we're going to do this in the banking committee, he's one I haven't talked to you.

K: No, my instinct is, he would be in strong support of your position.

C: I think that he would be also. Now one other thing. The amendment - this is the final thing I've got -- on the amendment that we're working on, I've worked with Nelson and Himes a revision and it comes down in clear essentials to this, first, we propose that if most favored nation is granted our credits by the President there would be under the reorganization act a 90 day period in

which one House of Congress could object to ___and thereafter the most favored nation thing would be subject k approval or disapproval each two years so that Congress would have that right to take a look every two years and the ____governing what we should take into account woul include the following section D and this is really the meat of the ____. When considering such a resolution of disapproval, the Congress shall take into account whether such country is evidencing resonable progress and or is not retregressing from the observance of principles of human rights set forth in Section 402 which is ____including the principle of ___.

K: Was the problem you have in addition with this, which we haven't raised this China.

C:. Yes, I know. That's another little problem.

K: We don't want to get ourselves into discriminatory box with China, but maybe we can get Mansfield to introduce a special legislation for them.

C: He is going to. So that would cover that. Is that language I read to you sound reasonable?

K: That sounds possible. Now let me ask you, when you say, does it mean every two years the thing continues unless the Senate disapproves this.

C: That's right, yes.

K: It doesn't have a permanent ____for it.

C: It should be renewable for additional periods in the language we've got in now. Each not to exceed to 2 years subject to the provisions...

K: So, there has to be a positive vote or it lapses.

C: The Congress would just have to reject if it wanted. It would have the opportunity to object every 2 years.

K: That I would prefer.

C: That's the way it is.

K: The other thing on credits. Are you requiring that every credit no matter what the size be put before the....

C: That would be a different matter that is not in this portion of the bill.

K: That is not in there.

C: No, I believe that the banking committee will have some...

K: You know, I have no ~~box~~ objection to saying any credit above a certain amount should lay over for 90 days.

C: That's what we will do.

K: ~~GOOOOK~~ Good. Well, I appreciated very much what you're doing.

C: Well, ~~thaaax~~ thank you very much.

S: The situation in NY is moving very rapidly and I wanted to describe it to you and get some guidance and make a recommendation to you on how to handle it. The meeting is about to convene. We've been able to delay it for a couple of hours but no more than that. I gather the Lebanese Foreign Minister needs to get back to Lebanon. The expected scenario is as follows: One that the original non-aligned text which was very bad from our point of view will be submittted by someone. Secondly, the unamended draft, the draft you looked at over the weekend will somehow get to the table. I'm not quite sure you will the sponsor be. Now, Scali needs guidance and the guidance that should be given in my judgment is as follows. The presumption, by the way, is that of these two xxxxx resolutions, the one that you looked at over the weekend would have priority in the voting. Scali should be told to arrange for someone to submit the amendment to paragraph two and if he can't get anybody, to submit that amendment, he should do it himself, to that paragraph. Then to get the British and the others to vote for this resolution with the thing xxx in it. Vote for the amendment, if the amendment carries, they vote for the resolution. If the amendment fails to carry, we abstain on the resolution. That would be my recommendation. And to get as many of the others -- it would pass you understand, but I think on that basis we would probably have -- I want to confirm this -- we would probably have the British, perhaps the Austrians and perhaps the Australians at least abstaining with us. Which is not bad.

K: But would it carry then?

S: It would carry. My judgment is that it would carry. This is thex resolution, you know, the one I'm talking about.

K: That we negotiated with the Lebanese.

S: That's correct.

K: But how will it makes us look with the Lebanese?

S: Well, they won't be entirely happy, they would obviously prefer an affirmative note, but on the other hand, we will have supported the amendment and xx that will be the basis for really our abstention.

S: With the amendment.

K: No. He would vote for it without the amendment.

S: Well, let me see that. Because if that's what they would do, then we've got to be together on this.

K: He wants the French to put forward...

S: Yes, but I'm just getting the last page here. Well, if they are going to vote affirmatively and if the Australians and the Austrians are going to vote affirmatively, even if that amendment is not adopted, then I think we're in difficulty abstaining.

K: That's what I think. So I think Scali's instructions ought to be that -- at any rate we ought to be for the amendment and if necessary put it forward outselve.

S: Right.

K: If the amendment -- if Britain and Austria or even Britain alone abstains, then we should abstain with it.

K: Senator, how are you? I'm seeing you this afternoon. I'm calling you, I don't know whether that's the right procedure and you can pass it as acting chairman of the committee because we have this problem. Last year the Congress gave us 250 million dollars of drawndown authority for Cambodia but at the same time the conference report pointed out that they would hope that we don't exercise more than 200 million. As it turns out we are in an emergency in Cambodia where if we don't use the other 50 million we literally have to suspend delivery of ammunition. I've talked to Chairman Morgan about this and he feels that under those conditions he would go along with it. There's no legal objection to it, but the intent of the conference committee was clearly expressed in a strong hope that we wouldn't go beyond 200 million.

S: Yes, well my feeling would be that is a wish that was expressed but it has no binding effect and if it's needed, I think it's possible to do and do it.

K: Well, he said I should take a run at the Soviets about ending harrassment, which is what I'm going to do with Gromyko.

F: You got the feeling that there's enough give so that it's better to stay on this track then to try another track.

K: No, I think if you try another track, that's fine with me. Like What?

F: Well, I have a feeling there's -- that they made a real plea not to have this put on the Ex-im ~~xxxx~~ bank. bill. If it were put on the Exim Bank Bill it came off this bill we could have a bill that wouldn't do us any good but it wouldn't get us MFM but it would stop credit. I think they're afraid they'll lose their support on the other -- from the other Senators on Exim because the other senators constituents want loans. Another approach is to come up with a position that is significantly different then our original ~~x~~ position but

UNITED STATES DEPARTMENT OF STATE

not what Jackson wants and then see how many senators who are very unhappy at being on his amendment. How many of them will say, well that' meets my requirement, I'd not have to stick with you Scoop.

K: Well, I have the impression that we might work out something on the Exim Bill. He wasn't so strong on the Exim Bill.

F: Well, but did that assume that there was nothing in the bill. Or assuming there was a Jackson ___in this bill.

K: I had the impression he'd keep the Jackson __also in the bill.

F: Well then we haven't gotten anywhere.

K: Exactly.

F: I wonder if he isn't afraid -- he must be knowing that his senatorial support is erroding and a lot of these guys didn't mean to kill the Trade Bill and they're beginning to [redacted] see that that's what he's doing and they're beginning to suspect he's doing it really at that behest of Labor and a deal to keep Labor support for his candidacy. So, there aren't [redacted] 78 guys up there who want him to be President. Most of them want to be [redacted] President themselves.

K: I think what he really wants is to kill the Trade Bill for this year.

F: That's right, for the Labor people. Because know full well that once you get a veto through Congress, we're never going to get that thing out of the Ways and Means Committee again. It's' 77 for you get another swing at a Trade Bill and that [redacted] means no trade negotiations. The argument that we shouldn't go running around is probably a good one, surely a good one if we can make head way with him on the other hand are we being had for his purposes and he's just giving us a little in [redacted] order to kill the bill. I presume you are as anxious for foreign policy reasons as I am for international economic reasons to get a bill.

K: Oh, I'm very anxious.

F: I would guess that we have about 15-20 days in which to get some movement here or we're going to lose the bill just because of the [redacted] Finance Comittee's timing because I have to admit there's [redacted] not what you'd call a great deal of enthusiasm in the Senate or in that Committee for this piece of legislation so [redacted] they'd happily go on to other things. Do you think we can bring it to a [redacted] head in that period of time?

K: I think what we should do is to move very ___. The first thing, I think is impossible. I think we can try to bring it to a head as soon as I return.

Because then either we will have had a success in which case I'll proceed _____ might help alot. Well, if we've had a failure then it would effect everything anyway. I think we can gamble on success.

F: When do you hope to see Gomyko?

K: Monday.

F: Good. Is this something he can deal with?

K: Well, if -- look if he would give me anything at all, it would help. OK.

F: Then we will just think ~~xxxx~~ of alternative courses, put it in our back pocket until you come back and whenever it is, that's beginning the week after next, and make a real reappraisal right then.

K: Exactly.

F: Good luck, Henry.

R: I had a call from Roy Ash.

K: Yes.

R: While you were away about the end of March/at a Cabinet meeting the President brought up the subject that there should be some initiative and he would be coming to the cabinet officers for them, some initiative that he might take himself. He also went into the concept of the goals of the Department, you know the Roy Ash talk, that sort of thing. Roy said he was talking to the President this morning and the President wants -- he called me because he said he assumed you were so busy you wouldn't be able to get around to it. The President wants by May 1 from each Department, and keep it out of the bureacracy, a list of 3 suggestions, 3 concepts, new initiative, new ideas, new thrust of some kind, that the President could do as President. Now he said that he's sending a paper over on this, but he said -- I said will ours should be in the international __ and he said, no, if you have some ideas as Weinburgers department, he would like to have those too. He wants something that -- he just wants to get ideas and he wants 33 ideas from....

K: Oh, Jesus Christ. I've gone through this for about 6 years.

R: I just wanted you to know about it.

K: I don't want anything to go to the President from the Department that I don't see.

R: Right. I've got Win Lord working on this thing and we can get something up -- well we'll have to have it by May 1 -- we'll cable over to you just what we have. Now, as I say, it might not be anything in international field at all.

K: If it's out of the international field I'm not much concerned. But if it is, I want to see it. Ken, as long as I've got you on the phone, on two things. You think well of this fellow Goldberg that Holson is bugging me about?

R: Yes, as a matter of fact, I'm the one who suggested him. The reason I did was I knew him very well in Bonn. We thought very highly of him.

K: OK, then I'll go along with it.

R: He's an excellent man.

K: Secondly, Ken, this we really shouldn't talk about on the phone. Everyone once in a while, not very often, people come to me and say you're not happy, or there's this and that problem, I'm assuming that if you are not happy, you will let me know.

R: I will let you know.

K: And unless I hear it from you, there's nothing to it.

R: Unless you hear anything about me from me, ignore it.

K: That's my view.

R: Exactly. And I expect the same thing from you.

K: Exactly right. I have no problem and I think you're taking over a lot of things that make my life a hell of a lot easier. Of course, you know, all you have to do is look over my schedule, any meeting you want to join , it's up to you.

R: Good, Henry. I appreciate that very much. I have been trying to keep things away from you as much as I could, that you didn't really need to be involved in.

R: One other thing, I was talking to this morning the Somali Ambassador came in. This was an official invitation from him to visit Somali if and when I make my efforts. I said, well I assume from this that your country wants to improve relations with our country and he said that is the case. He said we would like -- he was talking to his President when he was there just two weeks ago.

K: I don't think that's a bad idea.

R: I don't either. It's an open ended invitation. He said -- I said I assume you want to improve relations with us as we do with you and he said, yes, we do and he said the President told me that he wants us to know, President Nixon and you that they do want to improve relations and that they've -- they would take any steps necessary along that end. K: Hello.

C: Greetings.

K: How are you? Sorry I couldn't get back to you earlier.

C: Quite all right. I was curious if you could tell me anything about the Jackson/Ribicoff situation.

K: Well the Jackson/Ribicoff situation seems to me what Jackson really wants, is to kill the Trade Bill for this year. I think he is softening up a little bit though--Jackson. He is now shifting from numbers to harrassment. On the other thing though is that we have got to get something done on the credits.

C: Yes.

K: And my own view would be of the two options you gave if you could help with the credits, that is the most urgent.

C: So we should just

K: I'm afraid if you put in a revision of Jackson and the credits you are going to start one hell of a brawl.

C: Yea.

K: Don't you think.

C: It is quite possible. Unless we could come at Jackson from two sides. I think the only way we can do it without a terrible brawl is to have a number of Jewish leaders approach him and urgent compromise and at the same the Senate leaders approach him and say we are prepared to seek to do it and we think we can swing it. In that way it might be possible, but it is probably wiser to just do nothing until we get the trade the Export-Import Bill through.

K: That is what I would think. Can all of this wait until I get back or would you like to trigger it earlier?

C: When do you get back?

K: About the 10th of May.

C: No it can wait. Because we don't go to markup until around May 23 on

UNITED STATES DEPARTMENT OF STATE

the Export Import in subcommittee, so we can wait till then before we do anything.

K: Right. Now if you have to get in touch with me about this. You can call Larry Eagleburger, my State Department office, and he knows how to get me quickly.

C: All right, fine. Let me ask you a couple of other quick things on the Jewish Leadership group was there any discussion when they met with you of the...

K: They seem to me to be very receptive to a compromise.

C: They do.

K: And I talked separately to the head of the Soviet you know whatever that is for the immigration of Soviet Jews.

C: National Conference on Soviet Jewry.

K: Right. And he actually is a much more balanced fellow than Mark was or at any rate seems more ready to listen to me.

C: What is his name?

K: Lodal. I can get you his name.

C: Lodal, he is the head of it.

K: He is the head of it. Well he is looking for something that he can sell his constituents. But he himself is not an active force. He is looking for something he can sell to his constituents.

C: Yea. Adali Stevenson, who is Chairman of the subcommittee that I'm on in the Banking, has the impression that the Jewish community would just assume let the Export-Import credits go through without a big fuss.

K: That is my distinct impression.

C: Now, the question is what will Jackson will allow. His man Pearl is meeting with Stevenson's staff people Monday.

K: Yea, but you know Pearl is a bloody fanatic.

C: I know he is. He is a wild man. He is meeting with Stevenson's people Monday to tell them what Jackson/Ribicoff want on Export-Import. It is apparently as not as stiff as the Jackson Amendment, but he has

sorta indicated that if they don't accept what he wants then Jackson will offer the Jackson amendment on the Export-Import thing. We'll try to compromise.

K: So he, I think what he wants is the minimum is the Congressional veto on every loan. That has, Casey tells me a number of commercial problems in that while that loan is on the table the competitors would all know what the bidding is.

C: Yea. Well, we will try to avoid that except at some figure Unfortunately they are talking fairly low figures like 25 million

K: Yea. I mean if the figure is high enough we can live with it.

C: What is your idea of an acceptable figure?

K: Oh, God, a few hundred million.

C: Yea. I doubt that we can get one at that level, but

K: But what they have to consider, well I don't have to convince you. We just cannot get a moderate Soviet policy in the Middle East and systematic cutoff all the fruits of detente. That isn't possible.

C: Yea. I fully understand that and I think there is a good number who do. Well we'll work

K: I can say my impression in talking with the Jewish community was that all except the head of the Soviet group would positively favor a compromise and even he in private talks was more flexible than I have ever seen that group to be.

C: Really. That is very encouraging. Well what I will be trying to arrange is to hit Jackson from the two sides if necessary from the Jewish community on the one hand and the Senators on the other hand. To try to orchestrate so that it sorta happens about the same moment, if we need to do that at this point. But I will focus on the credits and let the other stuff sorta slide.

K: I greatly appreciate this.

C: If we can help on the SALT thing why there is a number of us who want to. We don't

K: Well, I have talked to Muskie about this yesterday and we may get together a group just one evening at the Department and let our hair down and explain the figures, because I tell you of all the demoniac things that I have heard this one is the worse.

C: Well I agree.

K: Just for your information privately I had the chiefs in at a meeting this morning. I said all right gentleman, what is it that you would do if there were no interim agreement? And there isn't one bloody thing they can tell you.

C: Except ... everything they can think of.

K: Yea. But even that they can't really think of.

C: Actually I'm more interested in that than the other. I see the Jackson thing is a way to get toward the SALT so I will do anything I can to help.

K: Well, I'll get you involved in that.

C: Fine.

K: Many thanks.

K: Yea.

C: I had to go up and testify Tuesday on theEX-IM authorization and I just thought I would touch base with you to see if you had any guidance for me. They've been talking together about getting the EX-IM Bill out quite clean. With respect to Soviets and European transactions except for requirement that to be a Presidential finding with respect to any loan over some amount yet to be determined. Maybea $100 million maybe a quarter of a million dollars. And also a requirement that specifixx loans perhaps energy related and those of a large magnitude to gain a 100 million or whatever. The ... on the table up there is 30 to 60 days with an opportunity on the part of Congress to veto. Now xx it is my view that we could live with the Presidential finding requirement although I don't think that should be placed on the President but the requirement that you lay burden the whole xxx transaction out so that the sponsorer could be jilted at the altar and his competitors would know all about it and xx zero in on him I think would just x put us out of business.

K: Yep.

C: Now I'm going to say that, lay it out in my testimony.

K: Well I wouldn't have anobjection to the veto by Congress if the sum were high enough, if we could lick that problem, that technical problem of the xxxxxxxx competition.

C: Well it is not only the problem of competition it also puts the Congress in a position of perhaps administering a specific review slap in face to one of our trading parties and one of the countries we are trying to do business withand they really shouldn't put themselves in that position. The military aid there is to my knowlege no great criticism to economic aid. In fact on the National television set that ... US and Arab countries strengtheing relations of our countries.

K: Well military aid want happen before next Wednesday to Egypt so can we cool it until I get there.

D: I have said that there are no plans at the present time to have any military aid to Egypt.

K: Because it takes us a certain amount of time to build the SS-11 silos that is that Soviet one, I mean the minute men silos we are going to give them.

D: Yes, Mr. Secretary.

K: So you got a 6-months lead time before we do that.

D: I know very well how long it takes to get American military aid

K: But you know what the Israelis should get into their heads as I told you the other day, even if we replaced every damn ~~pxdxxxx~~ piece of Russian equipment with American equipment, which is not going to happen before next Thursday.

D: Wednesday, sir.

K: Or Wednesday, Now you are assuming it is going to happen by Thursday. You'd still be better off because it is unlikely that we would mount an airlift to Egypt during the war. I will tell you this if we mount an airlift to Egypt during the war ~~x~~ we will get more European bases than we will if we mount one to Israel.

D: Well, I am not sure about this, but maybe you are right. But the point.

K: No, No, but my point is this isn't going to happen on the question of military supplies, if it arises it would be in the context of a substantial egraded ~~association~~ dissociation from the Soviet Union and substantial greater progress toward peace with Israel. So this is not an issue we should now spend our time on.

D: Right, I agree with you. I think.

K: If that is an issue, we can perhaps discuss in Israel even though it's even premature for discussion in Israel.

D: I think with the Prime Minister you should discuss this.

K: I will be glad to discuss it with the Prime Minister, but there is nothing active going on at this moment, nor in the defense of the Egyptians do I have to say have they even made a request. When they make a request and we deal with them at Israel speed you know we have months of debate before we crystalize it.

D: Mr. Secretary, I am aware of this and I

K: But I foresee the earliest time that this problem can arise completely ~~xxxx~~ towards the late fall of this year in my own ~~xx~~ estimate but I just don't see this thing any substantial amount of military aid. We may at some point give some token saying if the Russian pressure gets too great but even that when I say we may be discussing an abstract theory.

D: Yes, I understand this and I report exactly this way to my Government after I talked to you the other night. So there is no misunderstanding on this. But I want to tell you that the price is not the scientific institution.

K: No, no, but the press is not unresponsive to your Government.

D: Well, yes it is. And you must understand, Mr. Secretary, I am telling ;you the truth . It is a combination of things together that make the press suspicious when you have in one week.

K: Listen.

D: No, I'm not justifying, I am trying, if I may be so bold to help you understand the mood. This is my job, it is my function to do this. And the mood ~~xk~~ is that the combine military ~~xdx~~ aid to Saudi and prospects of military aid to Egypt --prospects I say, plus aid economic aid to the Arab countriesfor the first time in Egypt in a long time plus the vote in the UN ~~XXXXXXXX~~ and they come with and plus the fact that our voting assistance was not what we wanted. Everyone of these things can be explained . We did not government promote it. The totality of the picture with the say in shooting.

K: I understand this. But what you have to understand is something else Because you have to explain both sides. Whatever our inadequacies whatever maneuvering we have to do, I believe firmly that we have contributed greatly to the security and survival of Israel in an almost impossible situation.

D: I don't think the people argue this.

K: No, that is not your fault that you are in such a difficult situation. Secondly, the forthcoming negotiation is apt to be the most difficult and in many ways the most decisive we have had, because after that one whether you negotiate Jordan or with Egypt you are not dealing with countries that can themselves start a hollow course in the Middle East or likely to do it. So in this sense it is extremely decisive. Thirdly, if we get the proper kind of settlement, our chances of doing to the Soviets and Syrians about 70% of what we have done to them in Egypt is not bad. All of this is directly relevant to the security of Israel. Conversely if we fail, the U.S. ~~by~~ this is not a threat of what I am going to do, but the U.S. by the logic of events it is going to be out of that negotiating game and it goes one way or the other into international forums where what happens in the Lebanese case will be compounded. This is the dilemma that I'm putting to you as an Israeliand as a friend.

D: I understand it.

K: And therefore, it is no sense threatening ~~x~~ me with not making concessions. You are not making them to me. And when Rabin said, you are not responsible for Rabin, but when Rabin said you are willing to make a few concessions ~~x~~ to your friends, but finally you have to protect your own security. You don't have to make any concessions to your friends.

D: Yes, I understand it, Mr. Secretary.

K: I know how much you admire Rabin.

D: Yes, but the Jews came out before .... That I am not blaming you for. I want to say something else. We are quite aware of general situation. It is in fact, ~~thexix~~ The Prime Minister in a message was very careful not to plague the negotiations, in fact, I added to Eagleburger orally that that means we want to negotiate and that we want you to come. And normally if we didn't realize the totality of the strategic interest in what you are trying to accomplish the normality would have been Mr. Secretary thank you very much for your good offer, but under these circumstances, with these wild men, the Syrians, we cannot negotiate. If they pacify the area we will discuss it. That would have been normal reaction if we did not have the Government that was fully afraid of what the strategic involvement of the situation and your good intentions about it. So I mean I want.

K: But it is not really any more at this point my good intentions that matters so much, because it is the objective strategic situation.

D: No, it matters to us tremendously what these motivating factors behind you and your operations.

K: Yea, but even if my intentions were less good.

D: If your intentions were less good, we would look for another man to do the job.

K: You're welcomed to that. That is what I would really want.

D: I know, but we are not going to let you off the hook so easily, but at the same time we ax I think the basic thing we have to do is make you aware of

K: I understand you. You passed your message to me. Now I am xxxx giving you some to give to her so that she can yell at you too, there is no sense you being yelled at only from one side.

D: That she has done even before your message.

K: And I just don't want xx Jerusalem to talk itself into a masada complex in a period of enormous complexity and danger.

S: Yes, yes, I know, but the Syrians must

K: The Syrians, I'm sending a message.

S: Mr. Secretary I did not ask you to beg the Syrians to be good children, you have done it before and I know.

K: And it actually worked for a week.

S: No, no, it didn't. There were a couple of day... I don't think there was any basic change init. It was more dictated by the situation. But be as it may what I am trying to say, is that you should start conditioning the Syrians in their minds that they are not going anywhere near what they expected.

K: That I listen, I have told them already a 100 times. That is not the issue. I have told them, I have told Boudienme, I have told Sadat that what they want is unattainable, and will not ax be supported by us in any sense.

S: I understand this. I am not dictating the crazy plan about half of the Golan Heights. I am saying that additional gesture should be good of them to accept our arrangements, xx because I am fearful would not be able to go beyond this.

K: Well, I tell you that is out of the question. That cannot be done. That youhave to, there is no possibility of either Sadat orBoumedienme supporting that and that I think ...

D: I mean after all, Mr. Secretary ....

K: Well look, frankly I can't argue that. I tell you it would lead to ...a louse up of the negotiations. And in that case

D: As you know Syrians and Russians...
I don't think disagreement...

K: Yea, but the fact of the matter is in this whole process it is basically in my judgment more in the interest of Israel because well I think a failure of this process will bring it all back into international forum.

D: That I agree with you.

K: You cannot get it on Dayan. There is no possibility of getting it on any thing close to what Dayan brought here. I have said so from the beginning. I have said so for months. It is my best judgment. Even what I have suggested, my judgment has a better than 50/50 chance of failing. Because I have never had even the slightest thing from the Syrians that they would accept less than the map I gave you.

D: I understand.... But what I am saying is this--if I may be as bold to suggest to you, I think if I were you, I would say to the Syrians that you behave ....

K: That I am willing to say to them.

D: This is not a tactical move, I know, Mr. Secretary....

K: I'm willing to sayit to them, but I am telling you you can't act on that basis.

D: Yes. ....
I think will be misleading you if I don't tell you what the mood is.

K: The mood may be what it is but you have to report to them my judgment and if I reach the conclusion that it is hopeless I have no choice except to go back home and then let nature take its course and see what else happens.

D: I understand this.

K: And that is what I am going to do.

*

D: I can assure you but..

K: I have ~~x~~ made no secret of my firm conviction and I consider what I have asked of Israel is the absolute minimum of what is dueable and has been designed to be the absolute minimum. And It is not what anyone else has suggested, but I will see you in Israel and we will all have a merry time.

D: Yea.

K: Because you will surprise me with your flexibility.

D: That has always been your problem that you were taken by surprise. Maybe the Syrians will surprise you.

K: I will tell you this, in my view if your settlements weren't there and if you were capable in your Government of making ~~x~~ more than I had proposed and more than I will propose, we would have an 85% chance of driving the Russians out of Syria and I think this would do you more good than all this horsing around.

D: I understand Mr. Secretary.

K: But I don't have to worry because we would even discuss this I am just giving you my personal opinion.

D: Well I don't know. There has been all sorts of denial in your press conferences and I understand ...Soviets .. I'll help you and so what. Not everyone is so sophisticated to understand this when you say that the Soviets are not going to help actually.. you know what I mean. ...

K: I have got to keep the Soviets quiet while I am doing this.

D: I understand this.

K: The problem of the Jewish in Israel right now is whether when they are in mortal danger they have enough understanding and self-discipline to survive.

D: I think Mr. Secretary.

K: Now they have not proved that they can do that to me yet.

D: Well, Mr. Secretary, I beg to differ with you. I think the Jews . I think both the military situation.

K: That isn't the issue. The issue is that if you want to pick a word up out of my press conference.

D: No, no I'm not doing this. I am telling you this is the sorta thing that people read and they are not pleased and we cannot make them agree with all the negotiations and this is not Israel you have people in America who believe this way too. This is part of the problem we have with the ...

K: Yes, but we went through this and I am sorta sick and tired of it because this is done by people who sell out in every part of the world except a narrow strip on the Mediterranean and you can't sell that in America. And at any rate I have given you our views now and I'll see you on Wednesday in Israel. Now seriously.

D: Yes. I am leaving on Monday. I'll be there on Tuesday and I will be waiting for you. on Thursday.

K: Good

D: Have a good trip and a safe trip.

K: I understand you don't have a lunch.

D: I don't have a lunch when?

K: On Monday.

D: Yea he called me and told me that he got a message from Gromyko.

K: Yes, I am having lunch with him on Monday.

D: I'm thinking to join you in Geneva. but if you prefer to join him than me that is a matter of taste.

K: Well let Larry know what he said when you see him.
Well you won't see him.
Well you don't ~~k~~ need it.
OK. Bye.

D: Best regards to Mrs. Kissinger. Bye

K: Thank you.

K: Hello.

R: Henry.

K: David, how are you?

R: How nice of you to call back and I apoligize...
I just wanted to point out to you a couple of things.

K: Yes.

R: As you heard from Nelson about Bilderberg.

K: Yes I have.

R: You probably also heard from Hal.

K: Right.

R: So I don't think I need to fill you in on that.

K: I think I have a pretty good feel.

R: He and Nelson made a great impression.

K: Wonderful.

R: It was very useful having him along and he defended the President very well against George Ball.

K: You know, we have a report today from Dabenyour(sp?) saying a lot of Americans at Bilderberg and also Americans from Bilderberg traveling through Europe were saying that this Administration is determine to destroy our Atlantic relations. You know, I don't understand what good it does to an American to do this.

R: Well, I can't imagine why they would.

K: It is not true but even if it were true.

R: I'd say that Hal did present a hard line.

K: Yea, but that's our line.

R: Well, OK. But I mean this is part of the problem we have

Rockefeller/Kissinger

K: Yes, but his hard line as I understood it was we will support European unity if Europe supports our Atlantic relationships, but not in the abstract.

R: Well, you know, it is unfortunately just a bad climate. It really is at the moment, and I think a new administration in France could certainly help.

K: Yea, but I doubt that they will.

R: I think might

K: Shiscar might, yea.

R: And Nelson said he had given you the statement by this young French fellow Pierre de Monteblanc. (sp?)

K: Yes.

R: And I thought it was a little encouraging that he had said something quite different from what Jobert has been sayingand the fact that Jobert said it. They are feelers. I don't feel totally discouraged but I do think it is not in a good shape at the moment.

K: Yea. But largely the result European actions.

R: I think that is probably true but its just not a good atmosphere I'm shocked about thought if what you say about the other Americans going around saying.

K: Yea.

R: And I don't the explanation.

K: What actions of ours have contributed to it?

R: You know, they are sorta snide remarks and retaliation and so on.

K: Well, what snide remarks?

R: Well I suppose one the sorta example was the sad fact of the report on your talking to the ladies.

K: Ch, but God, that happened at the end of a year's process.

R: I agree, but I am just sayingthis is

K: But that couldn't have caused anything, because the damage by that time had been done.

R: Right, it is an example of the sorta thing they ~~think~~ to pick on .

K: Yea. But that is a symptom that is not a cause.

R: No, no, it isn't a cause. I don't know. I think they are having trouble among themselves and therefore they are looking for outside excuses.

K: I mean that talk to the ladies was a disaster, because I didn't know the press was there and it wasn't a well consider statement.

R: That's right. Well, you know, I can understand, but I think

K: At any rate that couldn't have been the cause because that was the end of a year of trying to get them to agree to something rational.

R: Yea, well, they are very difficult. I have no question about that. But I think it is clear that they need a lot of sorta tender loving care just to give them when they behave the way they do.

K: Yea.

R: And I fully agree on that. I did want to say a word on the Soviets. I think the Darmouth meeting went much the best than any we have had. And I have been sick in the sense that it was much less recrimination and much less polemic than there has been at the others. and much more willingness to discuss in a rational fashion the nature of our problems and a willingness to discuss how we can deal with them. And in a way, strangely enough: almost more than in Bilderberg.

K: Oh, really.

R: It was surprising. Of course I would write it up in three groups. One on political side which I think is a little more fireworks and I wasn't involved in that. Then there was one on science and environment and that went very well. And ours was on trade and economic relations And we brought up a whole series of rather concrete suggestions that would make possible a more effective cooperation. Excepting the fact that the wouldn't accept ownership in the Soviet Union by anyone, that was the most difficult. We said well how about leasing and we described what this country could do with equipment and also with plants and this be a possibility. And then we discussed the possibility of joint ventures in third countries and instead of just saying this is the end, they said, well, we would like to study it and it was agreed in the end that new US/USSR Council would be asked to set up a task force to see what might be done in this area.

R: And I think that is encouraging because if we could do something along those lines, it would be very positive and their whole approach is this, theysense a good delegation. Richard Lee who is Administer of Food sat in with us for one whole day & the Deputy Minister of Agriculture and theVice Chairman of the state Bank so that it was really a good discussion. And then that was followed up by ... I did go to see Kosygin in Moscow and had an hour and a half with him. I think he would have gone on a lot longer, but we were half hour late for lunch as it was. And he brought up an interesting idea and that is and he really wanted me to take this up with you and he said how about US and Soviets xxxx participating in the construction of nuclear power plants in third countries. In other words this is a variation of the idea we had advanced only doing it in a different way and then we saw Deviseonne(sp?) and he is pretty clearly I think and put the idea in his head but he would really like to do this and I think it is an interesting idea.

K: It is certainly one we would be prepared to look at.

R: You see the idea would be that they would provide certain elements of the plant and we in others.

K: Yea.

R: But I would think this has interesting possibilities. So far as the joint ventures are concerned it seemed xxx to me that the ideal place to do it would be in India. Where they are already strong, where the Indians need enormous amounts of capital and I'm not sure it might not be an interesting idea. Not now speaking of necessary power plants but something else. And they were at least willing to discuss it.

K: Now are they going to approach us on this? Or how is itgoing?

R: Well, I mean, what he is going to do is to send me through Dobrynin a memorandum but I thought maybe it was useful to you fo have it in the back of your mind when you are over there seeing them. It seemed tome a positive approach and the whole meeting with Kosygin was much more xxxxxxx friendly, much less barring and much less jives than I have ever had it before.

K: Well I think they are still eage to continue the detente, but what's going in this country with Congress isn't very encouraging.

R: No, although Hugh Scott was there you know. He gave them a moderately optimistic view on MFN.

K: Good. I hope he knows what he is talking about.

K: Hello.

JK: Henry, congratulations.

K: Thank you, Joe.

JK: You must be very gratified.

K: It's the most nerve-racking negotiation I've every been involved in.

JK: Yes, I can imagine. Thank you very much for calling. I'm wrapping up a New Yorker letter from Damascus and I wondered if there was something you could tell me about the way Asad handled the negotiation. What he (inaudible) at, what his basic conception seemed to me, what he was worried about.

K: Well, you're not going to attribute it to me.

JK: No. I will not attribute...

K: The difference between him and -- first of all, I think he's a man of superb intelligence, great sense of humor and really quite attractive, and I found him to be a man of his word. His problem in contrast to Sadat was that Sadat had made up his mind where he was going to go before he entered negotiations, while Asad seemed to be feeling his way during the negotiations. And to him it was a really tramatic experience to go through the process of recognizing and to call Israel for even -- if only for purposes of negotations. And at every stage of the process he had to bring along his domestic consensus sometimes by bringing people in for me to repeat to them the same arguments I'd already made to him. Sometimes by simply having them sit in. He had two problems, one of course was theline where the disengagement would take place, the second was how to reconcile thinning out UN and so forth _____ conception of sovereignty.

JK: I see. What was the fight about Quenitra at the beginning about whether civilians could come into Quenitra.

K: There was no fight ever about whether civilians could come into Quenitra. At first the Israelis drew the lines around Quenitra and in such a way that Israeli military forces would in fact -- well, at first, Israelis wanted to keep half of Quenitra for themselves.

JK: I see, they wanted to keep the western half.

UNITED STATES DEPARTMENT OF STATE
REVIEW AUTHORITY: ROBERT L FUNSETH

K: And then the major problem was whether he could put xxx civilians into a town that in effect had Israeli military outposts at every corner except one road. That's really what the issue was.

JK: I see.

K: Never any prohibition against ____.

JK: I see and you solved it by putting the Israelis out of the town but in the joining area.

K: By putting the Israelis out of town into a joining area, your creating a xxxxxxxxxx demilitarized Israeli zone for a kilometer and a half beyond Quenitra.

JK: Any indication what the Palestinians are going -- how they're going to react?

K: Well, that was another problem he had very much on his mind. I think there's a chance that they will not react too violently.

JK: Yes. So far they haven't at any rate. OK, well, look, thank you very much.

K: One point you had in one of your xxxxxxx columns to which I took exception is, you know, was we didn't get the war started, the war go itself started in the Golan Heights.

JK: It was xxxxxxxxxx crudly written on my part.

K: It was not anything we had any control over and it wasn't something we deliberatelyx used. The problem was that without these negotiations it would have escalated into a much more extensive war.

JK: Well look, it was rather crud but I also feel that without that fighting he couldn't have brought it off.

K: That may be true but it wasn't a plan -- you know, it wasn't that -- there was no way of moving this thing to a negotiation faster given the Israeli domestic crisis and given the fact that we had to get these people to put something on paper to which they were committed before we started so it isn't we xxxxxxxx deliberately let this thing build up. We couldn't start much before we did.

JK: OK, I have written Bob McCloskey a note trying to explain that. I was a little surprised at his letter about that kind of relationship with me, but basically I just don't think you could have done it or that the Syrians could have....

K: Joe I did not agree -- I didn't disagree with your analysis xx of the dynamics of the negotiations. I objected to the phrase that I unleashed the dogs of war.

And also I objected to the idea that all of this was being done to arrange a Presidential trip to the Middle East. That may be the result but that was not the intention.

JK: I didn't say that. I mean I don't remember what I said, but.....

K: But basically I thought 4/5 of the analysis was extremely acute. I mean the analysis of the dynamics was extremely acute.

JK: CK.

K: Yes, you had been in Damascus.

JK: Yes, I spent a lot of time in Damascus. I sort of know a lot of about -- I think the _____.

K: Then you know that this was a tramatic experience for ___.

JK: Absolutely. She was coming down from a romantic linquistic_____ or he was brining his people down from that romantic linquistic _____heaven to the pragmatic dirt of a national state.

K: Exactly. And so it was a tremendously emotional negotiation because you could see what he was going through.

JK: And he had to haggle at every step of the way. You know, what strikes me about this that the last part of the agreement where he establishes almost no connection between this step and the end step. That really surprised me.

K: That's right. No, it was a -- in his way he had a much tougher role than Sadat and he showed again in the wierd Syrian way, equal of not even greater wisdom. I mean to get it this far, now what he'll do in the next stage, God only knows.

JK: Yes, but his capacity for making mischief is much smaller.

K: Much smaller. He's lost his extreme radical creditial.

JK: Yes. Alright, I think it's a very, you know, really extremely good outcome.

K: Good, Joe, nice to talk to you.

JK: Nice to chat, my best to Nancy.

K: Thank you and we'll see you when -- you're going off on a trip?

JK: I'm going to the Governors conference now and I don't think I'll go to the Mid East trip. I expect to go to Moscow. Will you be going to Moscow before the President.

K: No, there won't be time.

JK: God. I'll be going on that. Is it clear where he's going to be going? Apart from Moscow itself.

K: No. I have to talk to Dobrynin soon.

JK: I take it you've seen the Shultz article.

K: What Shultz article.

JK: (inaudible)

K: No.

JK: Nobody called it to your attention?

K: NO.

JK: It's in the current issue of Foreign Policy. I don't want to load you down with something but you at least ought to get somebody to look at it, it's going to break on your head and ....

K: What's he saying?

JK: I think it makes -- I'm not sure I can give a good characterization. It purports to be an account of peace making in Indochina and may be its surrounding by more ___ than the fact, but the ___ suggested there was a good deal of double dealing.

K: Double dealing with whom?

JK: With both -- well, let me be very very. If you wanted a worse ___you would say that you duped everybody, you duped the Cambodians, the South Vietnamese, the North Vietnamese, and President Nixon.

K: I duped -- no let's start with the last one. How did I dupe President Nixon.

JK: Look, I can't argue this case at all and I don't know enough about it even to make -- but two colleagues of mine had called me if I had seen it

and they are writing articles about it. You certainly ought to get somebody to brief you on it.

K: I'll get it. It's quite an achievement.

JK: It's not anything to worry about. I really don't -- but I think you ought.....

K: To do such a _____is an amazing achievement.

JK: That's right.

K: OK, Joe, I'll get it.

JK: One other question has come up. It came up to me in connection with something I saw Rockefeller about. Do you -- did you notice in the transcripts something that had -- that you told the President which Rockefeller told you which Coin told him.

K: I saw that and I don't what the hell they're talking about. Did Rockefeller know.

JK: He didn't know what they were talking about and that you had a pretty good memory and would know.

K: I have no idea what they were talking about. I've seen that transcript.

JK: Well, it's -- there are two possibility that came to my mind but none of them very clear. One that -- the most likely it seems to me is that Hoover told Coin who told Rockefeller who told you that there had been bugging of the 1968 campaign by the Democrats. That strikes me as the most likely. The other possibility has to do with how the story of the bugging of -- how the story of the 1969 -70 bugging got out.

K: No. That certainly not. That could not be the case. The first, conceivably. You know, in analysing, leaving aside anything that may be said about me, in analysing these transcripts you have to understand that they are necessarily the truth. They are the impression the various actors wanted to create about various events. They weren't necessarily.....

JK: It's very clear to me in the two I mentioned that they are totally ___. That they are in fact coaching for various specific purposes and to regard these as an expression of the truth is -- well, it's even an act of irony I would say.

K: Exactly. OK.

JK: Take care have a nice weekend.

D: And I said to Haig, I said to Rush, Bill.....

K: I just wish those SOB's would tell me the truth sometime. Excuse me. Haig told me he tried to persuade you to take my job.

D: Well, look, Henry, I don't want to ~~k~~ get in the middle of this.

K: That's all right, let's not worry about that.

D: The truth is he strongly advised me against it. You know, no reason for me to play games.

K: No. On what grounds did he advise you?

REVIEW AUTHORITY: ROBERT L FUNSETH
DATE/CASE ID: 07 JUN 2004 200102979

D: Well, I think he was trying to persuade me to do something else. That was the only thing I could -- now the -- so that has what was going on. I've told Haig, I told Rush, I told Bill that the matter that had the greatest intellectual challenge to me was, as I said to you when you and I talked about. The realx problem there is this time question and I think that was the reason and also because you were away and I didn't feel I should hold up anything more, that I got in touch with both him and, well, he got in tough with me on this other matter, Haig and then also Scowcroft and I told him that he could communicate with you and under those circumstances___.

K: That under what?

D: That under these circumstances of (A) the probablity and time I ought not to take such a job for less then two or three years and I was somewhat ___to commit myself to that point in view of my ___. That he should try and find somebody else.

K: You see, John, what I need is somebody in whom I can have enoughx confidence to turn over economic affairs to and given the particularlx structure in Washington right now, I really think State is in the best position to do it if it had the personnel. I just don't believe that these other organizations are going to be able to manage a coherent foreign policy or a coherent foreign economic policy. They can pick at it. Besides my relation with Simon are so good that particularly if you were here we could get almost anything done that needs to be done.

D: Well, my xx relations with Bill are very good.

K: That's what I mean. And Simon isn't disposed to xxxx make jurisdictional dispute.

D: No, he is not. He and I work very wel l together and have for years.

K: And you would be overwhelmingly my first choice and it isn't a subject, you know, I would want to be able to say what I want to accomplish in a foreign policy sense. But how that would get translated into economic policy, except in the most general way, I would leave to the man I put into that job. I haven't made another move until I had a chance to talk to you.

D: Well, I've been very candid with you on what's happened since you've been away.

K: I wouldn't worry about what Haig says. I think once you were over here it would work out very good.

D: Oh, I'm sure. Well, Bill had a run at me yesterday afternoon before I left, _____Rush was talking to him yesterday about his problems _____and then I

came back up here at the x end of the day.

K: I don't believe that I could in good conscience tell you that 7 to 8 months.....

D: Is the job, that's the problem.

K: Would do the job here. What the Department needs is somebody to reorganize its whole ecnomic aparatas and to establishex a xxxxxx relationship with the xxx other economic agencies, that's other then just a negotiating relationship.

D: Absolutely. I know that.

K: You know, I would like to lure you here and then figure you wouldn't want to leave in 7 months. Frankly, I don't believe you could leave as deputy secretary of Treasury in 7 months.

D: That's a very candid____.

K: I think you could do it in a year and a half if Harvard were extended for a year.

D: Let me do this, I have got to take the weekend to really get my own self in order on this matter. I find myself in somewhat in a peculiar position with all that's going on.

K: Of course.

D: I would have prefered to be candid with you, to stay and work on some domestic inflation problems. ____if the Congressx had extended that legislation but they did not. That I was prepared to do for 8 months to a year. That sort of thing. With that -- that's was interested mewhen I was down there, you know,....

K: But I think you could do a major job here.

D: That's nice of you to say so and you certainly deserve all the help you can get. Let me do this, I need a little -- let me give you a ring on Monday.

K: xxx Would you do that? When you think about it, really think of it in terms of that sometimes the best jobs to move into are those in which you can build everything from xxx scratch.

D: I'm well aware of that.

K: I think what the country nedds most, given in the foreign policy xxxxx field isn't really the sort of diplomacy I do now which in a funny way is transatory, but to build into the area of xxxxxxxx economic policy xxxx where if you look

ten, fifteen years ahead...

D: I couldn't agree with you more.

K: ...we're going to have our most massive problems.

D: I left a memo with Rush about his job in which I indicated that that is somewhat of the same thing _____real problems. Just as it is in the domestic side, on the inflation side, you're not going to solve this thing except over ten or 20 years in developing institutions that are much less inflationary than the present time. Well, let me be in touch with you on Monday.

K: John, think about it and I would really consider a great privilege to be able to work with you.

D: Quite the contrary.

K: You could consider that you'd have substantial carte blanch here.

D: Nothing would please me more than to work in the job.

K: Give it some thought.

D: I will give it a good deal of powerful thought, sir.

K: Thank you, John.

D: Bye.

F: Well, I was associated with you know what. They call it the mess in Washington among other things.

K: There is one consolation when the outcome takes this form you can't blame yourself that you have left anything undone.

F: No. It was so one-sided that the courage portray was just too powerful to overcome.

K: Exactly. And it makes you wonder whethere all incumbents may not be in trouble. this year.

F: This fellow is unusually good. He has all that Billy Graham has plus a lot. He is a very clever man. He could be good and he could be one of those fellows who could be dangerous too. Becaude he is without any inhibitions that are associated with normal contact. He is a driving ambitious fellow.

K: Well, now we come to the hard part on the Middle East. I do want to talk to you as soon as you are back about where we go from here and of course on the detente policy maybe we can have those hearings you talked about before the elections.

F: I am ready anytime you are. Anything I can do, I'm ready to do it you know.

F: And I will be uninhibited in whatever I can show to help you in this whole area.

F: I appreciate that very much. You did all you could possibly do in which you did in the period. It was good but I don't think anything we could have done ..

K: When you have an outcome like this as I said the consolation is that it makes absolutely no difference. You campaigned as hard as any one could, your firends helped you, but this is one of those things beyond human endeavor.

F: I think that is true.

K: That is absolutely true and it has nothing to do with individuals either.

F: I think that is right.
I'll be back and will be glad to work with you. We welcome any suggestions you have about the hearings and whenever you are free to do it well I'll be free to do it.

K: Mr. President

P: I just called to see if you got a good night's sleep.

K: I'm catching up, but it is beginning to be noticeable.

P: Everything seems to be on course at the moment.

K: Yes we have had answers from all of the countries and the schedule is now all set for you.

P: Al is working on it with the advance men now. And so that is good.

K: Right.

P: The countries seemed to be pleased about we're ~~s~~ coming.

K: Oh, most eager.

P: I think we will even get a good reception in Jerusalem. Don't you?

K: I think you will get a very good reception in Jerusalem. They know what is good for them.

.....

K: But it will add two days to your trip. If you want to go to Algiers

P: I think it is important that we not do Algiera now having seen him here. I would say to him however what I would like to do is to get a message to Algeria/Morocco. Morocco is coming here, ... is coming here. It is best for later time to ~~xxxx~~ travel to the North African countries. I want to be fair to them. I think it is important in announcing this that our Ambassadors be informed. That the President has in mind a later time in year. How does that sound to you.

K: Good.

P: And I think we could do it. I mean after the Russian trip some time bounce through those countries.

K: What is your thought, Mr. President, about stopping in Europe?

UNITED STATES DEPARTMENT OF STATE
REVIEW AUTHORITY: ROBERT L FUNSETH
DATE/CASE ID: 07 JUN 2004 200102979

P: Well, you mean after Russia or the Middle East.

K: No, no, not after the Middle East. Either before or after Russia.

P: After Russia or before?

K: We will have NATO declaration which will be ready to sign and if you were going to ~~k~~ stop we could arrange some kind of summit meeting in which it gets signed.

P: Well, would your point be that we do that before we go Moscow or after?

K: I frankly would have a slight preference before.

P: That sorta cuts down our preparation plan. But that is OK. Could we do it in Brussels or London?

K: No, it would have to be in Brussels.

P: Yea.

K: This doesn't preclude your stopping in London on the way back.

P: Yea.

P: I am thinking of stopping in London or France. You know what I mean. But we could do with France, we should give Giscard D Estaing an early ~~skadx~~ point you know before the next one.

K: Yea.

P: But I don't know. Provided it was just a pure business meeting, I don't want to stop and have two or three days horsing around with those people.

K: No, no it would only take about day or day and a half. Either on the way to or on the way back.

P: On the way to, I just don't know. I just wonder if things we have to talk to the Russians about that we just arent going to want to answer a lot of questions. You know or discuss.

K: On the other hand afterwards you have to explained ~~xxkx~~ what you did.

P: Well they have to be briefed.

P: What is the effect on the Russians if we stop before the meeting?

K: Well, they won't be crazy about it either before or afterward.

P: I understand.

K: I don't think it makes a lot of difference whether it is before or afterward.

P: My own inclination is that if we do it at all and coming back from Russia we could come back with only a rest stop and then back. Because I think we want the Russian thing to over-ride.

K: That would be my view. That is why I am slightly in favor of doing it on the way over. On the other hand signing the declaration can be a fairly solemn ceremony. And it is a good document.

P: But not thinking, Henry, in terms of a day or day and a half or anything like that.

K: You know, you don't need a rest stop on the way back from Russia. It is only a 10 hour flight.

P: That's true.

P: Although I may want to say something when I get off the plane. I don't know. On, now it doesn't make any difference. Do you think maybe we could stop in London on the way back?

K: The trouble is you stop in one capital and not in the others.

P: But I mean not stop in the capital now, is there some base in Northern Scotland or something like that.

K: Oh yea, but you would still have to see Wilson.

P: Yea, but that is still a problem, stop there the others are angry. So Iceland is out. You can't think of any other place that we could stop. I kinda like the idea of just stopping and getting some sleep even for six hours and getting on the plane and coming home.

K: Europe is only three hours from Russia.

K: That is the problem and you still have 7 1/2 hours to go there.

P: And it is out of the way if you stop in the Azores unless you were at the South of Russai. Suppose you were down at the Black Sea, Henry, is there any place we could stop at on the way back. Could we stop at that delightful place in Morocco not in Rabat or Casablanca.

K: You mean Malicas(sp?) for example oh sure you can do that.

[redacted]

P: And then go on.
That is a long flight.

K: An hour more or maybe an hour and a half.

P: Stopping on the way over for the NATO thing is not bothering me. I think it is all right.

P: Tomorrow you will sit down and have a talk with Dobrynin.

K: Naturally.

P: And you will have in mind not only this but be sure to put front and center that it is on the European conferences as a trade off on the MBFR thing. Will you do that?

K: Absolutely.

P: Now, when do you want me to step in with you. You remember the meeting I had with them three months ago and you said well we got the thing on the road again. Well, I am ready to go at any time. I'll look ... in the eye and even see...

K: Well, Mr. President, let's just see what the issues are. It is a little premature Mr. President. First we will have to see what the Russians are willing to accept.

P: Yea. Al was even ssaying that their defense department was even raising hell about the underground nuclear test. That is so ridiculous I don't know.

K: They are sabotaging everything right now.

P: Well they are trying to, but they are not going to. You know what I mean. They have tried to before.

C: I understand.

K: On the other hand, at this point the connection between these two is such an ~~intricate connection and~~ intricate one and I think one would have a great opportunity in the two years ~~a~~ that are left in this Administration. To try to get it headed in the right way.

C: Well, let me give it some thought and I'll see you on Wednesday.

K: You know, as far as I am concerned I haven't enough ~~confidence~~ competence in economic matters to give detail supervision What I would like to know is that the main lines follow the foreign policy. Except for that the ~~economic~~ economic under secretary would have a substanially free hand.

C: Well, that is one of the issues I would want to talk about. You are productive enough to be aware of the fact that your reputation for delegation is not a strong one.

K: Well, that depends among the people who have left not the ones who have stayed.

C: I see that is a fair point.

K: You know there is people who have worked closely with me and in whom I have confidence have a lot delegated to them. There is no conceivable way in which I can run economic policy. So if I don't delegate it, it doesn't happen. Let's talk about that on Wednesday.

C: All right.

K: Do you think you could let me have an answer by the end of this week.

C: Yes. I'll try to do that.

K: Hello.

F: Good morning Mr. President.

Laughter.

K: Clayton how are you?

F: In connection with our conversation with the Jackson amendment the other ~~day~~ night. Couple further thoughts. How , Have you given very much personal attention to Russell Long?

K: No.

F: He is Chairman of the Finance Committee and that is where everything is lodged now. And he is very old friend of mine and he is and he is susceptible to personal attention. Almost everything he has done in his life is done on that kind of basis. And he is strictly a quid pro quo guy. And as you know he has tremendous power up there. And other senators look to him very strongly and then number three on that Finance Committee is Gaylord Nelson. Who Russell looks up to him more than any other Senator and I had a long talk with Gayloard just about a week ago on this subject and he is very sympathetic to your position. He can do wonders with Russell.

K: ~~Yeaxxxxxxxxxxxxxx~~ Yea. Him I have talked to and

F: He is a marvelous senators and all the other senators think highly of him. But I tell you a little private session with Russell, drink or lunch or something like that I think would be well worth the effort. There are two other guys on that committee who were co-sponsors with Jackson. But whom I have second thoughts and one is Mondale and the other is Benson of kTexas and they are both highly respected by the other senators.

K: Well, let me look into that because both of those are good ideas.

F: Vance Harkie as you know is taking the lead on ~~xxxxx~~ going back to Hyde Terrace, but he last week, while you were away, gave a little private dinner for the Russian political delegation. And I was quite surprised in view of the position ix he has taken up to now. Also, I went to the dinner and he was critical of State Dept. for not giving this group enough attention. I don't know if there is any merit to that or not. He seemed to think you should have been giving dinner instead of him.

F: Any case, I don't know if you know that fellow or not, but he too

K: What dinner was that again.

F: Last week Vance gave a dinner at the Georgetown Club for this group of 8 or 9 Russian politicians who came over.

K: Ch, oh. well I was away.

F: Yes. But I was surprised to see how friendly he was considering the fact that he has been making things difficult on the Trade Reform Act. So maybe he may be worth a little attention.

K: What do you think of Cranston?

F: Ch, highest. Absolutely.

K: Cause he has offered to help and I just wanted to

F: Absolutely. He is just fine. He doesn't carry the weight with the other senators that Gaylord does you know or Mondale. But he is very well respected man and he is a man of great character. I have highest regarad for him.

K: I like him personally.

F: He is intelligent man too.

K: I just didn't know whether he could deliver anything.

F: I don't know. He sure would be worth having, but I don't think he could deliver like Gaylord or Russell, of course Russell could do anything. He is the real power house and everything depends on what that Committee does on the Jackson amendment.

K: Yea.

F: IBut if you had Nelson. The reason Gaylord is so important here not only because he is third or fourth ranking, but Russell really does consult him on everything. I know them both well.

K: I'm having breakfast with Jackson.

F: Good luck. I think maybe in the ~~kx~~ light of last weeks publicity h he may be a little more amenable.

K: I was just going to say . I think if he is going to. This is not his best week to take me on.

F: No, no, it couldn't be better time for you.
But he is pretty cocky right now, but I think maybe. Of course Stu is pretty good at sensing movement of things up on the hill and he must have noticed that some of his sponsors are getting uneasy. And that's why he may be amenable to some kind of formula that could work out a compromise here.

K: Yea.

F: I think it is worth pursuing any way. That is all for today.

K: Clayton, you've been a good friend and I appreciate it.

F: Keep on.

K K: See you soon.

K: One other thing that I thought about on the SALT discussion we had yesterday. We have no interest in making you sign something that's embarrasing for you. I'm trying to figure out some way of expressing this in a way that the differential in numbers. If we expressed it for example in terms of each side will stop deployment as of a certain date or deploy up to "X" percent of its total force. You see what I mean? Whichever number is higher.

D: To total existence.

K: Supposing we said, each side will stop deployment of MIRV missiles as of and let's say March 1, 1975, let me just think out loud. That would stop our program at 1100. Or deploy up to "X" percent of its total force in MIRV missiles, which ever number is higher.

D: "X" percent on what date?

K: Well, through 1979. You see if we said whatever number you and we agree on, supposing it's 750, we could express that as a percentage of your total force.

D: Of total force, you mean on missiles?

K: Yes. You see in that way there wouldn't be any -- the agreement wouldn't look as if any differential were put in. If each side has the right to do the same thing.

D: I understand. _____.

K: No, you won't have any....

D: Mention to you about what we have now.

K: No, but you have the choice either to stop on March 1975 or to build up to 30 or 40 percent or whatever the number is we agree on, of your total force.

*

Which ~~xxxxxxxxx~~ ever number is higher. We would stop in March 1975. Or whenever we have 1100. You would go up to the percentage because in March '75 you won't have anything yet.

D: This is exactly the point.

M: Henry, I'll just take a second. I talked to (inaudible) a half hour on the telephone. He was certainly less than enthusiastic and he had several different points, one of them he was concerned about the Donaldson example. I said -- he wanted to talk to Donaldson -- I said, hell I can't stop him from talking to Donaldson but I can tell you more about Donaldson then Donaldson himself can. (A) he xxxx is a person with considerable potential, (B), he came down here without absolutely no experience in Government, no knowledge of how to deal with governmental problems and people (inaudible) departments. (C) he had no experience in or understanding of international economics and yet by a force of circumstances through nobody's fault, he was thrown immediately into a problem that requires some xxxxxxx knowledge of international economics and particularly a knowledge of handle himself within a government and among government.

K: Exactly. His (inaudible) complaint was not that I didn't(delegate) him but (inaudible) responsiblity that he couldn't see me (inaudible).

M: In any case that problem I think I perhaps was able to able to clear out of his mind -- he'll still come down to talk to Donaldson, but I think I drew a clear difference Donaldson, on one hand and Cooper on the other. I said, you've got exactly the strength that in Donaldson were xxxxxxxxxx weaknesses, so put that out of your mind. Secondly, he xx said, x well, he didn't think he would operate from a subcabinet level with cabinet offers. I said, you mean to say you xxxx don't think you have the competence that exceeds that of Simon, Flanigan, two or three others (inaudible) that are involved in this thing and that you couldn't hold you own in an intellectual xx debate with them. Well, he said, they would have the power and I wouldn't have any. I said, in the first place, you're speaking with experience and a record that everybody in the government understands (inaud) Secondly, you're speaking with Henry Kissinger's backing (inaudible) he's the most powerful xxxxx person in the government. So it's perfectly absurd to say that you wouldn't have any influence. It was this thing running through the whole discussion that obviously was his basic concern, Henry. He feels he'll come down here and accomplish nothing. Either because you won't listen or his position will be weak or that he won't be able .....

K: His position will be very strong, in fact, if I back him he can't xxxxx lose.

M: This is exactly my point, Henry and he xx said well, he said the coarse relation now between national and international economic xxxxx affairs that you can't put them in compartments. xx I said I understand that and I'm xx certain that when domestic policy that has implications implications xxxxx are discussed you would be a participant in those disuussions. D: Hello?

K: Anatol.

D: Hello, Henry. I just wanted -- itsk not very urgent, but maybe you will get an answer tomorrow. This is about the schedule for the President's trip to Moscow. You remember we discussed?

K: Yes.

This is the schedule that that ____after negotiations inMoscow on the 27th and 28th. It will be Thursday and Friday. The President will spend Saturday and Sunday, it will be 29th and 30th in the Crimea. After that on July 1, it will be Monday, on his ~~xxx~~ way back from Crimea to Moscow, he could stay for a few hours in Volgagrad. There is only one small problem, in this case the President's plane, which would accompany him as usual would fly directly from Crimea to Moscow. The airport in Volgagrad is not fit for the planes of Boeing 707 type. If for the above mentioned reason, this suggestion would prove for the President's ___unacceptable because of this Boeing 707, then it would be possible on the way back __from Crimea to Moscow to stop for a few hours in Minsk, it is a very good and interesting city. He wasn't there.

K: Yes, that's an ~~xxxx~~interesting idea.

D: ~~Wxx~~So, we propose this way, or we could do it this way: he will fly to Minsk not from Crimea to Moscow but at the end of the day of July 2, after the completion of negotiations in Moscow and with the final departure from Minsk on July 3, there are two ~~possibility~~ possibilities. If he chooses Minsk, then we could do it, either he will go when he will go on July 1 from.....

K: I think he will probably prefer to conclude the trip in Moscow.

D: And to go directly from Moscow to home, yes?

K: Right.

D: In this case it will be these two choices, either he will go to Volgagrad but in this case Boeing 707 will stop ~~because~~ because he will use our smaller ~~xxxxxx~~ planes there.

K: How are you, Senator?

S: I should ask how are you.

K: I hope you realize that as a result of my putting in a call to you I've already had a half hour discussion on the Law of the Sea. This man in our department who handles the Law of the Sea is also called Stevenson. Since my secretary cannot imagine that I wouldn't prefer a State Department person to you.

S: I can't imagine that either.

K: When he started on the Law of the Sea I couldn't imagine what had possessed you.

S: Well, I won't start on the Law of the Sea, Mr. Secretary, is there something else I should start on.

K: I think we both know the subject. I wanted to talk to you about that bill on the credits.

S: Well, I can give you a thumb nail xxxx sketch if you like of where we stand.

K: Yes.

S: I'm sure I don't have to tell you that it is very difficult business at the moment of trying to put together a position that will command the majority in the Senate. We are embattled on both sides, just now, organized labor is up in arms and there's a great deal of x opposition xxxxxx growing x on the right. So what I have tried to do starting with negotiations with Scoop Jackson is to come to terms on a proposal that will probably make nobody xxxx completely satisfied but might head off far greater xxxxx problems, dangers on the floor. I haven't gotten much beyond Jackson at the moment but he is where it stands. We would continue the authority for the Exim Bank. Four years is requested, we'd make it three with one year for continued credits in the Soviet Union and the Eastern European countries except Yugoslavia and Romania. This takes the precedent we have in the legislation. Then impose a subceiling on -- within an overall authorization that would come out pretty close to 30 billion dollars. A subceiling for additional credits in the Soviet Union and that is somewhat tentatively is $300 million, which is slightly in excess of the rate at which they've been granted during this first year.

UNITED STATES DEPARTMENT OF STATE
REVIEW AUTHORITY: ROBERT L. FUNSETH
DATE/CASE ID: 10 FEB 2003 200102979

K: You mean $300 million a year?

S: $300 million before you have to come back to Congress for further authorization. There would be two parts. One year authorization, or credits in the Soviet Union and separately a $300 million additional subceiling; that's $300 million in addition to what is already or would be outstanding as of the effective days. [redacted] You would have I think outstanding $270 -$280 million. So you'd be up pretty close to $300 million. Then because of the...

K: And on top of that there's a $300 million?

S: That's the overall for the bank, worldwide. Overall for the Bank is $30 billion but within the overall authorization would be a subauthorization for credits in the Soviet Union and all Communist countries except Yugoslavia and Romania. And that is a subceiling which would be the outstanding credits of somewhere in the neighborhood of $270 million plus $300 million.

K: So at no time could there be more than $600 million outstanding.

S: Thereabouts--until you get further authorization from the Congress. Now there's one other, well there are a couple of others, but there's one other point which I think would be of particular interest to you. The concern here is not just with the credits in the Soviet Union; it's very largely with the whole through the notion of 3% or 7% loans anywhere in the world at a time when prime rate is up 7 1/2 % at home and with no so much the routine commercial transactions as the so-called projects, the developments loans and the danger that they will involve us politically and in unforeseen consequences will have adverse impacts on US labor or the tentative position of US businesses. Some of them are just ad hoc situations that are rankling here. $150 million financing of say cotton for example to Japan. So to respond to that concern not so much about the routine commercial transactions, but about the big ones and the big ones that lead to the development of production facilities abroad, competition for our manufacturers, adverse impact on labor and so on. We would also require that any guarantee in excess of $50 million, any single transaction in excess of $50 million be accompanied by this in anywhere in the world, you don't single out the Soviet Union, the only time the Soviet Union gets singled out is next to that subauthorization, that subceiling which I mentioned. Anywhere in the world there's a credit proposed to be authored by the bank of more than $50 million, it would have to be accompanied by a Presidential finding that it's in the national interest with some specific attention to the competitive consequences, the labor impact, short supply situations, maybe a couple of other areas now. That in the past at least wouldn't pick up more than 11 or 12 deals a year. Those 11 or 12 deals or whatever they are in the future would after the Presidential finding be subject to a Congressional veto if one-third of the members of either house signed a petition, brought the issue to a vote and the credit was disapproved.

K: Within what time period?

S: I think it's 30 days after the Presidential finding; I'm afraid I'm a little vague on that. I think we were figuring a total of 60 days; 30 days for the Presidential finding and then 30 days after the Presidential finding after which the Congress would have to act. Now that sums up in a rather general way I think where we stand at the moment with Jackson; it may be 60 days for the Congress; I'm afraid I just can't remember.

K: Would your position change any if we were making some progress with Jackson on his own amendment?

S: We, I don't know which amendment of his you..

K: The Jackson Vanicky.

S: Yeah. I don't think Jackson'Vanick amendment has anything to do with this.

K: I agree with you.

S: And, I don't know where you stand with him. He's been quite willing from the beginning to leave it out of the exim bank legislation and I think I know his reasons. But this proposal to..I started work at this originally in the hopes that it could be a way of side-tracking Jackson-Vanick but in the interim the concern has been growing greatly in the Congress with not only those of the Soviet Union..well just with loans. Partly because of the very largely because of the 6 - 7% interest rates as opposed to the high rates abroad, but also with ad hoc situations--it's cotton in Japan or it's drilling equipment for Iran or the sale of Boeings to Japan--oh, one of a kind of commodities they have to buy anyway and a growing feeling that we better start exercising a little oversight here and not just give this bank/$30 billion dollar blank check. For a veriety of reasons, some of which are political but most of which have plenty to do with Jackson-Vanik.

K: That ceiling of $300 million in addition to what's already outstanding applies only to the Soviet Union?

S: Yes.

K: You didn't lump Poland in with it?

S: That I'm quite sure, I wish I could, I'm 99% sure and I'd have to doublecheck just to give you a 100% answer. That applies just to the Soviet Union. I'm trying to think what it is that should bring in the Eastern Europeans. Yes.

I'll tell you what it was. Here's where I've got my notes now in front of me. The one-year authorization. I said there was a one-year authorizationa nd a subceiling. The subceiling of what's outstanding plus $300 million would apply just to the Soviet Union. The one-year authorozation as opposed to the three-year authorization for all other countries, would apply to the Soviet Union to all Communist countries, except Romania and Yugoslavia.

K: So you'd have to authorize it again next year.

S: Yes.

K: Then what's the sense of putting a ceiling on it? Oh to keep us from going crazy this year.

S: Well, it wasn't .. there are those concerns but there was also the feeling, At least I've had the feeling, that maybe this would be helpful to you. I saw some testimony of yours, I think it was in the Senate Finance Committee, and in response to a question by Senator Nelson which seemed to indicate how you felt, you didn't commit yourself, but you indicated that it might not be unhelpful to you if you were in the position of having to say that either because of the one year or because of the $300, I think he was talking about one year, I don't think he mentioned the subceiling, if you were in a position to say that you had to satisfy the Congress.

K: Now tell me, is this $300 million credits that can be extended or the amount of money that can actually be made available?

S: I'm not sure, frankly, we've addressed ourselves to that distinction. If you wanted to..

K: You'd be (inaudible) in terms of what would be drawn.

S: Yes. Well, I think we might too.

K: Because in that case we could probably give slightly more credit because not all of them would be made available in that year.

S: But you'd be in a difficult position; you'd have to assume that you could get the authorization for the subsequent increasement. I don't know how the bank would like that. I think we could go either way on that and none of this is set in concrete.

K: Let me talk to Bill Casey about that, may I?

S: By all means. Do you have any initial reactions to the package, without committing yourself. I'm getting under the gun, here.

K: Well, Casey, of course, doesn't want that $50 million for the whole world; he just wants it -- if it has to be applied, applied to the Communistxx countries. I can see your reasoning in not wanting to be that discriminatory.

S: Well the considerations are the same and also I didn't want to single out the Soviet Union any more than necessary.

K: Well it's not as badxk as I was afraid it would be.

S: Well I'm afraid it could be worse, it could get worse than this unless we put together a package and really get some support.

K: Let me think about it; it doesn't look unmanageable.

S: Well, that's encouraging.

K: Can I call you over the weekend?

S: By all means, no--Sunday I will be in Illinois. I'll be back late.

S: Alright.

K: In neither case is there a question of overnight. It would be on the way back from the Crimea.

S: OK.

K: In the case of Volgagrad which is the former Stalingrad, there is no airfield big enough to handle the 707 but we're not flying the 707 anyway, we'll be on the Soviet plane. But they like the 707 to trail along.

S: Yes, they do, for communications and other people and so on.

K: OK, well, Minsk has an airfield big enough. We could compromise on ___ maybe.

K: _____they have everything.

S: When do they want the advance party?

K: I understand they're going there on the 19th.

S: Well, that's what I understood.

K: I think it doesn't give a hell of a lot of time for planning.

S: No, it doesn't. As a matter of fact what they were going to do is sort of send the advance party reconstitute it when they finish in the Middle East right on the the Soviet Union.

P: Well, the others are Prime Ministers so what the heck. It is perfectly all right.

K: That's right.

P: The Italians would come in a minute.

K: Of course, and this is not, Mr. President, I would not take this as a hostile move from Giscard.

D:.....
Go back and we will sit down with you together.

K: Right. Now Anatolyy, I have the transcript of my conversation here with Gromyko. Actually from Geneva.

D: You mentioned to him 40, 45,000.

K: Let me just read you what I have. I said the General Secretary said to me and to Kennedy that everybody without a security clearance can go. Gromyko said we told you. Then I siad if it were possible for me to say this, and Gromyko says you can say this. Then if I could get an estimate of what this means in numbers, Gromyko says, what we would you say. I said last year it was 35,000. Gromyko says right. Then I said, if I could say 40 to 45,000, Gromyko said for what period? I said for a year, Gromyko said what year, I said for the whole year as a yardstick. Gromyko said approximately as a trend that is all right. Then I said, what I will say is my estimate is based on all my conversations this means 40 to 45,000. Gromyko says yes you will be

justified. Yes the General Secretary even made a joke the other day that perhaps we should start a campaign for the Jews to go, and that is what he said.

D: What I have hear
I will translate how it was written by him. Dr. Kissinger raised three points. The first point, he said that you said you would like to say that the Soviet ~~xxxxx~~ authority do not have in mind or in view to prevent or to limit immigration from the Soviet Union deliberately and that taking into consideration the statistics or figures which already have about immigration for the last three years, it would be assumed that the level of immigration for 1974 will be some where in the limits or 40-45,000. This is what you said.
I answered to Mr. Kissinger that we do not have a objection against his qualifications which he intends to make, but made clear that this does not mean of course to take on ourselves strick ~~xxx~~ obligations to fulfill exactly those figures, because the number of people who would like to immigrate from the Soviet Union would be less, and Dr. Kissinger should take it into ...himself.

K: Well, what are we going to do now?

D: I was just telling you to ask Gromyko. Maybe he has k some additions.

K: Well, can I have Sonnenfeldt get in touch with you to work out that letter?

D: Of course.

K: Because I really think we can achieve a solution and it would also solve the credit problem.

D: Understand. Well I am just waiting now to reply to him, because this telegam you mentioned to me. If I do not receive it today, when I receive it , I will give Sonnenfeldt text. Okay?

K: Right.

D: Maybe I will receive it today. I don't know yet.

K: If you hear, let me know.

D: Yes, I will let you know about it. But this is exactly what I read from his .

*

K: Well, and I have read you what.

D: In your case you just have a minute.
In my case I only have official summaries—
His summaries .....
.....But this is what I have here on my own
.....
Well let's do it as you propose.
I sent telegram to Gromyko ~~xxx~~ asking him on this one.

K: Well, the sooner the better so we can work something out with Jackson.

D: I understand.

K: Because that other Bill goes ~~xxx~~ through before the end of the month.

D: I understand.

K: Good.

D: Okay.

K: Bye.

D: What about communique....

K: Exactly.

D: And now what about IBM business.

K: Hasn't that been sent to you? It will be sent to you this weekend You can count on it.

D: One question. I just received a telegram. This is a message from Mr. Brezhnev to the President. About the need to speed up the work of the European conference. It is saying that maybe in order put this up ---send to Geneva on a last part of the second stage is going on now. To present a little more higher rank than it is . They will have authority to take decisions ...on this part.

K: Whom are you thinking of?

*

there is a possibility of me saying

D: He didn't specify, but in the end he mentioned Dr Kissinger, Brezhnev's letter to Mr. Schmidt and to Mr. Wilson .

K: Okay.

D: It didn't define exactly but the idea is so please look what can be done ....later on.

K: I'll communicate with you about it or I'll get Sonnenfeldt to todo it.

D: Okay, transmit usual way. and then send to you, okay.

K: Excellent.
Thank you Anatolyv

K: How are you Jack?

J: OK. I called you to tell you Marion and I hope you will excuse us about Saturday night. She understands Nancy isn't coming and we had something to do which related to some of our children.

K: Sure, of course.

J: Is that alright? Nancy is not coming I gather.

K: Well, she's still laid up.

J: I see. Well, I'm really sorry and, you know, we would have set everything else aside if she were coming, but without that we just felt that we shouldn't preempt the kids.

K: I don't know whether that's a compliment to me.

J: I don't know. It's human and you're such a friend that I'm talking to you as a member of the family and not...

K: Of course, I understand.

J: The other thing I wanted to ask you was this, I understand you'll be in tomorrow, I'll be there, I gather you don't want any questions on the other matter until we have looked into it and you've gotten back.

K: It's up to you.

J: That's what Clifford suggested and it's entirely satisfactory with me.

K: Who's Clifford?

J: Clifford Case.

K: Oh. I will go along with whatever the Committee wants.

J: Well, what do you think about it yourself.

K: I think it's probably just as well.

J: The other thing is that Parker was here to consult me about his testimony in the morning and I suggested to him that he leave questions of the atomic

power deal with Egypt and Israel to you, rather than trying to deal with them himself.

K: That's a good idea.

J: And I will be there to ___him harmless, in other words, I'll strongly back him in the fact that all he could tell us is hearsay and what he read in those papers, but you could tell us what animated you and what safeguards you have in mind and so on.

K: Right. I think that's fair enough.

J: That's better. OK. Henry, you tired, do you feel better?

K: Well, Jack, I didn't feel so badly. You know, that's one of the myths that is now being spread. I felt I couldn't let myself be bled to death one leak at a time while I was traveling through the Middle East.

J: Listen, the power of honest indignation is unbelievable and that's what you expressed.

K: After all I knew the documents, I had shown them to Sparkman and Case.

J: Of course.

K: And I knew that if they leaked one at a time there would be an editorial a day, maybe it was a mistake to hold the press conference.

J: No, you expressed an honest indignation of an honest man who was doing an enormous job and in danger of being messed up by ____.

K: You know, what really worries me, Jack, which I can say is this; with the President facing impeachment, what's been holding things together is my moral authority abroad and to some extent at home. If that's lost we may be really in trouble.

J: Absolutely right. Listen, it makes a lot of sense. I think we'll understand that and the virtue of having it in our committee is exactly that, that we do understand the whole picture.

K: Well, the committee has been fine and you've always been a good friend.

J: Well, that's the way we'll keep it. Now you go and how long will you be away?

K: About 10 days.

J: Now (Gil?) called me from the Times and said he's writing a story about these breakfast meetings you've had with Jackson, Ribicoff and myself, and he said he will not quote me because I've told him nothing. But he said he would like to talk to me after I read his story. I said, well, I 'll see when I read your story, but I didn't wanted you to....

K: Well, he has the figure of 45,000:

J: That's xxxx correct.

K: He tried to check it here and I refused to discuss it with him.

J: Same with me. I don't know xxxx where he got it but I guess he got a pretty good idea. I haven't offered anything, as you know, I've been very careful with this one because I feel very very sensitive. You and I ought to talk sometime too about the attitude to be taken on the Jackson/Stevenson amendment on the Exim Bank. Have you had that looked at?

K: Yes.

J: What does that look like to you?

K: Well, I think it's too restrictive.

J: Even the way the committee turned it out?

K: I understand there is another variation of it now.

J: Yes, the Committee turned out a variation which took the ceiling off 300 million.

K: Xxxx Yes.

J: I acquired a concurrent resolution of both Houses to negate anything. I gave the possibility of a two year instead of x a one year deal.

K: That looked better to me.

J: Very good. Jackson talked to me about it today and obviously will try to forge some kind of a common front to the original version. So I think obviously you can't meet with the three of us before you go, hopefully this Exim Bank thing will not come up until after the recess, but I think you ought to meet with us as soon as you can thereafter.

K: I will meet with you immediately xxx when I come back.

J: The last point I wanted to make is I'm going to Europe on the night of the 27th

hoping to see these four new governments. I'll be in Israel on the 4th of July and Hartman's coming over in the morning to brief me on the Europe business. So if there's anything that you think you'd like me to do I'm going to Britain, Germany, France and Israel and I'll be gone for 10 days.

P: We had a rather interesting editorial board meeting -- between people saying that we should be alot kinder -- people who say we're kind enough. An argument about the press conference about that MIT kid. God he was an awful questioner. I was wondering whether at some point you might not be willing to have lunch with us.

K: Of course. Who is us?

P: The editorial board of the magazine. Stanley Cornell, Walter Pinkus, John Osborne.

K: You know, I think Osborne is the best writer in Washington on Washington affairs.

P: I think so too. So if you know someone in your office.

K: It will have to be after I come back from the Soviet Union.

K: Well, you know things are good but precarious and it is a tremendous -- you know, it takes a tremendous balancing act. And just for your information, my concern in Saltzberg was how to hold this thing together if my moral authority gets undermined here.

P: Yes.

K: That is the problem I face.

P: I was very sympathetic with what you did and what you're going through. I mean there is a sort of debauch of morality in the country. Really, the most unseemly sources.

K: Well, no one has yet explained the following. I had all the documents that are now leaking and I submitted them to the Senate Foreign Relations committee. Why in the hell would I lie with documents -- you know, I knew what these documents said. I also know how J. Edgar Hoover keeps books. But that is --- let's not talk about that. And I don't think we should discuss that when we meet with the editorial board.

P: No, what we really want to do is talk about foreign policy.

K: That is what I would like to do. I think it is an excellent group. We'll do it the week of the 8th. I'll be back the night of the 8th. Let's aim for that Thursday.

P: Good. And I will talk to Mr. Bremer - I'll talk to him this afternoon -- I'll call him. It would be nice if you ever have a free minutes just chat idly.

K: Absolutely. And he asked a very helpful question. He said is everything already negotiated so that he's just going there to sign? Or is there a lot left to negotiate. I said, I wish there were a little less left to negotiate, because in most of the areas there are very big problems remainin I went through it with him. And then Fulbright stepped out and said he fully supports you.

N: Good. And you were able before and after to get the nuclear power plant thing.

K: That's right. I don't know whether they showed it on television but I.....

N: But Bo Ron -- I think they must have because he said you got out in time to be on if they were going to use it. I'm competent they must have used it.

K: Good.

N: Anyway, that's one out of the way.

K: I think we're going to have a very successful trip.

N: Which are not insignificant, let's face it.

K: Well exactly, Mr. President, if we got a breakthrough on SALT which will get negotiated later on, that's not bad.

N: That's right. But I mean having the threshhold of the ABM thing, is an accomplishment of itself.

K: Of course. I don't find much nitpicking about the trip anymore.

N: Scott said the committee was pretty well set, they didn't badger you with other streneous matters.

K: No, I don't think this was the time to do it.

N: Good. The Committee was, in other words, pretty supportive all the way around, then.

K: The Committee was very good. It was a very good session.

N: That's good.

K: And it was all on the summit, a little bit on NATO and Fulbright, when he came out, made a very strong statement, the press tells me that others as they were coming out made good statements.

N: Well, we have to understand this little flap on the nuclear thing -- they have to find something to pick on so they -- and people just -- it's such a the trouble is such a darn mistery, you know, we have to remember Eisenhower talked about atoms for peace; way back there we were going to share it with the world and gave the same speech, and Kennedy was for it. That's what this is all about. How do you do it otherwise? Isn't that what it's about.

K: Exactly. It's the only way you can control relations in this period.

N: How about our Israeli friends. Are they still bombing?

K: No, they stopped it. We made a sharp protest and they sent us a message this afternoon -- this evening. In fact, Dinitz was just in here to tell me they had stopped it.

N: That's good. It should, in their own interest. We're not asking them to do something harmful for them. We're asking because if they go too far, we'll get one hell of a reaction here. People now are on the mountain top; they want a peaceful settlement in the east.

K: No question about it. I think they're coming on very strong.

T: And I think among other things there's one area that came up yesterday that I wasn't sure you had any report on and Symington is ~~quite~~ quite likely to ask you some questions about it. I thought I ought to background you just for a moment.

K: Good.

T: With us yesterday for the Armed Services Committee was Paul Nitze and I was the only republican present when he made most of his testimony. Thurmond came in later, but I don't think Thurmond ever got the gist. What he is saying in effect is that after SALT I there was an interpretation of protocol ~~xxxxx~~ entere into that was not communicated with regard to the G Class submarines and the 66 missiles on those SLBMs that they're not be in 950 limitation of SALT I. He says this was held back and not communicated and that the Russians first made it known sometime late in 1973.

K: Total nonsense.

T: Well, this is what he's saying. And I questioned him quite hard on it as to who told him, he wouldn't specify that it was you, he wouldn't specify who it was. He said it was a communication which he does not have a copy coming from the State Department confirming it after the Russians had made it known and. . . .

K: But the point was they were ___dismantel in order to reach 950 to ___ 209 submarines.

T: Right.

K: At the end of 9 missiles. We want to _____to ICBMs rather than G class submarine missiles which I have ~~xxxx~~ ranged at only 200 miles and which are becoming total ___anyway and none of which are on station right now and therefore we had agreed already in Moscow that they could not use B class submarine for replacement. We considered that a victory for us, not a set back.

The other thing he mentioned is the...

K: What is article 12?

T: Article 12 is the instruction to the delegation not to -- with regard to the withdraw position in so far as our forces in Europe are concerned and that they the delegation according to him have been instructed not to negotiate in this area. K: Henry, how are you?

HAK: Ted, how are you?

K: Congratulations on your trip to the Middle East.

HAK: Thank you. I appreciated your letter.

K: Very, very fine. An outstanding accomplishment. You deserve all the gratitude of many millions of Americans.

HAK; You've been a very good friend.

K: I understand the meeting went well this afternoon. I came up here -- I'm up in Rhode Island now, the Foreign Relations Committee.

HAK: That was about the report on the Summit. We didn't talk about the other matter.

K: I wanted to just see on this CTB. I'm sure you probably talked about it at some length at the.....

HAK: We talked about the threshhold test ban and Humphrey and Muskie raised the CTB and I didn't oppose it very strongly.

K: Well, this would be the -- our count on it probably is that 48 that have indicated support and probably 8 or 9 that might lean our way. I think an awful lot about whether bringing this up....

HAK: Well, my view -- Oh, I was asked about that. My recommendation is to bring it up after the summit because if you bring it up before the summit and then the TDB doesn't go, people will say it was because the Soviet back was stiffened, hoping for something more sweeping. I don't think you forego any option by pressing it afterwards.

K: Well the point of course there before would be some indication, I would think, of support for whatever you were, you know, the negotiations that were taking place.

HAK: You mean that even if we don't get a CTB it would be an indication of support for some sort of test ban.

K: That's right.

UNITED STATES DEPARTMENT OF STATE
REVIEW AUTHORITY: ROBERT L FUNSETH
DATE/CASE ID: 24 JUN 2004 200102979

HAK: Well, from that point of view and I'll tell you we will have some Jackson ~~problem~~ problem on this one again. Can you phrase your resolution in such a way in which your preference is made clear? But you'd go along with something else as long as it moves it that direction?

K: I think if they had -- I mean, if there was some language that they had that I think even that was worked out before, I think, that could help us....

HAK: I'm not opposed to the resolution as long as it isn't used to ~~knock~~ knock off what's attainable.

K: Yes. I suppose the Defense Department will be opposed to it.

HAK; To the CTB?

K: Yes.

HAK: Totally. They're violently opposed to the threshhold test ban. Not violently, but substantially opposed to the threshhold. They'll be violently opposed to the complete test ban. That I can assure you.

K: The thinking in terms of the threshhold of moving towards a comprehensive and the treaty after that or is this just....

HAK: Well, I think it could certainly be -- we would not object to writing into a threshhold test ban if this is a step towards a complete test ban. And we're going to put into the communique, this is just for your information, the desirability of the complete test ban.

K: Well, but if you were asked about it, Henry, I mean, the only thing we don't want to get into a situation where.....

HAK: I was asked about it by Humphrey. Let me tell you -- Humphrey at the committee. I said that I would prefer it after the summit but then I didn't look at it from the point of view that you just raised. I would think that if you -- if this thing could be phrased in such a way that you maintain your position on the comprehensive but that you'd go along with something as an intermediate step or interim step then I wouldn't oppose it.

K: I'll talk to Hubert and Ed at the -- I'll try to get them over the weekend or the first of the week.

HAK: Good. I'll be here thru Monday evening.

K: Fine. OK. Thanks very much.

HAK; How's yourson ?

K: Oh, he's over in Ireland. I don't know whether that's the most dangerous. Somebody was telling me it would be better to be in the West Bank then be in Ireland these days. But I'm going over for the 4th of July break and we're camping out and that sort of thing for five days.

HAK: I still hope to meet ~~tox~~ him. Will you let me know when he gets back -- when you both are back in town?

K: Yes. He'll be over there now for about 2 1/2 or 3 weeks and then up to the Cape, but maybe in the Fall.

HAK: Let's do it in the Fall.

K: Good. OK, Henry. Thanks very very much.

HAK: Thanks for calling. Bye.

K: Another thing I find ~~unbelievably~~ unbelievable is that they gave the ~~OSD~~ OSTP memo on the test ban to Jackson.

S: I find that unbelievable too. I just had a long go around with Wickham and I said my goodness, you know, I said those are internal working documents before we have a government position. I find that ~~incomprehensible~~ incomprehensible.

K: What's his answer to that?

S: Well, his answer was, well, he said, it's the same as Schlesinger said in the NSC meeting. I said, sure, what that is that it's militarily disadvantageous but the President may want to overrule it on political grounds. That's just great. He said, well, that was the same as he testified and I said, again he shouldn't have testified to ~~tha~~ that before we have reached a position, you shouldn't do that and he said, well, they asked questions, what are we supposed to do. They're a duly constituted authority. You know, they're just unbelievable.

K: That's what worries me.

S: I think he's shaken up. I don't know what his frame of mind is, but I think it's not good.

K: He's shaken up by what?

S: Well, by, you know, his meeting with the President and meeting yesterday, I think he understands that the President was not happy with him yesterday.

K: Yes. It was one of the most outrageous performances I've ever seen.

S: It really was. As a matter of fact, when the President called about Julie and David, incidentally, they are not going.

K: Good. Thank God.

S: Oh, I agree. He said something about, what did you think of your Defense colleague yesterday and I told him I thought it was disgraceful. And then he went on a bit about the idiocy of the comments about his friends capability and what did they think of these negotiations were and so on and so forth. He was upset. I've let Wickham know and this morning that it was not a very good performance in my opinion. I just think he's uneasy. I mean, in a period of instability and I just don't know what he'd do. J: Well, I think you have a right to insist on that. I think that if the matter is handled, you know, the one year basis which we discussed, I don't see really why he should complain about that.

K: Right.

J: I gathered from you yesterday that you're at some point, you have to cut loose from him.

K: I'm beginning to have serious doubts about Jackson. You know, what he's now put out about the SALT agreement is so mischievous and so wrong that I'm beginning to think he's just out for a confrontation.

J: And he just has to be taken on.

K: Yes.

J: Well, you're not going to make that decision until you get back.

K: Certainly not. And not without full consultation with you.

Gelb called me

J: Well, you're very kind. This bothered me very deeply, they called me / and said I just want to read you my story, he said, I know you won't say anything about it, so he told me what he was going to say and I said OK, and he said obviously you don't want to be quoted. I said, obviously I don't and that was the end of that. He didn't call me yesterday, Marilyn Berger called me but I told her nothing. Did she write anything this morning?

K: I haven't seen it.

J: Well, it's very unfortunate, I suppose it was too much to hope that it should be handled in the way that we hoped it would, but alright, I think the only thing to do is leave it this way.

K: Look Jack, I will do nothing in this area to change my course without you.

thing

J: OK. Now the other / wanted to ask you is about Europe. I had a talk with Hartman yesterday and I'm hoping to see Wilson, Smith, ___and governmen Of course now with this declaration it puts it on a much stronger frame, but I gather it's still a pretty ___operation. Is there anything specific or particular I should have in mind.

K: Jack can I call you, I was on the way to the hospital when you called me.

J: When can I call you?

K: Tomorrow afternoon. END

G: Hi, Henry, how are YOU?

K: I'm running to the hospital, so I won't have much time to talk.

G: How is your wife ~~a~~ feeling?

K: Well, she's getting better but it will take another week or two.

G: The whole Kissinger family has been aggravated for weeks. You shouldn't be so aggravated. I've had a hell of a time getting to a number of your people to check stories I've been doing over the last few weeks. I think that's a ___ circumstance.

K: It's against my wishes. I'll tell Larry to be available to you. Les, I have very high regard for you. I want you to get -- and you ~~have~~ haven't been unfair. I have no complaints about you and you should have possibilities of access.

G: Because it's no secret to you that there are ~~pe~~ people in this town who have stories to tell contrary to your notions of reality and at every one of those occasions I've tried to call three or four people who I think...

K: Like who?

G: Larry is one of them. At any rate, I've called Sonnenfeldt for example on every story that concerns things that you are working on, he's never once returned ~~my~~ my calls.

K: That will not happen again.

G: You know some of these stories are perhaps not ~~even~~ even worth writing if I can details to show it's not so, but I can't operate as a fair journalist otherwise.

K: Les, you don't have to convince me. I'm with you and I will take steps today to stop it.

G: Fine. I appreciate that. Specifically I'm concerned about today is the excerpts from the Kalb book on the Middle East.

K: I haven't read that.

G: The magazine is ~~now~~ running a Middle East chapter tomorrow and they paint -- they over simplify a week long conflict between you and Schlesinger

on Israeli resupply.

K: I think this -- look what I don't want to get into is debates on -- you know, you can't run a government if people are afraid to disagree with each other for fear that afterwards a story will be leaked. There were occasional differences in emphasis. There was not a basic clash between Schlesinger and me.

G; But that is how Marvin and Bernie paint this.

K: Well, I haven't read the chapter so I can't comment on it. But what I'm telling you is you had a story that I stopped the resupply. That was wrong. If there's another story that Schlesinger stopped the resupply, that's also wrong. He also has the President at a White House meeting on Saturday.

K: The President never attended a White House meeting.

G: That's what I thought. And he also has your telling Dinitz that the Pentagon has been the problem all week long.

K: Well, you know, I'm telling you what the facts are. I can't comment on every statement for obvious reasons. There were occasionally differences in ___in tempo and so forth, but not in basic policy.

G: Well, I think that's sufficient and I will put that.....

K: That is the major thing to get across, that there were differences in ___ sometimes in tempo not in basic policy.

G: Can I quote you on that?

K: Yes.

G: Because I have another quote here in fact from the Pentagon saying that this really was national policy for the better party of the week.

K: That's fine.

G: OK. I would hate to see you and Jim Schlesinger get into a disagreement.

K: No. I don't want it and it isn't fair.

G: Very good. Much appreciated.

K: Les, as long as you're on the phone, I don't know whether you're going to write anything on or whether the Times is going to write something on the G class issue. These additional missiles.

G: Right, I will be following up on that.

K: All I want to tell you is I will be putting out a formal statement. The story is totally absolutely without any foundation. The numbers in the interim agreement were never changed, directly, indirectly, secretly or openly and I will discuss it at the press conference in detail. But I don't think, you know, you can write what you want but it really -- you'd be going way off base and it's a really mischievous story.

G: Well, here again I called both Larry and Hal yesterday to try and check this before I even started writing.

K: Well, we will take care of this, it will not happen again. You're not mischievous because you have to write what you're given and you can't in the absence of overwhelming information but it truly is a mischievous enterprise and there's not even sometimes you take the wire tap thing and there is a basis in fact in interpretations___. Here there is no basis in fact at all.

G: Several people who ought to have known what the facts were told me this.

K: I think you will see after my press conference on Monday. That there is no basis in fact, whatever and that if it is said that they can modernize 70 missiles on G class submarines, then it is a deliberate lie.

G: That's a hell of a deliberate lie. It is mischievous in the worse sense.

K: There are enough disagreements in serious government and what really what people and maybe the press now that it has been projected into such a prominant role ought to consider if whether one can really afford to tear down public confidence in everything. This country's going to go on after 1976 and if the image is created that everything is done secretly, morally unacceptably where are we going to be?

G: It's hard in this situation in Washington today not to believe that every government officials isn't trying to pull your ear. It's very difficult.

K: That may be true, but the fact is that almost the only thing left doing or worth left doing is to maintain some ___of public morality.

G: But you know you have a better chance to deal with this then anybody in this administration.

K: And I will on that issue.

G: Larry and I had a conversation months ago in which I suggested to him that these things might be coming.

K: I'm not talking about wire tapping.

G: I'm talking about in general., including the wire tapping. My thought was that you ought to meet with someone like Sy Hersh, even though you have very strong feelings on it.

K: Sie Hersch is out to get me.

G: All, I'm saying, if you have a conversation with him, will you explain you notion of reality. Sie Hersch will print that and he will take that into account. He will be bound by it.

K: I will publish what I want. I will defend substance if in order to keep public office, I have to turn myself into a constance defense of my integrity, I won't keep public office.

G: I hate to hear you say that.

K: Well, it's what I expressed in Salzburg and that happens to be my view. I can be entitled to defend the substance of policy, but you cannot turn foreign policy into a criminal trial.

G: These kind of personal attacks and questions about secret agreements really are.....

K: No, that's different, that's substance. I consider that substance. The secret agreement that's fair enough. That will not effect my decision at all. That's a fair attack. You know it's an unjust attack, but it's fair.

G: Even on the wire tap.

K: Let's not get into the wire tap. I don't want to discuss it any further and that's not for publication.

G: Not only is it not for publication, I won't pass it on to anyone. Which is a different criteria for secrecy. I do wish you wife feels well and I do hope you stop thinking of leaving.

K: That last part I talked to you as a former associate.

G: No concern to worry about.

K: I will get you access. I will talk to Sonnenfeldt and Larry this afternoon.

G: Fine, thank you.

K: Barry, this discussion got so confused yesterday that I just wanted to make one point clear. I do not recognize that there was any loophole in this...

G: I agree with you.

K: understanding, If you look at the arsenal of Soviet weapons that they have now or under development you couldn't find one that they could claim is of the type that could be put on 3 class submarines.

G: That's true, Henry, but you have to remember that Senator Jackson is running for the Presidency and anything that he can grab to make a headline he is going to do. I don't think he got around the corner with you yesterday. The thing that's interesting to me is why if Paul Nitze knew this, or even thought it, why did he wait a year to bring it to anyone's attention?

K: Exactly, and why did the Chiefs.... You know, we sent this document over on June 20, 1973. Nobody said, good god, what have you done? The reason it came up was that we were drafting and implimenting protocol and sombody suggested to tighten up the language a little bit. So we did it.

G: I don't see anything wrong with it except that as you say, a Philadelphia lawyer who wanted to nitpick might be able to make something out of it. I tell you what, I would be very glad to make some remarks on that if you'd like me to.

K: I think it would help if you said that there wasn't a loophole and that this is just a political maneuver.

I mean it is an absolute absurdity to claim that the Soviets would, there is no missile in the whole Soviet arsenal that would fit the description that Jackson claims is in there; nor have they developed one; nor would we have admitted it if they had.

T: Well Jackson, of course, is running for President. He has been a strong man on defense and things of that kind.

D: I think the reason the press reaction -- does not reflect the government's reaction on this.

K: I spent a whole night fighting this thing. Less than that we couldn't do on the basis of the record. Then to string together things we had already said.

D: I under stand. I will point out to you where are the points which concerned us, but obviously it was not any concern that even my phoning back Sisco and telling him what I think of him.

K: The future of the Palestinians will not be decided with such nonsense.

D: That's is correct. But you must understand why there is great sensitivity in the press.

D: I agree with you.

K: If I hear once more a piece of land for a piece of peace. You tell Alon if he says that, that's the end of our conversation. He can say anything else. He can say he wants Amman for a peace settlement.

D: I tell you when I was in Israel I told Rabin _____ and said what the hell do you have to give him any interview. Who is he an agent of ___and later a __of Sadat. Why do you have to interview. He said I'm not going in and give him an interview just background. So I guess one cannot resist a picture in Time magazine.

Peres

K: And then of course what/said with Javits.

D: That I have told Scowcroft is not correct. I have told Scowcroft but I don't know if you've had a chance to hear from him, but I told Scowcroft because he called my attention to it and I checked with Peres and Rabin. Peres did not refer at all to any letter of commitment on the President.

K: Yes, but he said there was a letter.

D: No, he did not. Peres denies it forthright in a cable and a telephone conversation and authorized me to tell it to you in his name. It is not. I think that your Ambassador is very frustrated and probably has some ___ about it or maybe Javits ___ something and immediately wanted to cable because he wanted to indicate to everyone that he did -- you know, that he's not kept informed. That was his motivation. He said to someone that he has learned five minutes in his conversation with me so when he was in Israel more than you people tell him in a year. So this is his attitude for frustrated Ambassador who.....

K: Larry, I sent a letter out yesterday for Hal Sonnenfeldt to answer. This means I want the answer by tomorrow.

E: OK.

K: To Lord Kennet about this ~~Mx~~ Jackson episode. Can you make sure?

E: Yes.

K: Secondly, I find here a whole batch of letters to Senator Ross, to Otis Chandler. They are six weeks old, replying to letters they sent me. Now that just cannot be.

E: I'll check it with Bremer.

K: We're talking about Otis Chandler.

E: I ll check it with Bremer in the morning.

E: Alfred Smith.

K: Alfred Smith dinner. That used to be considered something the Presidential candidates fight for. Now why do we not anser that? Or at least get me a recommendation. How many hundreds of people have to analyse that?

E: I intend to check that in the morning.

K: How about that award from the Carnegie thing that I gave you yesterday. I just want to know what the procedure is.

E: The procedure is that on those they go down to PA for a recommendation and they usually pull together in one and they apparently take too damn long. I'll have to sit down with George Springsteen and work up a system I guess.

K: I want both of these back up tomorrow and I want no letter held for more than three days.

HAK: Oh, terrific.

K: But Dr. Kissinger, my office called to ask me to look into the story in the Wall Street Journal which I assume you may have seen this morning.

HAK: No.

K: It's on the front page on the top, Nixon and Kissinger head toward a falling out.

HAK: Oh, baloney.

K: And he says the President fails to aid the Secretary of State on the wire tapping controversy; Kissinger would like a White House statement that he's telling the truth.

HAK: That's also nonsense.

August. The fact that a trip was being planned for 1974, I of course knew, because I had it in the communique when Tanaka was here.

K: Absolutely. Well, one of the things that when we were listening to the Salzburg news conferences, there was some speculation that maybe some of that might have been that the President might step forth and in effect reiterate the May 22 that he personally authorized the entire wiretap program.

HAK: I've expected that will be done before it's over. There is no dispute between the President and me and I'm sure the White House will confirm this.

K: They have. They told me that this morning.

HAK: There's not the slightest problem and I don't know how these stories get started.

S: No, he said that diplomatic relations between the White House and the State Department were superb.

K: That's true.

K: I return his calls the same day now.

S: (Laughter) Well, you sound in pretty good shape. The reason I called is we are trying to do a piece about -- a sort of positioning things for your appearance.

K: My appearance won't be until the 23rd now.

S: I see. Are you pretty sanguine about how things..

K: Ch yes. Now that I have seen all the documents which I never had before. I think they more than support my case.

S: When you say all the documents, you mean the FBI stuff.

K: Yes, you see all I had seen is a 29-page summary. Now I have seen the documents on which the -- on what basis are we talking?

S: The usual.

K: No, I just don't think I ought to characterize my testimony before I give it, but I really...

S: Let me -- well, I can say on my own that you are confident.

K: Very very confident. And, in fact I don't think there is a problem.

S; What about this so-called difference about the fact that Hoover says in the memos, which I gather were drafted by Sullivan but signed by Hoover, saying that you were the initiator.

UNITED STATES DEPARTMENT OF STATE
REVIEW AUTHORITY: ROBERT L FUNSETH
DATE/CASE ID: 24 JUN 2004 200102979

K: I think that will all come out very clearly. The initiator of what, individual taps?

S: Yes.

K: It is a pure question of terminology. And I think I am going not to get into it. What I am going to do is to describe it. I really think it is a pure question of terminology. That the substance is as I described it.

S: Right, right. What about the thing on terminating the taps.

K: McCloskey now says, that he having reviewed the records -- if anything I overstated my role.

S: (Laughter) Well, it won't be the first time.

K: Listen, you bastard, you'll never get in here again. Look, everyone agrees that after May 1970, I didn't see any of these reports anymore. So what possible basis did I have for terminating it.

S: Yes,

K: Secondly, the records will show that a number of people that were tapped, I never got any reports on so I just couldn't have been the guy terminating them.

S: Right, well, who was resp onsible for that in the White House at thiat point.

K: You know I'll have to wait with my statement. But I don't know the answers to all of the questions.

S: Ok, it's just sort of speaking personally, I think that is one of the questions that should be answered in this whole thing because that is one of the questions that has been raised on this. The memo says, the FBI memo says, that on three separate occasions they asked for the taps to be terminated .

K: I frankly don't believe that.

S: Well, ...there may have been a little bureaucratic ass covering there, but you know, you're aware of what the problem is. The problem is that you then take a quantum jump from not terminating the taps to the idea that the information wasn't, didn't generate National Security information but was used for domestic political purposes, namely the fact that

S: Halperin and Lake were working for Muskie.

K: Loo,k at the time Halperin and Lake were working for Muskie, I wasn't getting any reports any more.

S: Ok.

K: So even if that were true, I wouldn't have known about it.

S: Now, what about the plumbers business and Wellender. Do you see that as a problem.

K: It is a harder problem to prove because I didn't do anything, so I have no records whatsoever to fall back on.

S: Yes.

K: I do not see it as a problem , no. I did not know about the Plumbers. I don't know how often I have to say that.

S: Now, for example, in your testimony, you have mentioned on two or three occasions people came to you for historical documents which you refused, but you also said that you didn't understand that that was an organized group.

K: No, no no. Nobody of the Plumbers ever came to me.

S: I see. I see.

K: That didn't come from the Plumbers.

S: Where did that come from, Colson?

K I think once it came from Colson and once it came from Erlichman. But that never came from any body from the Plumbers.

S: I see. Ok. Well, I get the feeling that resignation is fading into the background here, would that be correct.

K: It depends what decision the Committee makes.

S: Yes, but I sense that frankly, the worst that Erlichman and Colson have to offer seems to have just kind of floated away with the tide.

K: They don't have anything to offer.

S: That's right.

K: I mean they have innuendo. And with Colson, his own sick imagination. When Colson says I was at a meeting that he didn't himself attend, then what the hell do you have.

S: Yes, Yes.

K: No, I'm glad that we can have a comprehensive view of the thing. Ok, Jerry. You'ave been very decent through all of this.

K: Let me see. I couldn't be so lucky if they would tell mewhat I'm doing next week. There is a chance on Tuesday, but I won't know -- when are you coming?

F: On Sunday. I could call Sunday or Monday. I will give you a call Monday morning.

K: Terrific.

F: It would be delicious to see you.

K: Good to see you.

F: I will give you a buzz. Everything seems to be turning out alright for you.

K: We're going through hysteria but it seems to be alright now.

K: Hi Ron, how are you?

Z: Good, how are you? I wanted you to know that I took a jab at Jackson on three things. I was asked about the secret letter and I followed your guidance about leaking executive material and you had covered it in your press conference of June___ and what it was about and then I went on to say I had been asked to comment on other things. First the knowledge of the US Government on the Indian nuclear test before May 18 and I shot that down.

K: What? Oh, exactly.

Z: The fact that we had knowledge before the May 18 text. We didn't did we?

K: No idea whatsoever.

Z: And thirdly, I said the Senator said we are selling police equipment to the KGB.

K: That's crazy.

Z: I said there is a world trade fair going on and some private industry might have done something, but any relations to munitions falls under COCOM and existing regulations...These are 3 instances where the Senator has violated..without stating the facts. I also said you would be out on Thursday and then again for the signing of the Spanish Declaration.

K: Good.

Z: Fulbright has released the letter and I think we will release it out here.

K: CK. Many thanks

Z: Anything there?

W: This is Waldheim speaki ng .

K: Yes, Mr. Secretary General.

W: Mr. Secretary, I am grateful for you returning my call. The reason is , you have probably heard from Buffum, that we have a serious development and I wanted to inform you of a cable that we have received. This would give a clear picture of the situation. I received from my special representative and Commander in Chief in Cyprus -- I don't know if you have been informed by Buffum.

K: I think Sisco has told me about it.

W: Makarios may request a meeting of the Security Council to discuss, what he terms, Greek military intervention in Cyprus. We know four members of the Greek Government are being treated for wounds received during the coup d etat in the last two days, so there was some involvement. I want you to know that we have these indications that the Greek military contingent is involved. And he also asked me to convey to you and others to help keep Cyprus independent and soverign. I sent a message to the government of Athens and ~~Ankara~~ Ankara stressing the importance of maintaining...

K: I notice the Greek Government has affirmed this.

W: Yes, the important thing is, well it is not so important, but that the Archbishop asked that the British send a helicopter to evacuate him to a British base on the island and the British High Commissioner accepted this on the condition that the Archbishop would accept evacuation to the United Kingdom and in the meantime, our commander in chief there has asked for protection, so Makarios refused to evacuate the ~~xxxx~~ island and I have now authorized our commander in chief to grant protection. Of ~~xxxxxx~~ course, that will cause problems in the future. This will be a problem.

K: Yes.

W: This is most important information which I got ~~xxx~~ this morning. I asked Rossides whether he will ask for a meeting of the Council. He did not...I consultated with the Presidentof the Council and we decided there should be a meeting at 3:00 this afternoon. The situation is very confused and all kinds of rumors around the world and I think it is important that the Council be informed.

K: I appreciate this very much and you information is later than ours.

*

*

K: I talked with Callaghan who reports they were evacuating Makarios and that didn't sound right to me.

W: I agree. But for us it will be a problem if the new military government is in control and no President is sworn-in, then we have a problem of what to do with Makarios.

K: How about you and I talking tomorrow and exchanging information then.

W: Yes. I think it is important to avoid intervention by the Turks. Our information is that the Turks...will report that they will not provoke or do anything which could create deterioration of the situation, but this is the real danger.

K: We are dealing with the Turks today and I will keep you informed and I understand we are going to get together next week or soon.

K: I called you yesterday about the possible assistance to Italy if that becomes necessary and I understand that one idea is to use the swap line and that you are a little reluctant to do it. I don't want to get into fiscal details which I don't fully understand. I just want to point out from a foreign policy point of view we cannot let Italy go down the drain. Whether that is the way to do it or some other way, I don't know.

B: I agree and I have been actively trying to get other countries to contribute to a package but what we can do through the swaplines is very limited. The amount could be large but it is a three month loan and that is not what they need.

K: Yes. My people tell me you would not approve more than $300 million.

B: As a start.

K: Yes. Look, on financial things I am not somebody--I cannot get into a debate on numbers. All I wanted to stress to you is to really give this -- if it arises -- very high priority.

B: I agree and I was active in getting the credit line extended. Also in a meeting with the finance ministers I went around and pushed the Germans and Japanese to contribute to a package for Italy. It is a loan of medium term duration and the swap line does not serve that purpose. That is the essential point.

K: May I make this suggestion. Anatol, I think the course of events, if we all behave in a restrained manner, will lead in this direction, but if anyone behaves provocatively it will get mixed up in the whole East/West debate.

D: I understand.

K: We have no interest in changing the situation as it was on the island last (month). Our problem is how to position it so that the natural balances is not affected. This you can tell them.

K: Mr. President.

N: Hello, Henry. How are we getting along with our Greek friends?

K: The problem in Cyprus is the Europeans have taken a ~~xxxxxx~~ united position that Makarios ought to be brought back and they want us to bring pressure on the Greeks. My worry is that Makarios now has to lean on the Communists and Eastern bloc. All our evidences is that the opposition is in total control of the Islands~~x~~. My recommendation is that first, we get someone over there to ~~x~~ make our view clear and secondly, we work for a compromise in which neither Makarios or the other guy take over....They want us to ~~xxxx~~ rake the Greeks but if they get overthrown then that will ~~xxxxxx~~ jeopardize our whole position.

N: I know that. I can see that, but not much support from Europe?

K: No, but they know we are dragging our feet, but they don't ~~x~~ know exactly what we want.

N: Who are you going to send?

K: Either Ingersol or Sisco. Ingersoll has the advantage of taking orders well, but Sisco is more knowledgeable.

N: Whatever you decide, it's alright with me.

K: Sisco is necessary here to manage the ~~xxxx~~ thing on a day to day basis.

N: I see. What can he accomplish. Explain to them what we're trying to do.

K: The danger is this, if everyone runs to Makarios embracing him the legitimat head...and if the Soviets are the only ones to offer to help restore him, we have no basis for resisting it.

N: I see the danger. We have ~~x~~ no support.

K: We can not openly oppose Makarios but we can try to slow it down enough so that perhaps we can crystalize enough support for an internal solution. The Europeans are talking a tough game, but we have to defend their position.

N: We have to defend their game plan.

K: Exactly.

K: That's is what I would propose, with your permission, to do.

N: I think it's a good try.

K: And if it fails, we can join the consensus.

N: That's right.

K: My analysis is if Makarios is brought back this way, he will have to kick the Greek officers off the island and then the Communists willbe the dominant force and to balance the Turks he will have to rely on the Eastern bloc. So the coup will have shifted the balance to the left.

N: I get it. Too bad he has to come back.

K: Mr. Chairman. How are you?

F: All kinds of excitement. I was calling you about this Greek situation. I am thinking about inviting the President of Cyprus down to a coffee. I understand he is coming to New York tonight.

K: Is he coming tonight.

F: That's what I understand.

K: Would you like to come by for a drink tonight and I will bring you up today--this would be independent of your having him for coffee.

F: As you know the Committee and I have not been sympathetic to the Greek Colonels -- you know that. I have drafted a letter to you. We had heard that we were being reluctant to take this to the UN. Is that correct?

K: No. What we want to do is first stop the possibility of Turkish intervention.

F: Are we prepared for an embargo on arms during the period.

K: It has not come up but we would not be unsympathetic to that -- particularly if it is accelerated into an international confrontation.

F: We talked about this in the Committee yesterday. Pell wanted to send a letter then but many of the members thought it was not clear enough then and we were not particularly impressed with that anyway. The purpose of this would be simply to show some concern on the part of the Committee which we have had for a long time. You are familiar with the history of this.

K: I don't object to a letter from the Committee. I would like to brief you apart from that. I am not using this to keep you from writing a letter. This is a totally different thing. If you on behalf of the Committee want to write a letter expressing your concern it would be appropriate.

F: There is a long period of opposition in the Committee to the support of the dictatorship in Greece. We think that would have a salutary effect--if any at all-- it may go unnoticed.

K: Can you hear me?

C: I think so. I think if about seventeen people get off the line I could hear you better.

K: I was thinking of sending Joe Sisco or Bob Ingersoll to London so that you could get a more first hand impression of our thinking on Cyprus.

C: That would be very good.

K: Is Ecevit going to stay over night?

C: Probably will leave in the early morning. Makarios is leaving at 11:00 our time and will be with you at 1:35. He will then ask for a Security Council meeting on Friday.

K: Right.

C: So that gives you time.

K: I will try to get someone over tomorrow morning and then have hime go to Athens and ~~xxxxx~~ Ankara.

C: I think it would be very valuable. I would like that. I'll tell you our position and this is basically the European position -- all the countries in the Nine and NATO. We think the ideal solution would be to get Makarios back. ~~xxxxxxxxxx~~ Whether we can do it by diplomatic means remains to be seen. Makarios asked for diplomatic activity to continue and the need for non-recognition of the new regime in Cyprus. When you look ahead for six months -- will the situation be more than or less tense? Our estimation is more -- that it would look to be more tense if we can't get Makarios back -- but the question is can we?

K: Some of our people are wondering if a compromise not be Clerides.

C: He couldn't hold it. But the compromise might be an election in 3 months with Makarios back on the Island.

K: But how will you get him back?

C: What we would do? Well, hopefully you would exert your influence on the Greek Government about the national guard officers. The Turks under our guarantee Treaty may say to us what are you going to do and if action doesn't seem possible -- any of the three powers has the right to take action. I think we can take it that we can talk about unilateral action and if so then there has to be US pressure on Greece. How do you see it?

K: I see it similarly. But I am not sure about what we are embarking on when you say diplomatic action.

C: I think the Greek regime is a bit worried. _____ has called our man in Athens to see when tomorrow....and I think he is going to ask what we and the Turks are up to. We think there is a chance that if there is concerted diplomatic pressure they might calm down by withdrawing some of their ~~xxxx~~ officers. I am thinking about the Turks tomorrow or tonight. But, if you think six months ahead, my view is that it is better to have Makarios there than Sampson.

K: That is almost certainly true, I agree.

C: The problem is three to one or five to one chance it won't succeed, but it would be worthwhile to do...

K: Well, we want to avoid giving the Soviets an excuse to make what happens legitimate.

C: Yes. Again, looking six months ahead of Sampson -- If Sampson stays, he would be accused of running a Fascist regime and the Russians are stepping up their activity so I come back again to -- we may not succeed but it could be that we may crack the regime and get Sampson to withdraw.

K: Let me get somebody over to talk to you. We agree on the general approach. We are not too far apart on it.

C: Well, send somebody, but I don't think we can afford to lose much time to begin pressuring the Greeks.

K: He would be getting in there tomorrow morning.

C: Who will that be, Joe Sisco?

K: Joe Sisco or Ingersoll.

C: After he and I talk, he can talk to you and you can make up your mind.

K: Exactly.

C: Well, I think this should come quickly. If there is a feeling in the Greek Government that you are holding back, then what is happening in the EC will not be of much importance. You have heard about the EC demarche?

K: No.

C: The put out a statement saying they made a demarche to the Greek Government -- stronger than the terms I made publicly.

K: I didn't know that and it is good to know.

C: I didn't know it til lunch and the House of Commons is anti-Greek on both sides.

K: Good, well, I'll be in touch.

C: Alright. If anything comes out of the meeting with the Turks, I will give you a call. We have had a request -- that if they ...get out of us, they might act unilaterally.

K: You can tell them we are willing to exert ourselves with the Greek Government but I want to get our strategy more precise and also that we are not supporting Sampson.

C: I'll tell them and I will leave it to you to tell them about who is coming.

K: Yes. That was your instinct too, wasn't it.

N: I just sort of felt that.

K: I thought you were right.

N: You can control him.

K: It's better to have somebody who knows the subject. We're having trouble here with some of my guys who are leaking, and I m going to take care of them next week after this is over. The New York Times is coming after us.

N: About Makarios?

K: Yes. Some of the members of the House are starting to rumble.

N: We'll try not to commit ourselves here. I'll leave it up to you.

I: Very good.

K: I mean they support Clerides and they will urge negotiations. Tell that to Sisco--tell Sisco his major job is to get the Greeks and Turks to London.

I: Fine.

K: And calm down--and you do you calm down Sisco, I don't know, but that is your job. I mean can we send him a cable-- I sent him an encouraging cable--did that ever go to him?

I: No, that is the one we didn't send because we had already sent another one.

K: What do you mean?

I: Rembmber this afternoon--we decided that we wouldn't send that one because we already sent one--

K: I sent him a cable telling him he had done a good job--could that have gone?

I: No, it was the first paragraph of your cable--

K: I sent him a three line telegram, saying he had done a good job--that wasn't sent?

I: I didn't see it--I don't know

Now, can somebody send him a cable and tell him we need his special skills and tired as he is, we want him to make one more effort and it is to get the Greeks and Turks to London--the British are fully aboard now, fully following the line we worked out?--they no longer want Makarios, they are going along with the Clerides thing and he has the support of Callaghan too. And to be steady and firm and we are sending Dr. Nidel out with pills.

I: All right, get it off right away--

K: Jim, how are you

S: Okay. We have at the present time, reports of bombs falling in Kyrenia and Nicosia

K: Bombs falling ?

S: Yeh. There is no confirmation of Turkish landing as yet, but if they have not occurred as yet, they are expected momentarily. Now the Forrestal--

K: You consider that confirmed?

S: Yeh. We are getting that from the British I believe, but I can check on that.

Now the Forrestal Task Force is west of Crete at the present time and it might be desirable for us to start moving it down towards Cyprus.

K: I agree.

S: The amphibious forces moving towards Cyprus is steamed for about four hours and it is still about six hours away -- the British have an evacuation plan for themselves with a Caravan going toward the base and we would hook into it if the need arises, but nobody has indicated as yet the need is arising.

K: When bombs start falling, they may change their mind. Who do you think is doing it?

S: Turks--Turks took several F 100's off about 3 hours ago from one of their bases ~~and~~ in Turkey--they were loaded up.

K: You think they are getting the airfield?

S: My own guess is that they have a notion that before you land on a beach you are supposed to drop bombs and they are doing that.

K: Nicosia is not on a beach is it?

S: There is nothing in the manual of war that says you have to drop the bombs on the beaches.

K: The only reason I keep asking is because I have a message here from

K: It says to pass to Schlesinger--Ecevit said so long as Greeks don't fire we won't.

S: I'm not sure he has control over everything--my own guess is that Sancherra andthe military have their own ideas about what to do when the baloon goes up. We shall try to check thru the reports that the bombs have impacted.

K: Good.

S:Q But the purpose of the call at the moment is that we probably ought to start moving that Task Force out from west of Crete.

UNITED STATES DEPARTMENT OF STATE

DATE/CASE ID: 13 FEB 2003 200102979

K: I don't give a damn all right. Send a message to Macomber. Of the same subjstance that Sisco was supposed to deliver. That message is that we otake a grave view of the situation, it could have themost serious consequences. That we are asking the Turks to keep in mind that it is easy to start these things--it is more difficult to end them. Our belief is that these must be restored as quickly as possible--our believe is that the only way now to restore constitutional government with any chance of success is the Clerities solution which Sisco outlined. Sisoo is on his way to Athens to present that and we are assuming that the Turkish government will agree to that, secondly, we are going to ask Britian to call for immediate negotiations of the ~~X~~_____ powers, probably in London, but conceivably on a British base in Cyprus. But we think London is better and we hope that the Turkisk government will accept that.

And you get Macomber in to see Ecevit with this message fastest. Read it to me before you send it out. Second we send detailed instructions to Sisco who may be a little tired after his exertions and explain to him what we have done in Turkey, wh y I believe the Clerities solution has not been rejected by Turkey if his reporting was correct , that they rejected it at first because they thought it was a way of keeping them from invading--now that they have invaded------ah (long pause)

Now the only other thing we have to keep in mind is to leave open the door to double enosis--but I think we better not start pushing that yet.

Okay can you get those two cables out--Point out that I interpret his reporting to mean that the Turks rejected the Clerities idea when they ~~thre~~ thought it was a way of keeping them out.

That I interpret what they said that they will aceept any President as a means of settling it. Now what is the judgment of the people about whether we should float the double enosis idea now?

I: Some people think that is probably the practical thing with the Turks in place.

K: I think we should go to that after trying the Clerities. It is too dangerous to come up with it now Because it will run into massive Soviet opposition. OKAY_let's get them drafted.

I: One to Macomber, one to Sisco--

K: The one to Macomber first.

S: The one to Tasca would be on its way--the one I read to you.

K: Then to Macomber, and then longer instruction to Sisco in Athens--quickly.

K: Okay, the first thing I want is to make sure thatSisco goes back in to the Turks and tells them what he is going to do. When he tells McCloskey that the Turks have already rejected the Clerities solution, I can only assume either that he misreported in this last cable or that his mind is still enthralled with the first conversation. In the first conversation they rejected the Clerities solution as a means of keeping them quiet. Now that they are in, they apparently have said they'll accept any government.

S: That's right.

K: That being the case, why does he say they have already rejected it?

S: I'm afraid I haven't talked to Bob since he has talked to Sisco, so I'm afraid I'm being on that.

K: Now could we also try to do this thing professionally and not discuss everything on an open phone to Turkey

I: Bob has been talking to Joe just to get him to go to Athens.

K: But in the process he has been told that the Clerities ideas has already been rejected by the Turks and therefore it is senseless for him to go to athens--therefore, everybody from Yugoslavia over knows what our plan is. I just haven't seen anything like this. I mean the Russians now know what our scheme is--everybody knows what we are going to try to do.

I: Bob is over in the Operations Center, I don't know what he said--

K: What he said was the Joe opposes going to Athens because the Turks have already rejected Clerities. From this I would have to assume that he discussed our plan with him--how else could he have gotten that intelligence.

K: Hello Mr. President

N: Hi Henry.

K: I was just checking ;the line had gone dead. Mr. President it looks as if the Turks are going to land in Cyprus within the hour if they haven't already landed there. At any rate they've told us they're going to land there. And that they have given instructions to their troops to avoid fire if the Greeks avoid firing. And so my recommendation, if you agree Mr. President, is the following. That we send -- we first of all are going to get in touch with Taska immediately and give him that message from the Turks about the firing. Secondly we're going to urge the Greeks to see whether they will accept the solution of the head of the national assembly Clerides. They'll never accept Makarios without going to war.

N: Yes.

K: And the Turks have already told us they will accept anybody and if they accept Clerides then actually we'll have come out very well. If they don't accept Clerides we're going to have a war between the Greeks and the Turks. We're also drafting letters from you to the Greek and Turkish leaders urging restraint on them but the first thing we've got to do is get the message to the Greeks. We'll get the message off -- your message off immediately. Immediately after that. And then maybe in a few hours we can ~~XXXXXX~~ consider the question of a Security Council meeting.

N: Good. Fine.

K: I'll keep you informed as soon as we know more. I've got a call into Callaghan to see that we can stay lined up with the British.

N: He ought to. We'll see. He'll support us. Why are the Turks going to such lengths.

K: They have a very tough domestic situation at this point. That is just the message that the Minister of Turkey has just told Sisco that they have a tough domestic situation and Ecevit is trying to appeal to them -- the nationalists. And....

N: Well, if it gets down to the Greeks and the Turks having at each other I mean if it does get to that we then have to go to the Security Council

K: What are we doing--why are you all at the Whte House?

ALL: Because! You asked for a WSAG meeting

K: Yeh, yeh, okay. What are we doing about that UN speech. I haven't seen a copy of it.

M Buffum is going to get it back out to you. Stabler and I read it, it looks okay. I thought it ought to convey a little more of the concerns that is reflected in the telegram you wanted sent Anakara.

K: That is right. That--but it is now 2:30

M: Last I talked to him Mr. Secretary 20 minutes ago it was still possible Scali would not have to speak this afternoon--that the council may agree to hear only Makarios and then carry over until tomorrow. ..... is to let me know just as soon as he has any change in that.

K: Right. Let me say a general thing. The management of a crisis like this depends on everybody being informed of our thinking that we want to take action. Mow I have a cable here from Sauvagnargnes.....which shows for example in para 4., is stabler on?

S: Yes, sir.

K: It says Sauvagnargnes proposes that Sisco go on to Ankara, now what does Irvine say to that profound remark, why doesn't he say that is exactly what he is doing?
Does he need instructions to be told this

S: He certainly shouldn't--he

K: Why didn't he say it/

K: There are only two possibilities--if he is reporting of it==he must either want to inform us of their thinking and think this will influence the decision--at any rate, I want Irwin to go back to Sauvagnargnes and tell him two things--I greatly appreciate his analysis, I agree with it and there were a number of things which weren't made clear in our original cable--one that we have made clear to Turkey that we would strongly ~~xx~~ oppose enosis, direct or creeping and that the Turks to us have expressed great appreciation for this.
Secondly, that we are going in the UN debate to indicate our objection to outside intervention and third as he knows Sisco has been sent to Ankara. Just want to do this to keep them happy.

Now is somebody keeping the British informed of what we are doing.

I I just talked to the minister--Ramsbothom was not available--but I got Sykes.
They have a long message from Callahan ~~xxxxx~~ to you in which they are delivering to me and we were just getting it over the phone when your call came in--

K: Is he rambunctious?

I No, pretty much the same position they had before saying they were going to ~~xxxxx~~ support Makarios at least at this time not knowing whether he could eventually be the head of the government, but until they found another solution, this was their position.

K: [redacted] B1

I: They said the only way this will happen is by putting pressureon the Greeks.

K: [redacted]

B1

I: Okay.

I: Nothing I have seen so far--

S: No, absolutely nothing at all

K: But could you gentlemen form a little group that keeps on top of this and not just reacts.

I: That is right. We talked to Fulbrigh and Morgan

K: How are they reacting?

M I spoke to Mansfield and Morgan. Mansfield was in fully support-- Morgan who I had to reach --

K: Of your position or my position?

M: Of your position and efforts

K: (laughs)

M: that we are making.

K: Good. I

K~~x~~ I: I talked to Fulbright and he was concerned with the way things were going and he commented very adversely on the colonels (?) in Greece.

K: You tell him we have no love for them.

I: I know. I told him we'd keep him informed.

K: The major theme is we can't have a war there right now and can only do one thing at a time.

I: We don't have anything from Joe from Athens, so we don't know what happened there.

K: Has he left?

I: Yes, He must be to Ankara now.

K: He must be taking over the government. Can we call Ankara and make sure the guy reports. And does he understand he is not to surface the Clerities thing until he gets instructions.

M We told him we'll send instructions on that from his two telegrams this morning--

K: You better pray that these were clear enough. I tell you there will be blood if he surfaced--the last thing I want is an American draft proposal--the last thing we need is an American proposal. We first have to get into the Turkish heads there must be an alternative solution. Once he has done that--then tell them we will support a alternative solution such as for example Clerities or something else they might think of. But until he has convinced them that there has to be an alternative, our introducing Clerities just makes us a.....

S: I have prepared as a result of an earlier conversation this morning the subsequent instructions

K: Listen Stabler, just because you have won me over with that cable last night, don;t press your luck. Okay, what are your instructions. I've even been saying nice things about you to Eagleburger. Which is the highest--almost like a declaration.

S: I'll have to return it. But may I--

K: What did you say--you are going to say nice things about me to Ealeburger

All: Laughter

K: That is the foreign service mentality.

S: Could we get on with your ~~xx~~ instructions? What I said, "the Secretary has considered the report of your conversations with Ecevit in London as well as your proposal to suggest a strategy contained in the message which you.... The Secretary does not want you to float the Clerities proposal until you have been absolutely sure that Ecevit understands that in our view the direction taken is presently pointed...would lead to ultimate disaster for Turkey. .....

K: Excuse me, I've got a call from Sauvagnargnes. Hold still and I'll call bac Iplaced the call to him to make sure he is happy.

S: Will you tell him these things?

K: I'll tell him those things, but send them anyway. And will you all stay where you can be reached

M: Should we start the WSAG
K: Yeh, and I'll call you out again.

His constitutional successor is a man called Clerities who is head of the national assembly and we are trying to see whether we can get him established with the agreement of Greece and Turkey--once that is done he can call for elections in which Makarios can run in 6 most and that way we avoid both a Greek/Turkish war, poossible Soviet intervention and civil war on the islandx And the major thing we want to do now is prevent a blow-up and possi ble call for American military forces

Do not suggest in any way that this is a American chief proposal but rather an idea on which he might want to reflect. Summarize briefly..

K: And say if he finds it useful he will report immediately to Washington and see whether we can.... and what our reaction is. Well, maybe we can put it a little stronger. Say that I asked him to feel him out on the.... just say it is something that I have not discussed with anybody but that I would like personally to get his reactions to and as soon as we have it we should report it. THat makes it a little less free-wheeling.

S: OK, to summarize briefly, we must not get ourselves in a situation where we are backing one solution and the UK and Turkey backing another and the Greeks another solution and the Soviets having the role of opting for Turkey if they so desire for Turkey. We must remain as flexible as possible and not get ahead of the ~~previous proposal~~ Carides proposal until we can bring the parties themselves to recognize that a compromise solution must be sought and that it is in their best interst. The Secretary does not wish you to commit yourself in any way to returning to Wash. at this time.

K: No, infact, I think he should go to London for the Monday meeting.

S: Well, you should be prepared to go to -------- London if desirable.

K: No, that's a damn good cable. Can you add one other thought to it, please. That one of our principle objectives is that not to have the Turks feel we let them down in this and therefore he should really make Ecevit understand that we are really talking to him as friends as allies.

S: Yes, we said we wanted him to approach it with compassion...

K: Yeah, I know, but say it again at the end.

S: Right.

K: And you better tell Joe that he should not surface his document.

S: Yes, right.

K: I mean, that is totally premature. Now, gentlemen, before I get another spade of stories, does anyone disagree with this? If anyone does, please let me know. There is no crime in disagreeing. There is a crime in taking it to the press.

I: We don't know where those stories came from--but certainly none of the people have been in on this.

K: I don't ming the disagreement if there is one.

I: No, I don't think there is one.

S: Mr. Secretary, I don't know how to convince you but---I wouldn't have any hesitations.

K: And, Bob, you agree?

M: Oh yes, Mr. Secrtary.

K: OK, fine. I'm not asking this for PR reasons, I'm asking it to make sure that we are all aboard. You might as well go ahead even if you disagree but I'd like at least to know.

I: Do you want to hear about the Souvaraguares cable?

K: Yes. I have talked to Souvaraguares incidently.

S: ... and therefore a compromise is the only way out. We are willing to press for such a compromise once it is clear what sort of compromise is desirable. You should also make the following two points------ Therefore a compromise is the only way out -------

K: And also you should tell them that we have told the Turks we will work with them on any solution on Cyprus that gives them guarantees in that respect. You know just a sentence about our cable.

S: Yes. And then finally during the Security Council ------ consideration you should make clear that we are opposed to all outside intervention from whatever quarter.

K: Including -----.

S: Yeah.

K: Now we better tell Erwin that we had a telephone call with Sauvargues, otherwise he'll look like a fool. Tell him the Secretary has made these points in capsule form to Sauvagnargues on the telephone but this is an extension of his remarks--or something like that.

I: Henry, we've set up a WSAG meeting for tomorrow morning at 10:00 a.m. To set up a working group to prepare a possible contingency plan and we thought we should not do anything on alert or anything like that. No evacuation plan.

K: I agree, but we should look them over.

I: We are, that is what we are preparing for tomorrow morning.

K: Good.

I: The other thing, I think I told you we got a message in from Callaghan which we are going to send to you as soon as it is delivered from the British.

K: You might talk Ramsbotham through what we are telling the Turks.

M: Anyone else that you want us to do this with?

M: The time was 10:00.

S: The message from Ankara was dated 10:06 our time. 7:06 your time.

K: What time is that in Ankara

I: Plus 7. 5:00 a.m.

K: Assuming they gave him -- there are two possibilities either they are telling him they are going in anyway or they gave him 48 hours. Now if they're going in anyway we've got to get the fighting stopped -- we've got to tell the Greeks to stop fighting. Not to go to war. Then the question is how to do we accomplish that.

M: I think you have to start with Presidential messages for one thing.

K: Ok. Will you draft those. And we've got to do something about this G.D. communications here. Brent will you do something about this communication and tell them to get the Watergate traffic off the bloody lines.

K: I guess they're sending those six books out here by ... Well, we need a message to Turkey and to Greece. We need immediately -- a contingency message to the British. I guess we have a little time on that. When do you think we'll know from Joe?

S: I suspect we would know by another 45 minutes.

K: [redacted] E

M: Do you have the Callaghan message now.

K: I have no idea where it is but what I'm now trying to decide is have we found out where the Callaghan message is. It is here. But that is not the key issue here. The key issue is when we have 48 hours we ought to try to get the Greeks and the Turks. There are two possibilities. Either the Greeks and Turks meet in London or Joe goes on a quick shuttle.

S: Either the Greeks and do Turks do what?

K: Go to London. Or Joe goes back there now. If the -- if he has 48 hours we have to see what it is that the Turks want. If the Turks insist on bringing Makarios back I don't think that can be done in 48 hours.

S: I was thinking if he does get 48 hours we then ought to stay where he is and continue to find out exactly the perimeter. B1

K: [redacted]

I:

K:

I:

K:

I:

K:

I:

S: I don't ever see how you could get the Greeks to stand on that.

K: On Makarois. We agree on that. I'm just trying to go astep at at time. So the next thing is will the Greeks accept in principal a constitutional solution other than Makarois. That's what would have to be done -- that is how this would have to be phrased within the next 48 hours.

M: [redacted] B

K: [redacted]

I: [redacted]

K: [redacted]

I: [redacted]

K: Well, if that is true then if we got 48 hours we're not in bad shape. Let's see what it is. Get me a copy too. We've got a great organization here. Cables are distributed in this order - Eagleburger, Scowcroft and then me. Well, this is just what you've been telling us. This is about that change of direction. Well look, what we need is first of all to get my other cable off [redacted] to the British as if nothing had happened.

S: Are you ready to go on that.

K: They haven't found it yet because its probably being read by Zeigler at a briefing. In reply to Doar. And we may have sent him a St. Clair statement.

M: They're still trying to find phase three. We passed to the British those other two papers you wanted.

K: You have.

M: Yes.

K: Just for Callaghan

S: Yes.

K: I thought we were going to attach them to the letter but this is actually very helpful.

M: We refer to it in the letter.

K: No, no its fine. You did the right thing. OK. If we have 48 hours we will draft a note out here for the Soviets which we will send to you to deliver to Voronstov which we'll send through Kennedy maybe to Voronstov and Bob you can see a copy of it. Just tell him what we're planning to do. Because they may go for a Clerides solution. We want above all and Wells I want you to draft a note now to the British explaining why if its 48 hours the Makarois solution can no longer work.

S: I think there is some flexibility in Callaghan.

B1

K: [redacted] I mean in a more elegant way. Or they will have to try the Makarois solution without us. And give them our judgment why we think in 48 hours it cannot be done. Are you still on the line?

M: Yes.

K: I think we should also get in touch with Soumanyar and give him some of that thinking. As far as NATO is concerned we should wait until we get a tentative reaction.

TELCON -- CONFERENCE CALL
Secretary Kissinger [San Clemente]
Dep. Sec. Ingersoll, Amb. McCloskey,
Wells Stabler & Colonel Kennedy [Washington]

RELEASED IN FULL

2:30 p.m., July 19, 1974

HAK: Hello, what are we doing -- why are you all at the White House may I ask?

McC: . . for a WSAG meeting.

HAK: Yeah.

McC: Just about to begin.

HAK: About that UN speech, I haven't seen a copy of it.

McC: Buffum is to get it back out to you. Stabler and I read it, it looks okay. I thought it ought to convey a little bit more of the concern that is reflected in the telegram that you wanted sent and we sent to Ankara.

HAK: That is right. But it is now 2:30.

McC: Well, the last I talked to him, Mr. Secretary, -- 15 or 20 minutes ago -- it was still possible Scali would not have to speak this afternoon. But the Council may agree to hear *only* Makarios and then carry over until tomorrow. Buffum is to let me know just as soon as he has any change in that.

HAK: Right. Now, let me say one general thing, the management of a crisis depends on everybody being informed of our thinking that we want to take action. Now I have a cable here from Sauvagnargues which shows for example in paragraph 4 -- Is Stabler on?

S: Yes, sir.

HK: I mean, it says -- Sauvagnargues proposes that Sisco go on to Ankara. Now what does Irwin say to that profound remark? Why doesn't he say that's exactly what he's doing? Does he need instructions to be told this?

S: No, he certainly shouldn't. Because he's certainly aware that he would. It was announced in the public domain in any event.

HAK: Well, then why didn't he say it?

S: Well, I'll have to just check that and see. I mean, it doesn't suggest that he didn't. But it certainly doesn't report that he said so, no.

UNITED STATES DEPARTMENT OF STATE
REVIEW AUTHORITY: ROBERT L FUNSETH
DATE/CASE ID: 01 JUN 2004 200102979

HAK: Well, there are only two possibilities. If he's reporting it, he must either want to inform us of their thinking.

S: Yeah.

HAK: And think that this will influence a decision. Well, at any rate, I want him -- I want Irwin to go back to Sauvagnargues and tell Sauvagnargues two things: One, I greatly appreciate his analysis; I agree with it and there were a number of things which weren't made clear in our original cable. One is that we have made clear to Turkey that we would strongly oppose enosis direct or trekking (?) and that the Turk to us have expressed great appreciation for this.

S: Um-humm.

K: Secondly, that we are going in the UN debate to indicate our objection to outside intervention. And third, that, as he knows, Sisco has been sent to Ankara. Now I just want to do this to keep them happy.

I: Okay.

HAK: Now, is somebody keeping the British informed of what we're doing?

I: Bob has just talked to --

McC: I have just talked to the Minister -- Peter Ramsbotham was not available but I got Sykes. And they have a long message from Callaghan to you which they are delivering to me and we were just getting that over the phone when your call came in. We didn't quite complete it.

HAK: *Is he rambunctious?*

I: No, pretty much the same position they were in before, saying that they were going to support Makarios, at least at this time, not knowing whether he could eventually be the head of the government. But until they find another solution, this is their position.

HAK: Well, that's all right.

I: Sampson out of course. And they have to do something to make sure that the Turks didn't move in and that would be the removal of Sampson. They said the only way this is going to happen is to put pressure on the Greeks.

HAK: Well, then we are willing to bring pressure on the Greeks as soon as we know what the alternative is that emerges.

I: Right.

HAK: And you can tell Ramsbotham on my behalf to Callaghan that we are not in disagreement with them on this.

I: Okay.

HAK: I don't want the British to start leaking that they are fighting us on Greece. Tell them it is a tactical difference. That we don't want to move against Sampson until we know the alternatives and use him as a bargaining chip but we can assure them we don't want to have Sampson emerge out of it.

I: Right.

HAK: And you might call the Turkish Ambassador and make this clear to him.

I: Right.

HAK: Hopefully on a line that the Russians monitor . . . . make microwaves.

I: [Laughter]

HAK: And have we heard from the Germans?

McC: Nothing I've seen so far. Wells?

S: No, there's been absolutely nothing at all from the Germans.

HAK: But you gentlemen form a little group that keeps on top of this and not just react?

S: That's right. We talked to Fulbright and to Morgan and to --

McC: I spoke to Mansfield and Morgan. Mansfield was fully in support. Morgan who I had to reach at home in Pennsy --

HAK: . . . . my position.

McC: Of your position and the efforts that we're making.

HAK: Good.

I: I talked to Fulbright and he was just concerned over the way thin s were going. He commented very adversely against the Colonels in Greece.

HK: Well, you tell him we have no love for them.

I: [Laughter] I told him we would keep him informed.

HAK: The major thing theme is that we cannot have a war there right now.

I: Right.

HAK: And we can only do one thing at a time.

I: Right. We haven't heard anything from Joe from Athens so we don't know what happened there.

HAK: Has he left?

I: He's supposed to have to have left.

S: He must be in Ankara by now.

HAK: He's probably taking over the government.

[Laughter]

HAK: Well, can we call Ankara and make sure the guy reports?

I: Yep.

McC: Sure.

HAK: And does he understand he's not to surface the Clevides thing until we ~~xxxxx~~ give instructions?

McC: We told him that we will send him instructions on that from his two telegrams this morning --

HAK: You better pray that people are clear enough.

[Laughter]

HAK: I tell you there will be blood. If he surfaces this. The last thing I want is an American draft proposal. The last thing we need is an American draft proposal. The first thing he's got to do is to get into the Turkish heads that there must be an alternative solution.

I: Right.

HAK: Once he's done that, tell them we will support an alternative solution such as, for example, Clevides or something else they might think of. But until he's convinced them that there's got to be an alternative, our introducing Clevides jus t makes us a party.

S: Well, I have report as a result of any conversations this morning the subsequent instructions. There were done of course --

HAK: Well, just ~~But that's~~ because you won me over with that cable last night, don't press your luck.

S: I'm not pressing my luck. But I think you've got to --

HAK: What are your instructions?

S: Well, they are your instructions.

HAK: . . . nice things about you to Eagleburger.

S: Huh?

HAK: I've even said nice things about you to Eagleburger.

S: That's _____.

HAK: Which is the highest -- it's almost like a declaration.

S: [Laughs] I'll have to return it. Well, --

HAK: What did you say -- you're going to say nice things about me to Eagleburger?

[Laughter]

That's the ..... mentality. Go ahead.

S: Can we get on with your instructions?

HAK: Yeah.

S: So what I said is: The Secretary has considered the reports of your conversations with Ecevit in London as well as your proposals to suggest as _____ contained in the message which you saw. And the Secretary does not want you to float the Clevides proposal until you have made absolutely sure that Ecevit understands that in our view the direction in which Turkey is presently pointed would lead to ultimate disaster for Turkey. You should, therefore, in speaking with him in Ankara go through it in carefully analysis set forth in the message of yesterday. He must be made to understand --

HAK: I got a call from Sauvagnargues. Hold still and I'll call you back. I placed the call to Sauvagnargues just to make sure he's happy.

S: Will you tell him these things?

HAK: I'll tell him those things but send them anyway.

S: All right.

HAK: Will you all stay where you can be reached?

S: If you want us to. Shall we start the WSAG?

HAK: Yeah. Start the WSAG and I'll call you out again.

I: Okay.

McC: Last thing, Mr. Secretary, there is a message coming in now from Sisco.

K: Good.

McC: Okay.

HAK: And the State Department at the WSAG will act firmly right? Not hand wringingly?

I: That's right.

HAK: Thank you.

I: Okay.

K: I just got the speech of Scali's but I suppose it is too late since I also had a call from Ramsbotham congratulating me on the masterful way in which Scali sometimes referred to Makarios as President and sometimes as Archbishop

I don't consider that masterful, I consider it another example of total indiscipline.

I: I just heard it and I talked to Ramsbotham afterwards who called it to my attentio n.

K: Do you suppose our calling President Makarious is without significance?

I: No, I dont--it is rather significant--the first part of the--

K: Did we all agree on that--I Mean is everyone happy with this, I am not.

I: He started out with Archbishop--that is what we had in the text I don't know where he got the President Makarios.

K: Well, weill somebody call it to his attention? That he is to stick to archbishop Makarios

I: Right.

K: If we can interupt his great flights of policymaking. Did he give essentially this speech?

I: Yes. I didn't have the text in front of me, but one of the fellows there was looking at it and said it was essentially that.

K: With what changes?

I: Well, he adlibbed at one point and talked about a reference that the Soviets representative made that--I didn't hear the Soviet man, so I don't really know what he was saying, and it implied that there had been American appealing to the Soviets that we should have a policy similar to theirs. And he said we always permit our citizens to take opposite policies or anything they want.
Henry you heard the story in the Fin. Times was not filed because the reporter found out it wasn't true.

K: No, I have not heard that because it would have been interesting information.

I We called Lewis and I--

K: That's all right. The next thing, Bob is the Callahan letter. I think it is basically a friendly letter and that basically we don't disagree with it, we are just differing about pace and how we get to this objective. Could Stabler do one of his masterpieces

I: To Callahan

K: A personal letter and reply, giving him our analysis of the situation again in a capsule and saying we agree--I've already called Ramsbotham just so that you know--is Stabler on?

I: I think I'm the only one on--I didn't know you wanted him

K: No, no that's all right. Tell him on A I don't disagree except I would do it with lower key, B I agree, C I believe that that is going on, D --that is premature--E we are willing to do once, we know what is acceptable to the parties or at least to the Turks, and F is becoming moot because of the eloquence of our great ambassador. Don't put it this way--F is now being debated. Does Scali understand that we would like to delay everything as long as possible.

I: I haven't been in touch, but I will find out and we could make sure he does--I'm sure he does.

K: Have you ever dealt with Scali? Will you tell Buffum that I'm holding him personally responsible for slowing Scali down

I: All right

K: Okay.

I: Essentially this is all right that Stabler can say except for this--

K: I want him to give our view and then say what this means to us is with respect to your letter the following--do it a little fuller than what I have just given you.

I: Right. We will draft it let you know in a bit.

I: I don't mind a bit.

K: Look do you have that Clerities cable in front of you --

I: No, I don't--I'll get a copy though.

K: Let me tell you I would like it to be given on a confidential basis to Ramsbotham for Callahan
And to say this is pretty much an analysis of ours.

I: Do you want to incorporate in this reply that Stabler is making?

K: Yeh, why don't you say for your own personal use, I am sending you a cable.
Secondly, I would like an instruction sent to Davies that he should see Clerities if at all possible and tell him we are quite sympathetic to the considerations he advanced--or more tactfully at any rate under no circumstances should he resign his position.

I: All right.

K: Now the only thing that Stabler has to learn to become a really good friend is to draft faster.

I: He dfafts fast, it is a matter of getting it through the typewriter I think is our biggest trouble.

Secretary Kissinger - Senator Pell

P: Hello, Henry.

K: Claiborne.

P: Greetings.

K: I just received your letter. I'm out on the west coast for a few days and I just wanted you to know that there is no intention of recognizing the Sampson regime and that it will not stay there. But we have to manuever in such a way that we don't trigger a Soviet intervention and that we don't get a Turkish-Greek war started. But, just for your information there is no intention or any prospect of recognizing the Sampson regime.

P: I'm delighted to hear that and I appreciate more than I can say your letting me know that. I think that will make the Committee feel more relaxed. As you probably know, Bill Fulbright is inviting Makarios.

K: That's all right. I knew that and had no objection. See what we are trying to avoid, just for your infomration again, we are trying to avoid the situation where we are nailing our flag to something which we then have to impose by military force. We would like to get the situation in which the Greek government accepts the removal of Sampson. We think if that happens that will also have a major effort of weakening the Greek government and doesn't put us in the position of an ineffectual grandstand play.

P: Right, but if you find that the --that you have to take a public position on this--

K: We will take a public position on this. And against----we are moving steadily. And, again just for your information and not to be repeated, we are already beginning to cut off military supplies.

P: Right. Well I'm delight and I thank you very much.

K: But don't get that into the newspapers. You can tell the other signers of your letter that if you want to that I have talked to you, you know, McGovern, Humphrey and McGee and you can give them a little feel. At any rate, put their mind at ease that we are heading for the recognition of the Sampson regime.

P: That I will but I will wait to contact them until Monday when they will be back in town.

K: THat's fine with me.

P: I appreciate very much your calling.

K: Don't let some of these articles in the N Y Times affect you. The top echelon of the State Dept. is all the people and they are totally behind what is being done.

P: Then basically your position is parallel to that of the British.

K: That's right. There are minute tactical differences but--produced by the fact that they are a guarantor, but I talked to Callaghan at least once a day--I've just had an 8 page letter from him. I'm writing him one that is going off tonight and we are working in the greatest harmony.

P: That is good news indeed. What will you do though if you find that you just can't get rid --- that he stays and stays---.

K: Then we will have to do other things.

P: All right. I thank you very, very much.

K: But what we don't want to do is have the Soviets go in there in the name of the Security Council to enforce a Security Council decision.

P: Yeah.

K: But, we will not accept Sampson.

P: Then I hope in the course of ------- that will give us an opportunity to let the Greek people be aware of the fact that the ------ government, while we have no wish to interfere---that it is not our first choice in government.

K: Well I think that if it comes out the way I think there is a good chance of it coming out, the junta will be substantially discredited anyway.

P: Would you thinking go toward---------.

K: Well, you know, we are not at that point yet. I personally, I would lean toward

Caramonles?.

P: He seems to have a broader base. And some respectibility at home still.

K: That would be my view but you know one cannot be sure what willemerge there.

P: I had a long talk with the King on my way through London. He has matured a great deal. A few years ago he was a little cocky. Now he is a much more solid person. And I would say probably in the end that he would be used as a symbol----to keep his fingers clean in all these very different machinations that have been going on. He is in Eng. finishing up his degree, he moved into a smaller house and I think he would be-- we would be pleased with him if he went back.

K: Yeah, bw we would have no objection to that if that is how it developed.

P: Good, well I thank you very much.

K: You're welcome, Claiborne.

P: Very nice of you to call and good luck to you---

K: You can reassure your colleagues on Monday. I've already explained it to Fulbright and he is fully with us.

K: Hello. Jim.

S: Yes Henry.

K: I just wanted to bring you up to date. You know the situation and I want you to know what my thinking is and see whether we're in step on it. My view is that -- you know the methods that the Turks have asked us to pass to the Greeks about not firing.

S: Right. They're landing.

K: They're landing and they have orders not to fire at the Greeks if the Greeks don't fire. So we're going to pass that message and we're also going to tell the Greeks that we think the best solution now is to have a negotiation as rapidly as possible looking for the return to constitutional government. And that we recommend the Clerides solution under these conditions. That's -- that means they have gotten rid of Makarios and they'll have to give up Sampson. And we'll send Sisco back from Ankara. Now we don't think this will really fly but at least its a slender threat.

S: My feeling is that the Turks at this stage are not going to settle for anything less than a piece of the island.

K: No, the Turks have said that they are willing to stabilize their forces and that they are willing to keep the existing structure and they will accept any president other than Sampson.

S: That's very generous of them. That's good. OK.....

K: If the turks want a piece of the island then in my view we have to work for double enesis and give the Greeks the other part of the island so my view is there are now two possible outcomes. Either double enesis or Clerides.

S: Completely. Henry. I had a call from Ingersoll a bit ago who wanted to move the Americans down to the British base.

K: I tell you. My bloody outfit. When they got a crisis the first thing they can think up is something trivial. What do you think. I'm not against it I just wish they'd do first things first.

M: He is apparently still there but I would suppose he is leaving soon.

K: I think Sisco ought to go to Athens. That's where he can do most good.

M: What instructions should he have?

K: His instructions are to urge them not to fire and to start an -- we will support immediate negotiations looking for a consitutional solution and let him surface the Clerides solution.

K: I think we should give Taska the outline of the Clerides solution. First of all get a flash to Taska what Wheaton has to transmit to them. Secondly tell them we recommend that they not go war. That the consequences for everybody including themselves would be disastrous. And three, we continue to save the return to the consitutional arrangements including the level of military forces on the island as it was prior to the coup. I mean now the Turks have something to bargain with. Four, we think under these conditions, a comprehmise solution is necessary and we recommend -- and our idea is that perhaps Clerides can take over and if they agree we will put this to the Turks. And Sisco is coming to discuss it with them.

K: No, no. God no.

M: Telling them all to excerise restraint.

K: No. I don't want to get the Russians in yet. Let's first get somebody to Greece. We can call a meeting of the Security Council in another couple of hours if necessary.

M: It's scheduled at 11 tomorrow morning as it now stands.

K: Look to me the Security Coun cil is far down on the agenda. It will make no contribution, it will get the Russians involved and the best hope is Sisco now. But also tell Ervin what we are doing. Let him see Souvana. OK can you draft that message to Callaghan immediately.

M: Mr. Secretary. May I suggest that you XXX call Callaghan directly.

K: I'm calling Callaghan but I want a message drafted anyway.

M: Alright. I think we should get craking on what is necessary in Athens right away.

K: That's right. The first message that has to be done is the one to Taska.

S: The question is whether we telephone Taska and.....

K: Then the whole world will know.

S: The whole world is going to know shortly - the first landing you know.

K: But we don't want our solution known by the whole ;world.

S: That's true but I mean in terms ....

K: That ;you can do and you can say we are sending a -- it finally got here the letter to Callaghan. We got a great system here. Fischer got through with it. So I think the operative part - the message from the Turks you should call Taska about right away.

S: Do you want Presidential messages too.

K: That too. But the first thing now is to get instructions to Taska about how we think this thing can go. I think the Greeks have to understand it is now too late. Either stonewall it. They should not go to war and that we think this is the way it could go and if they're willing to do it Sisco is on the way and -- so call Taska -- somebody other than Stabler

K: Stabler draft the message to Taska and then read it to me immediately. Then we do the Presidential messages.

S: Alright.

K: Maybe Bob, you can call Taska. OK Thank you.

M: I've talked to Lewis of the Enancial Times. He explained to me that he first heard this from an American--I explained the realities of the situation and said nothing like that ever occurred. He then told me that by the time he talked to a second source, he realized it was exactly the right version. It happened that I had in front of me Callahan's letter to you today and I said you can't read a letter that the Secretary just received from Calahan and believe anything like this happened at any time let alone in the present situation --it turns out he did not write a story that Kissinger blew up at Callahan by the British insistence on supporting Makarios.K:We don't disagree with the British so much.

M: I don't think we do.

K: There is a slight tactical nuance? the Callahan letter I 'm not in much disagreement.

M: I've also talked to Marder, Binder, Dana Adam Schmidt --Baltimore Sun this p.m., I think I got the message thru of our serious disappointment at this line getting around that you working against the advice of your people and I went into this at some length with all of them--I think I got them persuaded. In the case of Binder, you'd be interested, that he said he began to understand this as far back as yesterday. I said it was too bad then that that didn't get conveyed to the editorial page. He told me that on his original story where on Wednesday he had the quotes from unnamed sources that that opinion was easy to come by, but now looking back on it realized that that is not an opinion that ~~xxxxxx~~ really counts and it doesn't involved the people who are mostly working closely with you.

It happens that Les Gelb is doing today;s Cyprus story and I had Anderson speak to him ; after Anderson listened to me talk to Marder. And my impression is that Gelb is on course and understands. The same thing with Marder and I just spent 15 minutes ~~xx~~ with Dana Adma Schmidt.

K: I wonder whether we should have Schlesinger get some of his people to call.

M We have--My confidence in them is not as strong as my confidence in some of our own people.

K: It can't be that desperate. Okay. Then we won't do it.

M: I wanted to tell you also I went in on my own and spoke to the members of the Task Force and told them if any of this represented any views

the people in the Task Force, I'd like to have them say it to me. That I thought it was putting the Sec State in an intolerable position when he is accused of ignorning the advice of his people and he hasn't gotten any advice contrary to what he is doing. I went on at some greater length --and someone with me said he thought the message was put across. I also talked to Hartman: to keep his eye on that Task Force and see that it has some good strong leadership.

K: I think we will all learn from this crisis how to run a tighter ship.

M: For one who found myself arguing with you at times on behalf of the Foreign Service, I'm deeply disappointed with...

K: No, I understand this Bob and my concern is to make the FS a great institution. I m not fighting the FS. Because in the two years I've got left, I'd like to see that when I leave it will be proud of itself.

M: We had an inquiry in the press office this afternoon from John Finney who picked up some word the Soviet forces in So. Russia are on alert He went to the Pentagon and was given no comment and certainly got the same thing out of John King and our press office. I've asked Dick Kennedy to circulate from NSC that any inquiries should be ~~mark~~ met with no comment unless authorized guidance from the WH

K: Exactly right.

M: I guess that's all.

K: On the press that needs to be done is --two points that I--I just got the editorial from the Times--one did I do it against the advice of the State Dept. Two, we are not having any trouble with the British--we are in close touch with allies and more or less they agree with us--which ally is really unhappy with us.

M None that I know of-- except the Greeks

K: The Greeks are unhappy.

M: Although after all

K: On the whole we are doing fine--what we are trying to do is wokking. If we can keep the Turks from invading another 48 hours.

M: I hope you might find occasion in the next day or so to send a one line note to Joe how much you--how well you think he has done--

K: Okay--I'll send it now. But have we heard from him again?

HK: Do we know what he is doing.

M: He had--the last someone talked to him on the phone--he was awaiting the instructions--he must have them now. He did tell someone on the phone that he had heard in Ankara that Ecevit was going on the air sometime within the next couple of hours.

He didn't seem to --and we don't know--what to take from that--

K But did we deliver the original message--

M: Yes.

K: Did Joe do it or Macomber.

M: Macomber delivered the original message because Sisco had not yet arrived in Ankara--that was the instruction. I'm sorry.

K: Okay, so that have that--so he must be having thenext instructions.

M: Oh sure, I would think they are there by now.

K We sent them two hours ago didn't we?

M We sent them not quite that far back.

K: Okay. Thank you--are you going away.

M: No, I'll leave a number where I can be reached--

K: Good, we may all have to get together sunday morning--it depends what the situation is--

M: When are you coming in tomorrow?

K: About 8 or 9.

M: Do you want any of us to meet you?

K: I don't see any need for it.

M I'll talk to Eagleburger tomorrow.

K: Bob I have just talked to the British ambassador--just in general to tell him there were no disagreements of any major substance between us and he concurred and he says the British press has been fed stories from my darlings that I was furious with Calkhan and I blew my top at him

M: I had heard this this morning that he was attributing to someone of the Financial Times

K: That is right, but wx did we do anything ~~xxxxxx~~ Bob?

M: No, Mr. Secretary, since I talked to you I went in and spent 10 minute with the Task Force explaining to them that if any of those people in there had any differences they owe it to you to tell one of your advisors to tell you directly --but we can't have editorials of the major--

K:N No, did we tell-did somebody straighten the financial times? When we get a story in the morning and if I hadn't heard it from Ramsbotham, why didn't we call them and say it is totally total balderdash

M: First I was trying to find out the name of the guy at the ~~xxxxxxx~~ Financial Times who I had never heard of before.

K His name is Lewis.

M: I now know it and I haven't talked to him yet. I will. I have been talking to David Binder of the NY Times. Bob Ingersoll who is here now has talked to Johnny O.akes of the editorial page .... that had not been considered and when they had been--

M: I said we wouldn't necessarily agree with the, but we haven't even received them. And he is willing to print any kind of message we want to send him.

K: In a letter box.

M: I don't think it is worth doing.

K: That is not worth doing.

M: I was talking to Binder who gave me the sense that he was embarrased to see that editorial this morning because he said he became convinced yesterday and wished he had talked to me the day before--convinced that this is not the case.

K: But Bob we have two problems, one is a report filtered into the department that I was supposed to have blown my top to Callahan. If the Financial Times prints this it will become gospel truth and I'll never catch up with it. Now if by the sheerest accident I haven't talked to Ramsbotham I wouldn't even know about it. The opposite is true. We had the most amicable relationship. There isn't the slightest cross word, their position--the position Ramsbotham will take as signatories, they are in a different position from us but they are ~~xx~~ in close and intimate coordinatic

M : I understand.

K: You get a story of allied disagreements floating around and we will be in deep trouble. I talked to Mansfield and he said don't use force, we will not support it, don't support the Greeks and don't use any pressure. Now you tell me what policy that is.

M: A nonpolicy. I will talk to Lewis of the FTimes--

K I don't know if it is worth it at this late stage, because by now, whatever he has done he has filed.

M: I will find out.

K: Now whose resolution is this--(to someone in HAK's office)

M: Mr. Secretary--can I come back to the press--after--we have just received now your forSisco for the Secretary--that you sent to San Clemente--

K: Yeh, that really isn't necessary--after what you did
Has that already gone?

M: No, it just got here.

K I would hold it because your other cable takes care of it.

M: Okay.

K: What do you think?

M: I agree. I think the other one takes care of it.

K: The only thing is, if you redo it and say, you know, this is on top of the other one--and I just wanted to make sure that he heard also personally from me.

M: Well, we will send it but I honestly think--

K: No, I don't frankly think it is necessary. Where is the Callahan message?

M: It is pretty long--do you want me to read it to you?

K: No, but has it been sent to me.

M: Yes, to the WH

K Well has it been sent to me?

M: To you from the WH. It was delivered over there because we were waiting for it at the WSAG meeting and Kennedy was to send it to you from there.

K: Now, I just wonder whether there is any sense talking to Lewis. It is now past his filing deadline.

M: I'll get off the phone and get on it right now.

K: No, no, isn't it past his filing deadline--it is now--10:00 in London.

M: I t would be yes. It is possible that someone else here has already talked to him also. In the Eur Bureau.

K: Could somebody take control of this. When we get a story going in the department like this, by the time it gets established, if we want an artificial crisis, that once more we are troubled with our allies, if we had a functioning thing; someone would be putting out that we are in the closest contact with all our allies everyday. Which happens to be the truth. In NATO with the nine, with France, with Britain. That is what we should be putting out. We have been in touch, but we

have not been putting it out.

M: I think we will do it right now.

K: I don't think Bob can do it all but some of the leakers could put their energies on that.

M: Right.

K: Above all, if a paper as prestigious as the Financial Times puts out that I yelled at Callahan in which there isn't the slightest bit of truth, then other british papers will pick it up--then you are going to get the left wing of the labor party screaming.

M: In this case, at least this is not the kind of thing that would come out of the State Department--it had to come from the British source.

K Impossible, because he checked with the British.

M: Ramsbotham.

K: Lewis checked with Ramsbotham.

M: Saying he got it from the State Department.

K: He got it from an Amercan source. Why would the British put it out-it isn't true. There isn't the slightest bit of truth in it.

M: Mr. Secretary, the question I am sorry to be just catching up--apparently came up in the press briefing today and was denied. I have this man Lewis calling in now if you --

K: Why don't you talk to him and tell him it isn't not only not true it is theopposite of the true.

M: Right. Bob Ingersoll is still on.

K: Now what about the UN resolution--

M: Bill Buffum is here--here is Buffum.
Has Larry given you this resolution yet, Mr. Secretary, I dictated to him a few minutes ago?

K: It isn't as bad as I thought.

B: It really is the best we have seen so far. It also will coincide with our policy except for that reference to withdraw of excess troops, but I think there will be unanimous support for in the Council Mr. Secretary

K: Can it no longer be changed?

B: I don't believe so at this late stage. I would urge however that

K: If you say at this late stage--how did it get to this late stage without my gettting a crack at it.

B: Because they are nonaligned--they have been negotiating this text among themselves during the day--this is just emerged this afternoon from their own efforts--they gave us their earlier version night before last--the one I showed you yesterday.

K: And we never knew about anything they were doing. And we didn't know what they were doing?

B: They have been huddling on this throughout the day and this is the text they have finally produced--now we will urge that they not vote on this text this afternoon but if they should force a vote on this this evening, I wanted very much to have your judgment on it.

K: Except for the withdrawal of foreign military personnel we could live with it.

B: Indeed. That is the one sticking point and the question is I think, what --whether that is a serious enough consideration for you in view of the very good appeal to all states to exercise restraint. But we should stand aside on the text if everyone is supporting it.

K: No, but we should try to change it.

B: All right. We could make an effort, but I think this is probably the minimum requirement on withdrawal that most of the other members have settled for. Particularly since the British had been sponsoring this kind of language from the beginning.

K: But see if we can get it watered down--talk to the British first.

B: Will do. And has the revised text of the speech reached you yet, Mr. Secretary?

K: No. I also would prefer not to mention Makarios--but we dont' seem to be able to avoid that.

K: I'm doing fine.

C: Well, now look, as far as Sisco is concerned, have you told him to go to Athens?

K I've told him to go to Athens and under great protest he is on his way there.

C What is his objection to going, Henry?

K: His objection to going is that he thinks London is a more pleasant place and that Washington is even more pleasant.

C: Well, Yeh, I think that is right. What is he going to do when he gets there.

K: Then when he gets there he is going to urge the Greeks to negotiate that solution I discussed with you and to go accept any proposal you may make for Greek Turkish talks.

C: Very good. I think that he --I think we can talk a little more frankly now because I think we are on a secure line.

C: That's right. I think if Joe Sisco can persuade them to get rid of Sampson and to constitutionally get Clerides installed, then we've got the makings of a package to deal with the Turks, haven't we?

K: That is exactly my view.

C: Right. And I've got the Turkish ambassador waiting outside to see me now--I thought I would send a strong note through him to the Turkish government, calling on them to bring about the earliest possible ceaseifre to get the Greeks and Turks here

K: I agree with that completely--I was going to make that strong suggestion to you--you'll have too messy a situation on the island--much to messy

K: I wouldn't go into endless details, but I would tell him that we are

C: I missed you then-- say it again

K: To whom to the Soviets?

C: Yeh

K: I wouldn't go into all the details--I would tell them that--I would go into detail about the negotiating process, not about the solution.

C: Very good.

K: Otherwise they will hang behind another fellow and just thwart it.

C: This line is very bad--you keep disappearing completely

S: The message that was sent out this morning which I have here --should I read it again?

K: No, no that is the one you did this morning.

S: But in that one at your instructions we said you should reaffirm to Ecevit that we are totally opposed to enosis whether direct or creeping. That was in that one and that was the one about intervention--

K: But we didn't give the Clerities solution.

S: No we did not because that was in this other one

K: How about humoring me and and summing up our position again. That keeps Sisco from getting off on something else. And winding up with Clerities. I want some compassion shown to the Turks. I --we are going to wind up bulldozing both parties into a solution they don't want. The trick is to get at least one of them to want it.

I We will do a new telegram on this instruction--we've already made the point on enosis in the previous one but all the rest of it themm is

S: But I think sums up in this message--

K: Could you express to Sisco that the strategy to follow is to show compassion to the concerns of both sides so that --at least of the Turks so that we are not in a position where at the end of it the Turks will say we raped them--they said it in '67.

And that is why I want him to present our views of this in the most compassi nate light and convince them that military intervention has the wrong impact now because it strengthens the wrong forces. My personal view is that in '67 I wouldn't have been as opposed to their intervention as I am today. But that is a different matter.

I Okay sir, we'll do it.

K: Will you read it to me and get it off, because it is already 7:00 in Ankara --no it is 10:00

M: You understand he already has the one message.

K: Bob, I understand he has the message--I want him nevertheless in every message to understand the strategy . I want then from the base of that strategy--my nightmare is that his proclivity is to peddle a solution in the face of an unagreed view in which we will then become one of the parties to the dispute and we will have a Clerities faction , a Makarios faction and a Sampson faction and Clerities at that point has no support at all.

M: Understood. Get the point.

K: If we could convince the Turks that they should work with us for a new solution.

I: You mean some other solution?

K : Here we go.

M: No, I understand.

K: Here we go. July 19. Turkish news broadcasts reports by news agents that US Sisco has brought to Greece and Turkey and American plan for solving Cyprus crisis. According to their plan in which it is replacing current head of Cyprus regime with more moderate and influential person who could be Clerities. .....reads rest. Well gentlemen we have a disciplined outfit of which we can be proud.

I: Mr. Secretary, I was afraid you would see that.

K The worse thing we can have is an American plan at this moment. It isn't after all that I have failed for five years. It is that I have occasionally been right. Now can't this department carry out my instructions? That is where I want to come to. All it takes now is for Clerities to say he doesn't want it.

K: Hello, who is this?

M: This is McCloskey

K: Are the others on the line?

M: The others are on--our signal is not quite as clear because Buffum and Ingersoll are in their own offices.

K: Why is that.

M That is the way the call came in I guess.

S: We can go to the other office, if you like

M: Yes, do that we had a better connection this morning.

K: But I would like to get some action and -- do you think you could all assemble in the next two minutes.

All: Sure. Be right up.

K: Hello? Well, this isn't any better, let's just keep going. Is everybody together now?

M: Mr. Secretary: I'd like to take up the subject of the press briefing, if I may, first

K: Why

M: Because we're right against the deadline. Only two minutes.

K: Right.

M: We will annnunce the Makarious call on you and there will be a question as to whether he is being received as the President and Anderson would say, as we previously indicated, no question of recognition with respect to Cyprus has yet arisen.

K Well, in his case you've seen .... of recognition

M: No, change of recognition. It is an important distinction from what we have

UNITED STATES DEPARTMENT OF STATE
REVIEW AUTHORITY: ROBERT L FUNSETH
DATE/CASE ID: 01 JUN 2004 200102979

have been saying all week.

K: Until we change our recognition, the existing arrangement obviously continue.

M But I'm afraid we have changed it by what we said throughout the week implying that we are undecided as to which is the legal government and which one would we recognize, and I think and I'd like to recommend that we use the same formulation we have all week.

K: But I always thought we said this in relation to the Sampson government.

M: No, the questions were not always that specific.

K: I can't held responsible, you know for example, it wasn't I who instructed Anderson to say there was no outside influence.

M: That was a different matter, Mr. Secretary, and the context of the question on that point, was since Monday

K: If you say it this way, it means we no longer recognize Makarios.

M: No, it doesn't. It just leaves ambivalent.

K: Why can't we say, we don't have to make a formal decision on recognizing Makarios.

M: I'm afraid if we say that, we have made an important new diplomatic statement. I frankly think it is safer to leave it the way it has been--the fact that you are going to see Makarios.....

K: Now just a second, Bob. It makes a hell of a lot of difference whether when you are asked about Sampson who is in de facto control, whether you say the question of recognition hasn't arisen, or whether you say about it Makarios who happens to be the legal head of the government

S But because no question has yet arisen, it means obviously that we continue because nothing is before it--

K: Thatis fine with Sampson but if somebody says are you receiving him as President--can we just say ~~the question~~ the request was made by his Ambassador and he is being seen on that basis?

S We do say ....agreed to receive him at the .....request--do we want to say conveyed to his embassy in Washington--that might do it.

K: Yes, just say the request was made through the Cyprian Embassy

plus waffle it.

M: That is what we thought--

K: Bob if you say the question of recognition hasn't arisen, that is a clear step away from Makarios, because thatin effect says you may not recognize it.

M: Mr. Secretary, I'm sorry, I think I must disagree. I think that the answer implies more that we continue to recognize Makarios by saying that--by announcing that you received him--than it does the other way.

K: What is the question--is he being received as President?

M: Yeh. --that would be the natural question.

K: And we say what?

M As we previously said, no question of recognition with respect Cyprus has yet arisen. Now that was our formula for maintaining flexibility

K: Bob, I understand--I'm not as intelligent as the country directors, but after this week I learned something. My point is when you say in answer to, will you recognize the Sampson regime, if you say the question of recognition has not yet arisen, then you are distancing yourself from the Sampson regime. Are you receiving him as president and you answer, "The question of recognition hasn't arisen", you are saying something entirely different. Then you are distancing yourself from Makarios.

M: But the questions throughout the brief have not been specifically, do you recognize the Sampson government, the question is who do you recognize, that is why we have the answer, the "question of recognition has not arisen." It did not tie us specifically to one way ~~th~~ or the other. Now when you put together the answer today, that the announcement that you are going to receive Makarios, it means the situation in favor of Makarios. Without jeopardizing what you may want to do later on, if Makarios is completely and forever out of the picture.

K: I would prefer to say the question of recognition has not arisen when I am asked about Makarios. I would prefer to say almost anything else.

M: All right, then supposing we do this. ~~A~~nnounce that you have seen Makarios and any question of recognition, say we have nothing to add to what we said earlier this week.

K: We can say we've nothing to add to what we said earlier this week. That we can say. They say, then do you recognize Makarios, say his appointment was made through the Cypriot Embassy. Say anything other than

say yes.

M: All right. Second subject. There has been much made of the announcement by Greeek Ambassador in NATO yesterday that the Greek government is going to rotate the 650 offices in the National Guard

K: Yeh

M: The only thing we can think to say sensibly in response to a question for reaction would be the following: We have noticed this announcement and we hope that it may oontribute to an easement of tensions in the area

K: Say we have been urging all parties to exercise restraint and we hope that this may contribute to an easement of tension.
But I don't frankly think it will.

M: Neither do ~~it~~ I.

K: I don't think it has any significance.

M: Okay. Third subject, how nowif Anderson is asked to describe the objective of the Sisco mission ~~it~~ which you want to have down.

K: The objectives of the Sisco mission are--first to state the three objectives we have been stating since Monday--territorial integrity, independence and constitutional arrangements. To prevent a Greek/Turkish war, and and to find a solution acceptable to all of the parties concerned.

M: Good. Rather than our finding a solution...

K: And to encourage the parties to come up with a solution acceptable to all of them.

M: Right.

K: Now, may I get around to getting instructions to Sisco or would this be against State Department rules.

M: Mr. Secretary, just one more moment please--

K: Now just a second, one more moment for me please . Sisco is not to talk to anybody until he gets instructions. Is that clear?

M: We have sent a flash--

K: Is it clear that he has--is not to talk until he gets instructions?

M: We sent a flash message out right after I talked to you--the instructions were coming.

K: That doesn't mean he will not come back to us and say in the absence of instructions, I had no choice. You fellows better understand one thing-I am going to do this thing--as long as I am in charge the way I want it. And Bob Ingersoll , you will see to it that this department is going to do what is needed in this crisis and I do not give a good God-damn about the independence of emissaries and I want to make God-damn sure that Sisco knows he is not to talk until he gets instructions and if Ecevit climbs down a grease pole, that is going to happen.

M: Sisco has been told definitely and has acknowledged that he will see
S: nobody in Ankara until he receives instructions.

K: Okay, I just don't to get a cable being .... that since it is now 9:00 in Ankara and he has no instructions, he went ahead.

M: And he won't Mr. Secretary, we can say that confidently. And we have a telegram we would like to run over with you--

K: Now before you run anything over with me, I'm going to tell you what I want. But now let's go thru the press briefing.

M: There is a lot of reporting this morning that Turkish naval units are moving out of Southe astern Turkey for Cyprus

K: Yeh, I have the impression they are ... going intomorrow morning.

M: I think the only thing we should say so we don't raise any alarm--is we have seen the report, we have not seen any announcement...

K: No we are going to say --but we want to make clear we are opposed to any military intervention at this point--we are opposed to any military intervention and we hope very much all parties will exercise restraint --can do nothing to confirm this, but the US wants to make absolutely clear that diplomatic processes have not yet been exhausted. And we better say that at the briefing. Now where is Scowcroft. What has he has he got to do that is more important than this.

M: One other thing--Clements has told--called Bob Ingersoll and Bob do you want to describe it.

I He explained that the amphibious force that we talked about yesterday is about 100 miles or 10 hours no 20 hours steaming (?) time from Cyprus.

K: Yeh, I think they are going into tomorrow morning.

I He recommends we move that force half-way or 10 hours away or 50 miles away.

K: That is correct, I agree with it.

M: Do you want to run over the telegram now?

K: The first thing that--no, no I want to tell you what I want. Then you may run over a telegram with me. And not ~~w~~ one second before that. I want a telegram to Sisco that as soon as he arrives he is to tell Ecevit that we are extremely concerned about unconfirmed reports we have about Turkish military ~~inter~~ moves. He is instructed to point out to the Turkish government that the US would take the gravest view of turkish military move before all diplomatic processes are exhausted. That is point one. That he must do immediately, because I think we have been waffling and weeping around the place and we have not made clear that we are opposed to military intervention. Secondly, he is to say we are doing this in the Turkish interests, that Turkish intervention will not be the last move, it will be the first of a whole sequence of moves, that in our judgment something he never said, the government that will emerge out of this cannot be that a Greek Cypriot government will become a Turkish stooge. I mean you can put this in more elegant language. That therefore, if you look for support from --to the Soviet Union and to its own commmnist strength on the island--left wing strength on the island and therefore he can make this a message from me that part of it, as a freind as somebody who admires Ecevit , I want to warn him that what he is starting is a process in which he in which all can easily lose control. Now can we get that telegram out immediately. Then we will send him a longer ~~xx~~ one on the solution.

M: Okay.

K: Now what is it you fellows--could somebody go off and draft this now?

M: Yep.
Right away.

K: Now what is your telegram, what do you want to say.

M: What you have just given us would overtake what we have pursuant to your instructions this morning. Do you want to go over it--

K: No, why don't you send this telegram and then in 15 minutes call me again.

M: Thank you.

So I want you to know I am sendni g you a message what we have told the Greeks but I just wanted you to know tonight that the basic strategy you have described is one in which we are not in disagreement.

K: I noticed that--I think the major thing now is to prevent precipitant action

S: As a matter of fact Callahan did not seem too worried because he says they same thing as happened in '64 and '67 that the Turks ships that closed (?) before the island, but without taking action--

F: Henry, how are you?

K: I've got a little crisis on here, so

F: Just take me a couple of minutes. First of all, we have been working on this Jackson thing--and you made great progress on this--Javits call me yesterday and I think if you are ready, but I don't think it ought to be until you are ready....it might be advisable for us to meet with the just the two people--remember--the head of the conference and --that is Stanley Lowell and Is Miller and myself

K: Yeh but on general grounds would like to meet with the whole group too.

F: You would, fine.

K: The reason for my meeting isn't just the soviet situation, I just haven't met with the Jewish leaders for a while, I don't mind in addition meeting them

F: I am thinking about this because on the Russian situation, we put all the backers of Jackson on top of his neck, some of his particularly most influential financial backers and I think he has come around a long ways 0-if you think it is ready, there are two things that can be done. We arrange a meeting with the group, but as a matter of strategy it would be very important at the same time to go thru the procedure of a 30-minute meeting with Miller and Lowell and then have them come into the other meeting. I think I recommend this henry/

K" Then let's aim for that.
But I hope they understand that I also have time problems.

F: I realize that--I know you have plenty of other problems. Secondly, I think that something that could be very, very significant in this whole thing would be this. When I was in Israel, I met with all wives and childrer --the prisoners of conscinece--the 17 prisoners who are in prison in Russi and the wives and children are in Israel. They are the ones who were involved in the highjacking 7 or 8 years ago....I met with them and it was a very teary scene because I had to give them an audience. But I think if something could be d one to ease that problem, it could be a trmendous psychological boost for the Russians.

K: Yeh, but the problem is this....Max, and even I am getting impatient with it. Every three months I am told there is one other thing the Russians have to do..They do it after which wx they say, fine, now do the next thing.

M: Okay. That's what it says, if Sisco not yet arrived, Macomber should see Ecevit immediately and deliver the following

1. We are extrmely concerned over insistent reports of turning Turkish military moves towards Cyprus.

K: Reports can't be insistent.
Repeated reports.

M: You should add that US would take the most serious view of any military move with respect to Cyprus before the diplomatic process has had an opportunity for the fullest play. 2. You should make Ecevit understand that Turkish intervention will be only the first in the sequence of moves

K: That in our judgment

M: Right ... sequence of moves which would be difficult if not impossible to control. Any government in Cyprus which would emerge at the end of this process would not better serve the Turkish interests because in order to attempt a counter-balance of Turkish dominance, ... government would inevitably look for support both internally and externally to communism. You should give Ecevit an assurance that we are totally opposed to enosis whether direct or creeping.

K: You should reaffirm our... right

M: Finally, you should tell Eeevit that as his friend and admirer, I must make clear my convictions that if he follows the course of military intervention, he will have started a process which will not only have serious adverse affects for Turkey in the long run, but will be extremely dangerous for the West as a whole.

K: Yeh. Ah--you took out great consequences at the beginning.

I: They're about 2 pages.

K: I think we better do it by phone, don't you?

I: Here's the one to Sisco and that's the one we need the quickest.

"The Secretary desires that Sisco make immediate plans to go on to Athens.

K: Could it be a little louder?

UNITED STATES DEPARTMENT OF STATE
REVIEW AUTHORITY: ROBERT L. FUNSETH
DATE/CASE ID: 13 FEB 2003 200102979

I: "He should not request to have the meeting at the airport. From the message we have just sent to Ankara you will see what we have done and told Macomber to tell Ecevit. We have done this because we feel we must keep him playing as long as possible with the notion of a constitutional solution to the Cyprus problem. Ecevit in all probability rejected the Clerites proposal at the outset because he saw it as a possible bar to Turkish military intervention. Now, however, that the Turks have intervened, he has told you that he has no special concerns about who may be President of Cyprus. Under these circumstances we believe that there is still a chance, even though it may be an outside one, to try once again the Clerites solution.

"You will also have seen the instructions passed to Tasca to weigh in with Iohdides to exercise restraint in the face of Turkish landings and to float Clerites' proposal.

"Secretary wishes you to reenforce the views which have been expressed by Tasca and to tell the Greeks that they must bear a share of the responsibility for what has happened.

K: A heavy share of the responsibility.

I: "We look to them to recognize that unless they are prepared to accept a change of territorial integrity in the structure of Cyprus they must join with us, with the British and the Turks in finding a constitutional solution to the Cyprus problem. As we see it, only if Clerites offers an acceptable alternative, we are prepared to support the proposal with the Turks.

"You are prepared to return at once to Ankara and pursue the matter further with the Turks if the Greek Government agrees with the Clerites' proposal.

"In the meantime we have asked the UK to call for immediate negotiations of the guarantor powers in London. And we hope, and assume, that the Greek Government will agree to attend such a negotiation." That's the one to Athens. The one to Ankara follows:

"Ask to see Ecevit at once. Give him the following message: I take extremely grave view of the Turkish military intervention on Cyprus which will have the most serious consequences, (chief of which is the position it will place) on free world security. We are deeply dissappointed the Turkish government did not heed our pleas to exercise restraint.

"Now that the step has been taken, however, the most urgent means must be found to restore peace and stability in the area.

"While a conflict is easy to start it is difficult to stop. Statesmanship of the highest order is required of all concerned.

"The United States for its part, is prepared to support a constitutional solution and a level of forces which existed before the coup. The only way in our view to restore constitutional government is through the legitimate succession of Clerides. No other solution is possible or acceptable to the Greeks.

"The Turkish has indicated that it has no special concerns as to who the Head of State should be and, therefore,

K: Don't say "The Turkish Government, say President Ecevit."

I: Pardon.

K: Or Prime Minister Ecevit.

I: Yes. "Prime Minister Ecevit has indicated that he has no special concern as to who the Head of State should be and therefore Sisco is on his way to Athens to propose to the Greeks the Clerides solution. We assume that in light of what the Prime Minister told Sisco in their last meeting the GOT will agree.

"We are proposing urgently to the UK that it call for immediate negotiations with the guarantor powers in London to seek the constitutional solution which will open the way for the restoration of stability in Cyprus and in the area.

"We urgently appeal to the Turkish Government to weigh most carefully the proposals we are making, for we are convinced that to do otherwise would be self-defeating in terms of Turkey's own interests."

K: OK. Good. Fine.

I: Do you want to talk about a public statement?

K: Have you got one? Hello? Hello? I have trouble hearing you.

I: Bob has something he wants to show you.

K: OK.

(Bob McCloskey comes on the line.)

M: Hello.

K: Yup.

M: "The United States deplores in the most strongest terms the military intervention by Turkish military forces in Cyprus. We particularly regret that Turkey took this action at a time an active diplomatic effort in which the United States was participating was underway.

"We are appealing to Turkey to order its forces in Cyprus to cease-fire and we are at the same time urging Greece to avoid aggravating the situation by any further military action."

K: Why do we have to make a statement?

M: We don't have to now.

K: What? Are we getting a lot of calls?

M: Not many, I'm surprised.

K: Well, I think what we should say is we regret the action. We also deplore the previous Greek actions that helped precipitate this crisis. Tell them that I've been in frequent touch -- I mean don't put that out as a statement, just have it said -- I'm in frequent touch with the President, I've been in touch with Callaghan and Sisco is in Athens and we are in touch with all of the interested governments.

M: What was Callaghan's reaction?

K: Callaghan agrees with our line and he is also thinking of calling a meeting. Make sure they don't take Callaghan off the line there. Somebody on that other flickering line. Here they come. Who is it? (Talks to someone who has come in the room.)

M: Callaghan is going to let you know about going?

K: Well, what I wanted to mention briefly is that Dana Schmidt article now in the Christian Science Monitor about the disagreement in the State Dept. with our policy.

M: God damn it. Does he have a piece like that?

K: Yup.

M: I should have seen him the other day. He came and waited for me and I got too busy and never got to see him.

I: I told to call John Oaks of the New York Times at noon to explain that to him after their editorial but I wasn't able to ~~xxx~~ reach him.

K: But the fact is that no press man has yet heard one word of support out of the State Dept. for US government policy. That is a little odd. Could somebody call Schmidt. I mean for example---it says, "US officials were critical of the

decision to seek a postponement of the Security Council meeting for Monday until Friday, ostensibly to wait until all the facts were in. Well, the delay according to officials gave the insurgents time they needed to consolidate their position. Now then, on Monday we didn't even know Makarios was alive. Secondly, supposing there had been a meeting. How would we have unconsolidated their position? Thirdly, from Wednesday until today the delay was not at our request but at Makario's request.
We just a delay only until Tuesday when Makarios could get there.
Now I'm just wondering, can we do a little briefing of at least my point of view.

M: I quite agree with you.

K: And, furthermore, not one of these polisies was ever raised with me. Do you recall that this was ever raised?

M: No.

K: Was there one person who ever said to me, "let's have a meeting this afternoon?" And what would have been out position at that meeting?
Can we do something to keep this thing from developing into a rolling campaign?
Can we get some background, or should I do it from out here?

M: We'll do it here, sir.

K: Will you let me know what has been done on the Turkish intervention.
per your instructions

I: We'll call you in a few minutes.

K: Yeah, but---Hartman is a sensible fellow. Can somebody talk tothe key reporters like Murray Marder, or should we get a backgrounder group together, what do you think?

M: Well, we could, given the time now, I think what I would do is to get after the Times and the Post and I'll get a hold of Schmidt and go over our thinking with them. Now I had to pull Marder back last night from a story in which he was saying that we were introducing ------- now he claims to have gottn the basis for this from the British and the Cypriots.

K: Well, just keep it confused. I thought for some reason that the Marder article wasn't bad.

M: Well, I pulled it back from it. He had already written it and he changed it after I talked to him. I'm sorry about Schmidt. He came and tried to see me yesterday morning but sI got busy and couldn't see him and he couldn't wait any longer.

K: Yeah, but the fact of the matter is that it isn't your fault. The fact is in the Department no one seems interested in depending our policy and everybody that has a gripe that he doesn't have the guts to tell me personally is going to the press with it. Theimpression that makes of the Department is a disaster.

M: Right. I regret to say that that's true and that is the kind of thing thatled to that terribly misleading editorial in the New York Times this morning. That's why I tried to call Oaks to correct the impression.

K: The fact is that it never seems to work. No one has yet---there is not one newsman who has heard one senior official in the Dept. who is supporting policy. I don't even want personal support.

Well, that's not entirely--

K: Well, who's heard it--from whom?

M: Well, Marder has heard it from me. Valeriani has heard it from me. I talked also to Pete Lisagor yesterday.

K: I had no sense that any of these meetings show any fundamental disagreement.

I: I think you are right. I gathered all the regional assistants together this morning to tell them that and to pass the word down in their departments.

M: I fell particularly bad about this because I'm the one who---

K: Well you have many other things to do.

M: But I'm talking about the people in the Department now who are airing their own opinions.

K: Well, if they had only told me their opinions.

M: It is a gutless thing for someone to have done.

K: But what we face now---this is going to turn into the god-damnest brawl ever. It will be like the India-Pakistan thing. And it won't stop unless someone get a hold of it. So if just a few of these key people could get it---

M: I'll take care of that.

K: Or, I'll hold a backgrounder out here. Though it is a little humiliating for a Cabinet member to say my subordinates agee with me and never disagreed with me when I was there.

I: We'll take care of it.

K: OK and get me that cable within the next 15 minutes or else Joe won't have anything to talk about.

I & M: OK, Bye.

C: Not so good with the news.

K: That's it and I just wanted to check with you about where you think we should go now.

C: Yes. Can you speak a little louder Henry. I can't hear very well.

K: Good. I can hear you very well.

C: Good. So can I now. Well, what do we do now? Joe Sisco arrives here -- it is now half past four in the morning with us -- he'll arrive here in about an hour I think.

K: No, he hasn't left Ankara yet.

C: Oh, he's still there is he?

K: I was wondering whether/from Ankara to Athens? to send him To see whether we could get our compromise solution floated there now.

C: If you would send him to Athens.

K: Yes.

C: Well, that's a prospect.

K: What do you think?

C: I think that's an idea -- what would he put to Athens Henry?

K: Our pet idea. I don't want to say it on an open line. You know what I mean. Because I don't think your idea.

K: You know the one I've mentioned the compromise I mentioned to Clerides -- or I mean to.....

C: Yes. Well I think there is alot to be said for that. But it wouldn't be sufficient now would it. Would it be sufficient now to stop anything?

K: The Turks have told us they would accept anybody.

C: Have they. I see. And pull out.

K: No. But that would have to be the next phase.

C: I see.

K: Joe is eager to go to London but I don't see what he can do in London.

C: No. There is nothing he could do here. Very much at the moment. I was wondering whether we ought to invite them both there.

K: I think that you should do.

C: The alternative -- I wondered about this Henry -- is whether I would go to the sovereign base area and invite them both there.

K: That's another possibility.

C: I'd be closer to him there too. I'll think about that one.

K: Let me call Sisco and I think there is nothing he can do in London. Unless he has a friend there.

C: That's right. The Greeks have told us they will come here you know. You knew that did you?

K: I knew that and I thought that was good progresss.

C: So did I. But I think probably.....

K: I think the Turks have decided to go it before they went to London. Don't you?

C: Well I think they were divided myself and they assured me that they hadn't you know. They assured me hand on heart that if I were to give them helpful answers to their questions that they would use them for peaceful purposes and not as an excuse for going in.

K: Yes, but _____ strike me as having been helpful.

C: Well, that's what I thought but I still think they were divided and that when they got back. However this is all history.

K: What more could you have done.

C: What's that.

K: You couldn't have offered them anymore than you did.

C: Well. There you are. I'm just trying to turn the the thing over in my mind now. I was just thinking about where Sisco ought to be. Certainly not here. There is no point in that and there is nothing more he can do. I don't know anything about his mission to Turkey-- whether they told him anything or.

K: I will get all the cables we have to Ramsbotham within the next half hour and I will now in any case make sure you get Sisco's reporting cables.

C: I will get those then if you will authorize them and I can see what the story is. Then perhaps we could have another word.

K: Let's do that. I will get you all his reporting cables from Turkey and also from Greece. Then I will send him back to .....

C: My first reaction is subject to seeing that he should go to Greece. He's got to put alot of pressure on there and to do one of two things and you'll need that to make strong representations in Ankara before he leaves

K: To what effect?

C: I think we have to do that--we've got to put that on the record, anyway.

K: That's right.

C: And we'll do the same and I think I'd like about an hour to consider whether we should call them to London or not, or whether I ought to go to Cyprus itself--perhaps you could think about that, could you?

K I shall, and will you call me.

C: Yeh, I'll call you in about an hour then when I've had a chance to read it his cables. Do you think it would be better for me to invite them both to London or whether I should go out there and I'll think about it too and then as then stands at the moment Henry, I think I sooner he was in Athens than anywhere else.

K That's my view, --it is everybody's view execpt Sisco's.

*

C: Ah of course, well poor Sisco!

K But he is going to come to Athens, believe me.

C: I think so, now what about the UN--have to think about that

C: I think we ought to notify the SU too, but I'd like first to make up my mind roughly what I'm going to do.

K: We won't get in touch with them until I've talked to you again.

C: In about an hours time then?

K: Yes.

C: That's very good
All right Henry--as the Chinese say, may you live in interesting times.

K: We've achieved that anyway.

C: What is the time with you?

K: Oh I m in good shape , it is 8:30 in evening on the West Coast.

I: Well, Hartman has delivered your message.

K: By this point he probably went the other way. My instructions this morning which Scowcroft wrote down was to say. Hartman should express his personal opinion that having threatened aid cutoffs to Greece it would certainly come to Turkey if they did not accept a Sisco proposal. It was not to be an official U.S. government threat at that point. It was supposed to be Hartman's personal opinion. I will bet my bottom dollar he didn't do it that way.

K: Hello.

I: Henry. I'd like to have Bill Buffum outline to you what we have on the U.N. right now.

K: OK.

B: It has been proceeding at a very leisurely pace indeed Mr. Secretary. The Council has still not met at this 2:30 p.m.

K: It has not met.

B: It has not met. They have been negotiating in the corridors all morning long on our resolution. The Russians have been dragging their feet throughout the day trying to get everything they can from yesterday's text added to our text. And of course we've been stonewalling them.

K: Yes. Are the British and French with us?

B: They are generally although the French have been willing to accept the paragraph which would call for the withdrawal of all foreign military forces in excess of those envisaged in international agreement on the grounds that this now includes all excess Turks as well as Greeks. In other words those who landed yesterday.

K: Well that might not be a bad -- except the Turks won't like that.

B: No. Neither the Turks nor Greeks will like that. I said provisionally I did not think that accorded with your understanding with the French Foreign Minister and they are seeking further guidance from you.

K: Well I don't think the French Foreign Minister ever expressed himself to me on that.

B: That is not covered of course in the agreement of the points to be put to the 9.

K: That is correct.

B: So I thought that went beyond what you had agreed. And what we are trying to do at the moment is get the Council President to announce as a simple consensus of opinion a common desire that there should be a cease fire and negotiations among the parties. It is possible but not certain that the Peruvian President will do this. If he does not then our best choice I believe is to accept this modified draft as the French have worked it out.

B: You probably won't be here before 10 or 10:30.

K: That's what I would guess but can we work that out -- I haven't worked it out.

B: I'll work it out with Larry.

K: OK now. Have we any idea what Sisco said to these guys.

I
B: I've not seen a wire in yet and he wouldn't tell me over the phone.

K: Well, I've never been wrong about Sisco yet and if he didn't tell you he didn't carry out his instructions.

B: He said he was sending a report very shortly thereafter but we haven't received yet.

K: But the point is it would have been easy enough for him to say that he carreid out the instructions.

I
B: I gathered that impression but he didn't say so in any exact words.

K: What, that he carried out the instructions? We'll give him a decoration.

I
B: We haven't received his cable. How was the press briefing?

K: I kept it very, very low key and my major concern was ~~XXXXX~~ to give the impression that we knew what we were doing. The questions were very friendly. You know they are lethergic out here.

B: The questions are friendly in California than they are in California.

K: Yes and the group out here hasn't been on top of all this excitment. You get the text. / Tell them that that airborne battallion in Europe has been I did alerted because I didn't want them to find it out afterwards. But I made it very clear we are in no posture of confrontation with the Soviet Union/ We are working cooperatively with them and so forth.

I: What one is this.

K: Well, that G. D. General Goodpath that just went ahead and alerted for 509th Air Force without telling anybody. And I didn't want it to come out of Europe because if I did not say it and it hit suddenly it would sound as if something new had happened. So I listed it. I said it is a normal precaution, there is no alert, there is no confrontation and so forth.

I: Alright. We'll make it all available back here.

K: They can use my name but not quotation.

B: Henry. I was not able to reach Fulbright but I talked to Mrs. Fulbright and he gave her pretty much the story and shes going to get to him sometime this afternoon.

K: OK. Did you call Mansfield.

I: I spoke to Mansfield. He was very pleased that we gave him a briefing. He didn't disagree with anything we're seeking to do. In fact he said it seemed to be the right thing to do.

B: I got the same reaction from John Roades. I got him over.

K: Somebody should call Alpert.

I: I've tried and we can't get him. I am trying to reach Morgan in Pennsylvania.

K: Good. Many thanks. I'll see you all tonight. I'll give you a call just before I leave.

K: Well, is Tasca going going and telling it to the Greeks.

I: That's the suggestion, yes.

K: Is it an order -- you know in this free-wheeling rable I've got -- I'd like somebody -- tell Tasca to go in and tell the Greeks and urge them -- tell them we're doing our utmust to bring about a cease fire.

I: Alright. Fine.

K: Including the same consideration we've advanced to the Greeks.

I: Have you seen the Sisco wire. It's a good one.

K: Hello.

M: Henry.

K: John, we've had a hell of time getting together.

M: I don't like to impose on you.

K: You can't impose on me but I've had a war going on here.

M: Yes. Two things I wanted to tell you. In 1964 we had the same situation in Cyprus as you know and I was the one that got the meeting of the Foreign Ministers of Greece and Turkey to sit down and in Geneva with Dean Achieson that brought the situation that has prevailed for 10 years and I did it by meeting Aristotle Onnasis in Paris. He at that time had a gread deal of influence with Papandreou and he was selected because he had more influence than anybody else and I was selected because I knew him better than anybody else. So, after a couple of days of meetings in which he went to Athens and presented the matter to the entire Cabinet. We were able to bring about an agreement by the Greek Cabinet that they would send their foreign minister to Geneva and that resulted in papering over the thing which lasted for 10 years. I don't know whether any such approach is feasible at this time but that's the way it worked in a similar situation. I thought that might interest you.

K: Right. John, I appreciate this output. I've got the British Foreign Secretary on the line.

M: The other line if you just take one second. When we =- I think it is very important for this Committee, this advisory committee on Disarmament not to meet unless they meet with you at the first movement.

K: I've agreed to come to breakfast with them.

M: You can do that. Because otherwise, G. D. they go in every direction you know and what they need is an outline by you to the perimeters of theproblem and your ideas of which might be done and what might not be done and give them a sense of direction you see. OK. Well, you and I are thinking alot alike on that. If you can't be there then the meeting ought to be cancelled until you can be there.

K: I'm planning to be there.

C: That's right. You know that the ceasefire is broken down in Nicosia do you.

K: No, I do not.

C: Well I think the communities are getting at each now Henry and that's the kind of worse thing that can happen. You get intercommunial violence of this sort and its far more difficult to stop than regular forces.

K: Well, what do you suggest.

C: I've got nothing to suggest at the moment. I'm just feeling a little depressed about it. I don't think that we're going to pull it off you know. What do you think Greece will do?

K: I think they may hold their fire for another 12 or 24 hours but not longer than that.

C: You think if you get a favorable response from the Turks that the Greeks would then consent to come.

K: Well you've made strong representations haven't you?

C: My God we have yes.

K: What do they say to you.

C: What they say is its time we went and talked to the Greeks. That is the Greeks who are responsible. That they don't see why they should be put up against the wall by people who are supposed to be their friends. And much is the same strain. This was the Foreign Minister who then said that he would in any case put it to Ecevit and see what the response was. But our Ambassador got a feeling that things were going pretty badly.

K: Yes. Well....

C: Now, what do we do if it breaks down. If they won't come.

K: Well if they don't come I think we all have to cut off whatever military relations we have with them. With both of them.

C: I think that will be the only thing that will be instrumental in the short run if they really felt that would happen.

C:

C: I'll call you I think if I get some word.

K: Well, its going to be a lonely department when I get back. You called the Turkish Ambassdor. K: There is no sense you doing it. Tell Hartman to call back the Turkish Ambassador. Tell him he did not make himself clear. He wants it clearly understood that the proposal for a cease fire that Sisco is bringing has our total support and that it is his view that it will lead -- that if we threaten it to Greece it will lead to a cut off with Turkey also and we want him to know that as a friend so that there will not be surprised if things don't go properly.

K: Hello

C: Mr. Kissinger, have you talked to the PM in Greece?

C: He said he'd sit tight? Well, now, what Ecevit says to me is this: He says that they would be willing to announce the principle of a cease-fire tonight. I then pushed him and he said he would be willing to meet in Vienna at 8:00 tomorrow morning, local time, in order to submit what he calls very reasonable conditions because they can't agree to a cease-fire without preliminary conditions, and it will be _____ will be able to agree to a cease-fire. I said I would want him to go and I would go myself. He said he would be willing to go, but of course if it were Foreign Ministers obviously it would have to be his Foreign Minister who would agree, but he would be willing to have a preliminary meeting with me. Now our people are very sceptical about all this. They think that once we got there we would find ourselves involved in an awful marathon.

K: Well, it would be the same as that Greek _____ that never existed.

C: That's right. And so, I just wanted to see what you thought. I'm not sure what I think. On the whole, as I like action, I'm ready to go, but on the other hand I don't want to get myself snarled down into a thing that goes on and on and, in any case, would the Greeks be willing to accept a meeting at 8:00 tomorrow morning if the Turks have announced acceptance of the principle of a cease-fire?

K: Well, why don't I call the Greek Prime Minister and ask him?

July 21 - 10:40 a.m.

Kissinger: Good morning, Mr. Prime Minister.

Ecevit: Good morning, Dr. Kissinger. We are in the middle of a Security Council meeting to discuss this matter. We have a problem. We doubt the reliability of Greece. Ioannides word of honor is a joke. We have now figured out what the joke is behind his words. He said we could fire on any ships bearing Greek flags. His ships are drawing Turkish flags!

Kissinger: Well, no one can blame you if you sink your own ships.

Ecevit: No, Dr. Kissinger, they are not our own ships. They are Greek ships. They are Greek ships drawing Turkish flags.

Kissinger; Yes, Mr. Prime Minister, but you can sink them if they are not your ships but are flying Turkish flags.

Ecevit: They are using two tricks. We are NATO allies and the Turkish pilots know our codes. They speak Turkish. They call our pilots in Turkish using our codewords. We can no longer rely on the words of Greece.

Kissinger: What exactly is it that you want? I know you are an intelligent man -- I know that from the days of Harvard. With all due respect, I cannot take this. This can go on for six weeks on this basis.

Ecevit: They say that they want an armistice. It has become obvious that they want to exploit the cease-fire for massing troops on the islands. The Greeks must cease these methods.

Kissinger: What methods should they cease?

Ecevit: They say that they are ready for a cease-fire. They have already shown us the tricks that they will use to violate the cease-fire.

K: Well, here is his proposal and see how that, as they say here, "grabs you." His proposal is that he is willing to meet any place tomorrow.

C: Yeah.

K: To discuss -- not he, but a representative -- to discuss a ceasefire.

C: Yes.

K: But they are not prepared to accept a ceasefire tonight.

C: Humm.

K: Now, of course the Greeks will never send anyone to discuss a ceasefire.

C: Nope.

K: So I have told them this was not acceptable. [redacted] B1

C: Yes. Yes.

K: [redacted] B1

C: Yes.

K: And that shook him up and he now promised me an answer in half an hour.

C: Well, I think I will ring him back because I've been speaking to Kipraiof [sp?] -- he's in a very excitable mood. He wouldn't even let me finish a sentence. What he says is they have been waiting for 3 days.

*1

If they don't have a ceasefire today, then I drew the deduction they would extend the action straightaway. But he has just gone off to see the Prime Minister, whose telephone number he gave me as 603018. They are to have a meeting there and I gather the decision is to be taken at 7 o'clock local time.

K: 60318?

C: No, 603018.

K: 603018.

C: That's right. And I think If they get on to them there, you'll get the Prime Minister.

K: Okay.

C: If you like to try that.

K: And you talk to Ecevit.

C: And I'll talk to Ecevit. And then, incidentally, Caprell (sp?) said that they would be willing to go to somewhere like Geneva or Vienna after three or four days because they were very tired.

K: [Laughter]

C: That the public -- don't laugh, Henry -- That the public is very angry and because the public is very angry, they cannot wait beyond the day.

K: Yeah, I understand. . . . Will you [play] with Ecevit and you can tell Ecevit that he doesn't have to worry about Sampson.

C: That he doesn't have to worry about what?

K: Sampson staying in office.

C: Why?

K: Because we will support his removal.

C: All right. Okay, okay. I'll tell him that. And then we'll exchange views again later.

K: Right.

C: Goodbye, ole man.

K: Hello.

C: Hello Henry.

K: H Jim.

C: Yes sir.

K: I just talked to the Greek.

C: Yes.

K: And I don't think he quite understood the proposition. We thought that there would be a ceasefire tonight and under those conditions he would have been willing to meet Tuesday morning.

C: Yes.

K: Which was a change of his previous position.

C: Yes.

K: Now he is - when I explained to him there would be no ceasefire tonight, only the principle of it -- he said he would have to consult his colleagues and I just sent Sisco in there to talk to him.

C: Yes, yes.

K: I have no definitive answer. Now do you think if I brought some more pressure on Ecevit to accept it.

C: We were wondering we had so many interruptions in our phone call whether he was being pulled back by other people in the room.

K: Whether he was being what?

C: Pulled back by other people in the room. Because our phone call was interrupted three times. I think he is under pretty considerable pressure. But ah I think - I have come to the conclusion before you rang me that if the Greeks wouldn't accept this we have got to put more heat on to Ecevit. It depends upon how you assess the Greek position. Do you think the Greeks will come on? Let me read to you something that I have just written - scribbled out here as something that could be said under certain circumstances. Following quote "Following

discussions with the Greek and Turkish Governments the British Government understands that both sides agree in principle to a ceasefire and will send representatives to meet in Vienna at 8:00 a.m. tomorrow to discuss the modalities of its implementation. The purpose of this meeting is to put into effect paragraph 2 of Security Council Resolution # 353 and the British Government urges all concerned in the meantime to cease all firing and to defray information which might further aggravate the situation. The British Government will be represented at the talks.

The wording of that picks up paragraph two of the Security Council Resolution which they both say they accept. Now do you think on reflection after having talked to them that the Greeks would accept that?

K: I doubt it. But I am not sure.

C: It is your target(? ?) Henry that I think if you think -- well all right then if that is the answer to the first question

K: Well let me find out - no let me first find out what Sisco is going to bring back from them.

C: All right. But then if you doubt it and if he brings back an adverse report, then the second question is, if they don't accept it what do they do?

K: That is a good question.

C: [redacted] B1

K: Well, I don't know.

C: All right. Well, let's assume the worse. Let's assume that it does mean that and that you get worst raging(?) then you have got now and I think we have got to turn the heat on Ecevit tonight and get him to accept the ceasefire not in principle but ah in actuality.

K: And it ought to be

C: And also I don't know what are these modalities that he will want to discuss. They could be very complicated and very tiresome things. Are you provising (? ?) it preventing the access of ships monitoring their entry and all the rest of it. Couldn't

K: They are bound to be.

C: Do you recken it will be cleared up in two or three hours.

K: I doubt it.

C: You are skeptical.

K: I am extremely skeptical.

C: Well, then, you see we keep coming on in circles at the moment, don't we.

K: Well, if the Greeks accept this proposition, then I think something like your statement would be excellent. If the Greeks don't accept that proposition, then we have trouble.

C: That is right.

K: And we would be prepared to join your statement or make a separate appeal.

C: Yes, yes. Well I think you ought to have a separate, a separate one because you have done so much work on it and we will be associated with the talks, you see. Don't you think that would be better.

K: That is fine.

C: I don't really mind.

K: No, no let's do it - we can do it separately.

C: I think we had better probably because we work in tandem so well today that I don't mind a joint statement but I think on balance that we have got to be part of the talks probably you had better put a separate one out.

K: That is fine.

C: Now, Henry, we haven't yet gotten it, have we.

K: No.

C: You will wait for Sisco?

K: Let me wait for Sisco.

C: Shall I ah - I shall not talk to ~~EKK~~ Ecevit again yet then.

K: Well, --

C: Because I may have to turn the screws on harder if you will. I mean, I think if Sisco comes back with a very adverse report, you will have to go in hard on Ecevit and then when you finish with him I will have to go in hard on him.

K: That is right.

C: And you let me know as soon as you finish with Ecevit and --

K: I will let you know as soon as I hear from Sisco.

C: Yes. Well, you let me know when you hear from Sisco. Then we can decide whether you want to talk to Ecevit and then you let me know when you have finished with Ecevit and I will go in and do the mopping up process.

Conversation between Secretary Kissinger and James Callahan, British Foreign Secretary July 21, 1974 - 11:15 a.m.

Callahan: Hello, Henry. I have read the telegrams and also had an interesting report myself from Athens from one source. Any changes made will be for the worse. Therefore, I believe we ought to remove any excuse for widening the problem. You should take a bit of a risk in telling them what the Turks are willing to do and as far as I am concerned, I would approach them and say we hold ourselves ready for talks which are available -- suggest perhaps in Vienna. The Turks are available, and as far as I am concerned, we are ready.

Kissinger: The Turks are not ready for a cease-fire. Ecevit is using the excuse of Greek fleets in Cyprus. He says there are Greek ships carrying Greek flags. There will never be an end to this. He says that they are speaking Turkish they learned in NATO. I said that no one could blame him if he sank ships carrying Turkish flags; they are his own ships.

Callahan: What did he say to that?

Kissinger: [redacted] B1

Callahan: The situation will be worse tomorrow.

Kissinger: I will tell Ecevit we need a cease-fire tonight. [redacted] B1

[redacted]

Callahan: How will that move affect the Greeks' move toward the USSR? There is some suggestion of a move that way.

Kissinger: In Greece.

Callahan: Would your bluff be called?

Kissinger: My bluff would be called if we went to war anyway. [redacted] B1

[redacted]

Callahan: What will you say to the Greeks?

Kissinger: I must talk to the Turks first.

E: Well, you see, Mr. Kissinger, I wish I had the chance to talk these things over with you as well as Mr. Sisco. We have followed the policy recommended by America in Cyprus for 10 years and where have we ended? We have different ideas about it. We believe that _____ Turkish peasants in Cyprus is the best guarantee against Communism.

We want to make good use of it. [Beeping noise on line.] I mean, if Turkey were effective in Cyprus, there wouldn't be much more of the danger of Communism in Cyprus than in Turkey. After all, ...

K: Yes, but that outcome -- Cyprus cannot become part of Turkey.

E: No, I'm not saying that at all. But if Turkey were effective there, if Turkey was to be influential enough to help in Cyprus to prevent it's drifting away towards Communism , that would be the best guarantee.

K: Yeah, but that can only arise from the negotiations.

E: We were not given this opportunity up until now and we are not trying to seek it through our rights in the Treaty.

R: I just wanted to give you...60 seconds of what went on with the Committee this afternoon. The impact was good. I started to make a hard _____ in terms of the method and actions of the FBI. I wanted to mention to you one point, and that is, I did tell them about our .....assessment during your work in the...and your work on Viet-Nam and I said that if you said something to me, I would believe it. There seemed to be general agreement around the table. I understand Haig will be coming on later. As far as you know, nothing Haig will say will undermine my veracity. I said if you were to say something to me on this subject, I would believe it.

K: It is not inconceivable to me that in one or two cases, Haig may have received orders from Haldeman or the President, as orders of the President. It's inconceivable to me that Haig did it on his own. There is no possibility that Haig would say I gave him orders to do things beyond what I have testified. I don't know whether you saw my statement.

R: No. They read two or three.

K: The backup material helps my case because it is now clear that the first four cases were done under Hoover's recommendation. It is clear that 3 of these people I had put on my staff against Hoover's recommendations so I wo uldn't have tried to prove him right..which proves Hiag was right all along.

R: ...that Hoover would make no...He never interfered with my ability to make a judgment on...or security matters.

K: In my case, he has, of the names given, 3_____to me and the 4th turned out to be an espionage agent.

R: And the 4th was Henry Brandon. That was ridiculous.

K: I know. That was Hoover's view. There were four cases where the ~~FBI~~ FBI.....signed a statement saying I just had a call from Haig who said that he had just been called by the President that the following four names should be put on the list.

K: My guess is that unless Haig's testimony sets them off balance, they are likely to say that after the most careful and meticulous re-examining they have no basis for changing their original judgment and will reaffirm the point that this whole business of wiretapping needs to be looked into by the Muskie Subcommittee.

K: My impression is, in fact, they were a littletoo easy on me this morning.

R: I will be criticised a little for some phrases. I said talking to J. Edgar Hoover was like talking to De Galle. Well, I am going back to Atlanta tomorrow but I wanted to express to you what I said about my confidence in your veracity and make sure that Haig will not undercut me.

K: No possibility of that. You know I appreciate this.

E: I just did. He should come in 10 minutes.

K: Good. Give him my regards. Now, may I ask when should the talks between you and the Greeks start?

E: I have talked to Callaghan and he was wondering if ~~x~~ the Greeks could attend the conference in Geneva. I said I don't know, they don't seem to have a government but I said unless we hear from the Greeks to the contrary, Callaghan and Gunes will be in Geneva,

K: I think that is a mistake.

E: They may be able to appoint a Foreign Minister and send him but they have decided not to hold a private talk session but offered to open the ~~xxxx~~ meeting and wait for the Greek Foreign Minister to come. If he comes, alright, if he doesn't____. Wait, I just received a note....I mean they will attempt to open the conference and wait for the Greek Foreign Minister to arrive. I will not have an American representative there before Thursday.

E: Excuse me?

K: I will not send Buffum there until Thursday in any event.

E: One moment please. We have just received a message from Mr. Callaghan and he suggests that although uncertain that Greece can attend, they should still meet and discuss what to do. In the meantime, there are sumors that a delegation headed by the ex-Foreign Minister might go to the Geneva meeting. This is a message I just received from Geneva.

K: We will not send anyone until we know that the Greek Government is sending a representative.

E: They may send -- it doesn't have to be a Foreign Minister. ~~x~~ We have heard nothing to the contrary. Of course the conference will not be officially started unless the Greeks attend.

K: Whatever you want to do, you should proceed doing. If you have agreed to send somebody to Geneva with Callaghan then you should do it. I have no right to get in the way.

E: I didn't understand.

K: We cannot get in the way of an agreement you have already made with the British. But, I would prefer to know that all parties are coming.

E: Certainly. If word reaches us that Greece cannot attend the meeting tomorrow, then we will cancel it, but we have heard nothing so far.

K: But they don't have a government.

E: But their's is a different system and there is still a President and they can send a representative. According to a note I received, the Greece delegation headed by Gunes may come. If we postpone Callaghan and Gunes going, it would be worse. Gunes will ask our Embassy in Athens to approach whatever authority they ~~xx~~ can find and ask if they will be represented.

K: That is a very good suggestion. We will approach them too.

S: Ok. He was thoroughly thrilled when he got to Moscow this time, when Smirnov, head of Soviet weaponry, said he was downright insulted that Americans like Senator Henry Jackson would believe that the Soviet s would put brand new missiles on old diesel submarines. That is what Kissinger has been saying to his critics about the so-called treaty "loophole", so when the Soviet -US heart agreement was signed in the Kremlin, Kissinger warned Smirnov , I don't want you putting your, putting any articifical hearts on those old submarines.

K: Yes, I said they can't put heart machines on those submarines either.

S: Ok, can't put any..

K: artificial heart machines on these submarines either.

S: Ok, good. There we go. And it is part of the legend now, that Kissinger came away from the negotiation session [redacted] with the Soviets once and said I would do anything for caviar, and I may have. Is that right.

K: That is also essentially true.

S: Back in '72 when the Russian did not start carry Nixon to Kiev, the mortified Alexi Kosygin asked if the Minister of Aviation ought to be shot, Kissinger tried to soothe things, explaining the inherent evil in objects: dropped coins roll away from a person, not toward him. Buttered bread falls butter down in direct proportion to the cost of the carpet . Kosygin eyes Kissinger and said he didn't agree. Kosygin had dropped coins that rolled toward himself. Kissinger changed the subject.

K: Laughter.

S: There is something in the world now called Henry's groupies. They are his former Harvard students. You can find one or two in almost every Government that we encounter. The Secretary flies in , there is a little meeting with the old seminars, that sort of thing. Oh, yes, here's one. Kissinger has been offered the choicest girls by at least one of his powerful hosts . He graciously declined. Even though it was in bachelor days. Once the offer was so insistent that he felt like accepting and then telling this host to hurry and take the pictures they wanted, so Henry could get back to work. Is that too delicate.

K: That, if you can avoid that, that might be a little bad.

S: Ok. We can take that out. Let me see, what else. Oh, he called for a massage once in Israel recently, and then you can say anything you want about Jewish intellectual attainments, he reported, but that guy almost killed me. And then, Kissinger's fascination with soccer is such a relatively new discovery. Reporters wormed it out of him that he had broken his hand when he played goalie as a boy in Germany; shifted to forward. Was he pretty ~~xxkxxx~~ fast, someone asked. Kissinger thought a moment. I wasn't so fast, he said laughing, but I was tricky. And then, Kissinger like Nixon has found that sports and politics have much in common. So a while back when East Germany was still in the world soccer contention, he sidled up to a Soviet official, "I bet I know one team you don't want to win" said Kissinger. East Germany, because if they win they will be more trouble than ever. The Russian roared and slapped Kissinger on the back for displaying such wisdom in the ways of this strange world. That's it essentially.

K: I think that's very friendly.

S: No, no. It is just good nature. I must say we are so burdened with heavy stuff , it seemed to me that essential in your success is your enjoyment of the job.

K: Well, I appreciate this and it was fun to have you on the plane.

S: Oh, goodness, Henry. I wouldn't have missed it. You know, I kept saying I was going to roll off but.. howis the rest of it going?

K: It is going along ok.

S: Is it easing out on this whole business?

K: On which.

S: Oh, just the whole trial thing.

K: I think, you know, now that I look over the evidence and so forth. I think I'll be fine.

S: I was worried that in court there would be cross-examination and all of that sort of thing, but it seems to me that this whole thing is breaking down. This business of involving you and that, but we'll see.

K: Well, I hope so. Anyway, I have that impression.

S: Strange days. Listen, I will guard you on this. No state secrets. Just good warm fun.

K: No, this is very friendly and I appreciate it.

S: Ok, good luck.

E: We have sent a liaision officer in good spirits with excellent english. He should be there sometime tomorrow.

K: He told the British and Cypriots that you are going to take the airport in two hours.

E: This is not true. I have talked with Waldheim, Macomber and Callaghan about it. There are confusing reports. It seems that because the Greeks were using the airport for transporting armaments and military men, our military units took over the airport and offered it to the UN forces. They did not arrive for a long time, so they had no alternative.. hello? Hello?

K: I can hear you.

E: They had no alternative but to take hold of it, the airport. The British forces arrived there and claimed they had certain legal rights at the Nicosia Airport based on the agreements. Our people accepted that the British had these rights based on the international agreements and we said we will agree to respect the British rights at the airport and we are doing that. According to the UN, it is not in control of the UN force but surrounded by the Turkish forces. What ever the position may be under Turkish control or UN control, Turkish forces have strict orders not to get into conflict with the UN forces but we are not clear about who really controls the airport but whatever the situation our people will respect it and maintain it. We may have a disagreement with the UN but Gunes will discuss with _____ in Geneva. UN claims they have right to control airport. We say why didn't you exert that when airport was in control of the Greeks. We ask for the protection of the helpless Turkish units..so this is the point. We are not going to cause any confrontation with British forces.

K: . . . It doesn't do me any good to make one of these hackneyed speeches. What I now have is a sort of a B+ Cabinet level speech. What I have to do particularly at this moment is to give a strong lead of what our foreign policy really is in order to stop this debate. Take the Nitze article today. I don't know what he is talking about.

N: I had the feeling he wanted to really get something off his chest. He wanted to say the Pentagon is responsive to it.

K: That isn't my point. If the President wants them they will do it. But the question is that before the President orders them they create a frame of mind so the President can't. What I wondered is whether you could do it and forget the length, but do a careful analysis of what we are trying to do. First, the strategic situation. Secondly, our timing in SALT and thirdly, the issue which is more imminent, our potention loss of superiority. Fourth, what we did in SALT I and fifth, what we are doing with the 10-year program. I want to navigate between a sure destruction and sure strike capability. It is a disaster for us politically if the Russians have a (better capability than we do). We have to make a moderate effort in the strategic field to protect ourselves against _____ we cannot now imagine. Second, political responsibility as I mentioned before. I cannot define what military superiority will be like in the future. I don't want the U.S. to be so obsessed with the. . . . . .

N: I agree with everything you said.

S: Yeah. Well we had gotten that report some place or other.

K: That's fine. I'm doing a paper which is basically an expansion of what I said to Brooke---which, if eager beavers in Defense don't pick it up--could start a fight over---to be supportive of you.
What we cannot have is the Zumwalt line. That is what I'm attacking.

S: Right.

K: I'm attacking the Zumwalt and Nietzsche line because that is contrary to the President's policy.

S: That is clear. The point is, Henry,that this is a mute issue.

K: In fact, I hope you are going ahead on the Minute Man 3 -- going ahead on the production.

S: We are prepared to do that. We have just gone over the options and the feeling was that we had better start--putting more money on the throw-away missile.

K: That, too, I would strongly support. Can't you do both?

S: We can do both--but it costs money and we're under pressure to reduce spending. But we can do both.

K: So far as I would strongly support with the OMB and the President.

S: OK, well, part of the problem is that we have received a budget line that is ludicrously low from the OMB. But we can talk about that when you get back.

K: OK, I've asked Scowcroft to set up a breakfast as you suggested.

S: Don't let that other matter bother you. I dismissed it two days ago when we chatted.

K: Haig seemed to think that it happened yesterday.

S: He's wrong on that.

S: I'm pretty sure I called him before going over--

K: Well, he has been under so much pressure that the days may...

S: In fact, I think I called him on Tuesday.

K: The days may easily run together in his mind.

S: But once again, what I said to Al was that if this is so, this is no good.

K: No, Al didn't mention it to me critically. He mentioned it to me as an example of a tendency to pick fights. He knew I wasn't doing it. But that is not the point now. You ought to know that whatever may be in the press that I have never done anything but support you with the President.

S: Very good.

K: And I just think---it is like fighting for the captaincy for the Titanic.

S: (laughter) I wouldn't let those things worry you in any event.

K: I don't let them worry me. I can easily handle them. But, it is not doing the country any good. OK, Jim, I just wanted you to know from me that there was no task force going on and that my statement while it will be ~~pblx~~ phrased in a way that acceptable to the Senate For. Rel. S: Hello.

K: Mr. Chairman.

S: Yes sir, how are you, Mr. Chairman?

K: OK. Mr. Chairman, I've given a lot of thought to that meeting with the Committee yesterday which I thought was really a very useful one.

S: Yes, I think so too.

K: And I wondered if I could ask somebody who's talked to you as a friend on other occasions make one observation if I may.

S: Yes.

K: I believe that the origin of most of these disagreements that you gentlemen refer to is not in the State Department and I want to reaffirm to you again that I don't think the country needs a dispute between me and Schlesinger right now.

S: Yes, I think you're a thousand percent right.

K: And secondly I don't believe there are any significant differences between me and Schlesinger.

S: All right. Good.

K: You know minor ones on this or that number in a proposal but they do not go to the heart of the issues. And I thought I was saying that to the Committee yesterday. But I wondered if you could on a personal basis talk to Schlesinger and urge him in the same direction.

S: Yes, well I'll be glad too.

K: And you can assure him from me from what I said before the Committee that I will meet him three quarters of the way. But quite honestly I think they made most of the mischief that led to this Jackson hearing.

S: You think what, Mr. Secretary?

K: I think they made much of the mischief that led to the Jackson hearing. They knew it was total nonsense and they could have just put out a statement killing it right then and there and they never did.

S: Yeh. Yeh.

K: I don't want to get you involved in the middle here because the issue isn't what the past was. The issue is that with our President being under the attack he is, we cannot have foreign governments see the two senior officials who have to handle crises in disagreement.

S: Well, I think your a thousand percent right and you're going more than half way in trying to remedy that situation.

K: And I want to tell you as a man you've seen me in action for five years, I give you my word, that I will not let it happen if it can possibly be avoided, and I think that if the Defense people show any cooperation it will be avoided. I was wondering whether you as a patriot and as somebody who is the Chairman of that Committee might not give Schlesinger a call and give him your impression of my testimony. You can hook it to that. So then you're not mixing into anything.

S: I'll certainly do it and I'm glad to. And I'm interested in it and concerned about it for the country's sake and I just -- I'll talk to him along that line and tell him that you and I were very frank at the table there and you were with all of us and so forth.

K: But that I supported him. So that he doesn't think that I went to his Committee behind his back.

S: Oh no, he couldn't think that. Remember I brought this up.

K: That's right and as you recall I strongly supported him.

S: Yes sir.

K: And also I want to tell you Mr. Chairman, if you ever find anything being done either by me or the State Department that you think makes an unnecessary point in this call me up and let me know and it will be remedied immediately.

S: I certainly shall and you're doing amighty big job in a fine way. I don't want this to bother you too much.

K: It isn't bothering me too much, but our country has to go on, Mr. Chairman, and these things will be forgotten long after the issue -- in a short time, but the country must now be preserved. You know I'm very worried about what's going on.

S: You know it's no time for you to be saying that and being concerned too. I'm concerned about the country. I meant that I didn't want you to be too much concerned about this. I meant to your detriment. You just keep going. You're doing a fine job.

K: Thank you, Mr. Chairman.

S: I'll give you the impression of what he said. I think I'll just go over there and see him rather than just call him.

K: That would be even better, Mr. Chairman.

S: All right.

K: Thank you, Mr. Chairman.

S: All right. You have a nice weekend.

K: Thank you, Mr. Chairman, my best to Mrs. Stennis.

Somebody wrote me from Germany saying my wife should run and become President and then I could exercise the duties of the office but that I tell you is due to the fact that that letter writer didn't know my wife.

S: (Laughs) How are you?

K: I don't think she'd let me live there if she made it.

S: All right.

K: It would go well if you have a picture of Judy Brown with it.

S: Well, I have that and she's with Sakharov, etc. Sakharov says that you are the salvation of the dissidents.

K: I, Henry Kissinger, how am I salvating them?

S: You're the only salvation they have because if you forsake them -- for example, if those other people can accomplish whatever you want without the indiga of the dissidents being thrown into the equation, they'd go down the drain. But if you include their interger in that equation they'd survive so you are really the key man in their survival. How does that sound to you? Do you think there's any truth to that?

K: I appreciate it and I simpathize with them.

S: You are the last giant oak in the forest insofar as they're concerned. Whether you accpet that or not is something else again.

K: I'm pleased to let them think that.

S: The point, I think Mr. Secretary, is how you play it. If you play it up front with disarmament so that it takes on equal importance which I think is maybe the Jackson position, politically [redacted] anyway, that undercuts him if you do that. Or you play it on a back burner which then gives him a little move. Right?

K: Yeh. Well, what matters is what works. I'm not doing it politically.

K: I had a very good session this morning and if you follow the same route we're home free. Almost everyone agreed to clear us. Starting out on Kraft____they asked about that. I said that is all nonsense. Haig never did anything that he was not ordered to do and Haig never did anything I was not aware of. So the, that reduced it to Saffire.

H: They said what about Saffire?

K: I sa d I didn't know about it and I assumed Haig didn't know about the tap. They said how does Haig's name appear on that request. I said, I don't know. I don't know how they kept____on this. That is the only area you have a problem. All the rest of the stuff____ On the Young thing, I said I have no reason to believe Haig knew Young was requesting an investigation.

H: An investigation of wha t?

K: I knew Young was doing that one interview. I'm just talking about the Kraft article.

H: I don't know wha t Kraft is saying.

K: At any rate, the major problem is at the hearing this morning, it was so embarrassingly white-washy. I don't see how they can publish the transcript. A number of them made speeches saying it was a lousy method. It was amazing. It was embarrassing.

H: That's good. That Kraft piece came out of Saffire. I'm so damn mad.

K: In my view, you should stay quiet. If you stick with me on this you can't hav e any problems because we accounted for all of them. I have not created an independent role for you. It's filthy. He's going to write his own before the week is up. I would not get into an independent defense or they'll come after you. You see what I mean?

K: The record this morning is embarrassing. It's a total clearing. They cleared the whole process. They started out trying to go the Kraft line and then gave it up.

H: Who's the tough guy on that?

K: Who was he.. Well, Symington isn't after you. He's after Haldeman and Ehrlichman. He says these guys always found some legal body to cover up what they did semi-illegally, like the CIA or NSC. That you know is true. Church was sort of semi-niggling. They subsided almost immediately. They said is it possible Haig did things on his own, I said no. They said is it possible he did it on the President's orders. I said I can't think of a single case....How do you accou for the Saffire tap. I said that the Brandon tap, I know Haig didn't have anything to do with it. I said take the first four, they never pursued it after the first three minutes. Javits was the guy who raised you. But, after the first three minutes your name was never raised again.

H: Ok, when are you coming out?

K: On Thursday night.

H: When do you plan to leave?

K: Saturday afternoon, why?

H: What time do you arrive Thursday?

K: About 9 or 9:30.

H: I just wanted to be sure we have that for the press.

K: I'm bringing Genscher with me. You'll see when you read this thing, if you stick to what I said, it leaves you out totally. In what I said, you're just a transmittal agent. I just wanted you to know.

H: That is virtually true. I don't know how to handle these cut-offs. I don't know who did it.

K: That is what you should say. I don't either. On the cut-offs, say I just don't know how they were cut off and that's exactly what you should say. Just say you don't know. I don't know either. I think the major problem is this is going to be an embarrassment. It was so easy.

H: I don't worry about that.

K: Unless things change course during the week.

H: That' can't happen.

K: I doubt it. They're looking for not the culprit, that's one thing -- their line is that nothing wrong was done.

H: Did they get into those other two guys. I don't know anything about this.

K: They didn't even mention you. They said, in orther words, you gave names that were tapped___it was all me_____they may come to you. Just read what I said. First, it's the truth and you see___nothing was done. It isn't that they are looking for a villian and thereby clearming me of something. They're claiming nothing wrong was done.

H: You think I should make an opening statement?

K: No. Just go up there without a paper before you and answer questions.

H: That's what I planned to do.

K: I wouldn't try to be clever. It's better to say you have no recollection. They are convinced these records are a mess. Dean Rusk is testifying this afternoon. --saying it is ridiculous to think that ~~xxxxxxxx~~ -- and that you would only act on a directive from the President.

H: Alright, good. Everything going alright in Cyprus?

K: Yes. There is a coup in Greece and _____has been brought back. You see, all the ____guys w ll come out perfectly. We've got to get Tasca out of there. That I have to talk to you about later. That guy is no good. I don't care what line he used with the President.

E: I am reading you now. The text that Mr. Callaghan proposed to us this morning we accepted. The three Foreign Ministers agree that consideration should be given to the possibility of the eventual disarmament of the Republic of Cyprus and the desirablity of elaborating measures and meet the reductions by ~~xxxx~~ numbers of armed forces and of war material

This was propsoed by Mr. Callaghan and we accepted it. But after the Greeks (inaudible).

K: I understand your position Mr. Prime Minister. The difficulty is that I think it is in your interest to settle this. You gain sometime before the political negotiations start. So without going into the merits of the various proposals it is clear one should not exploit your good intentions but you should not maneuver yourselves into a position where your opponents can exert pressure. That is my concern. Now if I understand it there are now two texts before us. One is a text that Mr. Callaghan proposed. There is another one he put before you which you rejected.

E: It was put before us previously but I brought it before the government and we accepted. It is formulated by Mr. Callaghan.

K: I understand. But now another proposal has been made.

E: The reason is that we accepted this proposal by Mr. Callaghan but the Greeks have not accepted it. He gives us an ultimatum to accept a proposal acceptable to Greece. I do not understand it.

K: Let me ask you this. Suppose I sent Buffum to your Foreign Minister.

E: I was having a talk with a friend of mine in Greece. I understand at this moment our Foreign Minister is talking to Mr. Buffum, actually.

K: I have instructed Mr. Buffum not to make any concrete proposals until we have talked.

E: What are you going to instruct him on?

K: We are trying to find some compromise between your text and the Callaghan text. We are not eager to come forward with an American proposal. The text he is now giving you is acceptable to Greece.

E: I am trying to be both peaceful and realistic. We don't have to reconcile with Greece but we want to make things easier for them. We do not feel ourselves obliged to come to terms with them on every point.

K: I am looking for a solution which is in between these two proposals.

E: We say clearly to the world that we are on the island. We have to remain there for sometime in view of our differing experiences in the past. For several days we have thousands of Turks who are in prison under the Greek regime and the UN will not help them. They are left there helpless. We cannot deceive the world by giving the hope we are speculating.

K: I understand this but what we have tried to do...

E: Not unless, not until a state for the Turks is established on the island.

K: Why don't you let me send a suggestion to Buffum and you consider it..

E: Another text.

K: Another text. It is not the Callaghan text.

E: May I have it first if at all possible.

E: I would prefer it.

K: All right. Let me do this. I do not have it in front of me. Can I have someone call your office in 5 minutes and dictate it? ~~xxxiii~~

P: That's right.

K: I wanted to get your guidance so it would be of most use to your committee. I thought I would not make a substantive statement. I would be glad to, if you want me to. I'll say a few words about the budget and then your committee could ask questions.

P: I know you've been busy. You can justify the overall ___ and the work the State Department has to do and that the items have been approved.

K: Then on substance, you don't want a review of the world situation in a statement.

P. No, no, something along the line of a brief statement, then questions and answers off the ___.

K: It would take me about a half hour and then give the committee a chance to ask questions. I will make a brief statement without going into any details of the overall budget.

P: Good. That will be the only part of the meeting that will be released to the press.

K: How are you, Mr. Chairman?

F: Fine. I meant to call you but I have been in a hearing until a few minutes ago with General Haig.

K: I didn't know. Oh, you switched it from this morning.

F: We had to. Senator Morse's funeral was this morning.

K: Galbraith told me you gave one of the most moving speeches he ever heard.

F: Who?

K: Ken Galbraith.

F: Maybe the shortness appealed to Ken.

K: He said it was extremely moving and affectionate.

F: I didn't get a chance to talk to him. I had to go to a board meeting.

K: What I called you about this morning, Mr. Chairman, is, I am working with my colleagues on the statement for the detente hearings. I don't know how you visualize the proceedings. Would it be an all day or morning session. What is your view.

F: I thought of it in the morning because I didn't want to impose on your day too much. I wanted to take full advantage of it if I can. Unless you have other views

K: We're discussing two ways of going at it. We have draft about a 35 page statement which deals with the whole political context, including SALT. Including the whole strategic issue. I have been working with John Newhouse to do a much longer piece on the strategic issue. You can't really cover it in one statement. I could submit these documents and do it in one whole hearing.

F: We could have a hearing in the morning and then arrange to have one the following morning. I would prefer, if you have the time, to arrange for a second session the next morning. This is an educational adventure.

K: We could conceivably do it in two successive days. Could I look at my schedule and see if I can do that.

F: This way the press/is alive and so forth.

K: Are you absolutely committed to doing it on the 8th?

F: You have me that date. I don't think it could not be changed. I don't have my schedule in front of me.

K: I think it would serve our purposes best if my statement were as outstanding as I could make it.

F: You were awfully good at the generalization. Submit the long documents. How about perparing your own statement. I'm thinking about the media.

K: I will not speak for more than 20 minutes. I thought it would be better for you if I had a long statement so there would be one document of what our detente xxx view is.

F: Good, that would be for the press and others.

K: No matter what I say in a 25 minute statement they can take anything out of context and start shooting at it. If we have a long statement it protects us against the sharp shooters.

F: It would be impressive and we know you can be. What you said xxx on the critics and so forth. That would be part of the record.

K: Let me have Eagleburger get in touch with Holt tomorrow morning.
to check my schedule.
F: I'm not in my office. I personally am free that week.

K: If we want to slip it a few day that would not be ___.

F: If you wanted to come the 7th and 8th....the following week Jackson is coming. We thought we would lead by the two proponents.

K: I do not want to slip it forward. I want to slip it backward. When are you having Jackson?

F: On the 13th. You gave me the 8th and 9th.

K: You followed my suggestion. It's entirely my doing.

F: I think the 8th and 9th, if you can arrange it and cut it off at 12:00 to 12:30 and continue the next day at 10:00 to about 12:00. He'll come on the 13th. I forgot the rest of them. Jones is handling that.

K: I think on the 8th we may be in between the committee and the House.

F: I think that's right. That's good.

K: That's an argument to keep it on the 8th. I'll be in touch tomorrow morning.

F: I think that will be our main impact, your opening statement.

K: I don't think you would be heartbroken if the impeachment was on when Jackson testifies.

F: How do you feel yourself?

P All right.

K: I'll be much happier--only if you call me by my first name.

P All right, I'll do that Henry. Look I've got a letter from the Providence Chamber of Commerce from its President. I know this is an unusual thing but it is a hell of a ---- affair. Now I don't know what your policy is, but I've got to get in touch with these people--they are asking me that because of my relationship with you if you would be willing to address their annual meeting in October of this year--on the 10th or date in October that you would designate. Now I don't know what your policy is--

K: My policy is--I've got two contradictory policies--one is not to accept such invitations and the other to do almost anything within reason that you ask me to do. Can you send that letter over to me and I'll try my damnest to see whether I can do it.

P All right.

K: Does it have to be a very formal speech?

P Oh no, no no. Not at all. I mean these really--the business and industrial and leaders of the community--it is a very, very fine group, bankers and and the industrialists and ~~xx x xxxtxx xfx~~ the manufacturers, it is a high-class group and I have had occasion to address them from time to time--even when I was governor. And naturally of course if you decided to go, I would be privileged to introduce you and--

K I'd be very pleased--

K: No, I wanted to talk to you. Our view is this. In this particular proposal you made, it isn't consistent with ours. It goes beyond it. What we would prefer is to begin talks with you first and based on the result of these talks we would then join in at the UN but we question if it is desirable to do it through the UN when we are having bilateral talks.

V: We would have 2 months before the General Assembly.

K: Anatoyl and I agreed to, that is the first definition of the topic is not in the language we had in Moscow. It is your language.

V: Yes, not quite. It is broader. So you would prefer to do it the way it was in the Communique and you don't wish to join us on this move. I understand from a telegram that we got that we are to do it anyway alone on the broader basis.

K: While I have you on the phone, there are a number of things I want to talk with you about. First, we are making progress on the Jackson Amendment and we are doing it through a letter. It is my interpretation of a conversation I had with Gromyko--of course we won't mention Gromyko's name. I may show it to you next week. Maybe you and I could have a review of the situation next week.

V: On what?

K: I may have Sonnenfeldt tell you what we are doing that involves Moscow/US relations. We are working on SALT and other areas.

V: On the Middle East, are you making progress? You are talking now.

D: It was a lovely evening last night.

K: And substantive too. And it was the frankest talk that has ever been held below Golda's level.

D: Yes, and he is the only one who can have this kind of talk...I would say that...

K: I could see you suffering from time to time.

D: No, no. I didn't. There is one thing I have always tried to keep in our relations, so sometime when my colleagues take extreme positions, I try to...

K: I just wanted a direction from him. I have enough now to be able to talk generally.

D: It wasn't suffering on my part, it was a concern that you realized enough to place it in the right mosaic. The idea of something negative would never be accepted...what he thinks of as the final solution is the lowest of denominators of what he can get. But it was important to express the view.

K: I don't think we should worry about the final solution. Any attempt to getting a final solution will lead to war. I don't think we should face that now.

D: I don't think that was the intention.

K: I talked to Schlesinger this morning as I told you. I do not have the impression that _____ was as much of a surprize as you think. The real problem is the one I have given to you. You can tell Allon that he is not going back empty handed so he can ease his mind on that.

D: Do you think he will have results before he leaves?

K: Yes. Unless there is a paralysis at the White House this weekend.

D: I heard reports that he was aboard on the boat last night with his friend. And about you spending time at the White House...

K: I am working to give him some items from both lists.

D: Let me understand...I want to know with regard to the special list the need.....

K: ON everything, the need to approve...but I am not blaming it on Schlesinger.

D: Also on the expenditures....

K: But I think we can do something on both lists. I have Haig, Scowcroft and others lined up. I will probably give you informal word and let formal word come through Scowcroft and that will make everyone happy.

D: I will be in New York over the weekend.

K: But we can reach you?

D: Yes. I want to thank you again for last night.

K: Well, if we can keep this confidence we won't fail. There are now some positive factors.

D: Is Sadat planning to come in November?

K: That was the original plan.

D: The Egyptian Ambassador was saying that last night....that Fahmy will come next week and Sadat in November.

K: That was the plan and then we will give him nuclear weapons.

D: No, we have to know your intentions... the State Department has not been helpful. They have been feeding the press.

K: We have had a very tough note from the Russians about your buzzing their ships that are engaged in minesweeping. They said two Phantoms took runs at them yesterday simulating attack runs. That if this doesn't stop they will take military action to protect themselves. That they expect the United States to take appropriate action. I told them that the last sentence was totally unacceptable. They didn't need to say expect...We would not stand for unilateral Soviet military action in the area, but I do not think this is the time to get into a confrontation.

D: Did you get the message I x passed to you last night?

K: Yes.

D: That was what I expected they might plan. [redacted] B1

That is one thing. Secondly, we have not, as you know, crossed into the middle zone to buzz them but they xx were sending their helicopters to take photographs and survey and gather intelligence on our aircraft.

K: The first is what are the facts? Second, is what we do. First, would you get me an unsigned note in response to our representations on just what you have just told me. Then we can aske them to exercise restraint. Would you tell them to be careful. The Soviets are looking for some opportunity to show how tough they are. I have seen this in the last two weeks. Why take the President on inflation? They are, therefore, looking for an opportunity for an ostentatious exercise with us. Please keep this in mind. D: When they are crossing into our waters and taking photographs with their helicopters, shouldn't we send up planes?

K: If they send in helicopters I would not take runs on ~~thix~~ their ships. Send me a note and say if it happens again we will send planes. Then you will have some cover.... Simcha I am telling ~~xx~~ you to let them go. Once without sending planes and send us a note saying we will have no choice but to send up planes if they do it again. Tell Peres for God's sake to keep quiet. What you should do is to send us a note, let them do it once without reacting, send a note in response to the Soviet provocation, that Soviet ships crossed into your waters and if it doesn't stop you have no alternative but to send planes. I then have a record of your complaint which I can send to the Soviets and put them on notice.

D: I will get to work on it right away. Should I ~~kaxe~~ give them this note to Scowcroft?

K: I don't want it before tomorrow. I don't want to seem too eager. An unsigned note on a plain piece of paper.

K: Scotty, how are you?

R: How are you?

K: Okay.

R: Say, I am going over to interview Giscard and Schmidt tomorrow afternoon or tomorrow evening. Have you got any time or any thoughts about what would be useful in a conversation with them in their present moods?

K: You want to do it on the telephone or do you want . . .

R: Well, whatever you say or whatever is convenient to you. I will come to you when you are ready, if you are available any time.

K: Let me give it a little thought and can I call you before noon?

R: Sure. I will be right at the TIMES.

K: I think it is a good time to interview them.

R: I do, too. Also, it is a good time to get out of this time.

K: I tell you, I share that feeling.

R: I don't wonder.

K: Somebody walks out -- this is off the record -- somebody -- Len Garment came up to me in the hall -- in the corridor of the White House today and said if I could send him on a diplomatic mission he would be a friend for life.

R: (Laughter) I don't blame him. There are probably a lot of other takers, too.

K: I'll talk to you.

R: Okay. Bye.

K: Bye.

H: Yeah, well you know when the USIA people were up here last year I quizzed them about what they were telling the Greeks about what was going on in Greece and the results were that they weren't telling anything except what the dictatorship wanted them to hear, that's the long and short of it. And somehow or another he got a copy of it, and the funny part of it is, the letter from him was written just three days before the Government fell and I got it about two or three days after the Government fell. And I got a new little girl outside and she came in with the mail and she said, "There's a letter here from London. Do you know any Constantine R. in London?" (laughter)

My friend said that Mel discussed with him at some length whether he, my friend, could live basically with you as Secretary limelighting my friend. I say my friend because I am professionally obligated not to tell you. H_____ has been living in a very strange circumstance. I just don't think there is any problem in effect, which is what I told him. I thought it was very interesting that Mel was seeking advice on this.

K: Not every advice Mel seeks is _____.

H: Jerry preside over....Cabinet and WH and presumably at such time as Haig goes, Laird will come in and take over the WH. Rose Woods called me today in a terrible funk and said the President wanted my advice. I said it breaks my heart to say this, but I told her I thought he should resign and do it soon. She said he has made no decision. But Mel has certainly moved in and is getting off the shots. _____ would like to see Nelson as V.P.....does Nelson want it?

K: I have no way of knowing. Mel is Mel and we will just have to see.

H: I have no doubt, Henry, that he told you all along he would be a big wheel and he is the man who made Ford what he is. The best thing is for you to just do your business.

K: I get along with Mel and you never know what the WH will be like.

H: There is nothing else that can be done.

H: I hope it works out for Nelson. I think it is his time in history. He will do no good to stay out. He can't make a run at an incumbent President. But Nelson may be carefully assessing Ford. I don't think he has _____. If Ford presides over a very serious reassessing, it is not going to be a _____.

K: I cannot take it on. Assuming there is a big reassessing then the Republican nomination is not good having.

S: There was a memorandum sent into you yesterday and I saw....

K: Yes, and it only raises four locations. What in the ~~name~~ name of God is so hard about it. An FSO-8 should be able to prepare it. Nothing makes it any easier, three days before or three weeks before.

S: I know... but let me take hold of this and see what I can do.

K: I understand you had lunch with Dinitz today. I hope you didn't tell him much.

S: Very little. I left that for you with Rifai... I told him ~~xx~~(x A) we are in general concurrence and willing to talk about this and secondly, there is a question about how these things can be done. What I really talked about was we have the Law of the Sea problems and secondly, he talked about arms, but he said he thinks he can explain why all of this war talk is coming out of Israel. He says they need this to generate the kind of professional preparations calling new__up and that sort~~s~~ of thing; ~~x~~ provisions to get weapons, tanks ready. I think this is a government that is politically afraid to get caught with their pants down. I found it a rational explanation ~~x~~ but from an international view point, it is difficult.

K: Take a look at NEA and if Atherton can't perform, we'll have to replace him.

S: I'll have a look and I'll do my best. This is my first love and I want to please you and do what you want me to do.

K: I know that. But now the problem is, here we have Fahmy coming on Monday and what are we going to discuss in the economic session, but why aren't ~~x~~ the invitations even out for a dinner for him? And it's too late.

S: That is true, it is late. One of the difficulties is they aren't clear in terms of when he is going to be here.

K: That is stupid. He is here for the meeting. Who will chair the first session - Simon? We have to have the meeting at the beginning.

S: The first recommendations is that you meet with the delegration on the 12th for a brief opening session followed by a private meeting with Fahmy. But it doesn't cover the point you raised as to what social functions you would give, and you need to give one. I see it that you have a choice of Monday or Wednesday.

F: Well, I appreciate that very much. We'll have a chat about that.

K: Yes. And now it's much easier to do that.

F: Well, I was pleased. In fact, I'm pleased about the whole thing. I put a little statement a while ago -- I made a statement to the Senate about the whole situation. I think it's all been very painful but I think we're off that wicket and maybe we can do better on this one. To me, I thought the impression he made was quite favorable both last night and what I've heard about it.

K: The President?

F: The new President, yes. I said I thought that Nixon handled himself well last night and I was fascinated by his statement this morning. I saw you on television.

K: Well, it was one of the most painful things I've ever witnessed.

F: I could tell that. I didn't know he was coming on. I was just getting ready to leave. Betsy -- my daughter is here, you know -- and was getting ready to go to the plane and I turned it on and I was fascinated with it. Of course, it was painful and highly emotional. But nevertheless it was done and it was very interesting from a purely personal point of view.

K: Well, it had almost all the aspects of his personality.

F: Yeah. . . . and the tragedy and everything else came through in that sort of disorganized and rambling way. In a way, it's more impressive than a prepared statement of any kind.

K: I agree. It was sort of a faded doom about the man.

F: That's right. And it was an interesting thing. Well, anyway, we have to go on from here. Listen, the Cyprus Ambassador came to see me while ago and he was excited -- and I had a call from the Greek Foreign Minister -- I don't know why they think I can do anything. All I promised him to do was to speak to you. They think it's extremely serious and that it is very important that we make the Turks be responsive in Geneva if we can. He said they've not and he told horrendous stories of the indiscriminate bombing around Kyrenia and other places and now he's said that they are engaging in wholesale -- he called it "wholesale looting" in the Port of Famagusta. And he claims there is $28 million worth of goods there from various parts of the world in the port and that is his story within the hour. And I promised him I would call you -- I said: what can I do about it? He says that I would hope that you would call it to the attention -- I understand why the Secretary has been preoccupied, which everybody does. But he thinks the Turks are being very, very uncompromising and extremely tyrannical. And also, killing people. He said there is a woman here -- American -- who has just come back from there and tells terrible stories about it.

K: Well, I told the Turkish Ambassador today that we didn't know all the details but in our judgment, their actions had to stop.

F: Well, that's good. What he particularly appealed to is that they be responsive in Geneva and give the Greek Government some hope. He thinks that there is a great danger that Karamanlis will have another coup if this continues. . . didn't know whether the Left or the Right will come back.

K: Exactly. And either is bad for us.

F: Yes. He said either one would just be disasterous. And he is very agitated and he certainly believes it. And the same thing was said in less dramatic tones from the call from Movoros in Switzerland.

K: Yes.

F: So I guess there is a good deal to it.

K: We do not have those reports. But I have a very good man -- do you know Arthur Hartman, the Assistant Secretary?

F: Yes.

K: He is in Geneva and I will get him to talk to Movoros. And may he refer to the Movoros' conversation with you?

F: Yes.

K: Because that will show that he has gotten some action.

F: They simply greatly fear that it would result in the overthrow of Karamanlis if the continues in this unrestrained manner. He said there were 40,000 troops there and they have moved out all over the country and he said the worst thing was that they were bombing houses -- I mean, private houses -- and killing people right and left in a sort of a frenzy, culminating in the looting of Famagusta. This is outrageous.

K: It is true, it is outrageous. I agree with you.

F: And I said I would call you. That is all I could think of to do.

K: Well, I appreciate this very much, Mr. Chairman.

F: Well, I hope that we can -- these things keep piling up on you, I know.

F: Good luck to you.

K: Understand I am not putting this forward in order not to show sympathy for your problems. My position...compromise solution. No one has seen my letter. Other parties not familiar with this. All our newspapers are saying I am too strong for Turkey. To be able to be effective, we all have these problems in politics. I call as a friend because you seemed distressed.

K: How are you?

E: Fine. We have finished our study of your proposal and I explained the details to Ambassador Macomber who is with me.

K: It is not a formal proposal, it is just an idea. Well, let's call it a proposal for this purpose.

E: Let's say a compromise proposal. We have studied it in detail. It meets some of our requirements. We do have a reservation but I will explain that later. At the same time it may reassure those who are concerned about the possibliity ...it might lead to partition. When I put the reservation from our side... my reason is it might be difficult for us to protect the security of the Turkish communities dispersed in various capitals. But I realize this may be a way of preventing the humiliation of the Greeks and may stop the humiliation the Turkish community has suffered. However, we have one condition we cannot ....we must acquire immediate control of the major Compound and it must be the one now under our control. I t would be from Kyrenia to Nicosia and including Chattos., which is densely Turkish inhabited, but leaving the northeastern tip. for the time being..our individuals in the Turkish section of Famagusta.

K: Just a minute. Let me get my map. Now, what were the names?

E: You know the area under our control from the center of Nicosia, extend the line making a curve towards the North and reaching the port of Famagusta. Cutting it in half and on the northern side it gives us for the time being a partition. I have given the exact map to Macomber.

K: I will wait until I get it from Macomber. and I will give you my reaction then. I don't think we should do this on the telephone.

E: I'm sorry to keep you waiting I was in a meeting.

K: That's alright. I keep getting conflicting reports so I want to make sure that I know what's going on.

E: Your Ambassador sent you my message?

K: Yes.

E: The problem is this, this is the 5th day of the conference. I think they haven't had an original meeting, bilateral talks and we seem to be getting no where. In the meantime the British have started putting pressure on us in a rather odd fashion...creating a great reaction.

K: I would not recommend anyone put pressure on the Turks.

E: The Greeks according to reports___so the situation is deterent while we are loosing time there is a solution that may become more difficult. We gave instructions to ___to tell Callaghan that they should have the real first official meeting and put on the table our proposal, that I suggested after your non-proposal, shall I say. And then we shall be free to discuss any problems regarding the ~~fxxx~~ final__or whether we should seek ___arrangements.

K: But ~~tax~~ that is all he is going to do -- put forward his proposal.

E: Regarding the major Canton.

K: We are told if it isn't accepted tonight, he would go back to ~~Ankara~~ Ankara. My view is that if you put forth a far-reaching proposal you can't expect it to be accepted immediately.

E: Well, we would expect an answer within 24 hours. We don't expect an answer within 24 hours. We don't expect the conference to solve all the problems within a day or week. All we want is that in order to secure the security of the Turks on the Island, we must have this and continue the talks ~~xx~~ in a comfortable spirit. We are not pressing them on a final solution.

K: We will support a meeting tonight and I hope Gunes will present it in such a way it doesn't sound like an ultimatum and then see what comes. I will talk to Callaghan now. I'm assuming you will give them some time to reflect on this proposal.

K: It has been a very difficult thing.

R: Very. You have my sympathy.

K: The President appreciated the message you left for him.

R: Good. Now, my own good advice. There are two points I want to take up with you. One, I hope you will be able to consider this invitation to Ottawa -- be able to fit it in.

K: I ~~kki~~ am thinking about it very seriously.

R: I don't want to press you too hard. It is urgent but not as urgent as last year but it would be useful.

Let me also express my concern about the story that Gwertzman had last Monday about the course of the Middle East negotiatons.

K: What was that?

R: It seems to me that what he was saying that we are moving now toward a second round of military disengagment talks. Further withdrawals without clearcut peace agreements and it raised the flag in my mind that they were trying to press you into a repetition inch by ince of the pattern of the'57 withdrawal without clearcut peace agreements.

K: There is a big difference between peace agreements and commitments to certain actions that involve peace.

R: It all depends on what they are. We had all the commitments on earth in 1957 but they wre breakable and they were broken.

K: Every agreement is breakable.

UNITED STATES DEPARTMENT OF STATE
REVIEW AUTHORITY: ROBERT L. FUNSETH
DATE/CASE ID: 5 MAR 2003 200102979

R: These were secret and passed confidentially and so on. It seemed to me...

K: I think the Israelis have to make up their mind on one or two things. If they don't want to discuss final borders they cannot have final peace. It is just impossible. The worst thing for Israel is to throw all of it into the same pot--borders, Palestine, Jerusalem. That is unbearable for Israel.

R: Why are they not willing to discuss final borders?

K: Because in practice they are not. They don't want to make another move with Syria. They don't want to discuss--they basically are not...

R: The experience I had with the thing of course -- 242 always contemplated in the beginning that there would be an agreement to move in certain stages. The idea of a time table was Egyptian not Israeli and that there would be an overall agreement and pursuant to that stage by stage various things would happen -- withdrawal, political etc.

K: The point is the Gwertzman story was not accurate anyway. There is no point in debating that. I think it is very hard to discuss that in abstract. What is meant by peace agreement; what is meant by breakable; what is meant by various things.

R: It is and on the phone too. I will be down on the 26th. Will you be in town?

K: What day is that?

R: Monday.

K: Almost certainly.

R: I have to make a speech that morning. Could I drop by in the afternoon.

D: Of ideas. There at the United Nations?

K: We haven't really thought it completely through yet.

D: I understand. So it's your answer still saying that we will continue on in next week, yeah?

K: Exactly.

D: Because as I mentioned to you, some of my people . . . very tough. They have the idea that well, why don't we in a friendly way do something together. You see, there is real politics and there is certain [laughs] -- which sometimes which maybe you, I mean, off-the-record, don't quite understand. Some really have good intentions saying: It's rather simple. Why we shouldn't sit down and do something which will be really wonderful things for both so we have good personal relations on a top level. You understand?

K: Yeah.

D: So this sometimes happens. It's not really any specific tricks or not. So this is just on background I'm saying. Well, I will look through it and send immediately to Moscow for Brezhnev and Gromyko.

K: Oh, yeah. Oh, that idea of Cyprus -- total nonsense!

D: Well, this is the point. I heard that you're going there just to shuttle in between.

K: No, look, I can't make a joke anymore. I was walking through the hall of the State Department when a newsman came up to me and he said: Are you going to Cyprus? I said, "What I want is to shuttle between Nicosia and Limassol."

D: Laughter.

K: And I thought this was so absurd so they write, "Kissinger is going to Cyprus."

D: Yes. Good think you didn't say exactly between where you are going to shuttle.

K: Well, because they probably didn't know where either place was.

D: Laughter.

K: There is no intention whatsoever of my going to Cyprus.

D: Yeah, I understand.

K: What would I do on Cyprus?

K: Well, or maybe even I get caught in a slow process like last time in the Syria-Israeli thing.

D: That's true.

K: But I won't go unless I know what the possible outcome can be.

D: This is true. I know this is exactly -- you're using I think the only right [exit] . . not ours but to know where you go.

K: Well, Mr. President, we understand that this was out of your control, and you are quite correct, Roger Davies was a friend and the United States thinks of itself as a friend of yourself and of what you are trying to do.

C: I rushed as soon as the news reached me. I entered the Embassy under fire and bring out . . . . .

K: Well, I understand, Mr. President. But the only thing I would ask is that the deliberate effort to blame the United States for what has happened is one of the contributing causes to this situation, and if we are to play a useful role, which we are eager to do, we cannot do it under this sort of pressure. And so we are asking all responsible Greek leaders to stop the anti-American agitation or we will withdraw completely from the negotiations, and leave it to be settled directly between Greeks and Turks.

E. We have prepared for your consideration a text. May I dictate it to someone.

K: The text I am going to read? Go ahead.

E: The Turkish Government is reaffirming their commitment to the principle of timely and phased recution of forces as stipulated in the Geneva Conference on July 30..when conditions allos..(inaudible) the Turkish Prime Minister has declared publicly August 17 that the Turkish Government would be prepared to negotiate the demarcation line of the area that should remain under Turkish rule and he hopes that Turkey would not be.....(inaudible) about retaining all of the territory but it should be (inaudible) in an atmosphere conducive to developing and securing for all on the Island and negotiate for a final solution in a constructive spirit without delay. This should be a framework, if acceptable to you.

K: May I make a suggestion? What I am going to say is not a diplomatic document. It is an attempt to get control of events here. I think, for present purposes, it is enough if I can say that part of what you say about _____to hope.

E: Excuse me, I couldn't understand.

K: I should not refer to you public statement. I should put it on the basis that you have confirmed this to me. Secondly, I can say the gist of this but I think we should leave out all this about terrorism. The major point is to give people a face-saving excuse to get them back to the Conference. I should say that I have been given to understand that you will not insist on holding all the territory for Turkish autonomous rule.

E: I should tell you that...

K: The details I think we should leave to the negotiations.

E: What I am after is....

K: You shouldn't be asked to go beyond what you have given us before the Turkish operation began...not beyond that border that you give before the operation started.

E: I have shown the line to Macomber.

K: What you said about the reduction..I can say..according to the Geneva Conference.

E: Timely and phased.

K: What I would like to say about the terrorism is that we do not believe, that is, I would say we do not believe that the territory not being held by Turkey should be put in the Turkish autonomous zone and we have been given to understand that in a negotiation Turkey would not insist on on that.

E: Say the Turkish Government would be prepared to negotiate the final demarcation.

K: I may put it that way, but I think for our public opinion it would be helpful to make you appear conciliatory.

E: I understand, but after the terrorist acts here, the public opinion has become fierce also.

K: I will say that the Turkish Government has assured me that they consider the demarcation line negotiable.

E: That's right. To a certain extent; to a reasonable extent.

K: Ok.

E: Alright, thank you and my condolences again.

K: Cy, how are you?

V: I am ok, how are you?

K: Somebody told me you were upset because you heard that I said what you did in '67 was wrong. I can't believe you thought this because it isn't our view and nobody could possibly have said this.

V: That's ~~is~~ a distortion. Somebody said to me that they thought it was being said.

K: What we said was that the conditions are not the conditions of '67.

V: I agree.

K: That's the point we ~~xxxxxxxx~~ had been making. That doesn't mean '67 was wrong. Just that under the conditions we faced no acceptable government in Cyprus and a new Greek government...

V: What I had said was that I think it was a mistake this time recognizing the situation was different not to immediately have jumped in with support of the British position because that was the only thing that would keep the Greeks from moving.

K: But we substantially supported the British position.

V: But that never came through.

K: But the Turks knew it. That was the problem entering the first week. I think once Samson was in there the Turks saw an opening to do what they had missed in '67. We were ready to support almost everything in the British position. They were doing it openly and we were not doing it publicly on the theory that some Greek government would have to swallow it.

V: My position was that not doing it publicly....

K: That is a technical disagreement. We will never be able to prove it. It was never doubtful that we wanted to get rid of Sampson and we did it. Just say we were aloof. Maybe yes and maybe no but in it coincided with one week of a Presidential resignation and

one week of a transition.

V: I have said that to everybody.

K: Compounded by the fact that we have been extremely forebearing with the British. They insisted that they had the problem solved. They did not want us to send anybody to Geneva. We did not realize until Monday that there was going to be a blowup. Callaghan had made some x threatening statements. I had k put forward a proposal that I thought the Turks would accept. Callaghan went through the roof that I put forward a proposal so that made the Greeks reject it.

V: I understand and I know there are always a thousand reasons.

K: One reason for calling you is that I want you to know I did not believe you were wrong in '67 and secondly that we were not saying this.

V: Somebody told me this had been said out of your office and I did not believe it.

K: Inconceivable. I believe there are now possibilities for working together that were not there two weeks ago.

V: Absolutely. Anything I can do to help you I will. If we have had disagreements, we have always discussed them. All you have to do is call on me and I would be delighted to help.

He is represented from about all the different sources working with my man to be extremely able, very bright, well regarded by the Japanese, for whom he has done quite a bit of work. From one source whom I trust very much, he wonders if he would be tactful enough. Sometimes he comes on too strong. It seems it is in particular from a very high degree of self-confidence. K: It was never a possibility. My suggestion was that I meet Karamanlis and Ecevit separately as an interim.

H: I agree.

K: But that does not come across to me.

H: I'll tell him we agree with that and that my idea is, there could be a meeting between me and Karamanlis and me and Ecevit on separate days in the same city, say Rome, or any other place he prefers, or Vienna and alternatively, I could come to any place in Greece, besides Athens.

S: If we get some satisfactory answer from the Greeks that they intend to correct the statement I would be incined to let him come.

K: What they are putting out is that they were misunderstood and it was not that they did not trust me but rather they were not entrusting me with mediation.

S: That is not bad.

K: I still think we should tell him to come after the next meeting.

S: I really don't feel strongly. This is not a bad correction. He really wanted to come down and he is really a strong leader and a good influence on the Foreign Minister and I don't think it is in our interest to offend the guy.

K: Yes.

D: Yes, but I also . . . . . one million.

K: Yes, but with frost and with the new difficulties. Our people think that 500 thousand is really the maximum we can handle. And we wondered--you see otherwise if you go through with it and if this gets announced then we have to do something about restricting exports which we don't want to do.

D: I don't know whether Buts reported to you or whether he was doing everything on his own. I already discussed with him and with Moscow authority and everything and it remained on a high order.

K: I am absolutely positive, Anatol, that it is our fault. I am positive that you responded to us.

D: Everything he asked me--so the last time he was with me -- about five days ago--if it is not more than one million, okay, but not more than one million, so I said to Moscow all right. So now it's changed in the past three days. He came to the Embassy and said exactly not more than a million.

K: I haven't the foggiest idea since--it is the last time he will come to your Embassy without permission--believe me.

D: Yes. I dnn't complain he came to me.

K: I am telling you he is not coming to your Embassy again without permission. Or we may have a new Secretary of Agriculture.

D: [laughter]. Really he asked me several things and on all exchanges it was a positive answer. So I reported everything this way. Now he is telling me a different kind of thing.

K: Another think he also placed for a million tons of wheat-was that also arranged with Buts?

K: Well a million we can probably handle on wheat if you don't go above a million.

D: So what is your/...

K: Oh, you have already ordered two?

D: I don't know. I don't know.

D: You mean by the end of this year or before the elections?

K: Before the election there shouldn't really be anything.

K: Well, it is going to be announced very soon and if this isn't-- if we can't get some understanding on it. Well let me get back to you within an hour. Let me check with the Agriculture Department.

K: Hello.

A: Henry, how are you this morning?

K: OK. How are you?

A: Fine. Say, I ran into a piece of information that I think could be very useful to you on your trip abroad. It looks as if Mexico has a discovery comparable to the North Slope, and it's not too far below Houston and it's on shore, which means it can be developed quite rapidly. Now the Mexican government has been quite cozy about it -- are you aware of it?

K: They told me something like this, yes.

A: Yes. Well there is enough to conceivably -- we think it could support at least 2 million barrels a day of exports out of Mexico, and maybe as much as 3. Unfortunately I don't believe anyone in OPEC is aware of this. I have felt maybe if some publicity could be given to it without involving our government that it might be useful. I think it would be better if you were in a posture of commenting on it rather than the bearer of it. I'm sure actually the field is far enough along that the Mexican government is offering some oil for delivery this month and next -- well, this quarter. So I thought I'm going to be in London tomorrow and over until next week, that if the occasion arose I might see if I couldn't at least say something that might start a lead toward this.

K: But what would you accomplish with it?

A: Well, I think psychologically it would be a real setback to the OPEC group. We think very seriously there's as much as 5 million barrels a day now that is without a home, and the prospect of another 2 or 3 coming out of production, even if it's a few years off, would do a great deal towards driving world oil prices down. As a matter of fact, for the first time I really believe we're going to see a break.

K: Yeah, I don't think they can take the heat.

A: Well, it's almost unmanageable now. Even the prospect of 2 or 3 million barrels which is much closer to market coming downstream would really put a hell of a lot more heat on them.

UNITED STATES DEPARTMENT OF STATE
REVIEW AUTHORITY: ROBERT L. FUNSETH
DATE/CASE ID: 11 MAR 2003 200102979

K: Yeah, well the only thing I'm wondering about is if we get the word out too quickly whether it will hurt our bargaining position with the Mexicans.

A: Well I understand the reason they've been so cozy about it is there is internal disagreement whether they should cash in on this, which is conceivably as much as 7 to 10 billion a year for Mexico -- or follow the Norwegian pattern and sit on it as a national treasure. Now, I know enough about Mexico that I don't believe they're going to sit on this kind of money very long.

K: No.

A: And actually I think it is sufficiently useful in the OPEC matter to leak it unless there's some reason our government wouldn't want to.

K: Well, the only concern that I have is what it does to our bargaining position with Mexico, since it's bound to come out anyway.

A: Well, it will, yeah. They have offered 60,000 barrels a day for immediate delivery. I think it was $10:50 a barrel. And this thing is so situated that they can deliver oil into either the Atlantic or the Pacific. It's on the Isthmus of Tawanapek right at the bottom of the Gulf of Tawanapek.

K: Yeah. Well, I hadn't thought it through. My general strategy in a negotiation is to try to assemble as many cards as possible and not play them peacemeal, but I have no strong views, if I did I would tell you.

A: Well, it's a piece of information that you might find useful.

K: No, the information is extremely useful. I didn't know the extent of it. I knew they had some, but I didn't know the extent.

A: Well, Henry, If you'd like, I would have our company come into Washington just as private people to talk to you about it.

K: My problem is that I'm going off to the Middle East and I have next to no time before that.

A: Yes, well, I have looked into this quite carefully and our people are satisfied there's probably 18 to 20 billion barrels there, which is as much or more than Prudho Bay.

K: I don't mind your -- maybe you can get it out in a low-key way if it doesn't start a stampede towards the Mexicans.

A: No, I don't think it would. Actually it would be better if it came from Europe as a rumor. I'll see people over there and can get it started in a very quiet way.

K: OK, why don't you do that.

A: And really, I think psychologically it's very helpful to you right now.

K: Right.

A: Good. How have you been?

K: I've been fine.

A: I've thought about you.

K: Thank you.

K: Let me tell you what happened. We had discussed 3 letters with the Senato The first letter contained the assurance I received. If I had received more assurance, I could have put them in my letter. The 2nd letter , what he thought those assurance should mean, including numbers, which I told the senators were never give to me _____. We then sent the letters to Senate leadership, chairmen and ranking members of the Foreign Affairs Committee. If we had been able to make those assurances to begin with -- I told everybody from the beginning how these assurances translate into _____.

G: I'm told you did say that 45,000 would be acceptable to the Russians and I gather they came back with 75,000 and 60,000 was sort of agreed upon.

K: This assumes that I cam make Jews leave the Soviet Union. We say 75,000 therefore let's compromise on 60,000. It's ridiculous. What the hell can I do about it.

G: The question is, which was more troublesome. If this was the case why wa the ~~next~~ letter drafted in the first place.

K: It was also said the wording of these letters -- we would have to go over again and was an idea that the 3rd could be interpreted to mean that we would do our best. The more it was studied, the more people who believed it was a commitment.

G: That was my impression and that was the Jewish impression.

G: What's the situation?

K: I'm planning a meeting with them on Monday and see what can be worked out.

G: Great expectations were built up -- certainly in the Soviet Union.

K: I think if you see those letters, you will say my ___we ___carried out.

G: I gather in your 1st letter, we have assurances that certain criteria will be carried out.

K: No restriction on application, all of which is somewhat changeable.

G: Jackson's letter is full of detail.

K: Which I was never given.

G: Do you think there's an honest problem here -- that there was a misunderstanding?

K: A problem that could have easily been worked out. I said from the beginning we want to work out in good faith. If I signed this letter and a year from now it will _____.

G: The letter was sat on the table for more than2 months.

B: O.K. Well, ~~would~~ it will serve your purpose, Henry.

K: ~~Absolutely~~ It would absolutely. I don't want the Syrians to feel isolated. But you'll suffer through one of their awful meals and don't be too honest. Now that shouldn't be hard.

B: O.K. I can handle that alright.

K: I mean just give them the impression they're getting a PL-40 program.

B: O.K. And we will work one out, but I'll go in there and be sympathetic. That's what you'd like.

K: That's all I need and give them love.

B: O.K. Now then, with respect to that speech of yours, some of our people are having input in it. I suggested that if they can just get the general principles you want and not get down to nuts and bolts, that I think then instead of the delegation a day or two later, I'll give _____ one that has nuts and bolts in it. Does that make sense?

K: That's substantially what I have in mind.

B: O.K. And I'll have our people get on this, Henry, thanks a lot...

K: Alright, except I want to have enough nuts and bolts in it so that it looks plausible.

B: Well, we'll do that.

K: Good. Thanks.

M: I understood you were in a rush. Were you satisfied with your trip?

K: I think we had good talks in Israel and I think on the whole there are some possibilities -- it is not getting any easier but on the whole I was not dissatisfied with my trip.

M: When do you expect to be back in the neighborhood?

K: I think early in November and Nancy will be with me which means I will have to see you no matter what my intentions are because Nancy will not leave Israel without seeing you.

10:20 - Secretary Kissinger's conversation with Secretary Simon

Secretary Kissinger: Bill, how are you?

Secretary Simon: Great, how are you?

Secretary Kissinger: Bill, I noticed in yesterday's Washington Star that Oswald Johnston is trying to build some dispute between you and me on that $25 billion ...

Secretary Simon: I didn't notice that. The Wall Street Journal had an article that said that it --- that contradicted what I am going to do. I am going to address that in my speech today.

Secretary Kissinger: Because what I think I am putting out is the whole strategy. Of course, another argument is that this is a sudden improvisation. But I want to get across, and you are to get across, is that we have been meeting on this since summer! This is part of the strategy -- we have been waiting for the emergency program to get adopted. That was the only hold-up.

Secretary Simon: I am saying we have been talking for a year.

Secretary Kissinger: That's right. Alright, just put it out. Say you, Burns, and I have been meeting for a year to develop this. And, secondly, somebody told me, you know how rumors are in this town, that you are going to pull away from this figure.

Secretary Simon: What figure?

Secretary Kissinger. Of $25 billion.

UNITED STATES DEPARTMENT OF STATE
REVIEW AUTHORITY: ROBERT H. MILLER
DATE/CASE ID: 6 JAN 2003 200102979

Secretary Simon: I did not. I mention $25 billion specifically in my speech.

Secretary Kissinger: Because, you know, without it -- the World Food Conference that got screwed up by Butz, blowing the whole thing sky-high.

Secretary Simon: Let me tell you. The verbiage in this speech has been developed with Butz, Enders, Bennett, and Cooper.

Secretary Kissinger: Well, we have been together on this -- we will stick together on this, or they are going to get us.

Secretary Simon: I am going to land on all this...

Secretary Kissinger: You know they are right. What is the alternative? I mean, I have seen some of the European press and some of the comments. Now, neither -- in September they accused us of not getting prices down immediately, which we never intended. Our strategy has always been to break these institutions and to put them down reliably.

Secretary Simon: So, I am going to say, you know, when people scream hysterically at no policies and what have you, that we have been developing this over the past year and agreed to a _____ that is required in any conversations with whatever nations, whose reliance is far greater than ours, and, therefore, some of the solutions will be different. And that is why we have to work this thing very carefully. This whole thrust will get out in my speech absolutely. And the specifics -- we will have the $25 billion in 1975 -- I don't go beyond '75, I just talk about that.

Secretary Kissinger: You know, but I think you should say ~~think~~ that more is

necessary because that is what I said. We just shouldn't have any crack there.

Secretary Simon: No, I agree. I couldn't agree with you more.

Secretary Kissinger: Because I think we can turn this energy affair into a big plus for us -- let's do it now. We are the only country that has taken a responsible line.

Secretary Simon: I ~~agree with~~ stressed that -- as far as what we have done with the energy consumers' conference. The speech is too long, but it is necessarily too long. You will find it consistent. I am going to send over -- I hope to have the near final draft this afternoon -- and I am going to send it over to you and make certain it is put right in your hands. I think you will find it is completely consistent. Enders is out of town, but he has worked on every draft up to this one.

Secretary Kissinger: Terrific.

Secretary Simon: Great.

Secretary Kissinger: Thank you.

Secretary Simon: Goodbye.

Secretary Kissinger: Goodbye.

K: And I must say this Department is just killing me! Why did you have to say we returned these gifts. They were returned because [redacted] Daley picked out the wrong ones. There was nothing wrong with it. She wanted to get something that had more class when she found out they were going to give a Mickey Mouse clock to Queen Alia. B6

M: We are preparing something which I will bring over to you. What is a convenient time?

K: Well, I will be over at State about 11:45.

M: All right. We will have something for you when you get over here. I am sorry to hear that she is . . .

M: Did someone also call her mother?

K: That's right. Someone called her mother who had heard it on the radio. Her mothere is 81 -- I mean they have never been accused of stealing before.

M: Well, I don't know what all the facts are.

K: The facts are very simple. Nancy thought that the gifts we were giving were lousey. She then went to some jewelers to see whether she could get gifts at the same price which had a little more class and she picked out some. Then [redacted] Daley went up there and got some additional gifts from B6

these same jewelers. She didn't want to give only Steuben and crap. And then the stuff that Daley had got was returned not because there was anything wrong with it but because Nancy didn't like it.

M: And not as a result of the Proxmire letter.

K: And not as a result of the Proxmire letter. And the price for these items was less than we are paying for the Steuben. And the ~~fig~~'s gifts were not to people she picked but to people on the protocol list.

M: The story quotes Daley as saying that he denied the Proxmire inquiry had anything to do with the decision. But then there is this next paragraph that says other State Department sources indicated officials anticipated criticism and decided to headit off. No one can account for who the hell that is.

K: If that is the case, then I want to have some house cleaning there.

M: Uh-huh.

K: There was no criticism. What can there be criticism about?

M: Well, only that Proxmire is the one leading the criticism.

K: I want Proxmire attacked, too.

M: Uh-huh.

K: What is the criticism. Is there a law that says we have to buy Steuben things.

M: No. I don't think anyone else would criticize this. I don't know what Proxmire's hang-up is.

K: It is one thing to attack the notion of gift-giving but when the wife of the Secretary of State who has no God damned obligation to do it at all tries to give some class to our gifts and spending as much money ~~as~~ has has been spent before goes to the trouble of picking stuff out -- what the hell is wrong with this?

K: Can I do something which has never worked yet? Complain about Maxine Cheshire.

B: What did she do?

K: I'm no longer provoked when she attacks me but now she's going after my wife. She had an article saying my wife bought jewelry as gifts for my visits around the world which an embarrassed State Department had to return after complaints by Senator Proxmire. We do not make the lists of gifts. There's a list of protocol gifts that are given on trips and she felt that the State Department had no class so she looked for gifts of the same price range at some jewelers and seleded some and then the jewelers sent the wrong gifts and they were returned. So of all the gifts that she really gave, she only gave one of the jeweler's pieces that she ordered. When you read the Cheshire story, you'll see that it sounds like she did something wrong. I'm used to this sort of attack but she's not and she's taking it harder than I would.

B: The list of gifts was authorized.

K: She doesn't pick the people who get the gifts, all she did was try to get more classy gifts when she found she was supposed to give a Mickey Mouse clock to Queen Alia of Jordan.

B: A Mickey Mouse clock?

K: Yes.

B: I don't believe it.

K: That's right. She was looking for something of the same price range, but something more distinguished and she went to some jeweler in NY and got a discount. Maxine gave the wrong figure. It was $1300 for all of them put together.
